8. The explanations of the fluctuations in the consumption of country rum have always been a matter of some doubt. In their review of the Excise Report for the year 1898-99, the Board discussed the question in some detail consequent on the fall in that year of nearly a lakh of rupees in the revenue under this head, and they were disposed to doubt the opinion of the Excise Commissioner that the enhanced rate of duty had not affected consumption. In the year 1899-1900 the amount of rum consumed rose by 3,191 gallons, L. P., and a review of the figures since 1892-93, when the duty was first enhanced to Rs. 5 per gallon, L. P., led to the conclusion that that change, followed by the further increase of duty to Rs. 6 per gallon, had affected the trade. It was apprehended that German white spirits might have successfully competed. During the year 1900-1901 the consumption further increased by some 1,752 gallons, L. P., and the greater popularity of rum and cheap imported liquors in comparison with country liquor was adduced as a reason. It was also thought possible that more rum from Shahjahanpur to Assam was being despatched *via* Calcutta instead of by the direct route. In the year at present under review, there has been a net decrease in consumption of 18,467 gallons, L. P., which effectually obliterates the two small items of increase recorded in the two preceding years. The

Commissioner expresses the opinion that owing to the enhancement of duty in 1898, country spirit now successfully competes with rum, a view directly opposed to that held last year, and to the fact that exportations from Calcutta to mufassal districts increased. Moreover, the consumption of distillery liquor in Calcutta decreased in comparison with the previous year. The Superintendent of Excise Revenue, Calcutta, apprehends that Shahjahanpur rum is now sent in greater quantities to Assam direct; he also represents the difficulties in the way of any satisfactory conclusion. The figures of exportations from Calcutta to Assam certainly show a decrease, though not nearly equal to the total decline in the consumption.

Imported Liquor.

9. In reviewing the results of the preceding year the Board observed that it was desirable to devise means of collecting statistics of the consumption of imported liquor in the different districts in Bengal. The subject was discussed during the year, and the conclusion finally come to was that the disadvantages attaching to any special procedure for the purpose would outweigh anything to be gained thereby. In the absence of such statistics only general conclusions can be drawn as to the spread of a taste for imported liquors and as to its effect on the revenue derived from other heads, noticeably that of country liquor. It is reported that the imported brands are growing in popularity, more especially in the districts of Eastern Bengal, and the increase in license fees obtained in the districts of Dacca, Mymensingh and Backergunge would seem to corroborate this view. In the two former districts, the revenue from country spirits was less than in the previous year, but the high price of food-grains is also mentioned as a cause. In Dacca the importation of country rum was less, and in Mymensingh it was greater, than in the preceding year. As explained last year, there are various factors tending to complicate the question.

It is observed that the importations of German white spirit decreased from 50,521 gallons in the preceding year to 45,421 gallons. The trade in this liquor formed the subject of correspondence during the year. The conclusion arrived at by the Board was that such spirit was less noxious than was popularly supposed, and that the remedy mainly required was some control over the operation of bottling it in this country, not with the object of checking the sale of this liquor, but in order to prevent customers being deceived.

Tari.

10. The revenue from *tari* has recovered, and was in excess of that realised during the year 1899-1900, when the tree-tax system was in force. It would not seem, therefore, that the abolition of that system has prejudicially affected the revenue, although the contrary view is held by one or two Collectors. It is to be remembered, however, that the system as understood in Madras was never introduced in Bengal.

Ganja.

11. The additional *gola* at Naugaon for the storage of *ganja* is still under construction. Thanks to a favourable season and the cultivation of an area which, though less than in the preceding year, was considerably above the average, the outturn of *ganja* was the highest on record. The consequent fall in prices was very marked, and the consequent temptation to dispose of the crop illicitly led to a noticeable increase in the number of prosecutions.

* * * *

Bhang.

12. The Commissioner of Excise is of opinion that the enhancement of the duty on *bhang* in certain districts of the Burdwan and Presidency Divisions has not affected consumption. The amount consumed showed a decrease in four out of six districts, but it was not large and is attributed to other causes. The enhanced rates led notwithstanding to larger receipts from duty.

Opium.

13. The decision to remove all restrictions on the issue of opium to shops in certain districts to which limits had previously been enforced as a check upon smuggling, has apparently had a curious effect upon the sales to licensed vendors. The amount so sold in Chittagong has increased by 96 maunds, while Hooghly, Calcutta and Backergunge show a decrease of 32, 29 and 13 maunds, respectively. Chandernagore only took 9 maunds as against 42 in the preceding

year. The inference is that Chittagong being more conveniently situated for access to Burma, has now become the head-quarters of the illicit trade. The preventive establishment in that district has been strengthened, but it is obvious that the exercise of special vigilance will be required.

Cocaine.

14. Under the Board's Notification No. 37B., dated the 6th January 1902, the sale of cocaine has been prohibited, except under license for *bonâ fide* medical purposes. *

* * * *

* The number of prosecutions in Calcutta for illicit sale increased from 65 during the preceding year to 101. Judging by the prosecutions instituted, the cocaine habit has little hold outside Calcutta, but it is noticed that no cases were returned from the district of Murshidabad, Muzaffarpur and Purnea in which the use of cocaine as an intoxicant was last year believed to prevail. Special attention will be invited to the point in these districts. The number of licenses granted for the sale of cocaine in Calcutta was 101. The number of druggists' permits for the sale of opium was only 62, and it is curious that licenses for the vend of cocaine which are only issued to duly approved persons and firms should have been the more numerous. It is also noticeable that in Murshidabad and Bhagalpur, in both of which districts the misuse of the drug was last year suspected, 4 and 7 licenses respectively were granted, a number which in comparison with other districts was large. The Board will request the Excise Commissioner to make certain that licenses are only being issued to suitable persons.

Offences.

15. The Board will call for a special report on the case of unlicensed sale of *pachwai* in the Singhbhum district noticed by the Excise Commissioner, in which 100 persons are said to have been arrested.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE COMMISSIONERS OF THE PORT OF CHITTAGONG FOR THE YEAR 1901-1902.

No. 1829Marine.

Government of Bengal,

MARINE DEPARTMENT.

MARINE.

Dated Calcutta, the 4th October 1902.

RESOLUTION.

READ—

The Administration Report of the Commissioners of the Port of Chittagong for the year 1901-1902.

THE following statement shows the financial position of the Chittagong Port during the last two years:—

	1900-1901. Rs.	A.	P.	1901-1902. Rs.	A.	P.
Opening balance	19,330	5	6	16,149	1	6
Receipts during the year	64,418	11	4	1,27,715	3	7
Total ...	83,749	0	10	1,43,864	5	1
Expenditure during the year ...	67,599	15	4	1,26,657	1	4
Balance at the close of the year ...	16,149	1	6	17,207	3	9
Total ...	83,749	0	10	1,43,864	5	1

The receipts show an increase of Rs. 63,296-8-3. There was a large increase in the earnings of the jetty at double moorings and also in port dues. The increase in expenditure is due mainly to the working expenses of the jetty and repayment of the *Gekko* Loan. It is satisfactory to note that Rs. 32,587 were paid during the year towards repayment of the loan due for the years 1899-1900 and 1900-1901.

Shipping.

2. Ten vessels, with a burden of 19,287 tons, entered the port from foreign ports during the year, against seven vessels of 14,041 tons, in the previous year, the increase being due to more vessels arriving from the United Kingdom with salt and railway materials.

There was a larger number of vessels employed in carrying jute to the United Kingdom and pilgrims to Jeddah; altogether 24 vessels, aggregating 48,459 tons, cleared for foreign ports during the year, against 15 vessels aggregating 27,921 tons in 1900-1901.

Five hundred and twelve vessels, with a tonnage of 221,070 tons, cleared for Home Ports, against 450 vessels with a tonnage of 193,652 tons during the previous year. A larger number of vessels cleared for Narayanganj and Akyab.

Port appliances.

3. The appliances of the port and light-houses are reported to have been kept in good order during the year.

Jetty.

4. The jetty continued to be worked by the Assam-Bengal Railway Company under their agreement with the Port Trust. The earnings of the jetty rose from Rs. 3,545 in 1900-1901 to Rs. 47,649-1-4 during the year under review. There was, however, a corresponding increase in expenditure of Rs. 33,848-15-6. The net profit was Rs. 9,562-4-7.

The steam-tug *Gekko*.

5. The earnings of the S.-T. *Gekko* fell off from Rs. 5,941-8 in 1900-1901, to Rs. 500, during the year under review, as few sailing vessels visited the port. She was, however, largely employed in the work of the port in various other ways, and the work done by her is estimated to represent a saving of Rs. 6,000. The net expenditure on the vessel was Rs. 11,465-1-9 against Rs. 13,827-14-9 in the year before.

Pilotage Fund.

6. The subjoined table shows the position of the Pilotage Fund:—

		1900-1901.			1901-1902.		
		Rs.	A.	P.	Rs.	A.	P.
Opening balance of the year	...	40,657	11	6½	43,643	5	0½
Receipts during the year ...	...	14,421	0	0	20,736	8	0
Total	...	55,078	11	6½	64,379	13	0½
Expenditure during the year	...	11,435	6	6	11,515	3	4
Balance at the close of the year	...	43,643	5	0½	52,864	9	8½
Total	...	55,078	11	6½	64,379	13	0½

7. The pilot service worked satisfactorily. There was only one accident during the year. It was due to the pilot allowing himself to be ruled by the Pilot Service master of the vessel. The pilot was placed on half earnings for a fortnight and was severely censured.

By order of the Lieutenant-Governor of Bengal,

D. B. HORN,

Secretary to the Government of Bengal.

LIBERALITY OF BABU SURJYA KUMAR ROY OF LAKHIKOLE, RAJBARI.

No. 2053T.M., dated Darjeeling, the 4th October 1902.

From—H. C WOODMAN, ESQ., Under-Secretary to the Government of Bengal, Municipal Department,

To—The Commissioner of the Dacca Division.

I AM directed to acknowledge the receipt of your letter No. 1075G., dated the 19th September 1902, forwarding a copy of a letter from the Magistrate of Faridpur, in which he reports that Babu Surjya Kumar Roy of Lakhikole, Rajbari, has made a donation of Rs. 5.000 for the construction of a new building for the Rajbari Charitable Dispensary.

2. In reply, I am to request that you will be so good as to convey the thanks of Government to the donor for his public spirit and liberality. Government approves your proposal to have a tablet fixed in a prominent position on the façade of the dispensary with an inscription to the effect that the building was erected by his liberality and at his cost

3. This letter will be published in the *Calcutta Gazette*.

LIBERALITY OF RAJA MOHIMA RANJAN RAI CHOUDHURI OF KAKINA.

No. 2063T.M., dated Darjeeling, the 4th October 1902.

From—H. C. WOODMAN, ESQ., Under-Secretary to the Government of Bengal, Municipal Department,

To—The Commissioner of the Rajshahi Division.

I AM directed to acknowledge the receipt of your memorandum No. 657Jct., dated the 16th September 1902, reporting the payment by Raja Mohima Ranjan Rai Choudhuri of Kakina of his promised donation of Rs. 10,000 for the construction of a ward in the Rangpur Hospital in commemoration of the Coronation of His Majesty King Edward VII.

2. In reply, I am to request that you will be so good as to convey to the Raja the thanks of Government for his liberality and public spirit. This letter will be published in the *Calcutta Gazette*.

3. I am to add that a further communication will be addressed to you on receipt of your report with regard to the Raja's promised donation for the construction of wells.

WEATHER AND CROP REPORT.

For the week ending the 6th October 1902.

Burdwan.—Rainfall at Sadar 0·32, Kalna 0·62, Katwa 1·06, Raniganj 0·02. Weather fine. Harvesting of *aus* continues. Fodder and water sufficient. No cattle-disease. Common rice sells at 11 seers per rupee.

Birbhum.—Rainfall at Sadar 3·25, Rampur Hât 0·11. Weather fair. Standing crops promising. Fodder sufficient. Common rice sells at 12½ seers per rupee.

Bankura.—Rainfall at Sadar 0·68. Standing crops doing well. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Midnapore.—Rainfall at Sadar 0·62, Contai 1·24, Tamluk nil, Ghatal 0·70. Weather hot and cloudy. Harvesting of *aus* paddy continues. Agricultural prospects good, but more rain wanted. Fodder and water sufficient. No cattle-disease reported. Prospects of sugar-cane favourable. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Contai	12	0	
Tamluk	11	0	
Ghatal	13	0	

Hooghly.—Rainfall at Sadar 0·40, Serampore 0·09, Arambagh 0·22. Weeding of *aman* and steeping of jute continue. Prospects of standing crops good. Weather seasonable. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Serampore	10	6	
Arambagh	11	7½	

Howrah.—Rainfall at Sadar 0·51, Uluberia 2·14. Steeping and washing of jute still going on. Its outturn has been average. The *aman* crop and sugarcane are doing well. No cattle-disease. Fodder and water sufficient. Rice sells at 11 seers per rupee on an average everywhere within the district.

24-Parganas.—Rainfall at Sadar 0·17, Barasat 1·42, Basirhat 0·28, Diamond Harbour 0·38. Weather hot and cloudy. State and prospects of standing crops good. More rain wanted in high lands in Diamond Harbour subdivision. Harvesting of *aus* finished. Steeping of jute still continues. Condition of cattle good. Supply of fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	0	per rupee
Barasat	11	0	
Basirhat	10	4	
Diamond Harbour	10	8	

Nadia.—Rainfall at Sadar 1·63, Kushtia 1·41, Chuadanga 3·34, Meherpur 3·71, Ranaghat 0·87. Crop prospects good. Jute-steeping in full swing. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Kushtia	11	4	
Chuadanga	11	4	
Meherpur	11	4	
Ranaghat	12	0	

Murshidabad.—Rainfall at Sadar 3·21, Kandi 1·61, Jangipur 0·63, Lalbagh report not received. Weather seasonable. Prospect of *haimanti* paddy and sugarcane good. *Kalai* being sown in Jangipur and *rabi* crop in Sadar subdivision. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	8	per rupee.
Kandi	14	0	
Jangipur	13	0	

Jessore.—Rainfall at Sadar 1·14, Jhenida 3·03, Magura 1·21, Narail 0·82, Bangaon ·51. Weather seasonable. Prospects of crops good. Fodder and water sufficient. Cattle-disease reported from Salikha outpost in Magura subdivision. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Jhenida	12	0	
Magura	11	0	
Narail	11	8	
Bangaon	12	0	

Khulna.—Rainfall at Sadar 0·10, Bagerhat 0·04, Satkhira 0·85. Weather seasonable. *Aman* plants doing well. Fodder and water sufficient. Cattle-disease reported from thanas Dumuria and Paikgachha. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	2	per rupee.
Bagerhat	11	12	
Satkhira	10	8	

Rajshahi.—Rainfall at Sadar 4·67, Nator 1·34, Naugaon 1·92. Weather seasonable. Prospect of standing crops good. Condition of cattle good. Common rice selling at 12½ seers per rupee. Steeping of jute progressing. Lands are being prepared for sowing of *rabi* crops.

Dinajpur.—Rainfall at Sadar 0·58. Fall in the district general, varying from 2·76 to 0·11. Weather seasonable. Standing crops good. Steeping of jute continues. Cattle-disease reported from Kaliganj. Fodder and drinking-water plentiful. Rice selling at 12 seers at Sadar and Thakurgaon.

Jalpaiguri.—Rainfall at Sadar ·40, Alipur Duars ·47. Weather seasonable. *Haimanti.* paddy doing well, but in places greatly damaged by flood. Steeping of jute going on. Common rice sells at 10½ seers a rupee. Fodder and water sufficient.

Darjeeling.—Rainfall at Sadar 1·51, Kurseong 2·29, Siliguri 0·95. Weather seasonable. *Hills—Haimanti dhan, bara* and *chhota marua* doing well. *Terai*—Reaping of *bhadoi* paddy finished. The cutting of jute going on. *Haimanti* paddy doing well. Prospects good. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	9	0	per rupee.
Terai	10	0	

Maize sells at Darjeeling at 20 seers and at Kalimpong at 34 seers per rupee.

Rangpur.—Rainfall at Sadar 1·09, Gaibanda 4·33, Nilphamari 1·05, Kurigram 1·2. Cutting and steeping of jute nearly finished. Prospect of standing crops good. Weather fair. Water and fodder sufficient. Flood has caused some damage to cattle on the Tista side in Nilphamari subdivision. Common rice sells as follows:—

	Srs.	ch.	
Sadar	9	8	per rupee.
Gaibanda	10	0	
Kurigram	9	0	
Nilphamari	10	8	

Bogra.—Rainfall at Sadar 3·56. Fall general. Weather seasonable. Harvesting of jute almost finished. Lands being prepared for *rabi* crops in places. Prospects good. Fodder and water sufficient. Common rice sells at 12¼ seers per rupee.

Pabna.—Rainfall at Sadar 1·49, Sirajganj 2·59. Weather cloudy and rainy. Showers general. Prospects of *aman* and sugarcane fair. Common rice sells at 10 seers per rupee.

Dacca.—Rainfall at Sadar ·2, Manikganj 1·17, Munshiganj ·31, Narayanganj ·35. Prospects of crops fair. Weather seasonable. Fodder available. No cattle-disease. Common rice sells at 11 seers per rupee.

Mymensingh.—*Aman* paddy doing well. Jute-steeping continues. Harvesting of *aus* finished. Fodder scarce in parts. Water sufficient. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Jamalpur	11	6	
Netrokona	12	0	
Tangail	10	14	

Faridpur.—Rainfall at Sadar 0·80, Goalundo 0·16, Madaripuri 1·60. Weather—occasional rains. Days hot, nights cooler. Prospects of crops good. Fodder sufficient. No cattle-disease. Common rice sells at 11 seers the rupee.

Backergunge.—Rainfall at Sadar 2·52. Fall general. Heavier in south and east. Weather generally fair. Occasional storms. Cyclone on 3rd. Considerable damage to property throughout the district. *Aus* suffered very slightly. Prospects fair. *Bhadoi* outturn anticipated about 90 per cent. Reports silent about cattle-disease. Fodder sufficient. Common rice sells at 13 seers (*aus*) and 12 seers (*aman*) per rupee.

Tippera.—Rainfall at Sadar 4·83, Chandpur 2·83, Brahmanbaria 4·38. Weather seasonable Prospects of standing crops good. Reaping of jute completed. Transplantation of *roa* paddy going on in Brahmanbaria. Fodder and water sufficient. No cattle-disease. Average price of common rice is at 12 seers per rupee.

Noakhali.—Rainfall at Sadar 4·84, Feni 11·31. Cyclonic weather prevailed on Friday last. Transplantation of *aman* completed. Prospects fair. Cattle-disease at Sudharam. Fodder and water sufficient. Common rice sells at Sadar at 12 seers, and at Feni at 13 seers per rupee.

Chittagong.—Rainfall at Sadar 6·02. Transplantation of *aman dhan* is nearly finished. Water and fodder sufficient. Common rice selling at 12 seers per rupee.

Chittagong Hill Tracts.—Rainfall at Sadar 4·41. Weather hot and sunny. Harvesting of *joom* paddy going on. Prospects of winter rice crops good. No cattle-disease. Common rice sells at 13 seers per rupee.

Patna.—Rainfall at Barh 0·68, Bikram 0·54. Weather seasonable. Harvesting of Indian-corn nearly completed. Standing crops doing well. Paddy prospects good. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Patna	12	4	per rupee.
Barh	12	0	
Bihar	10	0	
Dinapore	12	8	

Gaya.—Rainfall nil. Weather seasonable. Harvesting of *bhadoi* crops almost over. Sugarcane doing well. Rain wanted for paddy. Prospects, however, fair. No cattle-disease. Fodder and water for cattle ample. Price of common rice is 12 seers per rupee.

Shahabad.—Rainfall at Sadar ·70. Weather seasonable. Harvesting of *bhadoi* nearly completed. Prospects of paddy good. Fodder and water sufficient. No cattle-disease. Rice sells at Sadar at 11½ seers a rupee.

Saran.—Rainfall at Sadar nil, Siwan ·14, Gopalganj 1·12. Weather seasonable. Harvesting of *bhadoi* crops approaching completion. Land is being prepared for *rabi* crops. Paddy and sugarcane doing well. Fodder and water sufficient. No cattle-disease. Common rice sells at 15 seers per rupee.

Champaran.—Rainfall at Sadar ·07, Bettiah nil. Weather hot and cloudy. Prospects of standing crops good. Threshing of *bhadoi* crops approaching completion. Weeding of witer rice and preparation of lands for *rabi* going on. Sugarcane doing well. Cattle-disease reported. Fodder and water sufficient. Common rice sells at 16 seers 2 chitaks and maize at 27 seers per rupee.

Muzaffarpur.—Rainfall at Sadar ·64, Sitamarhi 2·49. Weather generally fair. Harvesting of *bhadoi* crops continues. Prospects continue good. Fodder and water sufficient. Prices are—Common rice 11½ seers, and maize 25 seers a rupee.

Darbhanga.—Rainfall at Sadar ·07, Samastipur ·96, Madhubani nil. Prospect of standing crops good. Flood came again in the end of September and has done some damage to *aghani* crops; it is subsiding. Fodder and water sufficient. Cattle-disease is reported from Dalsingsarai thana. Common rice sells as follows:—

	Aghani. Srs.	ch.	*Aus.* Srs.	ch.	
Sadar	13	3	14	0	per rupee.
Samastipur	12	0			
Madhubani	11	11	14	4	

Monghyr.—Rainfall at Sadar 0·42, Begusarai 5·76, Jamui 3·46. Weather seasonable. Harvesting of *marua* nearly finished. Sowing of chillies and sweet potatoes going on. Standing crops doing well. Fodder and water sufficient. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Begusarai	12	0	
Jamui	11	0	

Bhagalpur.—Rainfall at Sadar 0·08, Banka 3·20, Madhipura 7·20, Supaul 10·16. Weather seasonable. Prospects of *aghani* paddy continues to be favourable. Sowing of *kurthi* going on. Some damage caused to the *aghani* paddy by late flood in Supaul subdivision. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	6	per rupee.
Banka	12	8	
Madhipura	13	8	
Supaul	15	0	

Purnea.—Rainfall at Sadar 1·04, Kishanganj 0·52, Araria 0·03. Fall partial. Jute is still being harvested. Prospects of *aghani* rice favourable. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	9	0	per rupee.
Kishanganj	11	0	
Araria	13	0	

Malda.—Rainfall at Sadar ·40, Chanchal 1·08, Sibganj 1·11, Gajol ·39. Fall general. Weather—mornings cool, days hot. Winter rice thriving. Prospects good. Cutting of jute finished. *Kalai* is being sown in some places. No cattle-disease. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Sonthal Parganas.—Rainfall at Sadar 0·19, Deoghar 0·65, Godda ·07, Jamtara 0·04, Pakaur ·06, Rajmahal ·76. Weather seasonable. Prospects of standing crops favourable. Harvesting of *aus* at Pakaur continues. Fodder and water sufficient. Common rice sells at 13 seers at Sadar per rupee.

Cuttack.—Rainfall at Sadar 0·20. No rain at other places except Banki where the fall was 0·06. Weather seasonable. Late *beali* being cut. *Sarad* progressing well. *Rabi* being sown in places. No cattle-disease. Fodder and water sufficient. Common rice sells at 13¾ seers (old) and 15¾ seers (new) per rupee at Sadar.

Balasore.—Rainfall at Sadar 0·05. *Beali* and jute being harvested. *Sarad* growing. Sugarcane progressing. Rains badly wanted. Rice sells at 13 and 15 seers a rupee at Sadar and Bhadrak respectively. Fodder and drinking-water sufficient.

Angul.—Rainfall at Sadar nil, Bissipara 0·38. Weather hot. Sowing of *rabi* and harvesting of *bhadoi* crops continue. Common rice sells at 13 and 12¼ seers per rupee at Sadar and Khondmals respectively. Fodder and water sufficient but rain urgently wanted.

Puri.—Rainfall nil. There was little rain in the south-west part of the district. Weather hot. Harvesting of *bhadoi* paddy and *mandua* nearly over. Outturn cent. per cent. Winter rice growing well. Sugarcane and other miscellaneous crops doing well. Fodder and water-supply sufficient. Common rice sells at 15 seers per rupee.

Hazaribagh.—Rainfall at Sadar nil, Giridih 1·17. Fall not general. Weather seasonable. Harvesting of *bhadoi* going on. Lands being prepared for winter crops. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Ranchi.—Rainfall at Sadar 0·10. Weather seasonable. Prospects of crops good. Harvesting of *gora* and sowing of *sirguja* and *kurthi* in progress. Cattle-disease reported from several thanas. Fodder and water sufficient. Common rice selling at 15 seers per rupee.

Palamau.—No rain. Weather seasonable. *Bhadoi* harvesting continues. Standing crops all doing well. Cattle-disease in a few places. Fodder and water sufficient. Prices at Sadar—Rice 11¾ seers, and maize 25¼ seers per rupee.

Manbhum.—Rainfall at Gobindpur 0·08. Weather seasonable. Prospects of crops good. Fodder and water sufficient. Cattle-disease not reported. Average price of common rice at Sadar is 12 seers, and at Gobindpur 10 seers 14 chitaks per rupee.

Singhbhum.—Rainfall nil. Standing crops excellent. Harvesting of *gora* paddy continues. Average price of rice is 13 seers 6 chitaks in the district; at Chaibassa 13 seers per rupee.

General Summary.—The rainfall during the week was fairly general, but for the most part light. The districts of Midnapore, Gaya, Balasore and Angul and parts of the 24-Parganas are in need of more rain. Some damage has been done to winter rice by floods in Jalpaiguri, Darbhanga and parts of Bhagalpur. Damage to cattle has also been caused by flood in the Nilphamari subdivision of the Rangpur district. Considerable damage to property has been done in Backergunge by cyclone of 3rd, and *aus* suffered slightly. Harvesting of *bhadoi* crops still continues at places; the outturn is estimated at 90 per cent. for the Province. Sugarcane doing well. Prospects of winter rice continue fair. Preparation of lands for *rabi* crops has commenced at places. Cattle-disease reported from 8 districts. Fodder is reported to be scarce in parts of Mymensingh; elsewhere sufficient. No want of water. The price of common rice has risen in 5 districts, fallen in 12, and is stationary in the rest (30).

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

REVENUE DEPARTMENT,

The 7th October 1902.

§ Of this, 49,874 acres represent provisional lease.

CALCUTTA,
The 4th October 1902.

R. C. EDGE,
Under-Secy. to the Govt. of Bengal.

Abstract of the Results of Meteorological Observations taken at the Alipore Observatory in the month of September 1902.

	Inches.	Date.	Hour.
The mean pressure of the month	29·694		
The average pressure of September from 44 years' registers (Alipore Observatory)	29·685		
The highest pressure in the month	29·903	30th	10
The lowest pressure in the month	29·403	7th	16
The range of pressure	0·500		
	Hours.		
The total number of hours of bright sunshine during the month	127·8		
The maximum possible number of hours of sunshine ...	367·0		
	°		
The mean temperature of the month	83·8		
The average temperature of September from 20 years' registers (Alipore Observatory)	82·5		
The highest temperature in the month	92·2	4th	
The lowest temperature in the month	75·2	30th	
The range of temperature during the month	17·0		
The mean daily range of temperature	10·6		
The greatest range of temperature in one day	15·8	30th	
	Per cent.		
The mean humidity of the month	86		
The average humidity of September from 20 years' registers (Alipore Observatory)	86		
	Inches.		
The mean vapour tension of the month	0·995		
The average vapour tension of September from 20 years' registers (Alipore Observatory)	0·943		
The mean cloud proportion of the month	7·78		
The average cloud proportion of September from 25 years' registers (Alipore Observatory)	6·98		
	Inches.		
The total rainfall of the month	6·98		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	5·84		
The average fall of September from 24 years' registers (Alipore Observatory)	10·40		
The greatest fall in 24 hours	1·21	9th	
	Days.		
The number of rainy days in the month	12		
The average number of rainy days in September from 24 years' registers (Alipore Observatory)	13		
	°		
The mean maximum equilibrium temperature of solar radiation during the month	147·5		
The mean difference of sun and air temperatures	58·0		
The greatest sun temperature	156·7	7th	
The greatest excess of sun over air temperature	67·2	1st	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	76·6		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	2·3		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	4·4	29th	
	Miles.		
The mean movement of the wind per day	88·9		
The greatest movement of the wind in one day	232·0	25th	
The greatest movement of the wind in one hour	16·0	25th	2 to 3 p.m.

The number of hours with winds from each of the eight points—
N. 22, N.E. 33, E. 92, S.E. 166, S. 181, S.W. 91, W. 28, N.W. 34, Calm 73.

G. W. KÜCHLER,
for *Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.*

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Alipore (Calcutta), the 7th October 1902.

Results of the Meteorological Observations taken at the Alipore Observatory from 28th September to 4th October 1902.

Month.	Date.	Maximum in sun.	Number of hours of bright sunshine.	Mean pressure barometer at 32° Fahr.	Temperature. Mean.	Maximum.	Range.	Minimum.	Hygrometry. Mean wet bulb.	Vapour tension.	Dew point.	Humidity.	Wind. Prevailing direction.	Miles recorded.	Rain.	Weather.
1902.		°		Inches.	°	°	°	°	°	Inches	°	%			Inches.

	Inches.
The mean pressure of the seven days	29·852
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29·750
	Hours.
The total number of hours of bright sunshine	43·9
The maximum possible number of hours of sunshine	83·3
	°
The mean temperature of the seven days	81·8
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	83·4
The extreme variation of temperature	16·2
The maximum temperature	91·0
	Miles.
The highest velocity of the wind in one hour	11
	%
The mean relative humidity	80
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	83
	Inches
The total fall of rain from 28th September to 4th October 1902	0·17
The average fall of the corresponding period for 24 years, Surveyor-General's Office	1·62
The total fall from 1st January to 4th October 1902	58·96
The average fall of the corresponding period for 24 years, Surveyor-General's Office	59·76

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

dew; o, overcast; p, passing temporary showers; d, drizzling rain.

G. W. KÜCHLER,
for *Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.*

METEOROLOGICAL OFFICE, GOVT. OF INDIA;

WEATHER AND CROP REPORT.

For the week ending the 13th October 1902.

Burdwan.—Rainfall at Sadar 0·01, Katwa 0·10, Kalna nil, Raniganj nil. Weather fine. Harvesting of *aus* finished. Condition of *aman* and other standing crops fair. More rain wanted. Condition of cattle good. Fodder and water sufficient. Common rice sells at 11 seers per rupee.

Birbhum.—Rainfall at Sadar nil, Rampur Hât nil. Weather fair. More rain wanted for high paddy lands. Common rice sells at 12½ seers per rupee. Fodder sufficient.

Bankura.—Rainfall at Sadar nil, Vishnupur ·25. Standing crops need more rain. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Midnapore.—Rainfall at Sadar nil, Contai nil, Tamluk 0·40, Ghatal nil. Weather hot and cloudy. Harvesting of *aus* is almost finished. Agricultural prospects continue fair, but more rain wanted all over the district. Fodder and water sufficient. Cattle-disease reported from Binpur thana. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Contai	13	0	
Tamluk	11	0	
Ghatal	12	0	

Hooghly.—Rainfall at Sadar 0·76, Serampore ·16, Arambagh 0·78. Weeding of *aman* and steeping of jute continue. Prospects of standing crops good. Weather seasonable. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Serampore	10	8	
Arambagh	11	8	

Howrah.—Rainfall at Sadar 0·17, Ulubaria nil. Steeping and washing of jute still going on. The *aman* crop is progressing and sugarcane is doing well. No cattle-disease reported from anywhere. Fodder and water sufficient. Weather seasonable. Common rice sells at 11 seers per rupee on an average everywhere within the district.

24-Parganas.—Rainfall at Sadar nil, Barasat 0·83, Basirhat 0·71, Diamond Harbour nil Weather hot and cloudy. State and prospects of crops good except at Diamond Harbour, where crops on high lands show signs of weathering for want of rain. Ploughing for *rabi* crops going on briskly. Jute in many places fit to be reaped. In Diamond Harbour reaping of *aus* and jute wholly over. Condition of cattle good. Supply of fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	0	per rupee.
Barasat	11	0	
Basirhat	10	8	
Diamond Harbour	10	8	

Nadia.—Rainfall at Sadar 0·05, Kushtia 0·25, Chuadanga 2·22, Meherpur nil, Ranaghat 0·72. Crop prospects good. Some cattle-disease in Ranaghat. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Kushtia	11	4	
Chuadanga	11	4	
Meherpur	12	8	
Ranaghat	12	0	

Murshidabad.—Rainfall at Sadar not received, Kandi ·11, Jangipur 0·53, Lalbagh 1·07. Weather seasonable. Prospects of *aman* and sugarcane good. Sowing of *kalai* and *rabi* crops going on. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	8	per rupee.
Kandi	14	0	
Jangipur	13	8	
Lalbagh	11	8	

Jessore.—Rainfall at Sadar 2·48, Jhenida 0·96, Magura 1·16, Narail 2·07, Bangaon nil. Weather seasonable. Prospects of crops good. Fodder and water sufficient. No cattle-disease reported from Salikha outpost in Magura subdivision. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee
Jhenida	12	0	
Magura	11	0	
Narail	11	8	
Bangaon	12	0	

Khulna.—Rainfall at Sadar 0·15, Bagerhat 0·92, Satkhira nil. Weather variable. Prospects favourable. Fodder and water sufficient. Cattle-disease reported from thana Paikgachha. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	2	per rupee.
Bagerhat	11	12	
Satkhira	10	8	

Rajshahi.—Rainfall at Sadar ·03, Nator ·81, Naugaon ·85. Weather seasonable. Prospects of standing crops good. No cattle-disease. Fodder and water plentiful. Common rice selling at 12½ seers a rupee.

Dinajpur.—Rainfall at Sadar nil. Fall in the district scattered, maximum fall 4·56. Weather fine. Standing crops good. Steeping of jute continues. Cattle-disease reported from one thana. Fodder and drinking-water plentiful. Rice selling at 12 seers per rupee.

Jalpaiguri.—Rainfall at Sadar 2·93, Alipur Duars 1·76. Weather seasonable. State of standing *haimanti* paddy favourable. Steeping of jute continues. Fields are being prepared for tobacco. Common rice sells at 11 seers a rupee. Fodder and water sufficient.

Darjeeling.—Rainfall at Sadar 3·01, Kurseong 0·72, Kalimpong 1·00. Weather seasonable. *Hills*—Maize, *chhota* and *bara marua*, *bhadoi* and *haimanti dhan*, *phaphar*, and *kalai dal* doing well. *Terai*—Jute-cutting nearly completed. Steeping going on. *Haimanti* paddy doing well. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	8	0	per rupee.
Terai	11	0	

Maize sells at Darjeeling at 20 seers and at Kalimpong at 34 seers per rupee.

Rangpur.—Rainfall at Sadar ·93, Kurigram 3·17, Gaibanda 2·79, Nilphamari ·30. Cutting and steeping of jute nearly finished. Condition of standing crops good. Weather fair. Water and fodder sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	9	8	per rupee.
Gaibanda	10	0	
Kurigram	8	8	
Nilphamari	10	8	

Bogra.—Rainfall at Sadar 1·84. Fall general except in the west. Weather seasonable. Harvesting of jute finished. Lands being prepared for *rabi* crops. Prospects good. Fodder and water sufficient. Common rice sells at 12¼ seers per rupee.

Pabna.—Rainfall at Sadar nil, Sirajganj slight showers occasionally. Report of *aman* and sugarcane fair. Common rice sells at 10 seers per rupee.

Dacca.—Rainfall at Sadar ·66, Manikganj 1·11, Munshiganj 2·79, Narayanganj 1·31. Weather seasonable. Prospects of crops fair. Fodder available. No cattle-disease. Common rice sells at 11 seers per rupee.

Mymensingh.—*Aman* paddy doing well. Jute-steeping continues. Harvesting of *aus* finished. Fodder scarce in parts. Water sufficient. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Jamalpur	12	0	
Netrokona	12	0	
Kishorganj	11	3	
Tangail	10	14	

Faridpur.—Rainfall at Sadar 1·58, Goalundo 0·28, Madaripore 0·52. Rains occasionally. Weather seasonable, but hot at times. State and prospects of crops good. Fodder sufficient. No cattle-disease. Common rice sells at 11 seers per rupee.

Backergunge.—Rainfall at Sadar 1·92; at other subdivisions below one inch. Weather seasonable. Transplantation of *aman* practically over. Prospects fair. No cattle-disease. Fodder sufficient. Common rice sells at 12½ seers (*aus*) and 11 seers (*aman*) per rupee.

Tippera.—Rainfall at Sadar ·16, Brahmanbaria 1·87, Chandpur ·05. Prospects fair. Transplantation of *roa* paddy still going on in Brahmanbaria. Fodder wanting in Habiganj thana. Water sufficient. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	15	0	per rupee.
Brahmanbaria	11	7	
Chandpur	11	0	

Noakhali.—Rainfall at Sadar 0·05, Feni 2·69. Weather seasonable. Prospects of standing crops good. Slight cattle-disease at Sudharam. Fodder and water sufficient. Common rice sells at 12 seers at Sadar and at 13 seers at Feni.

Chittagong.—No rain during the week. Transplantation of *aman dhan* is over. Fodder and water sufficient. Common rice selling at 12 seers per rupee.

Chittagong Hill Tracts.—Rainfall at Sadar 0·5. Weather seasonable. Prospects of standing crops favourable. Harvesting of *joom* crops still going on. No cattle-disease. Common rice sells at 12 seers per rupee.

Patna.—Rainfall at Sadar 0·66, Dinapore 0·04. Weather seasonable. Harvesting of Indian-corn completed. Paddy looks well. *Rabi* sowing going on. No cattle-disease. Fodder and water sufficient. Common rice sells at 12½ seers per rupee.

Gaya.—Rainfall at Sadar nil, Nawadah 0·06, Jahanabad 0·07. Weather seasonable. Harvesting of the *bhadoi* crops over. Prospects of paddy good so far, sugarcane doing well. Lands being prepared for sowing *rabi*. No cattle-disease. Fodder and water ample. Price of common rice is 12½ seers a rupee.

Shahabad.—Rainfall at Sadar ·32. Paddy crop and sugarcane doing well. No cattle-disease. Fodder and water sufficient. Rice sells at Sadar at 12 seers a rupee.

Saran.—Rainfall at Sadar 0·01, Siwan 0·41, Gopalganj nil. Weather seasonable. Harvesting of *bhadoi* crop continues. Paddy and sugarcane doing well, but rain wanted. Land is being prepared for *rabi* sowing. Cattle-disease reported from Mirjapur thana. Fodder and water sufficient. Common rice sells at 14 seers per rupee.

Champaran.—Rainfall at Sadar nil, Bettiah ·09. Weather cloudy. Prospects of standing crops good. Threshing of *bhadoi* crops approaching completion. Weeding of winter rice and preparation of lands for *rabi* going on. Cattle-disease reported. Fodder and water sufficient. Common rice sells at 17½ seers and maize at 30 seers per rupee.

Muzaffarpur.—Rainfall at Sadar ·01, Sitamarhi ·57. Weather fair. Harvesting of *bhadoi* crops approaching completion. Prospects of crops good. Fodder and water sufficient. Prices are—Common rice 11¼ seers, and maize 25 seers a rupee.

Darbhanga.—Rainfall at Sadar 1·09, Samastipur 1·85, Madhubani 0·71. Prospect of standing crops good. Lands are being prepared for *rabi* sowing. Fodder and water sufficient. Cattle-disease reported from Ladania outpost and Banipati thana. Common rice sells as follows :—

			Aghani.	*Aus.*	
			Srs. ch.	Srs. ch.	
Sadar	...	...	13 3	14 0	per rupee.
Samastipur	...	...	12 0		
Madhubani	...	...	12 5	17 8	

Monghyr.—Rainfall at Sadar nil, Begusarai 0·01, Jamui nil. Weather seasonable. Sowing of *rabi* crops commenced. Standing crops doing well. Fodder and water sufficient. Common rice sells as follows :—

				Srs. ch.	
Sadar	...	...	...	11 14	per rupee.
Begusarai	...	...	...	12 0	
Jamui	...	...	...	11 0	

Bhagalpur.—Rainfall at Sadar 0·13, Banka 0·82, Madhipura 0·00, Supaul 1·05. Weather seasonable. Prospects of *aghani* paddy continue favourable. Sowing of *kurthi* going on, but retarded in places in the Supaul subdivision owing to the late excessive rainfall. Fodder and water sufficient. Common rice sells as follows :—

				Srs. ch.	
Sadar	...	...	...	12 10	per rupee.
Banka	...	...	...	12 8	
Madhipura	...	...	...	13 8	
Supaul	...	...	...	15 0	

Purnea.—Rainfall at Sadar 0·78, Kishanganj 0·10, Araria 0·40. Fall general. Weather seasonable. Steeping of Jute still continues. Sowing of mustard and other *rabi* crops going on. Prospects of winter rice good. No cattle-disease. Fodder and water sufficient. Common rice sells as follows :—

				Srs. ch.	
Sadar	...	...	...	9 0	per rupee.
Kishanganj	...	...	...	11 0	
Araria	...	...	...	13 0	

Malda.—Rainfall at Sadar 2·47, Chanchal 1·16, Sibganj 1·53, Gajol ·83. Fall general. Weather seasonable. Prospects of winter rice good. Sowing of *kalai* going on in places. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Sonthal Parganas.—Rainfall at Sadar 0·48, Jamtara 0·03, Pakaur 1·31, Rajmahal 0·33. Weather seasonable. Prospects of standing crops good. Fodder and water sufficient. Common rice sells at 13¼ seers a rupee.

Cuttack.—No rain during the week except Banki where the fall was 0·33. Want of rain felt in places. Weather seasonable. Late *beali* is being cut. *Sarad* progressing. No cattle-disease. Fodder and water sufficient. Common rice sells at 13¾ seers (old) and 15¾ seers (new) per rupee at Sadar.

Balasore.—Rainfall at Sadar nil. *Beali* and jute being harvested. *Sarad* growing, but rain very badly needed. Sugarcane progressing. Other standing crops doing well. Rice sells at 14 and 16 seers a rupee at Sadar and Bhadrak respectively. Fodder and drinking-water sufficient.

Angul.—No rain. Weather hot. Harvesting of *bhadoi* crops nearly over. Fodder and water sufficient, but rain urgently wanted for high-land paddy. No cattle-disease. Common rice sells at 13 and 12 seers per rupee at Sadar and Khondmals respectively.

Puri.—Rainfall at Sadar nil. It is slight at western parts of the district. Weather hot. Harvesting of *bhadoi* paddy and *mandua* is nearly over. Rain wanted for winter rice on uplands. Plowing of lands for *kutthi* commenced. Sugarcane, cotton and other miscellaneous crops doing well. Fodder and water-supply sufficient. Common rice sells at 15 seers per rupee.

Hazaribagh.—Rainfall nil. Weather seasonable. Harvesting of *bhadoi* going on. *Rabi* crops being sown. Sugarcane doing well. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Ranchi.—Rainfall nil. Weather seasonable. Harvesting of *gora* and *marua* in progress. Rain wanted for the winter rice crop. Cattle-disease reported from several thanas. Fodder and water sufficient. Common rice selling at 15 seers per rupee.

Palamau.—No rain. Weather seasonable. Standing crops all doing well. Cattle-disease in a few places. Fodder and water sufficient. Rice selling at Sadar at 12 seers 6 chitaks per rupee.

Manbhum.—No rain. Weather seasonable. Prospects of crops good. Rain wanted for high-land paddy. Fodder and water sufficient. Cattle-disease not reported. Rice sells at Sadar at 12 seers and at Gobindpur at 10 seers 14 chitaks per rupee.

Singhbhum.—Rainfall nil. Standing crops good. Average price of rice 14 seers in the district.

General Summary.—Rain fell during the week in Bihar and most of the districts of Bengal Proper, but the fall was light except in Jessore, Malda and parts of North and East Bengal where it was moderately heavy. The Burdwan, Orissa and Chota Nagpur Divisions generally require more rain. Steeping of jute continues at places. Weeding of winter rice and sowing of *rabi* have commenced. Prospects fair. Cattle-disease reported from 9 districts. Fodder sufficient except in parts of Mymensingh and Tippera where it is said to be scarce. No want of water. The price of common rice is dearer in 5 districts, cheaper in 12 and unchanged in the rest (30).

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,
Offg. Secretary to the Govt. of Bengal.

The total fall of rain from 5th to 11th October 1902	Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	1·73
The total fall from 1st January to 11th October 1902	58·96
The average fall of the corresponding period for 24 years, Surveyor-General's Office	61·49

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

CONTENTS.

PRELIMINARY FORECAST OF THE WINTER RICE CROP OF BENGAL, 1902.

THE following note is published for general information.

W. C. MACPHERSON,
Offg. Secy. to the Govt. of Bengal.

The 17th October 1902.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Preliminary Forecast of the Winter Rice Crop of Bengal, 1902.

Character of the Season.—The ante-monsoon showers were exceptionally heavy, especially in Eastern Bengal, but the monsoon broke late, and the fall in June was short, the deficiency being most marked in Bihar and Chota Nagpur. July brought good rain though there was defect in parts of Bihar and Lower Bengal. The fall in July was very heavy,

while on the other hand the fall was excessive in Orissa and parts of Eastern Bengal. Transplantation was retarded by excessive rain in Eastern Bengal and by drought elsewhere; but the weather has of late been seasonable and, taken as a whole, the season is not unfavourable to the winter rice crop of the Province.

Area cultivated.—Since the issue of the final forecast of the winter rice crop of 1901, some District Officers have revised their estimates of the normal area. They now estimate the total normal area at 30,094,700 acres as compared with 30,443,600 acres finally estimated last year. The area actually put under winter rice crop this year is reported to be 29,356,500 acres against 28,404,200 acres sown last year. The failure to sow the full normal area is due to unseasonable weather during the transplantation season.

Character of the Crop.—From the summary of the district returns given in Appendix I, it will be seen that 22 out of the 45 districts in the Province report an outturn of 100 per cent. or over; in nine it is estimated to vary between 90 and 99 per cent. In eight others the estimate varies between 80 and 89 per cent., while in no case, it falls below 60 per cent. of the average. According to the estimates of the District Officers, the outturn for the Province as a whole will amount to 94 per cent. of the normal, but the district reports, which were mostly compiled early in September, do not take into account the improvement which has since taken place, and it seems probable that, if the rest of the season be favourable and especially if the Háthiya rains in Bihar do not fail, the Provincial outturn will not fall below the average.

C. G. H. ALLEN,

Offg. Director of the Department of Land Records and Agriculture, Bengal.

DARJEELING,

The 4th October 1902.

APPENDIX I.

Preliminary Forecast of the Winter Rice Crop of Bengal, 1902.

District.	Subdivision.	Total area of subdivision and district in acres.	Total area estimated to be under cultivation in acres.	Approximate normal area under winter rice in acres.	Approximate area under winter rice last year (1901) in acres.	Estimated area under winter rice this year (1902) in acres.	Taking 100 to represent the normal outturn, how much represented the outturn last year (1901)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1902)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
Shahabad	Arrah	581,760	487,400	325,000	248,000	340,000	54	100	The probable outturn in the Buxar Subdivision has, in my opinion, been under estimated.	
	Buxar	425,600	340,000	234,500	231,500	234,500	66	75		
	Sasseram	955,520	644,400	355,000	153,300	206,810	44	[illegible]		
	Bhabhua	832,640	470,000	313,500	280,000	300,000	50	95		
	District Total ...	2,795,520	1,941,800	1,228,000	907,800	1,081,300	54	91		
Saran ...	Sadar	673,140	547,500	141,200	134,200	107,000	25	50	For want of rain transplantation of *paddy* has has not yet been done in considerable area of *paddy* lands, but rain has now begun to fall and transplantation is now in full swing, and if this state of rain will continue for some time more the extent of area and prospect of outturn of rice will increase.	
	Siwan	493,440	423,300	142,000	130,000	80,000	25	60		
	Gopalganj ...	542,146	386,400	90,600	90,600	90,000	25	80		
	District Total ...	1,706,726	1,357,200	373,800	354,800	277,000	25	60		
Champaran	Sadar	978,846	760,900	257,000	257,000	257,000	40	115	The increase in the area and estimated outturn is due to favourable rainfall up to date. Floods have done damage along the banks of the Sikrana and Bagmati rivers. Hence taking 125 per cent to represent the highest possible outturn, I estimate this year's outturn at 115. This is on the assumption that favourable rain will fall till end of September.	
	Bettiah	1,190,969	686,700	293,000	250,000	300,000	40	115		
	District Total ...	2,079,815	1,447,600	550,000	507,000	557,000	40	115		

Muzaffarpur.	Sadar	780,185	664,800	216,000	216,000	216,000	30	93	Of course these figures are merely conjectural, as all depends on the Hatya rains. The forecast for Sitamarhi would have been 16 annas, but for the floods, which destroyed a good deal of the *dhan* on low lands, but what has been lost is being generally replaced; though there is some scarcity of seedlings. The floods caused some loss to the *dhan* in the Katra thana and north Muzaffarpur also.	
	Hajipur	510,895	399,200	105,100	105,100	105,100	25	90		
	Sitamarhi	650,174	573,000	337,500	337,500	337,500	50	80		
	District Total ...	1,941,254	1,627,000	658,600	658,600	658,600	39	85		
Darbhanga	Sadar	783,000	617,400	382,000	375,000	425,000	38	77	Most of the damage done by the floods of August has been repaired by transplantation. Thanas Bonipatti, Darbhanga, Bahera, Rosera and Warrisnagar may still show improvement. With favourable rain in October there is hope of a 90 per cent. crop.	
	Madhubani ...	876,000	668,400	462,400	350,000	445,000	51	93		
	Samastipur ...	471,000	392,200	123,500	108,700	120,000	44	77

PRELIMINARY FORECAST OF THE INDIGO CROP OF BENGAL, 1902.

THE following Note is published for general information.

W. C. MACPHERSON,
Offg. Secy. to the Govt. of Bengal.

The 17th October 1902.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Preliminary Forecast of the Indigo crop of Bengal, 1902.

Explanatory.—The chief indigo-growing districts in this Province at present are Saran, Champaran, Muzaffarpur, Darbhanga, Monghyr, Bhagalpur, Purnea, Nadia and Murshidabad. In forecasting on this crop, it is therefore necessary to consider the character of the season in these districts only.

Character of the season.—The previous monsoon terminated very early and the winter rains failed; there was consequently serious lack of moisture in the early part of the season. There was practically no rain in February, but in March there was good rain everywhere. In Bihar, however, there were hailstorms and rain showers at the time of germination which rendered extensive re-sowing necessary. The rainfall in April was copious and general, except in Muzaffarpur, and Darbhanga where it was slightly deficient. In May also there was good rain, except in Muzaffarpur and Monghyr, though the crop in the Bengal districts suffered to some extent from storms and heavy rain. In the following month the fall was deficient throughout the indigo area, especially in Saran, Champaran and Murshidabad. Since then the rainfall has been generally heavy for the indigo crop which has suffered from water-logging in Bengal, and from floods in Darbhanga and Muzaffarpur. On the whole, the rainfall of the season has been very capricious and ill-distributed so far as indigo is concerned. Although the moderate showers of the past three months have effected some improvement in the crop in Bihar, the prospects are still among the worst on record.

Area sown.—According to the estimates sent in by the District Officers, the normal area under indigo at present in these Provinces amounts to 446,700 acres, but this estimate is evidently too high, sufficient account not having been taken by the reporting officers of the serious falling off which has taken place during recent years in the cultivation of this crop. The area sown in indigo this year is estimated by the District Officers at only

258,300 acres, as compared with 311,200 acres planted last year. The contraction is attributable to the unfavourable prospects of the industry, and also to the drought in the sowing season.

Character of the crop.—From the summary of the district returns appended to this forecast, it will appear that, except in Nadia, the crop is nowhere expected to reach the normal. The five districts of North Bihar, which claim more than two-thirds of the indigo area of this Province, anticipate only 43 per cent. of a normal crop, while the outturn for the remaining districts is estimated at 59 per cent. of the average. Purnea and Bhagalpur report a crop of 80 and 74 per cent., respectively, while Monghyr and Darbhanga forecast an outturn of 69 and 63 per cents. respectively, of a normal crop. In all other important indigo districts, the outturn is expected to vary between 25 to 43 per cent. of the normal. According to the estimates of the District Officers, the outturn for the whole Province will amount to 47 per cent. of an average crop. But the weather in September has been seasonable, and it is expected that the *khoontee*, or second cuttings, will yield a more favourable outturn than was at first hoped for, and I think the Provincial outturn will not ultimately fall below 50 per cent. of the average.

Gross outturn.—According to the district estimates, the total outturn in the North Bihar Districts will amount to 22,770 factory maunds, and that in the remaining area to 8,127 factory maunds. A factory maund is equal to about 75 lbs.

Messrs. Moran and Company estimate an yield of 26,000 factory maunds of indigo in North Bihar, and four to five thousand factory maunds in the remaining area. It must be borne in mind that several districts of Lower Bengal, which grow indigo on a small scale, are omitted from their calculations, and that native grown indigo presumably finds no place in their estimates. On the other hand, the returns submitted by the District Officers having been compiled before the middle of September, do not take into account the improved prospects of the second cuttings, while Messrs. Moran and Company's estimate is based on the latest information. After a full consideration of all these circumstances, I think that the yield of indigo in North Bihar this year will amount to 25,000 factory maunds, and that in Bengal to 8,000 factory maunds.

C. G. H. ALLEN,

Offg. Director of the Department of Land Records and Agriculture, Bengal.

DARJEELING,

The 6th October 1902.

Preliminary Forecast of the Indigo Crop of Bengal, 1902.

DIVISION.	DISTRICT.	Total area of district in acres.	Total area estimated to be under cultivation in acres.	Approximate normal area under indigo in acres.	Approximate area sown last year (1901) in acres.	Estimated area sown this year (1902) in acres.	Taking 100 to represent the normal outturn, how much represented outturn last year (1901)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1902)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9	10	11
Burdwan ...	Burdwan	1,726,080	1,254,200	6,100	1,900	1,700	68	65	......	The normal area should be revised.
	Bankura	1,677,440	642,800	2,400	100	100	90	90	The cultivation of indigo crop is gradually decreasing in this district.	Ditto.
	Midnapore ...	3,2[illegible]	2,1[illegible]	3,[illegible]	1,9[illegible]	1,100	44	50	The cultivation of the plant in this district is almost extinct.	Ditto.
Presidency ...	Nadia	1,788,160	630,100	16,600	12,500	11,900	77	30	The normal area is revised. The cultivation of indigo has been gradually dying out in this district; hence the decrease in the area sown. The decrease in the outturn is due to the deficiency of seasonable rain.	
	Murshidabad ...	1,373,440	899,800	25,000	11,200	8,900	86	25	Indigo is being generally given up. This year there was little or no crop, and only a few factories are still continuing to grow a little in the hope of better prices in the future.	Ditto.

Division.	District.	Total area of district in acres.	Total area estimated to be under cultivation in acres.	Approximate normal area under indigo in acres.	Approximate area sown last year (1901) in acres.	Estimated area sown this year (1902) in acres.	Taking 100 to represent the normal outturn, how much represented outturn last year (1901)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1902)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9	10	11
Presidency—*concld.*	Jessore ...	1,872,000	1,203,800	14,000	500	400	25	13	The decrease in area sown this year is owing to the closing of the Hazrapur indigo concern.	The normal area should be revised.
Rajshahi ...	Rangpur	2,231,040	1,602,700	6,600	5,000	4,100	50	50	The cultivation of indigo is gradually dying out here.	
Patna ...	Gaya	3,015,680	2,207,500	100	100	100	50	75	The crop is grown to a nominal extent in this district.	
	Shahabad ...	2,195,330	1,841,900	7,700	2.100	1,500	58	77	The decrease in the area sown is due to the substitution of sugar and other more paying native crops.	Ditto.
	Saran	1,708,796	1,357,200	46,600	37,600	19,300	70	40	It is reported by the General Secretary to the Bihar Indigo Planters' Association that accurate return of area cannot be submitted, much indigo land having been put under other crops.	Ditto.
	Champaran ...	2,079,815	1,447,600	96,000	84,000	84,000	69	43	Want of rain has reduced the prospects of the crop. The drought from September to March, and after that the unseasonable rainfall account for the low outturn.	
	Muzaffarpur ...	1,941,254	1,627,000	87,200	50,000	48,000	62	25	......	Ditto.
	Darbhanga ...	2,130,000	1,678,000	53,000	47,600	32,500	82	63	Short moisture in Samastipur subdivision has very much reduced the outturn.	Ditto.

Division	District								Remarks	
Bhagalpur ...	Monghyr ...	2,509,440	1,582,800	20,600	14,000	12,600	78	69	The decrease in the area sown this year is due to fall in the price of natural indigo. The fall in the outturn is due to want of moisture and insufficient rainfall.	
	Bhagalpur ...	2,704,640	2,097,000	13,000	13,000	12,000	76	74	The Subdivisional Officer of Madhipura has reduced the area, in column 7, by 1,000 acres as the Bangown factory has given up cultivation of indigo.	
	Purnea	3,195,520	1,680,000	40,000	19,000	16,000	110	80	The decrease in area sown this year is due partly to unfavourable season and partly to a few factories being closed. There was drought in May and June, followed by excessive rain and floods in August. Hence the outturn will not be good. The figure in column 6 has been revised.	The normal area should be revised.
	Malda	1,216,000	672,800	5,000	8,000	2,000	94	100	The cultivation of indigo has almost been abandoned in this district.	
	Sonthal Parganas	3,500,160	1,725,100	5,700	2,500	2,000	66	81	The greater portion of the land under this crop has been converted into paddy lands, and hence the decrease both in normal area and area sown this year. The normal outturn is due to timely rainfall.	
Orissa ...	Cuttack	2,323,200	1,161,200	200	200	200	52	81	The prospect of the crop at Dumka and Jamtara is favourable, but at Rajmahal, owing to absence of seasonable rainfall, a very bad outturn is expected.	
	North Bihar ...	10,369,235	7,692,600	301,300	233,200	196,400	78	43

RESOLUTION ON THE ADMINISTRATION REPORT OF THE ORISSA PORTS FOR THE YEAR 1901-1902.

No. 1881Marine.

Government of Bengal.

MARINE DEPARTMENT.

Dated Calcutta, the 14th October 1902.

RESOLUTION.

Administration Report of the Orissa Ports for 1901-1902.

READ—

Letter No. 8490., dated 11th July 1902, from the Commissioner, Orissa Division, submitting the Report on the Administration of the Orissa Ports for the year 1901-1902.

Letter No. 8720., dated 16th July 1902, from the Commissioner, Orissa Division.

THE receipts, during the year under review, amounted to Rs. 13,364, against Rs. 10,032, the receipts for 1900-1901, showing an increase of Rs. 3,332. This is due to the revival at the ports of Cuttack and Puri of the rice trade with foreign ports, after cessation of the famine in the Central Provinces.

2. The expenditure amounted to Rs. 15,451, against Rs. 18,727, showing a reduction of Rs. 3,276, due mainly to the revised scale of establishment sanctioned by the Government. The reduction would have been greater but for the expenditure incurred in the purchase of a new light from England for Shortt's Island.

3. The receipts, with the opening balance, will, after covering the expenditure, leave a surplus of Rs. 8,298, and it is satisfactory to note that no contribution from Government will be required.

4. Owing to its diversion to the railway, the trade of the Orissa ports continued to decline. From Rs. 1,20,75,438 in 1899-1900, it declined in value, during the year 1900-1901, to Rs. 87,98,466, and to Rs. 82,42,330 during the year under review, although there was an increase of the export trade in Cuttack and Puri, as mentioned above. This decline in the value of the trade had no adverse effect on the revenues of the ports, which are mainly derived from Government dues on vessels, and as 228 vessels, exclusive of native craft, entered the ports, against 193 in the previous year, there was a small increase in the receipts of the ports.

5. A larger number of vessels visited the ports during the year: 228 vessels, of 137,794 tons, entered the ports in 1901-1902, against 193 ships, of 106,613 tons, which visited the ports during the previous year.

6. Since the opening of the railway, the pilgrims have generally ceased to use the sea route, which is now used mainly by local men seeking employment in Calcutta or elsewhere in Bengal.

7. The erosion of Shortt's Island continued. The new fifth-order light has been exhibited on the Island from the 1st August 1901, and is reported to give a clear and uniform light.

8. There were no cases of plague in any of the ports, while only two cases of cholera were landed from the S.S. *Jatra* and taken to the Pilgrim Hospital at Chandbally, where they both proved fatal.

By order of the Lieutenant-Governor of Bengal,

D. B. HORN,

Secretary to the Government of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 20th October 1902.

Burdwan.—Rainfall at Sadar 0·57, Kalna nil, Katwa nil, Raniganj nil. Weather fine. Threshing of *aus* commenced. Condition of *aman* and other standing crops fair. More rain wanted. No cattle-disease. Fodder and water sufficient. Common rice sells at 11 seers per rupee.

Birbhum.—Rainfall at Sadar nil, Rampur Hât 0·40. Weather seasonble. More rain wanted for high paddy lands. Common rice sells at 12½ seers per rupee. Fodder and water sufficient.

Bankura.—Rainfall at Sadar ·04. Rain badly wanted for the standing crops. Sugarcane also suffering for want of rain. Fodder and water sufficient. Common rice sells at 13¾ seers per rupee.

Midnapore.—No rain during the week. Rain badly wanted all over the district. Weather hot and cloudy. Agricultural prospects fair. *Rabi* sowings going on. Fodder and water sufficient. Cattle-disease reported from Binpur and also from part of Garhbeta. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Contai	13	0	
Tamluk	11	0	
Ghatal	12	0	

Hooghly.—No rain. Weather seasonable. Weeding of *aman*, steeping and washing of jute continue. Prospects of standing crops good. Fodder and water sufficient. Rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Serampore	10	0	
Arambagh	11	8	

Howrah.—Rainfall at Sadar 0·06, Ulubaria nil. Rain badly wanted, in default of it the *aman* crop on high lands is suffering. Steeping and washing of jute still going on. Threshing of *aus* nearly finished. Sugarcane doing well. No cattle-disease. Fodder and water-supply sufficient. Common rice sells on an average 11 seers per rupee.

24-Parganas.—Rainfall at Sadar 0·01, Barasat nil, Basirhat nil, Diamond Harbour nil. Weather warm and cloudy. State and prospect of standing crops fair. Crops on high lands in Barasat and Diamond Harbour show signs of withering. Rain badly wanted in all subdivisions. Ploughing for *rabi* crops going on in Barasat, sowing for them continues in Basirhat. Common rice sells at 11 seers per rupee. Condition of cattle good. Supply of fodder and water sufficient.

Nadia.—Rainfall at Sadar 0·33, Ranaghat nil, Chuadanga 0·09, Meherpur 0·18, Kushtia 0·30. Standing crops doing well. *Rabi* crops being sown. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Kushtia	11	0	
Chuadanga	11	4	
Meherpur	12	8	
Ranaghat	Report not received.		

Murshidabad.—Rainfall at Sadar nil, Kandi ·15, Jangipur ·05, Lalbagh ·23. Weather seasonable. Prospect of *aman* and sugarcane good. Sowing of *kalai* and *rabi* crops going on. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	8	per rupee.
Kandi	14	8	
Jangipur	14	0	
Lalbagh	11	8	

Jessore.—Rainfall at Sadar ·43, Jhenida nil, Narail 0·18, Magura nil. No report from Bangaon received. Weather seasonable. Prospects of crops good. Fodder and water sufficient. Cattle-disease reported from Salikha outpost in Magura subdivision. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Jhenida	12	0	
Magura	11	0	
Narail	11	8	

Khulna.—Rainfall at Sadar 0·72, Bagerhat 0·06, Satkhira 0·38. Weather seasonable. *Aman* paddy doing well. Fodder and water sufficient. A few cases of cattle-disease reported from Paikgachha and Dumuria. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Satkhira	10	8	

Rajshahi.—Rainfall at Sadar 0·24, Nator 0·37, Naugaon report not received. Weather seasonable. Prospects of standing crops good. Sowing of *rabi* in progress. Common rice selling at 12 seers a rupee.

Dinajpur.—Rainfall at Sadar ·65, light falls throughout the district. Weather fine. Standing crops good. Cattle-disease reported from one thana Fodder and drinking-water plentiful. Rice selling at 12 seers at Sadar and 13 seers at Thakurgaon.

Jalpaiguri.—Rainfall at Sadar nil, Alipur Duars ·09. Weather seasonable. *Haimanti* paddy doing well. Fields are being prepared for tobacco. Common rice sells at 10½ seers a rupee. Fodder and water sufficient.

Darjeeling.—Rainfall at Sadar 0·63, Kurseong 1·10, Siliguri 0·40. Weather unusually cold. *Hills*—Maize, *chhota* and *bara marua*, *bhadoi* and *haimanti dhan*, *phaphar*, and *kalai dal* doing well. *Terai*—Cutting of jute nearly finished. Steeping going on. *Haimanti* paddy doing well. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	8	0	per rupee.
Terai	11	0	

Maize sells at Darjeeling at 20 and at Kalimpong at 32 seers per rupee.

Rangpur.—Rainfall at Sadar ·68, Kurigram 1·21, Gaibanda ·85, Nilphamari 0·22. Cutting and steeping of jute nearly finished. Prospects of standing crops good. Weather fair. Water and fodder sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	9	8	per rupee.
Gaibanda	10	0	
Kurigram	8	8	
Nilphamari	10	8	

Bogra.—Rainfall at Sadar 0·9. Slight fall everywhere except in the west and part of the east. Weather seasonable. Lands being prepared for *rabi* crops. Prospects good. Fodder and water sufficient. Common rice sells at 12½ seers per rupee.

Pabna.—Rainfall at Sadar nil, Sirajganj 0·57. Weather getting cool and seasonable. No rain in Sadar, slight rain in Sirajganj. Prospects of standing crops fair. Common rice sells at 10 seers per rupee.

Dacca.—Rainfall nil. Prospects of crops fair. Weather seasonable. Fodder available. No cattle-disease. Common rice sells at 11 seers per rupee.

Mymensingh.—Rainfall at Sadar 0·10, Jamalpur 0·11, Kishorganj 0·09, Tangail 0·06. Weather seasonable. Prospects of *aman* paddy good. Jute-steeping nearly over. Scarcity of fodder continues in parts. Water sufficient. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Jamalpur	12	4	
Netrokona	12	3	
Kishorganj	11	3	
Tangail	10	14	

Faridpur.—Rainfall at Sadar nil, Goalundo nil, Madaripore 0·45. Weather cool at night, warm in day-time. Prospects of crops good. Common rice sells at 11 seers a rupee. Fodder available. No cattle-disease.

Backergunge.—Rainfall at Sadar ·17. Weather seasonable. Prospects fair. No cattle-disease. Fodder sufficient. Common rice sells at 11½ seers (*aman*) and 12½ seers (*aus*) per rupee.

Tippera.—Rainfall at Sadar 1·15, Brahmanbaria nil, Chandpur 0·15. Weather seasonable. Prospects fair. *Aman* paddy thriving. Fodder and water available. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	14	0	per rupee.
Brahmanbaria	13	0	
Chandpur	11	0	

Noakhali.—No rain. Weather seasonable. Prospects good. Lands being ploughed for *rabi* crops. Fodder and water sufficient. Slight cattle-disease at Sudharam. Common rice sells at Sadar at 12 seers and at Feni at 13 seers per rupee.

Chittagong.—No rain during the week. Cultivation of *rabi* crop is going on. Water and fodder sufficient. Cattle-disease reported in parts of the district. Common rice selling at 12 seers 10 chitaks.

Chittagong Hill Tracts.—Rainfall nil. Weather fine with cool nights. *Joom* harvesting continues. No cattle-disease. Rice sells at 13 seers per rupee.

Patna.—Rainfall at Sadar 0·34, Dinapore 0·05. Weather seasonable. Paddy prospect good. *Rabi* sowings going on vigorously. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Patna	12	12	per rupee.
Barh	12	4	
Bihar	10	8	
Dinajpur	13	0	

Gaya.—Rainfall at Aurangabad 0·31. Weather hot in the day and cold in the night. Sowing of *rabi* commenced. Prospects of paddy fair. Blight is reported to have appeared in some places in the Aurangabad subdivision. Fodder and water sufficient. Common rice selling at 12½ seers per rupee.

Shahabad.—Rainfall at Buxar 0·30, Bhabua report not received. *Bhadoi* being threshed. *Rabi* sowing commenced. Prospect of paddy good. Sugarcane doing well. Fodder and water abundant. Rice sells at Sadar at 12 seers per rupee.

Saran.—Rainfall at Sadar nil, Siwan 0·06, Gopalganj 2·25. Weather seasonable. Standing crops doing well, but rain wanted. Cattle-disease reported from Mirganj thana. Fodder and water sufficient. Common rice sells at 15 seers per rupee.

Champaran.—Rainfall at Sadar 0·27, Bettiah ·29. Weather cloudy. Prospects of standing crops good. Threshing of *bhadoi* crops nearly completed. Preparation of lands for *rabi* going on. Cattle-disease reported. Fodder and water sufficient. Common rice sells at 17¾ seers and maize at 31 seers per rupee.

Muzaffarpur.—Rainfall at Sadar ·08, Sitamarhi ·10. Weather fair. Harvesting of *bhadoi* crops finished. Fields are being prepared for *rabi* sowing. Prospects of winter rice good. Fodder and water sufficient. Prices are—Common rice 12 seers, and maize 26 seers a rupee.

Darbhanga.—Rainfall at Sadar 0·04, Samastipur 0·75, Madhubani 0·10. Prospect of standing crops good. *Rabi* sowings going on. Fodder and water sufficient. Cattle-disease is reported from Darbhanga, Warishnagar and Samastipur thanas. *Aghani* and *aus* rice sells as follows:—

	Aghani. Srs.	ch.	*Aus.* Srs.	ch.	
Sadar	13	3	15	0	per rupee.
Samastipur	13	8			
Madhubani	12	0	17	8	

Monghyr.—Rainfall at Sadar 0·45, Begusarai 0·31, Jamui nil. Weather seasonable. Paddy and sugarcane doing well. Sowing of *rabi* crops going on. Fodder and water sufficient. No cattle-disease. Common rice sells at 12 seers per rupee.

Bhagalpur.—Rainfall at Sadar 0·76, Banka 0·40, Madhipura 0·10, Supaul 0·30. Weather seasonable. Prospects of *aghani* rice continue favourable. *Kurthi* and other standing crops doing well in Banka and Madhipura, but somewhat damaged by flood in Supaul. Stray cases of cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	10	per rupee.
Banka	12	8	
Madhipura	13	8	
Supaul	15	0	

Purnea.—Rainfall at Sadar 0·37, Kishanganj 0·35, Araria 0·57. Fall general. Weather seasonable. Mornings are cool. Prospects of winter crop good. Cattle-disease reported from one village in thana Araria. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Kishanganj	11	0	
Araria	14	0	

Malda.—Rainfall at Sadar ·64, Chanchal nil, Sibganj ·26, Gajol nil. Weather seasonable. Prospects of winter rice good. Sowing of *kalai* in progress. Lands are being prepared for *rabi* crops. No cattle-disease. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Sonthal Parganas.—Rainfall at Sadar 0·42, Deoghur 0·50, Godda 0·40, Pakaur 0·10, Rajmahal 0·33. Weather seasonable. Standing crops doing well. Rain is needed in places for high land rice. Fodder and water sufficient. Common rice sells at 13¼ seers per rupee in Dumka.

Cuttack.—No rain. Weather hot and cloudless. Want of rain badly affecting *sarad* rice and *rabi* seedlings. Outturn of late *beali* average. Fodder and water available. Common rice sells at 15¾ seers (new) and 13¾ seers (old) per rupee at Sadar.

Balasore.—Rainfall at Sadar nil. *Sarad* paddy crop on high lands already greatly damaged by the continuous drought. The remainder wants rain very badly and is withering. Rice sells at 14 and 13¼ seers per rupee at Bhadrak and Sadar respectively. Fodder and drinking-water sufficient.

Angul.—No rain. Weather hot and clear. Sowing of *rabi* and oilseeds retarded. Highland paddy suffering. Rain urgently needed and its abrupt termination causing much anxiety. Rice sells at 12 seers in Sadar and 11 seers in Bissipara. Fodder sufficient, but water is getting scarce. Cattle-disease reported.

Puri.—Rainfall nil. Weather seasonable. Rain is badly wanted for winter rice as well as for the sowing of *rabi* crops. Seeds have been put in in some places. Sugarcane and other miscellaneous crops doing well. Fodder and water-supply sufficient. Common rice sells at 14 seers 7 chitaks per rupee.

Hazaribagh.—Rainfall at Sadar 0·27, Giridih 0·07. Cattle-disease reported from two thanas. Harvesting of *bhadoi* going on. Fodder and water sufficient. Common rice sells at 14 seers per rupee.

Ranchi.—Rainfall nil. Weather cloudy. Prospects of standing crops good, but rain is badly wanted. Harvesting of early winter rice commenced in places. Cattle-disease reported from Ranchi, Karra and Mandar thanas. Fodder and water sufficient. Common rice selling at 13 seers per rupee.

Palamau.—Rainfall at Sadar ·07. Weather seasonable. Rain urgently wanted for upland paddy. *Rabi* sowing has commenced. Cattle-disease in a few villages. Fodder and water sufficient. Rice selling at Sadar at 15 seers 3 chitaks.

Manbhum.—Rainfall at Sadar nil, Gobindpur nil. Weather seasonable. Occasionally cloudy. Prospects of crops good, but rain badly wanted for high-land paddy. Slight rain fell last night in some places and did some good. Fodder and water sufficient. Cattle-disease not reported. Average price of common rice at Sadar is 12 seers and at Gobindpur 10 seers 14 chitaks per rupee.

Singhbhum.—Rainfall nil. Standing crops excellent. Harvesting of *bhadoi* paddy in progress. Rice sells at Sadar at 14 seers per rupee.

General Summary.—The rainfall during the week was light and scattered. No rain fell in Orissa, and the fall in Chota Nagpur was scanty. The districts of Burdwan, Orissa and Chota Nagpur Divisions and also the districts of 24-Parganas, Saran and Sonthal Parganas require more rain. Sowing of *rabi* progressing. Winter rice doing well; outturn is expected to be average if the rest of the season be favourable. The outturn of indigo for which the season was not favourable is estimated at 50 per cent. Sporadic cases of cattle-disease reported from a few districts. Fodder and water generally sufficient. The price of common rice has risen in 7 districts, fallen in 15, and is stationary in the rest (25).

By order of the Lieutenant-Governor of Bengal.

W. C. MACPHERSON,
Offg. Secretary to the Govt. of Bengal.

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF SEPTEMBER 1902.

Soon after the middle of August a period of unsettled weather commenced over the Bay. Shallow depressions formed in rapid succession, and though not causing very strong winds over the Bay, they caused general rainfall inland during their westward passage. The latter part of that month was therefore distinguished by well-marked south-west monsoon conditions over both the Bay and the Province.

These conditions continued for some time during September, and rainfall was copious in all divisions of the Province except Orissa. The probable reason for the deficiency in Orissa may be found in the course followed by the depressions. They moved more into the north-west angle of the Bay than usual; and instead of passing directly across Orissa, they skirted its northern boundary. In following that direction they moved well into the central parts of Bengal, which in consequence received frequent and at times heavy rainfall.

The most noticeable feature in the rainfall distribution is the heavy falls in the northern districts, more especially in North Bengal, where more or less heavy rain was of almost daily occurrence, even when weather was generally settled. The average fall for the whole of North Bengal was 25 inches—nearly 10 inches in excess, and in Bihar the fall was 14 inches, or 4 inches in excess.

The general rainfall was in the main due to three depressions which formed in the north of the Bay—two in the early part of the month and the third towards the end. The first was a fairly well-developed disturbance on the 1st with a centre almost due east from False Point and defect of between ·15 and ·2 inch in the central area, which lay over the north-west angle of the Bay. This depression followed the usual course to the north-west—very similar to that of its predecessors in August, and though rainfall was fairly general in Bengal after the passage inland, it was not heavy except at some of the western stations. While over the Bay the disturbance was slight, the strongest winds being 19 miles an hour at Diamond Island and Saugor Island on the 1st when a rather steep pressure gradient prevailed.

Pressure rose briskly on the 2nd and 3rd, and the distribution had become normal or slightly above except in the extreme south-east of the Bay, where the second disturbance was beginning. Pressure was falling in Burma; the winds were north-westerly, showing the probable approach of a low-pressure area, and very heavy rain fell at Tavoy. At that time the depression was very slight, and between the 3rd and 5th it was only faintly outlined by the coast observations. But on the 6th it was better defined over the north-west angle of the Bay, with a moderately steep gradient towards the south-east.

Up to the 6th the motion of the disturbance had been in the usual north-westerly direction: after that, however, a change occurred, which had an important influence on the rainfall distribution in Bengal. From the north-west angle it moved slowly northwards into the central districts, and there it almost entirely filled up, with general heavy rain in Bengal Proper. The period over which the rainfall due to that depression extended was from the 6th to the 11th in Lower Bengal, and somewhat longer in the northern districts.

After a rapid rise of pressure on the 9th and 10th, the depression had not only disappeared, but a moderate excess had developed over the Province. The pressure gradient over the Bay was less steep than usual, and comparatively settled weather prevailed. Rainfall was light and scattered in the southern districts, but in North Bengal heavy rain fell almost daily and at times extended westward into Bihar.

During the third week unsettled conditions reappeared over the Bay. Pressure was uniform or relatively low over the sea area, and light northerly winds continued from day to day both on the east coast and in parts of the west coast. This faint disturbance developed very slowly, and for a day or two about the 21st had almost disappeared, but from the 22nd, when the central area was near the head of the Bay, development became more rapid. The depression was still shallow on the 24th, when the centre was a short distance to the south of Saugor Island, and after rapid changes of pressure during the following 24 hours, a well-defined cyclonic disturbance was influencing weather over the Province and the head of the Bay.

The rapid deepening of the depression between the 24th and 25th is difficult to account for, but the pressure changes on the latter date were of the kind that would suggest the

movement of a depression from the north-east to south-west; that is, a rapid rise of pressure was shown over Assam and North Bengal and a rapid fall in South-West Bengal and Chota Nagpur, while on the Orissa coast and apparently over the north of the Bay changes were much smaller. The heavy rainfall in North Bengal and the low temperature showed that weather was unsettled in the north-eastern districts, and the rapid steepening of the pressure gradient from north to south over the Province supports the probability that the sudden development of the disturbance between the 24th and 25th was due to the junction of two small depressions—one from the Bay and the other from the north-east.

During the 25th the depression moved rapidly northwards, and on the morning of the 26th the central area was in the west of Bihar. The course followed was probably curved, and it is probable that the centre of the depression approached the Himalayas in a north-easterly direction. On reaching the hills the disturbance, as usual, to a large extent broke up, but there followed what is not so usual: a residual depression moved eastward along or parallel to the Himalayan range, and was shown in the extreme east of the Brahamaputra valley on the 28th.

The chief features of this disturbance were (1) it caused very little squally weather over the Bay, and it was only after the development on the 25th that strongish winds were experienced near the head of the Bay; (2) in its passage northwards over the western districts, and then eastward over Bihar and North Bengal heavy rainfall was general, more especially in North Bengal, where the after effects of the disturbance were experienced.

On the 28th pressure was still low along the Himalayas, but a rapid rise followed on the 29th, and all trace of the depression had then disappeared. The month closed with high pressure over the whole area and general fine dry weather.

Pressure for the whole month was practically normal over both the Province and the Bay. In the western districts, which came more under the influence of the depressions, means are relatively somewhat lower than in the north-east, but the variation is nowhere more than ·02 inch.

Depressions occurred more frequently than usual, especially in the early part of the month, but they were shallow except in the last case, towards the end of the month, when defect in the central area was about ·3 inch.

Temperature was more frequently above the normal in the southern districts, but in the north, where cloudy rainy weather was almost continuous, both maximum and minimum readings remained low, though not usually to any great extent. The variation from normal maximum temperature for the whole month varies from excess of 1° in South-West Bengal to defect of less than 1° in North Bengal. The variation in minimum temperature is very similar, but the defect extends westward into Bihar and is rather larger in North Bengal.

The mean variation was excess of 1° in South-West Bengal, Orissa, and Chota Nagpur, and defect of about 1° in North Bengal. Elsewhere mean temperature was practically normal.

Rainfall over the Province as a whole occurred in three periods except in North Bengal and the adjacent part of Bihar, where it was almost continuous and frequently heavy. In the first of these, that is, during the early days of the month, general light rainfall occurred, chiefly in the western districts because the depression to which it was due moved rapidly westward. On the second occasion about a week later the depression passed into the central districts and filled up there. In consequence the rainfall in Bengal was more general and heavy than during the previous disturbance. On the third, towards the end of the month, heavy rain fell in all parts of the Province, but more especially in the western and northern districts. The heaviest falls reported were 15 inches at Mongpoo, 12 inches at Darjeeling, Kalimpong, and Kurseong. Many stations received between 5 and 10 inches in 24 hours between the 25th and 27th, and one or two scattered stations in the western districts reported falls exceeding 10 inches.

The average fall was 25 inches in North Bengal, 13·6 in Bihar, 12·5 in East Bengal, 12 in Chota Nagpur, about 10 in South-West Bengal, and 7·3 in Orissa. These amounts are all in excess of the normal except the last, which is more than three inches in defect. Lower Bengal received about the normal amount, and there was a large excess in Chota Nagpur, Bihar, and North Bengal, especially North Bengal, where it was just under 10 inches.

The following table gives a condensed summary of the rainfall statistics of the present year up to date for each meteorological division, the first nine columns giving the actual average falls in each division for each month expressed as a percentage of the normal, while

the tenth column gives the actual rainfall of the first nine months as a percentage of the normal rainfall for that period :—

METEOROLOGICAL DIVISIONS.	January.	February.	March.	April.	May.	June.	July.	August.	September.	Actual rainfall of first nine months of 1902 expressed as a percentage of the normal fall for the period.

	Inches.
The total fall of rain from 12th to 18th October 1902	0·01
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·79
The total fall from 1st January to 18th October 1902	58·97
The average fall of the corresponding period for 24 years, Surveyor-General's Office	62·28

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌂ dew; d, drizzling rain.

G. W. KÜCHLER,

CONTENTS.

LIBERALITY OF RAI AMRITA NATH MITTER BAHADUR.

No. 2226T.M., dated Darjeeling, the 22nd October 1902.

From—E. W. COLLIN, ESQ., Offg. Secy. to the Govt. of Bengal, Municipal Dept.,
To—The Inspector-General of Civil Hospitals, Bengal.

I AM directed to acknowledge the receipt of your letter No. 3131D., dated the 29th September 1902, forwarding a copy of a memorandum from the Principal of the Medical College, Calcutta, reporting that Rai Amrita Nath Mitter Bahadur has deposited into the Government Treasury a sum of Rs. 22,036 for the construction of an additional building to be called the Dwarka Nath Mitter's out-door eye dispensary in connection with the Medical College Hospital.

2. In reply, I am to request that you will be so good as to convey the thanks of Government to the donor for his liberality. This letter will be published in the *Calcutta Gazette*.

Rain wanted in thana Nawabganj, where winter rice will suffer in default of it. *Kalai* sowing not finished. No cattle-disease. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Sonthal Parganas.—Rainfall at Sadar 0·89, Deoghur 0·60, Godda 0·44, Jamtara 0·57, Pakaur 0·17. Weather seasonable. Standing crops thriving. A shower of rain is needed in places for highland paddy. Fodder and water sufficient. The extent of indigo-sowing is about 14 annas. Common rice sells at 13¼ seers per rupee at Sadar.

Cuttack.—Rainfall at Sadar 1·07. Fall presumably general. Weather changing. The rain has benefited all standing crops, but more wanted. *Mung* and mustard sowing vary from 10 to 100 per cent. Fodder and water available. Common rice (old) sells at 13¾ seers and (new) at 16 seers 6 chitaks per rupee at Sadar.

Balasore.—Rainfall at Sadar 1·80. People irrigating fields from all available tanks and roadside drains. Rained a little here and there at Bhadrak and Sadar during the week. Prospect somewhat improved. Rice sells at 12 and 13½ seers at Bhadrak and Sadar respectively. Fodder and drinking-water sufficient.

Angul.—No rain. Weather hot and cloudy. Sowing of *mung*, *kulthi* and oilseeds stopped. Highland paddy withering for continuous drought. Rain urgently needed. Common rice sells at 11 seers at Sadar and Khondmals. Fodder sufficient, but water getting scarce. Cattle-disease, reported from Angul.

Puri.—Rainfall 0·20. Fall scanty and unequally distributed. More rain is badly wanted for the winter rice crops as well as for sowing *rabi* crops and also for other standing crops. Fodder and water available. Common rice sells at 14 seers 7 chitaks per rupee.

Hazaribagh.—Rainfall at Sadar nil, Giridih 0·61. Weather seasonable. Harvesting of *bhadoi* going on. Standing crops doing well, but rain wanted. Fodder and water sufficient. Common rice sells at 15 seers per rupee.

Ranchi.—Rainfall at Sadar 0·14. Weather cloudy. Harvesting of paddy in progress. Sowing of *rabi* crops commenced in places. Cattle-disease reported from several thanas. Fodder and water sufficient. Common rice selling at 14 seers per rupee.

Palamau.—No rain. Upland paddy suffering for want of rain. *Rabi* sowing in progress, but much restricted for want of moisture. Cattle-disease in places. Fodder and water sufficient. Prices at Sadar—Rice 15 seers, maize 27 seers per rupee.

Manbhum.—Rainfall at Sadar 0·20, Gobindpur 2·59. Weather occasionally cloudy, but no fall of rain since 21st October. Prospects of crops not good for want of rain which is very badly wanted. Fodder and water sufficient. Cattle-disease not reported. Average price of common rice at Sadar is 12 seers, and at Gobindpur 10 seers 14 chitaks per rupee.

Singhbhum.—Rainfall nil. Weather seasonable. *Rabi* crops need rain. Harvesting of *bhadoi* paddy continues. Average price of rice is 14 seers per rupee.

General Summary.—The rainfall during the week was scattered and, for the most part, light. Rain needed for the winter rice crop in the districts of Burdwan, Bankura, Midnapore, Hooghly, 24-Parganas, Gaya, Saran, Sonthal Parganas, Angul, Puri, Hazaribagh, Palamau and Manbhum. Prospects on the whole fair. Cattle-disease reported from 10 districts. Fodder said to be scarce in the Kishorganj subdivision of the Mymensingh district; elsewhere sufficient. No want of water except in Angul. The price of common rice is dearer in 5 districts, cheaper in 12, and unchanged in the rest.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,
Offg. Secretary to the Govt. of Bengal.

The total fall from 1st January to 25th October 1902	59·52
The average fall of the corresponding period for 24 years, Surveyor-General's Office	63·68

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew; ♂, duststorm; o, overcast; p, passing temporary showers; K, thunderstorm; d, drizzling rain; t, thunder.

(a) The decrease is due (1) to the running of extra troop trains in the corresponding period of 1901, from Kidderpore Docks to North-Western Railway and (2) greater movements of pilgrims.
(b) The decrease is chiefly in coal.
* Added No. of passengers 5,541 and deducted Rs. 16,825 } On account of difference between the approximate and audited figures for the week ended 23rd August 1902.

RESOLUTION ON THE REPORT ON THE CENSUS OF BENGAL TAKEN ON THE 1ST MARCH 1901.

GENERAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 4th November 1902.

RESOLUTION—No. 3180 Mis.

READ—

The Report by E. A. Gait, Esq., I.C.S., Superintendent of Census Operations, Bengal, on the census of Bengal taken on the 1st March 1901.

The fourth complete census of the Lower Provinces of Bengal, which was taken on the night of the 1st March 1901, shows the population of the Provinces within the Lieutenant-Governorship of Bengal, including the Feudatory States, to have been on that date 78,493,410 persons, of whom 39,278,186 were males and 39,215,224 were females.

The Superintendent of the Census Operations in Bengal, Mr. E. A. Gait, I.C.S., has submitted his Report within twenty months from the date of the census or after an interval six months shorter than that occupied in compiling the figures and writing the Report of the Census of 1891.

The Report, tables and other information compiled.

2. The Report is contained in four volumes, of which the first three form Volumes VI to VIB of the Imperial Series. The first volume comprises the Report Proper, the second contains the Imperial Tables in which the district is the unit, and the third the Provincial Tables, in which the unit is the Police circle; the fourth volume, which is the Administrative Report, gives a full account of the procedure adopted in taking the census and in compiling the results, matter which on the occasion of each previous census has been included in the Report Proper. In addition to the abovenamed volumes the Census Superintendent has supplied to each district manuscript volumes of village Census Tables, with an index, giving for each "village" and "mauza" the population by sex and religion. Volumes have also been prepared showing in alphabetical order the classification adopted under the heads (*a*) language, (*b*) caste, (*c*) occupations; these volumes, and another which contains specimens of all forms used throughout the operations, are likely to prove most useful at the next census. Mr. Gait also reports that he has caused to be paged, indexed and bound up, the various reports on the subjects of caste, sub-caste, marriage customs, language, Hindu religion, and Muhammadanism which contain much information that has not been utilised in the Census Report, but which may hereafter prove to be useful.

Work of Enumeration, Compilation, Check and Cost.

3. Mr. Gait has summarised in the Introduction to his Report the important facts connected (1) with the work of the enumeration, and (2) with the compilation of the figures recorded in the schedules; and it will suffice to mention here under the first head that the arrangements made were very similar to those of 1891, but that the number of enumerators excluding Calcutta and the Feudatory States in 1901 was 384,000 against 315,000 in 1891, and of supervisors 28,000 as against 26,000. Under the head of compilation it must be mentioned that the "slip system" which has long been in use in census work in other countries was, for the first time, adopted under the orders of the Census Commissioner, Mr. Risley, in a Bengal Census in 1901; the innovation was a complete success both in expediting the work of compilation and also in reduction of cost.

A very detailed examination of the district tables was made by the Superintendent and by his head office. Mr. Gait himself classified all castes, languages and occupations, as he explains in his Administrative Report, and also made a detailed check of the figures of marriage by caste for all castes and all districts. The tabulation for all the earlier tables was checked throughout item by item, and the testing of the caste and occupation tables, though not so complete, was still very thorough; lastly, all entries which disclosed marked differences in comparison with those of 1891, or which seemed to be open to doubt, were worked out *de novo*.

The total cost of the census just taken in Bengal has been about Rs. 3,90,000 as against about Rs. 7,00,000 expended over the census of 1891. The large reduction of cost is due mainly to the introduction of the slip system, but partly also to the employment of establishment on lower pay and to improved record room arrangements.

The Report Proper.

4. The Report is well arranged, and lucidly written and it indicates remarkable knowledge of the Province and its people. The general description of the Province and the historical retrospect in Chapter I, the account of the religions of Bengal in Chapter IV, the learned disquisition on the languages and castes of the Province in Chapters X and XI especially deserve the attention of scholars and will attract very general interest. The Report is longer than usual, but it is not diffuse and its length is amply vindicated on page V of the Introduction where Mr. Gait points out the vastness of the population of Bengal which is a quarter of that of the whole of India and the greatly varying conditions of caste, language, religion and social customs which distinguish the different parts of the Province. The Report is not only a store-house of information, but it is suggestive and inspiring, and it will undoubtedly prove the starting point of much future research.

In the Imperial Tables the districts have been grouped according to Commissioners' Divisions, but in the Report Proper and in the subsidiary tables, the districts have been arranged in eight natural divisions which correspond nearly but not exactly with the divisions adopted by Mr. O'Donnell in his Census Report for 1891, save that Mr. Gait takes the Presidency Division excluding Khulna away from Western Bengal, and makes it into a division which he calls Central Bengal. This is a suitable arrangement; Mr. Gait's reasons for departing from Mr. O'Donnell's arrangement are given in paragraph 40 of his Report. The statistics for the eight natural divisions are ordinarily taken in the Report as the units for discussion, and the figures for individual districts are dealt with only in Chapter II which treats of the variations in the population, and also in special places where such separate treatment is required.

Another feature of the Report which is deserving of special notice consists of the small maps and diagrams printed with the letter-press. Those which illustrate the Chapter on castes have been prepared on the system recommended by Mr. Jacques Bertillon as explained in paragraph 622 of the Report. These diagrams illustrate the statistics very graphically, and the use of similar diagrams in future reports may be commended.

Density and variations of the population.

5. Turning to the results of the census, it has first to be noticed that of the natural divisions Central Bengal has the greatest density of population, viz., 775 persons to the square mile. Of districts, Howrah with 1,668 persons to the square mile is the most thickly peopled and then follow Dacca with 952 persons, and Muzaffarpur and Saran with 917 and 907 persons to the square mile, respectively: the Chota Nagpur plateau is the area of least dense population, with only 152 to the square mile. The general increase of the population during the decade has been 5·1 per cent. against 7 per cent. in the previous decade. East Bengal with an increase of 10·4 per cent. is the most progressive part of the Province and the general result of this census and of the preceding census is to show that the centre of population of the Province is moving towards the east and south.

It appears from the Report that from 1872 to 1891 there was a steady improvement in the accuracy of the enumeration, and that part of the increases brought out by the Censuses of 1881 and 1891 was therefore unreal: on the other hand that disclosed by the present census is attributable solely to the growth of the population. Mr. Gait writes:—

"The standard of accuracy in 1891 had reached a stage which left but little room for further improvement and, as compared with that census, it is probable that the general gain on this account at the present enumeration does not at the outside exceed 100,000, while in the districts where plague was prevalent, the census of 1901 was less complete than its predecessor. Taking the gain and loss together, it may be concluded that there has been no appreciable improvement in the matter of accuracy at the present census."

A close approximation between the growth of the total population as ascertained by the census and that indicated by the vital statistics of the Province is noticed in paragraph 90 of the report; and paragraphs 235 and 396 to 398 discuss a general fall in the birth-rate.

To the mass of the people the most important events of the decade were the scarcities of the years 1891-92, 1896-97 and 1899-1900, the outbreaks of plague which began in the Province in 1898 and the development of the mining and mill industries which led to a great increase in the industrial population therein employed. To Chittagong the cyclone and storm-wave of 1897, which caused directly or indirectly 50,000 deaths, was a grievous calamity. No connection appears to exist between famine and variations in the population in Bihar (paragraphs 176, 181, 186 and 229 of the report); but it would seem that in Chota Nagpur a certain amount of the mortality is possibly attributable to famine (paragraphs 199, 203 and 206).

Seven districts have decreased in population since 1891, viz., Jessore, Patna, Gaya, Shahabad, Saran, Champaran and Purnea, the decrease ranging from 8·4 per cent. in Patna to 2·2 per cent. in Saran. There can be no doubt that the decrease in Patna is mainly due to mortality from plague, to the flight of the people from their homes on account of that disease, and to incomplete enumeration in certain places due to the disorganisation of the census

arrangements by plague. In Saran the loss of population is also accounted for by the plague epidemic which was more virulent there than in any other district of this Province, except Patna. In Jessore, Champaran and Purnea, the decrease is due to the prevalence of fever and in Purnea also to a very severe outbreak of cholera which occurred in the year 1900. In South Bihar generally, Mr. Gait finds a diminished birth-rate (paragraph 396).

That Bengal like the rest of India is a land of villages and not towns has long been known, and it appears that at the present time out of every 100 persons in the Province, 95 live in villages and 5 in towns. In the statistics for towns the most striking features are the increase in the population of Calcutta and Howrah and their suburbs, and the decrease in the towns of Bihar, which was due to plague mortality and to temporary desertion caused by plague.

Migrations of the people.

6. The great and growing immigration to Bengal Proper from Bihar and the United Provinces, the emigration from Chota Nagpur to the Assam tea gardens and from the Sonthal Parganas to the Barind tract of Northern Bengal are the most noticeable features of the "migration" statistics. The immigrants from Bihar and the United Provinces come to work in the mines of the coal area, and in the mills of the Metropolitan districts, while in the districts of Bengal proper generally they are employed as field labourers, on earthwork on railways, roads and tanks in the towns (and especially in Calcutta, where 40 per cent. of the inhabitants are Hindi-speaking), they are mostly day-labourers, servants and palki-bearers. Chota Nagpur, though the most sparsely populated tract of the Province, sends out not only the greatest number of emigrants but also the largest proportion as compared with its population; next to Chota Nagpur the districts of Bankura, Hooghly, and Saran send out the greatest proportion of emigrants. More than 10 per cent. of the persons born in these districts were enumerated away from their homes. It has generally been supposed that, except in Chota Nagpur, pressure on the soil was the chief factor in determining the extent of migration, but Mr. Gait strikes a new note and makes the following interesting remarks as to the capacity of rice-growing tracts to support large populations:—

"Speaking generally, it may be said that Eastern Bengal is capable of supporting a much greater population per square mile than Bihar and that in Bihar the tracts which can support most people are those where rice is grown. This explains why Muzaffarpur and Durbhanga with their extensive rice tracts are less dependent on earnings outside the district than Saran which is reported to be very fertile and is highly cultivated and well irrigated but which has a comparatively small area under rice cultivation. Purnea, whence the emigration is least, is almost wholly devoted to the growth of rice."

The theory is ingenious, but, on the other hand, it is to be remembered that it is the rice-growing tracts of Bihar which are most liable to famine, and that Saran, which is a "three harvest" district, is the district of North Bihar most immune from famine.

Europeans and Eurasians.

7. The number of Europeans in the Province has increased from 22,773 in 1891 to 27,489 in 1901 and the number of Eurasians from 15,162 to 23,114. The Superintendent considers this return to be more accurate than that of the last census when the Eurasians amounted to only 39 per cent. of the combined population of the two races compared with 46 per cent. on the present occasion. About half of the Europeans and nearly two-thirds of the Eurasians were enumerated in Calcutta. Amongst the Europeans the males aged 15 and over are more than twice the number of the females.

Religions.

8. Nearly two-thirds of the population are Hindus by religion and rather less than one-third are Muhammadans. Next in number at a long interval are those who are classed as Animists, of whom two and three quarters millions have been recorded, chiefly in the Chota Nagpur plateau; the Christians, who are over a quarter of a million, stand fourth, and are followed by the Buddhists, who are under a quarter of a million in number. The aggregate of persons of all other religions is less than fifteen thousand.

The Hindus are predominant in Bihar and Orissa, on the eastern edge of the Chota Nagpur plateau, and on the western fringe of Bengal proper; the Muhammadans, who have increased in number nearly twice as rapidly as the Hindus during the past decade, are almost as numerous as the Hindus in Central Bengal, are half as many again in North Bengal, and are more than twice as many in East Bengal. Christians have increased 45 per cent. in the last ten years, and are three times as numerous as they were at the census of 1872; the converts in the Ranchi district amount to nearly half the Christians in the Province.

It is not possible in this place to do more than mention the interesting discussions in Chapter IV of the Report on the origin of the Muhammadans of Bengal, the Muhammadan sects, the Hindu sects and godlings, and the traces of Buddhism in Bengal. Mr. Gait mentions in paragraph 380 the valuable researches made by Pandit Hara Prashad Shastri with regard to the last-mentioned subject

The ages of the people.

9. The age returns, as in former censuses, are probably the least trustworthy of all the statistics collected. This inaccuracy is due to ignorance, to a preference for certain numbers, and in a lesser degree to wilful misstatements. In view of the admitted inaccuracy of the figures, which is especially noticeable among females, Mr. Gait has used the age statistics chiefly for purposes of comparison: a more elaborate treatment of these statistics will be forthcoming, it is understood, in the Imperial Census Report. It is suggested that the birth- and death-rates were over-estimated in 1891 (paragraph 392), and reasons are given which carry conviction for the contention that there has been a decline in the general birth-rate since 1891 (paragraphs 396 to 398).

Sex and marriage.

10. With regard to the proportion of the sexes, Mr. Gait writes:—

"At the census of Bengal taken in 1872 there was an equal number of each sex, but in 1881 the females exceeded the males by 8 per 1,000. Ten years later the excess fell to 5 per mille, and now the females are fewer than the males by 2 per mille. The actual deficiency in the number of the weaker sex at the present census is 62,962, but this result is due to migration. If only persons born in Bengal are taken into consideration, the females outnumber the males by 160,375, or about 3 per mille."

As was noticed in the census of 1891, the female sex is proportionately more numerous than the male in Bihar, in Chota Nagpur, and in Western Bengal, but males are in excess in the eastern half of the Province, and especially in the districts where the Mongoloid element in the population is strongest, viz., in Jalpaiguri, Cooch Behar, Dinajpur, the Chittagong Hill Tracts, and Hill Tippera.

It is a commonplace that every one in Bengal marries. The average age of marriage for girls all over the Province was stated in 1891 to be eleven years. Doubtless because of the inaccuracy of the age statistics, Mr. Gait has not attempted to state the average age of marriage for the Province or for particular areas except Chota Nagpur, where, he says, that the usual age of marriage for a girl is between 17 and 18. But the general conclusions of the census of 1891 stand good for the later census. Hindu girls, except in Orissa, are married earlier than Muhammadan girls. The marriage of infants below ten years is most common in Bihar and specially in the Darbhanga district and parts of Muzaffarpur and Bhagalpur. The proportion of widows and of married girls under ten years of age is declining slightly.

The marriage customs of the different Hindu castes are examined in detail, and Mr. Gait arrives at the conclusion that the price paid for a bride or bridegroom depends ultimately on the laws of supply and demand (paragraph 424), and that the age at which a girl is married varies to a great extent with the sum which has to be paid for her (paragraph 438). A former theory that infant-marriage in India is based on the practice of hypergamy amongst the higher castes which leads a man to seek to marry his daughter to a suitable bridegroom at the earliest possible moment, and that the lower castes have copied the practice of the higher castes in this matter was contested by Mr. O'Donnell in his report for 1891. Mr. Gait supports Mr. O'Donnell's conclusions and finds that as a rule the lower castes marry their daughters earliest. The differences are, however, in the main local rather than personal (paragraphs 439 and 440).

It is usually thought that infant marriage and the prohibition of widow remarriage go together; but this is not the case. Where infant marriage is most common, widows freely remarry and (in some cases) fetch a higher price than virgin brides, owing to their greater skill in the caste occupation (paragraphs 441 and 424).

Infirmities.

11. The infirmities recorded at the census as on former occasions were insanity, deafmutism, blindness and leprosy. The number of persons afflicted with these infirmities shows a progressive decline due, as is believed, in the main to more accurate enumeration and more careful exclusion of persons whose infirmities, whatever they might be, did not fall within the scope of the sanctioned definition.

The maps given in paragraphs 457, 463, 470 and 476 of the Report show in very striking manner the local prevalence of infirmities. Insanity is most prevalent in North Bengal and in Chittagong and the Chittagong Hill Tracts, and Mr. Gait finds that the prevalence is a matter of race and that the Koch is specially liable to this infirmity. Deafmutism is generally associated with cretinism and goitre: it is most common in the Himalayan and sub-Himalayan districts, and it is especially prevalent along the course of certain moribund rivers near the foot of the Himalayas. Deaf mutes are very short-lived (paragraph 466). Blindness is most common in the hot and dry districts of South Behar and Chota Nagpur. In connection with the decrease in the number of blind persons recorded, Mr. Gait notices that 15,987 successful operations for cataract were performed in the public hospitals and dispensaries in the last decade as against 2,434 during the previous ten years. The great centre of leprosy in these Provinces lies in the three western districts of the Burdwan Division, viz., Bankura, Birbhum and Burdwan and in the adjoining district of Manbhum. In the Province generally the census shows a decrease in the number of lepers, who number 48 for every 100,000 as compared with 60 in the last census; but there appears to have been a spread of the disease in Manbhum and the Sonthal Parganas. The decrease is probaly due to more careful enumeration resulting in the exclusion of those who are affected merely with leucoderma.

Education.

12. At the census of 1891 the population was divided into three categories, viz., literate, learning and illiterate, but at the census of 1901 the population was broadly divided into two great classes only, the literate and the illiterate, *i.e.*, of those who are or are not able both to read and write. This change of system, though it has simplified the work, has obscured the results and made a detailed comparison difficult. Comparing the figures, however, for persons over 15 years of age, the number of literate males in the whole Province is 146 per 1,000 as against 137 in 1891, and the number of literate females 7 per 1,000 against 4 only in 1891. It will be noticed that the figures given in the 484th paragraph of the report show the absolute and not the proportional increase of literacy since 1891.

Wide as is the field for the improvement of primary education among the male population, still more remains to be done among the female population, and the progress during the last decade has been proportionately greater among females than among males, though not absolutely so great. Mr. Gait urges in his 485th paragraph that female education has made great strides during the decade; but looking to the very small number of educated females in the whole Province, this seems too confident a statement, and it can hardly be accepted for any area except Calcutta.

The continued and increasing superiority of the Hindus over the Muhammadans in literacy, the large amount of literacy among converts to Christianity, and the marked superiority of the metropolitan area over the rest of the Province are the most striking features of the chapter dealing with the statistics of education. The most backward part of the Province in education, in spite of the efforts of the Christian Missionaries, is Chota Nagpur, and next lowest is North Bihar.

The statistics of knowledge of English may with advantage be more fully examined than has been done in paragraph 486 of the Report. Table VIII

shows that in the whole Province 351,310 males and 22,972 females are "literate in English," *i.e.*, are able to read and write English. Deducting from these numbers 24,156 males and 15,089 females who returned English only as their "language ordinarily used," *i.e.*, the European and Eurasian population, it appears that there are 327,154 males and 7,883 females among the native population who can read and write English. So far as these figures can be compared with the statistics of the last census, it would appear that, as might be expected, there has been a considerable increase in the number of English-knowing persons among the native population of the Province since 1891.

Language.

13. Mr. Gait's chapter on the languages of the Province is of the highest interest.

Omitting Europeans and Eurasians but including all other immigrants, the people of the Province speak 74 languages, viz., 15 grouped under the Aryan Family, 16 under the Munda Family, 9 under the Dravidian Family, and 34 under the Tibeto-Burman Family. That there has been no unnecessary sub-division of languages in this category will be understood when it is mentioned that Hindi includes Urdu and Bihari the latter of which Dr. Grierson once divided into seven dialects. Out of every 1,000 persons in the Province 528 speak Bengali, 341 Hindi (including Bihari), 79 Uriya and 1 speaks Khas (or Nepali-Hindi) leaving 51 persons per 1,000 for all the other 70 languages put together. It is in the Chota Nagpur plateau with its Munda and Dravidian dialects, in Darjeeling and Sikkim with their Tibeto-Himalayan dialects, and in the Chittagong Hill Tracts where the Kuki, Chin and Bodo dialects are spoken that the great congeries of non-Aryan languages are found. Mr. Gait has avoided a detailed examination of Aryan dialects partly in order to curtail his report, and also because Dr. Grierson is dealing with these dialects; but he has discussed the Himalayan, Sikkim and Nepal groups of languages more fully than the others, because they have not yet formed the subject of any reports in the linguistic survey.

The conclusion at which Mr. Gait arrives in his 545th paragraph as to the absence of any necessary connection between race and language is noticeable.

Castes.

14. The chapter on castes is the longest in the volume, and takes up nearly one-fourth of the Report. Much labour was given to this part of the enumeration. A caste index largely based on Mr. Risley's "Caste and Tribes" was circulated to Census Officers of higher grades, and greatly facilitated the work, but even with this help, the classification of doubtful entries gave immense trouble. The discussions on the origin of caste (paragraphs 550 to 574), and on the social precedence of castes (paragraphs 575 to 621) have been inserted in accordance with directions given by the Census Commissioner.

With insufficient time at his disposal for working up the results of his enquiries, or for following up the numerous and difficult side issues which arose in the examination of the caste figures, Mr. Gait has nevertheless made a most important contribution in this chapter to the ethnography of the Province, and has presented several obscure questions in a clearer light than has before been shed on them.

The origin of existing castes is discussed in paragraphs 566—574 of the report and the origin of the restrictions which characterise the institution of caste is distinguished from the question as to how the existing castes were recruited. The views held by M. Senart that the sub-caste is the true caste, and that caste was a natural development of the family and tribal organization of the Aryans are cited in paragraph 562; but Mr. Gait holds that caste is more likely to be due to the influence of the panchayats of the functional groups. He quotes the definitions of "caste" given by his predecessors in this field of enquiry—Messrs. Nesfield, Baines and Risley, and propounds the following careful definition of his own:—

"A caste is an endogamous group or a collection of such groups bearing a common name who, by reason of similarity of traditional occupation and reputed origin, are generally regarded, by those of their countrymen who are competent to give an opinion, as forming a single homogenous community, the constituent parts of which are more nearly related to each other than they are to any other section of the society."

Mr. Gait adds that the decision as to caste must rest with enlightened public opinion, and not with public opinion generally, as it often happens that a Hindu knows little about any caste other than his own.

The orders issued with regard to arrangement of castes according to their social status gave rise to many acrimonious disputes, *e. g.*, specially with reference to the relative precedence of the Baidyas and the Kayasths and the position of the Chasi-Kaibarttas. In order to avoid as far as possible giving offence to rival castes, Mr. Gait has made his different groups fairly wide, and as a rule has avoided mention of the relative position of castes in the same group.

Of the castes other than Muhammadan there are fifteen having more than a million members, viz., (in order of numbers) the Ahirs (or Goalas), Brahmans, Kaibarttas, Rajbansis (or Koches), Namasudras (Chandals), Santals, Chamars (Muchis), Rajputs, Kurmis, Telis, Kayasths, Koiris, Dosadhs, Babhans and Bagdis. The Ahirs who are nearly four millions are a long way the most numerous; next follow the Brahmans with nearly three millions, the Kaibarttas who are nearly two and-a-half millions, the Rajbansis with over two millions, the Namasudras and the Santals each with over eighteen hundred thousand; the Chamars with sixteen hundred and twenty-six thousand; while the other eight castes named are each between a million and a million-and-a-half strong. The distribution of the main castes is illustrated by a series of maps which show in a very striking way how strictly local are many of the main groups. The Babhans, Dhanuks and Koiris for instance are confined to Bihar, the Bagdis and Sadgops to West Bengal, the Chasas and Khandaits to Orissa, the Chandals to East Bengal, the Pods to Central Bengal and the Rajbansis to North Bengal.

Among the notes on particular castes and tribes possessing special interest are to be mentioned those regarding the Saraks (paragraphs 778—780) an interesting archaic community, probably of Jain or Buddhist origin, found in Western Bengal, Chota Nagpur and Orissa, the notes on the disputed question of the origin of the Rajbansis (paragraph 617), on the Sectarian castes (paragraphs 782—787), on Muhammadan castes and tribes (paragraphs 812—817), and on the Nepali tribe of Newars (paragraphs 886—894).

Occupations.

15. The scheme of occupations prescribed for the census was very elaborate, comprising, as it did, eight classes, twenty-four orders, seventy-nine sub-orders and five hundred and twenty groups, and the preparation of the returns under this head was therefore very laborious. The Superintendent states (paragraph 905) that from one-third to a quarter of the entire expenditure on the census operations was incurred in compiling the occupation tables. The arguments used by Mr. Gait in paragraph 905 in favour of having a simpler classification in future are well worthy of attention, and seem to be conclusive against the attempt to collect statistics of occupation in such elaborate detail as has hitherto been done. This seems to be a case where elaboration defeats itself and where the truth is to be obtained only by a broad and general classification of occupations.

Changes of system which are noticed in paragraph 906 and following paragraphs of the Report have confused comparison with the corresponding return for 1891, and make detailed examination useless. Speaking generally, however, it appears that nearly 57 millions or 72·5 per cent. of the population are classed under the main head as employed on "Pasture and Agriculture;" nor is this an exhaustive statement of persons occupied with agriculture as it is probable that a considerable number of the five-and-a-half million general labourers returned as non-agricultural are at some seasons of the year employed in agriculture, and it will be safe to say that over three-fourths of the population are dependent on the land. Artisans and others classed under the head "Preparation and supply of material substances" make up over 9½ millions or 12 per cent., and unskilled labourers, not agricultural, are over 6 millions or 7½ per cent. of the population. The statistics which have been collected showing the small share of high appointments in Government service which are held by Muhammadans, and the practical monopoly of all such

appointments held Hindus by members of the Kayasth, Brahman and castes may be mentioned as a feature of this chapter.

16. In conclusion, the Lieutenant-Governor desires to record his appreciation of the labours of the Superintendent, and the District Officers as well as of a large number of officials and non-officials which have resulted in a most successful census of the people, and he has in addition to thank Mr. Gait for a Report of singular merit and ability. Mr. Gait's commendation of the work of his Assistants Mr. Howard, Mr. Moberly, Babu Jamini Mohan Das, Babu Mon Mhan Ray and Mr. Manmatha Nath Ghosh will be recorded in the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,
Offg. Secretary to the Government of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 3rd November 1902.

Burdwan.—No rain. Weather cloudy. Threshing of *aus* and sowing of *rabi* continues. Condition of *aman* and other standing crops fair, but some rain wanted. Fodder and water sufficient. Common rice sells at 11 seers per rupee.

Birbhum.—Rainfall at Sadar nil, Rampur Hât nil. Weather cloudy. *Aus* being harvested. Sowing of *rabi* commenced. Sugarcane thriving. Fodder sufficient. Coarse rice 13 seers per rupee.

Bankura.—No rain. Weather cloudy and hot. Standing crops suffering for want of rain. Common rice sells at 12½ seers per rupee. Fodder and water sufficient.

Midnapore.—Rainfall at Sadar nil, Tamluk and Ghatal nil, Contai 2·21. Rain badly wanted all over the district. Weather hot and cloudy. Crops withering for want of rain. *Rabi* sowings going on. Fodder and water sufficient. Cattle-disease reported from Binpur thana. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Contai	12	9	
Tamluk	11	0	
Ghatal	12	0	

Hooghly.—Rainfall nil. Rain badly wanted in many places for paddy winter and *rabi* crops. Sowing of *rabi* continues. Weather seasonable. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Serampore	10	2	
Arambagh	11	2	

Howrah.—Rainfall at Sadar nil, Ulubaria nil. Rain badly wanted. *Aman* crops on high land withering. Washing of jute still continues. Sugarcane is doing well. Lands are being prepared for *rabi* sowings which have been commenced in some places. No cattle-disease. Fodder and water sufficient. Weather sometimes cloudy. Common rice sells on an average 11 seers per rupee.

24-Parganas.—Rainfall at Sadar or subdivisions nil. Weather cool at night. State and prospects of crops fair. Crops on high lands are suffering for want of rain in Barasat and Diamond Harbour subdivisions. In Diamond Harbour the want of rain is reported to be serious. Sowings of *rabi* crops going on and lands being prepared for them. Common rice sells at 11 seers per rupee. Condition of cattle good. Supply of fodder and water sufficient.

Nadia.—Rainfall nil. Standing crops require rain in Ranaghat subdivision. Sowing of *rabi* and oilseed crops continues. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Kushtia	11	4	
Chuadanga	11	4	
Meherpur	11	5	
Ranaghat	12	0	

Murshidabad.—Rainfall at Lalbagh ·02, Sadar, Kandi, Jangipur nil. Weather seasonable. Prospect of *aman*, sugarcane and *kalai* good. Cultivation of *rabi* crops going on. No cattle-disease reported from anywhere. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	8	per rupee.
Kandi	14	0	
Jangipur	12	0	
Lalbagh	12	0	

Jessore.—No rain at Sadar or subdivisions. Weather seasonable. Prospects of crops good. Fodder and water sufficient. Cattle-disease reported from Mahamedpur thana in Magura subdivision. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Jhenida	12	0	
Narail	11	8	
Bongaon	13	0	
Magura	11	8	

Khulna.—Rainfall nil. Weather seasonable. *Aman* paddy doing well. Cultivation and sowing of *rabi* crops commenced. Fodder and water sufficient. A few cases of cattle-disease reported from Dumuria and Paikgachha. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	6	per rupee.
Bagerhat	11	8	
Satkhira	10	8	

Rajshahi.—Rainfall at Sadar 0·01, Naugaon and Nator nil. Prospects of crops good. Sowing of *rabi* in progress. Condition of cattle good. Fodder and water sufficient. Common rice selling at 12¼ seers per rupee.

Dinajpur.—No rain. Weather seasonable. Standing crops good. Cattle-disease reported from two thanas. Fodder and drinking-water plentiful. Rice selling at 12 seers per rupee.

Jalpaiguri.—Rainfall nil. Weather seasonable. *Haimanti* paddy doing well. Preparation of fields for tobacco and potato going on. Common rice sells at 10½ seers a rupee. Fodder and water sufficient.

Darjeeling.—Rainfall at Sadar 0·00, Kurseong 0·00, Siliguri 0·00. Weather seasonable. *Hills—Haimanti dhan*, *bara* and *chhota marua*, *phapar*, and *kalai dal* doing well. *Terai*—Prospects of standing crops good. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	8	0	per rupee.
Terai	10	0	

Maize sells at Darjeeling at 21 seers and at Kalimpong at 28 seers per rupee.

Rangpur.—Rainfall nil. Weather seasonable. Lands are being prepared for mustard and tobacco. Prospects of standing crops favourable. Water and fodder sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	9	8	per rupee.
Nilphamari	10	8	
Kurigram	8	8	
Gaibanda	11	0	

Bogra.—No rain. Weather seasonable. Lands being prepared for *rabi* crops. Prospects good. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Pabna.—Rainfall at Sadar 1·12, Sirajganj nil. Weather cool and partially cloudy. Prospects of standing crops fair. *Rabi* being sown. Fodder and water sufficient. Rice sells at 10 seers per rupee.

Dacca.—Rainfall nil. Weather seasonable. Prospects of crops good. Fodder available. No cattle-disease. Common rice sells at 11 seers per rupee.

Mymensingh.—Rainfall nil. Weather seasonable. Prospects of winter rice good. *Rabi* sowing going on. Water sufficient. No cattle-disease. Common rice selling as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Kishorganj	13	5	
Netrokona	13	2	
Tangail	10	14	

Faridpur.—Rainfall nil. Weather cloudy and warm. State and prospects of standing crops good. Fodder sufficient. No cattle-disease. Common rice sells at 11½ seers a rupee.

Barisal.—Rainfall nil. Weather cloudy and sultry. Prospects good. Fodder sufficient. Common *aman* 11 and *aus* 12 seers per rupee.

Tippera.—Rainfall at Sadar ·16, Brahmanbaria and Chandpur nil. Weather seasonable. Prospects good. *Aman* paddy in ear and progressing well. Cultivation of *rabi* crops has commenced. Fodder and water available. Cattle-disease reported from Chandpur. Common rice sells as follows:—

	Srs.	ch.	
Sadar	13	0	per rupee.
Brahmanbaria	10	10	
Chandpur	11	0	

Noakhali.—No rain. Weather rather hot for the season. Lands being prepared for *rabi* crops. Prospects good. Fodder and water sufficient. No cattle-disease. Common rice sells at Sadar at 12 seers and at Feni at 13 seers 7 chitaks per rupee.

Chittagong.—No rain during the week. Cultivation of *rabi* crop is going on. Water and fodder sufficient. Common rice selling at 12 seers 12 chitaks per rupee.

Chittagong Hill Tracts.—Rainfall nil. Weather hot. Harvesting continues. No cattle-disease. Common rice sells at 17 seers per rupee.

Patna.—Weather seasonable. Sowing of *rabi* crops going on. Sugarcane looks well. Standing crops doing well. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Patna	13	0	per rupee.
Barh	13	0	
Bihar	11	0	
Dinapore	12	12	

Gaya.—Rainfall at Sadar 0·33, Aurangabad 0·27, Nawada 0·14, Jahanabad *nil*. Weather seasonable. Paddy and sugarcane doing well. Sowing of *rabi* continues. No cattle-disease. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Shahabad.—Rainfall at Buxar 0·02, Bhabua 0·05, Sasaram 0·32, Dehri 0·32. *Rabi* sowing continues. Prospect of paddy and sugarcane generally good. Fodder and water abundant. Rice sells at Sadar 13 seers per rupee.

Saran.—Rainfall at Sadar 0·03, Siwan 0·03, Gopalganj *nil*. Weather seasonable, but sometimes cloudy. *Rabi* sowing in progress. Rain wanted for paddy. Standing crops doing well. Fodder and water sufficient. No cattle-disease. Rice sells at 14 seers per rupee.

Champaran.—Rainfall nil. Weather seasonable. Prospects of winter rice excellent. Preparation for *rabi* sowings going on. Cattle-disease reported. Fodder and water sufficient. Common rice sells at 17½ seers and maize at 30 seers per rupee.

Muzaffarpur.—Rainfall nil. Weather fair. *Rabi* sowings going on. Prospect of crops good. Fodder and water sufficient. Prices are—Common rice 12 and maize 26 seers a rupee.

Darbhanga.—Rainfall nil. Prospect of standing crops good. *Rabi* sowing in progress. Fodder and water sufficient. Cattle-disease is reported from Samastipur and Phulparas thanas. Common rice sells as follows:—

	Srs.	ch.	
Sadar	13	3	per rupee.
Madhubani	12	11	
Samastipur	14	0	

Monghyr.—Rainfall nil. Weather seasonable. Standing crops doing well. Sowing of *rabi* crops vigorously going on. Fodder and water sufficient. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	4	per rupee.
Begusarai	12	0	
Jamui	13	0	

Bhagalpur.—Rainfall at Sadar, 0·05, Madhipura, Banka and Supaul 0·00. Weather seasonable. Prospect of winter rice continues favourable. Standing crops doing well. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	13	14	per rupee.
Banka	12	8	
Madhipura	13	8	
Supaul	14	0	

Purnea.—No rain. Cold season setting in. Prospects of winter rice good. *Rabi* sowings going on. No cattle-disease. Fodder and water sufficient. Common rice sells at Sadar and Kishanganj at 11 seers and at Araria at 14 seers per rupee.

Malda.—Rainfall at Sadar, Chanchal and Gajol nil, Sibganj ·20. Weather seasonable. Prospects of winter rice good except in thana Nawabganj, where rain is wanted for it. Prospects of *kalai* good. Sowing of *rabi* going on. Cattle-pox reported from thana Gajol. Fodder and water sufficient. Common rice sells at 13½ seers per rupee.

Sonthal Parganas.—Rainfall at Sadar 0·03, Deoghur 0·04, Godda 0·02. Weather seasonable. Prospect of winter rice and other standing crops favourable. Harvesting of *aus* continues in places. Outturn good. The extent of sowing of mustard, linseed and wheat is over 13 annas on an average. Fodder and water sufficient. The price of common rice at Dumka is 13 seers a rupee.

Cuttack.—No rain. Weather unsettled. More rain badly wanted for all standing crops. *Laghu sarad* maturing, having suffered in many parts for want of rain. Fodder and water available. Common rice (old) 13 seers 12 chitaks and (new) 16 seers 6 chitaks per rupee at Sadar.

Balasore.—Rainfall at Sadar ·04. Fall general. Prospects of winter rice crop much improved. *Beali* being harvested. Sugarcane thriving. *Rabi* sowing commenced. Rice sells at 16 and 14 seers at Bhadrak and Sadar respectively. Fodder and water sufficient.

Angul.—Rainfall at Angul nil, Chhendipada 0·53, Bissipara 2·37. Weather hot and cloudy. Scanty rainfall in the interior of Angul is reported. General rain is very urgently wanted. Prospects in the Khondmals much improved owing to recent rain. In Angul the conditions are the same. Paddy crops are withering and sowing of *rabi* is retarded. Common rice sells at 11 seers at Sadar and Khondmals.

Puri.—Rainfall at Sadar 0·47. It is unevenly distributed, being heaver in the north-western part of the district. Weather seasonable. More rain is wanted for winter rice crop. Upland winter rice crop ripening in some places. Sowing of *rabi* crops commenced. Other miscellaneous crops doing well. Fodder and water available. Common rice sells at 13 seers 14 chitaks per rupee.

Hazaribagh.—Rainfall at Sadar 0·27, Giridih nil. Weather cloudy. Harvesting of paddy commenced. Standing crops doing well. Cattle-disease reported from one thana. Fodder and water sufficient. Common rice sells at 15¾ seers per rupee.

Ranchi.—Rainfall at Sadar 0·17. Weather cloudy. Harvesting of paddy continues. Wheat, gram and mustard are being sown. Cattle-disease are reported from Lohardaga, Sisai, Karra and Silli thanas. Fodder and water sufficient. Common rice sells at 14½ seers per rupee.

Palamau.—No rain. Weather cloudy. Upland paddy suffering greatly for want of rain. *Rabi* already sown. Sugarcane still doing well. Cattle-disease in some places. Fodder and water sufficient. Prices at Sadar—Rice 14 seers 10 chittaks and maize 23 seers 10 chittaks per rupee.

Manbhum.—Weather cloudy. There was a good shower yesterday which has done immense good to paddy crop. Prospect of crops now good. Fodder and water sufficient. Cattle-disease not reported. Average price of common rice at Sadar is 12 seers, and at Gobindpur 10 seers 14 chitaks per rupee.

Singhbhum.—Rainfall ·03. Harvesting of *bhadoi* paddy still in progress. Rearing of *tassar* commenced. Average price of rice is 14 seers per rupee.

General Summary.—Local showers are reported from a few districts, but the fall was everywhere scanty except in parts of Midnapore, Pabna and Angul. Standing crops are suffering for want of rain in the districts of Bankura, Midnapore, Howrah, 24-Parganas, Cuttack and Palamau. Rain is urgently wanted in the Diamond Harbour subdivision of the 24-Parganas and in Angul. Rain also needed in Burdwan, Hooghly, Saran, Puri, and in parts of Nadia and Malda. Prospects fair. Sporadic cases of cattle-disease reported from 10 districts. Fodder and water generally sufficient. The price of common rice has risen in 9 districts, fallen in 10, and is stationary in the rest (28).

The average fall of the corresponding period for 24 years, Surveyor-General's Office	64·52

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; ≏, dew.

N. B.—In the weekly report from 14th to 20th September 1902, *read* 29·808 *for* 29·80 as the mean pressure barometer of the 19th September 1902.

REPORT ON THE ROAD AND PUBLIC WORKS CESS OPERATIONS OF THE LOWER PROVINCES FOR THE YEAR 1901-1902.

NOTIFICATION No. 4833R P.

The 11th November 1902.—The following extracts from the Report of the Board of Revenue on the Road and Public Works Cess operations in the Lower Provinces for the year 1901-1902 are published for general information.

E. W. COLLIN,
Offg. Secy. to the Govt. of Bengal.

No. 759A., dated Calcutta, the 29th August 1902.

From—A. EARLE, ESQ., Offg. Secretary to the Board of Revenue, L. P.,
To—The Secretary to the Government of Bengal, Financial Department.

THE HON'BLE MR. C. W. BOLTON, C.S.I.

I AM directed to submit the Board's Report on the Road and Public Works Cess operations for the year 1901-1902.

Rate, land revenue demand, and gross rental.

3. As in the preceding year, the cesses were levied at the maximum rate of one anna in the rupee in the 43 districts in which the Act is in force. The Act has been introduced in the recently re-settled estates in the Sonthal Parganas, and

valuation is in progress. The current demand of land revenue in the 43 districts is Rs. 3,96,95,675, and the gross rental, or valuation, amounts to Rs. 17,03,53,369.

Demands, collections, balances, and remissions.

4. The demands, collections, balances, and remissions of the year are compared with those of the two preceding years in this table :—

Year.	Demand.			Collections.	Percentage of total collections on current demand.	Balance.	Percentage of the balance on the total demand.	Remissions.
	Current.	Arrear.	Total.					
	Rs.	Rs.	Rs.	Rs.		Rs.		Rs.
1899-1900 ..	90,84,990	19,09,787	1,09,94,777	93,13,990	102·5	17,04,598	15·6	45,257
1900-1901 ...	91,85,325	16,74,304	1,08,59,629	92,02,874	100·1	16,71,948	15·4	70,321
1901-1902 ...	93,26,543	16,75,523	1,10,02,066	93,13,325	99·8	16,84,918	15·3	66,873

The current demand shows an increase of Rs. 1,41,218 over that of the previous year. This was mainly caused by revaluations in the districts of the 24-Parganas (Rs. 38,559), Nadia (Rs. 3,874), Dacca (Rs. 16,288), Backergunge (Rs. 10,725), Tippera (Rs. 12,207), Noakhali (Rs. t,586), Shahabad (Rs. 21,722), and Ranchi (Rs. 18,730), by the assessment of coal-mines and resumed *chakaran* (service) lands in Burdwan, and by the valuation of *ghatwali* lands in Birbhum. The arrear demand increased by Rs. 1,219, but was Rs. 2,34,264 less than that of 1899-1900. The collections were Rs. 1,10,451 more than in the previous year. Owing to the considerable increase in the demand of the year, there was a slight decline (from 100·1 to 99·8) in the percentage of total collections on the current demand. The outstanding balance has increased by Rs. 12,970, but is less by Rs. 19,680 than that of 1899-1900. The percentage of the balance on the total demand is almost the same as in the preceding year. The remissions, which amounted to Rs. 66,873, against Rs. 70,321 in the previous year, were granted chiefly in the districts of Burdwan (Rs. 16,599), Birbhum (Rs. 3,148), Khulna (Rs. 4,509), Backergunge (Rs. 5,029, Tippera (Rs. 3,074), and Singhbhum (Rs. 16,608), and were on account of revaluations of estates under section 13 of the Cess Act, erroneous and double assessments, diluvion, revision of assessments of mines and forests, and acquisition of land for the Assam-Bengal Railway.

1. Mymensingh.
2. Muzaffarpur.
3. Hooghly.

20. Darbhanga.
21. Malda.
22. Birbhum.
23. Jalpaiguri.
24. Rajshahi.
25. Saran.

5. The districts are grouped in two classes, that is, (*i*) those in which the collections attained the prescribed standard of 100 per cent. on the current demand, or more, and (*ii*) those in which the collections were short of that standard. The marginally-noted districts fall under the first class, and in their case no explanation is needed. In Mymensingh and Muzaffarpur the percentage of collections was above 105. It was less than 100 in the 18 districts noticed below, against 19 in the previous year:—

(*i*) In Puri (99·8), Tippera (99·7), Jessore (99·6), Palamau (99·3), Noakhali (98·9), 24-Parganas (98·7), and Purnea (98·2), the percentage exceeded 98, and explanation of the failure to reach the standard is not called for. The explanations in regard to the remaining 11 districts are as follow.

(*ii*) *Bankura* (97·5).—The short collections are attributed principally to non-payment by the owners of three big estates, of which one is under attachment under section 99 of the Cess Act, and also to the failure of crops.

(*iii*) *Rangpur* (97·4).—The decrease (from 99·4 in 1900-1901) is ascribed to non-payment by two big estates for three successive kists. In one a dispute between the co-sharers has led to the defaults, while the other is under the management of a receiver appointed by the Collector under section 56 of the Land Registration Act, who has not been able to make collections, a co-sharer of the property having refused to furnish him with information regarding the liabilities of the tenants.

(*iv*) *Hazaribagh* (97·1).—The decline in collections (from 98·9 in 1900-1901) was principally due to non-payment at the last kist by certain zamindars,

and to the withholding of payment by the proprietors of certain mica mines, which were assessed for the first time or of which the assessment was enhanced during the year. Three of the defaulting zamindars have recently applied for the protection of their estates under the Encumbered Estates Act.

(*v*) *Monghyr* (96·9).—The unsatisfactory result is ascribed (1) to plague and (2) to the survey and settlement operations, which kept the proprietors busy before the Settlement Officers. The Commissioner, however, does not accept these explanations, and is issuing orders that the Collector should insist upon the Deputy Collector in charge paying more attention to the subject than he has done during the year.

(*vi*) *Cuttack* (96·07).—The low percentage is attributed to the gradual decrease of the arrear demand and to default on the part of certain important estates.

(*vii*) *Shahabad* (94·2).—The failure to attain the standand was due (1) to the deficiency of the winter rice crop and (2) to the non-payment of the demand of the March kist within the year by the zamindar of Surajpura and the receiver of Babu Baij Nath Sahai's estate.

(*viii*) *Burdwan* (94·0).—The short collections are ascribed to large amounts due from the Burdwan Raj and two other important estates not having been paid within the year.

(*ix*) *Khulna* (92·7).—The percentage would have been more than 101 had not the current demand of the Syedpur Trust estate been satisfied by adjustment from the excess payments that had accrued, owing to the valuation of the estate having been reduced with effect from the year 1898-99.

(*x*) *Manbhum* (87·06).—The short collections were mainly due to the non-payment of a large sum (Rs. 42,271) by the Patkum and Barrabhum encumbered estates. In the former the arrears occurred owing to the Patkum Indigo and Trading Company, who held the greater portion of the estate, having failed for several years to pay the rent and cesses due under their lease. Certificates were filed and decrees obtained, but all proceedings had to be stayed in consequence of the Company having gone into liquidation. The lease was put up to sale and purchased by the estate in July 1901, but the collection papers were not received from the liquidator's office till September of that year, and actual collections did not commence till October. It is hoped that the arrears will be paid within the current year.

(*xi*) *Singhbhum*.—The decline in the percentage (from 87·4 to 85·5) is attributed to the failure of the proprietors of the Dhalbhum and Anandpur estates to pay their dues within the year. The Commissioner also says that the lessees of mines and forests not infrequently default, and that, as they are not permanent residents of the district, it is often difficult to obtain their addresses.

(*xii*) *Ranchi* (70·3).—The poor results were due to the inability of the Maharaja of Chota Nagpur, who practically pays the whole of the cess demand, to recover his dues from his tenure-holders, many of whom have alienated their properties. Out of the balance of Rs. 52,012, a sum of Rs. 38,079 has been realised since the close of the year, and the remainder is in course of recovery.

Working of Certificate Procedure.

7. The number of certificates filed during the year for the realisation of cess arrears was 139,613, against 127,360 in the previous year, which, with 43,399 certificates pending from 1900-1901, gave a total of 183,012 for disposal. Of these, 143,355, or 78·3 per cent., were disposed of, against 75·9 in the previous year, leaving 39,657 cases pending. The increase in the number of cases filed is shared by all Divisions except Burdwan and Orissa, and appears to be chiefly due to more vigorous action in enforcing demands. It is most marked in Gaya (6,647) and Monghyr (3,224). In Gaya the increase was due to the institution of cases punctually after each kist, and this has materially helped in the prompter collection of the demand. In Monghyr also greater punctuality and strictness prevailed in the cess office, and the increase in institutions is further explained by the fact that the number of certificates filed during 1900-1901 was much below the average of the three preceding years. The collection of cesses of rent-free lands direct by the Government, instead of through the zamindars in whose estate the lands lie, adds greatly to the number of certificates in some districts

8. There was a noticeable decline in the institutions in Burdwan (1,294), Bankura (714), Jessore (506), Faridpur (1,155), Saran (1,655), Darbhanga (547), and Balasore (622). In Bankura, Faridpur, and Balasore this is attributed primarily to the withholding of certificates for petty arrears, which, in accordance with orders approved by the Government, are now allowed to accumulate to Rs. 5, provided that certificates must issue for any smaller sums when it is necessary to avoid their recovery being barred by limitation. No explanations have been furnished from the remaining districts. The decrease in Hazaribagh and Singhbhum is due to the issue, in the first instance, of warning post-cards immediately after the kist, on receipt of which many assessees paid up their dues. The use of post-card notices and the larger employment of kanungoes for the collection of petty arrears in Orissa tended to reduce the number of certificates filed in that Division. The largest number of cases was instituted in Burdwan (5,293), Midnapore (9,482), Hooghly (15,114), 24-Parganas (6,433), Chittagong (5,089), Patna (8,001), Gaya (12,216), Shahabad (8,465), Saran (8,865), Muzaffarpur (6,840), Darbhanga (5,318), and Monghyr (5,630).

9. The disposals exceeded the institutions in all the Divisions except Chittagong and Bhagalpur, where, however, the number of cases filed was greater than in the preceding year. The districts in which the number of pending cases at the close of the year shows a large increase are Midnapore, Dacca, Noakhali, Gaya, and Monghyr. No explanation has been furnished in regard to Midnapore, but it appears from a separate communication received from the Commissioner that the necessary temporary staff could not be employed, suitable men not being available. In Dacca the increase is attributed to a large number of institutions in the latter part of the year. The Collector reports that the file has now been greatly reduced. The deficiency in disposals in Noakhali is attributed to the filing of cases for arrears due from rent-free lands under section 70 of the Act in the latter part of the year. In Gaya and Monghyr the increase was due to the larger number of institutions— 12,216 and, 5,630 against 5,569 and 2,406, respectively, in the previous year. The largest number of pending cases in the Patna Division is in Shahabad, and this, the Commissioner says, accounts partly for the collections having fallen considerably below the standard. The pending files show material reductions in Burdwan, Mymensingh, Faridpur, Chittagong, Saran, and Muzaffarpur. It is satisfactory to note that, notwithstanding the increase in the number of institutions, the number of pending cases in all the Divisions declined from 43,399 (revised figure) to 39,657, or by 3,742.

Objections against certificates.

11. The total number of objections lodged against certificates was 11,759, against 11,621 in 1900-1901, of which 11,498 against 11,284 was disposed of. The largest number disposed of was in the districts of Burdwan (1,003), Hooghly (932), Gaya (983), Shahabad (1,73.), and Saran (3,899). In 1,146 cases the certificates objected to were cancelled, the percentage increasing from 8·8 to 9·9. The result is not so favourable as in the previous year, but is better than in 1899-1900—10 7. The number of cases in which reductions were made in the amount certified was 548 against 559. Out of 1,146 cases, in which certificates were cancelled on objection, Burdwan contributed 95, Dacca 105, Patna 142, Saran 217, and Monghyr 132. The cancellations were due to defective entries in the record-room and land registration registers, death and desertion of defaulters, exemption of lands lying within municipal limits, double assessments, and non-registration of names of holders of rent-free lands. In Monghyr the special cause was the incomplete state of the land registration registers, particularly in respect of the omission of the numbers of the separate accounts, which led to the entry in the certificates of the names of proprietors of residuary shares when those for separate accounts were required, and *vice versá*. The Board will call for a special report on the subject.

Stage of procedure at which demands were satisfied.

12. In 45,945 cases against 35,618 in 1900-1901, payments were made on the mere issue of notice: in 82,956 against 57,976 on the issue of notice for sale of moveable property, and in 28,107 against 23,607 on the issue of notice for sale of immoveable property. Of the total number of sales (3,864 against 3,451), 1,493, or 38·6 per cent., were set aside under sections 20 and 21 of the Public Demands Recovery Act, I (B.C.) of 1895,

as amended by Act I (B. C.) of 1899, against 1,470, or 42·6 per cent., in the previous year. The highest number of sales set aside was in the districts of Patna (114), Gaya (106), Shahabad (215), Saran (108), Muzaffarpur (148), and Darbhanga (170). No special complaint against the working of section 21 in the Patna Division has, however, been made.

15. During the year general revaluations were completed in the districts of the 24-Parganas (with exception of rent-free lands), Bogra (with the exception of 18 estates), Purnea, and Puri. The revaluation of estates and tenures in the 24-Parganas has resulted in an increase of Rs. 87,058 (approximately), or of 41·2 per cent., on the previous assessment. In Bogra the increase obtained amounts to Rs. 14,968, or 17·9 per cent., on the former cess revenue, while in Purnea and Puri the operations have resulted in an increase of Rs. 50,183 and Rs. 2,676, or 26·5 and 3·9 per cent., respectively. The districts under complete revaluation were Hooghly, Nadia, Khulna, Rajshahi (with the exception of 22 estates and 68 rent-free lands), Jalpaiguri (Regulation and Non-Regulation portions), Rangpur, Gaya, Shahabad, Cuttack, Balasore, and Hazaribagh.

Gross rental.

19. When the road cess was first assessed in 40 districts the gross rental or valuation of those districts was Rs. 13,11,68,432. Subsequently the districts of Khulna and Palamau were created, and the Act was extended to them and to the district of Singhbhum. The gross rental, or valuation, of the 43 districts shows an increase in the past year from Rs. 16,80,89,551 to Rs. 17,03,53,369, or of Rs. 22,63,818, which is chiefly due to revaluation in the districts of the 24-Parganas, Nadia, Backergunge, Tippera, Shahabad, and Ranchi, and to the assessment of coal-mines and resumed *chakaran* (service) lands in Burdwan and the valuation of *ghatwali* lands in Birbhum. The decrease in the gross rental of Rs. 87,456 in Singhbhum from Rs. 5,08,000 to Rs. 4,20,544 is noticeable, and is due to the annual revision of the assessments of mines and forests under Chapter V of the Act and, in particular, to the exemption during the year, in accordance with the Advocate-General's opinion, of the *premia* paid by lessees for mining rights.

LIBERALITY OF MAHARAJA SURJYA KANTA ACHARJYA OF MYMENSINGH.

No. 2649L.S.-G., dated Calcutta, the 7th November 1902.

From—E. W. Collin, Esq., Offg. Secy. to the Govt. of Bengal, Municipal Dept.,
To—The Commissioner of the Dacca Division.

I am directed to acknowledge the receipt of your letter No. 1285G., dated the 24th October 1902, reporting that Maharaja Surjya Kanta Acharjya of Muktagacha has paid into the District Fund of Mymensingh the sum of Rs. 5,000 for the construction of wells in commemoration of the Coronation of His Majesty King Edward VII, Emperor of India.

2. In reply, I am to request that you will be so good as to convey the thanks of Government to the donor for his liberality. This letter will be published in the *Calcutta Gazette*.

LIBERALITY OF RAJA PRAMADA NATH RAY AND HIS WIFE RANI BHABASUNDARI.

2652Medl., dated Calcutta, the 7th November 1902.

From—H. C. Woodman, Esq., Under-Secy. to the Govt. of Bengal, Municipal Dept.,
To—The Commissioner of the Rajshahi Division.

* * * * *

Para. 2. I am to request that you will be so good as to convey to Raja Pramada Nath Ray of Dighapatia and his wife, Rani Bhabasundari, the thanks of Government for their liberality in contributing Rs. 10,000 and Rs. 5,000, respectively, towards the construction of the new building for the Rampur Boalia Dispensary.

* * * * *

WEATHER AND CROP REPORT.

For the week ending the 10th November 1902.

Burdwan.—Rainfall at Sadar 0·09, Kalna nil, Katwa 0·62, Raniganj 0·08. Weather fair and seasonable. Threshing of *aus* and sowing of *rabi* nearly finished. Condition of *aman* and other standing crops fair, but some rain wanted. Fodder and water sufficient. Condition of cattle good. Common rice sells at 11 seers per rupee.

Birbhum.—Rainfall at Sadar nil, Rampur Hât nil. Weather seasonable. *Aus* being harvested. *Rabi* being sown. Coarse rice sells at 13 seers per rupee. Fodder and water sufficient.

Bankura.—Rainfall at Sadar ·45. Weather seasonable. *Aman* paddy is being harvested. Common rice sells at 12¼ seers per rupee. Fodder and water sufficient.

Midnapore.—Rainfall at Sadar 1·07, Contai 2·86, Tamluk ·38, Ghatal ·31. More rain wanted in Tumluk and Ghatal subdivisions and parts of Sadar. Weather seasonable. Crops on high lands are withering for want of rain. Fodder and water sufficient. Cattle-disease reported from Binpur thana. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Contai	12	8	
Tamluk	11	0	
Ghatal	11	12	

Hooghly.—Rainfall at Sadar 1·57, Serampur 31, Arambagh nil. More rain wanted. Prospect of standing crops fair. Sowing of *rabi* crops continues. Weather seasonable. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee
Serampore	10	0	
Arambagh	11	1½	

Howrah.—Rainfall at Sadar 0·28, Ulubaria 0·70. More rain wanted. The *aman* on high lands suffering for want of sufficient rain. Washing of jute still continues. Sugarcane doing well. No cattle-disease. Fodder and water-supply sufficient. Common rice sells on an average 11 seers per rupee.

24-Parganas.—Rainfall at Sadar 0·05, Barasat 0 59, Basirhat 1·56, Diamond Harbour 0·54. Weather seasonable. The little rain that has fallen has not sufficed to improve the crops on high lands. State and prospect of crops fair. Probable outturn of *aman* is 93·75 per cent. Sowing of *rabi* crops going on. Common rice sells at 11 seers per rupee at Sadar and Barasat and at 10½ seers at Basirhat and Diamond Harbour. Condition of cattle good. Supply of fodder and water sufficient.

Nadia.—Rainfall at Sadar and Ranaghat nil, Chuadanga 0·40. Reports from Kushtia and Meherpur not received. Weather seasonable. Standing crops suffering for want of rain in the Ranaghat subdivision. Sowing of *rabi* and oilseed crops nearly finished. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Ranaghat	12	0	
Chuadanga	11	0	
Kushtia	Not		
Meherpur	received.		

Murshidabad.—Rainfall at Sadar ·03, Kandi ·31, Jangipur ·33, Lalbagh nil. Weather seasonable. Prospect of *aman*, sugarcane and *kalai* good. Cultivation of *rabi* crops going on. No cattle-disease reported from anywhere. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	8	per rupee.
Kandi	14	8	
Jangipur	13	8	
Lalbagh	12	0	

Jessore.—Rainfall at Sadar 0·08, Magura ·50, Jhenida 0·06. No rain at Bangaon and Narail. Prospects of crops generally fair, but more rain is wanted for the standing *aman* paddy. Cattle-disease reported from Magura police-station. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee
Jhenida	12	0	
Narail	11	8	
Bangaon	13	0	
Magura	12	0	

Khulna.—Rainfall at Sadar 0·30, Bagerhat 0·39, Satkhera 1·15. Weather seasonable. *Aman* paddy doing well. Cultivation and sowing of *rabi* crops continue. Rape and mustard sowings estimated at 92 per cent. Fodder and water sufficient. Cattle-disease reported from Dumuria. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	6	per rupee.
Bagerhat	11	8	
Satkhira	10	8	

Rajshahi.—Rainfall at Sadar nil, Nator 0·13, Naugaon 0·70. Winter setting in. *Rabi* crops being sown. Prospects of standing crops good. Condition of cattle good. Fodder and water plentiful. Common rice selling at 12¼ seers per rupee.

Dinajpur. No rain. Weather seasonable. Standing crops good. Cattle-disease reported from three thanas Fodder and drinking water plentiful. Rice selling at 12 seers per rupee.

Jalpaiguri.—Rainfall nil. Weather seasonable. *Haimanti* paddy doing well. Prospect favourable. Transplantation of tobacco commenced. Common rice sells at 10½ seers a rupee. Fodder and water sufficient.

Darjeeling.—Rainfall at Sadar 0·55, Kurseong 0·00, Siliguri 0·00. Weather seasonable. *Hills—Haimanti dhan, bara maruα, phaphar*, and *kalai dal* doing well. *Terai—Haimanti* paddy coming into ears. Prospects of standing crops good. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	8	0	per rupee
Terai	10	0	

Maize sells at Darjeeling at 21 seers and at Kalimpong at 28 seers per rupee.

Rangpur.—Rainfall nil. Weather seasonable. Sowing of mustard and potato commenced. Prospects of standing crops good. Water and fodder sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	9	8	per rupee.
Nilphamari	10	8	
Kurigram	10	8	
Gaibanda	11	0	

Bogra.—No rain. Weather seasonable. Lands being prepared for and sown with *rabi* crops. Prospects good. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Pabna.—Rainfall at Sadar nil, Sirajganj nil. Weather fine and cool. Prospects of standing crops fair. *Rabi* being sown. Fodder and water sufficient. Common rice sells at 10 seers per rupee.

Dacca. Rainfall at Sadar ·03, Manikganj ·10, Munshiganj and Narayanganj nil. Prospects of crops good. Weather seasonable. Fodder available. No cattle-disease. Common rice sells at 11¼ seers per rupee.

Mymensingh.—Rainfall nil. Weather seasonable. Winter rice doing well. *Rabi* sowing continues. Fodder and water sufficient. No cattle-disease. Common rice sells at 12 seers per rupee.

Faridpur.—Rainfall at Sadar 0·21, Goalundo 0·37, Madaripur 0·05. Weather cool at night. Warm in day. State and prospects of crops good. No cattle-disease. Common rice sells at 11 seers per rupee.

Backergunge.—Rainfall at Sadar ·40. Fall general but slight. Cold weather has set in. Prospects good. Fodder sufficient. Common *aman* 11 and *aus* 12 seers per rupee.

Tippera.—No rain. Weather seasonable. Prospects good. *Aman* paddy maturing. A little rain is wanted. Cultivation of *rabi* going on. Fodder and water available. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	13	0	per rupee.
Brahmanbaria	13	5	
Chandpur	11	0	

Noakhali.—No rain. Weather seasonable. Lands being prepared for *rabi* crops. Prospects good. Fodder and water sufficient. No cattle-disease. Common rice sells at Sadar at 12½ seers and at Feni at 13 seers 7 chitaks per rupee.

Chittagong.—No rain during the week. Cultivation of *rabi* is going on. Water and fodder sufficient. Rice sells at 12¾ seers per rupee.

Chittagong Hill Tracts.—Rainfall nil. Weather seasonable. Prospect of winter rice crop good. No cattle-disease. Rice sells at 17 seers per rupee.

Patna.—Weather seasonable. Standing crops doing well. Sowing of *rabi* continues. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Patna	14	0	per rupee.
Barh	13	0	
Bihar	11	0	
Dinapore	14	8	

Gaya—Rainfall at Aurangabad 0·02. Weather cold. Sowing of *rabi* and poppy in full swing. Early paddy almost ready for harvest. Sugarcane being pressed. No cattle-disease. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Shahabad.—Rainfall at Dehri 0·06. *Rabi* sowings continue. Prospect of paddy and sugarcane good. Fodder and water abundant. Rice sells at Sadar at 13 seers per rupee.

Saran—Rainfall nil. Weather seasonable *Rabi* being sown Other standing crops doing well. Some more rain wanted. Poppy sowing begun in most places. Fodder and water sufficient No cattle-disease Common rice sells at 14 seers per rupee

Champaran.—Rainfall nil. Weather seasonable Winter rice and sugarcane doing well. Preparation for *rabi* sowings still going on No cattle-disease. Fodder and water sufficient. Common rice sells at 17½ seers and maize at 30 seers per rupee.

Muzaffarpur.—Rainfall nil. Weather fair *Rabi* sowings in progress. Prospects of crops continue good Fodder and water sufficient. Prices are—Common rice 12 seers, maize 26 seers a rupee.

Darbhanga.—Rainfall nil. Prospects of standing crops good. *Rabi* sowings in progress. Fodder and water sufficient. Cattle-disease reported from Samastipur and Phulparas police-stations. Common rice sells as follows:—

	Srs.	ch.	
Sadar	13	3	per rupee.
Samastipur	13	8	
Madhubani	12	6	

Monghyr.—Rainfall at Sadar nil, Begusarai 0·02, Jamui 3·03. Weather seasonable. Sowing of *rabi* crops continues. Standing crops doing well Fodder and water sufficient. Cattle-pox in one village reported from Begusarai thana Common rice sells at Sadar and Begusarai at 12 seers and at Jamui at 13 seers per rupee.

Bhagalpur.—Rainfall at Sadar, Banka, Madhipura, and Supaul 0·00. Weather seasonable. Winter paddy and other standing crops also doing well. Sowing of *rabi* in progress. Cattle-disease from Madhipura. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	13	10	per rupee.
Banka	12	8	
Madhipura	13	8	
Supaul	15	0	

Purnea.—No rain. Cold weather gradually setting in. Prospects of winter rice generally favourable *Rabi* sowings in progress. No cattle-disease. Fodder and water sufficient. Common rice sells at Sadar and Kishanganj at 11 seers and at Araria at 14 seers per rupee.

Malda.—Rainfall nil. Weather seasonable. Prospects of winter rice and *kalai* good. Sowing of *rabi* not finished. No cattle-disease. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Sonthal Parganas.—Rainfall at Sadar 0·43, Deoghur 0·20, Jamtara 0·14, Pakaur 0·14. Weather seasonable. Early winter rice being harvested. Outturn favourable. Fodder and water sufficient. Common rice sells at 13 seers per rupee at Sadar.

Cuttack.—No rain except 0·27 at False Point and slight rain at some other places. More rain wanted. Prospects good in irrigated and low areas, but not so in other areas affected by early cessation of rains. Weather seasonable. *Laghu sarad* being cut at places. Fodder and water available. Common rice (old) 13½ seers and (new) 17 seers 1 chitak per rupee at Sadar.

Balasore.—Rainfall at Sadar ·03. Fall general, except in half of Bhadrak subdivision. More rain wanted for the late winter paddy. Early winter paddy ripening. *Rabi* sowing commenced. Rice sells at 16 and 14 seers per rupee at Bhadrak and Sadar respectively. Fodder and water sufficient.

Angul.—Rainfall at Angul nil, Bissipara 0·09. Weather cold. Prospects of crops same as reported last week. Rain urgently needed. Cattle-disease reported from Angul. New common rice sells at 15 seers at Sadar and Khondmals.

Puri.—Rainfall at Sadar 0·16. Fall is scanty but general throughout the whole district. Weather seasonable. Winter rice crop on uplands ripening. Harvesting has begun. Low land paddy crop wants more rain. Sugarcane and other miscellaneous crops doing well. Fodder and water sufficient. Common rice sells at 13 seers 14 chitaks per rupee.

Hazaribagh.—Rainfall nil. Weather seasonable. Harvesting of paddy and sowing of *rabi* continues. Standing crops doing well. Fodder and water sufficient. Common rice sells at 15 seers per rupee.

Ranchi.—Rainfall 0·02. Weather seasonable. Harvesting of winter rice in progress. State of standing crops good, but rain is wanted. Cattle-disease reported from Ranchi and Karra thanas. Fodder and water sufficient. Average price of common rice is 13½ seers per rupee.

Palamau.—No rain. Weather seasonable. Rain wanted for *rabi*. Upland paddy suffered much for want of rain. Sugarcane doing well. Cattle-disease continues in places. Fodder and water sufficient. Rice selling at Sadar at 14 seers per rupee.

Manbhum.—Rainfall at Sadar 1·40. Weather seasonable. Prospect of crops good. Paddy being reaped in places. Fodder and water sufficient. Cattle-disease reported from thana Para. Average price of common rice (new) at Sadar is 13 seers per rupee.

Singhbhum.—Rainfall nil. Harvesting of *bhadoi* paddy still in progress. *Rabi* crops need rain. Average price of rice is 14 seers per rupee.

General Summary.—Light local showers have fallen in some districts. Paddy crops on high lands in the districts of the Burdwan and Presidency Divisions would be benefited by rain. The Orissa districts, especially Angul and the districts of Saran, Ranchi, Palamau and Singhbhum also require rain for the benefit of standing crops. Prospects on the whole fair. Cattle-disease reported from a few districts. Fodder and water sufficient. The price of common rice has risen in 8 districts, fallen in 5, and is stationary in the rest.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

REVENUE DEPARTMENT,

The 11th November 1902.

Abstract of the Results of Meteorological Observations taken at the Alipore Observatory in the month of October 1902.

	Inches.	Date.	Hour.
The mean pressure of the month	29·936		
The average pressure of October from 44 years' registers (Alipore Observatory)	29·836		
The highest pressure in the month	30·066	27th	10
The lowest pressure in the month	29·804	1st	16
The range of pressure	0·262		
	Hours.		
The total number of hours of bright sunshine during the month	193·0		
The maximum possible number of hours of sunshine ...	359·1		
	°		
The mean temperature of the month	80·3		
The average temperature of October from 20 years' registers (Alipore Observatory)	80·0		
The highest temperature in the month	93·0	12th	
The lowest temperature in the month	69·6	26th	
The range of temperature during the month	23·4		
The mean daily range of temperature	14·4		
The greatest range of temperature in one day	17·5	12th	
	Per cent.		
The mean humidity of the month	82		
The average humidity of October from 20 years' registers (Alipore Observatory)	81		
	Inches.		
The mean vapour tension of the month	0·836		
The average vapour tension of October from 20 years' registers (Alipore Observatory)	0·819		
The mean cloud proportion of the month	4·08		
The average cloud proportion of October from 25 years' registers (Alipore Observatory)	3·85		
	Inches.		
The total rainfall of the month	2·78		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	2·61		
The average fall of October from 24 years' registers (Alipore Observatory)	3·87		
The greatest fall in 24 hours	2·05	27th	
	Days.		
The number of rainy days in the month	4		
The average number of rainy days in October from 24 years' registers (Alipore Observatory)	5		
	°		
The mean maximum equilibrium temperature of solar radiation during the month	143·5		
The mean difference of sun and air temperatures	55·1		
The greatest sun temperature	153·8	2nd	
The greatest excess of sun over air temperature	63·4	2nd	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	70·7		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	3·6		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	4·5	13th, 16th, 23rd & 31st.	
	Miles.		
The mean movement of the wind per day	67·8		
The greatest movement of the wind in one day	111·0	8th	
The greatest movement of the wind in one hour	19·0	19th	10 to 11 p.m.

The number of hours with winds from each of the eight points—
N. 182, N.E. 24, E. 18, S.E. 27, S. 50, S.W. 153, W. 51, N.W. 115, Calm 124.

G. W. KÜCHLER,

	Inches.
The mean pressure of the seven days	29·995
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29·923
	Hours.
The total number of hours of bright sunshine	49·3
The maximum possible number of hours of sunshine	78·3
	°
The mean temperature of the seven days	76·2
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	77·9
The extreme variation of temperature	25·5
The maximum temperature	88·1
	Miles.
The highest velocity of the wind in one hour	12
	%
The mean relative humidity	76
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	74
	Inches.
The total fall of rain from 2nd to 8th November 1902	0·05
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·26
The total fall from 1st January to 8th November 1902	61·62
The average fall of the corresponding period for 24 years, Surveyor-General's Office	64·78

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III., IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew; o, overcast; g, gloomy; d, drizzling rain.

N.B.—In the weekly report from 5th to 11th October 1902, *read* 81·8 *for* 81·1 as the mean temperature of the 10th October 1902.

RESOLUTION ON THE FOREST ADMINISTRATION REPORT FOR 1901-1902.

REVENUE DEPARTMENT—FORESTS.

Calcutta, the 13th November 1902.

RESOLUTION—No. 3933.

READ—

The Progress Report of Forest Administration in the Lower Provinces of Benga for 1901-1902.

Mr. A. E. Wild held charge of the Bengal Forest Circle till the 10th February 1902, when he retired, and was succeeded by Mr. J. H. Lace, who has submitted the Report with commendable punctuality. The Report does not exceed the prescribed limit of 20 pages.

Areas of forests.

2. The only changes of importance made in the forest areas during the year were the reservation of 83 square miles of forests in the Chittagong Division; the transfer of 81 square miles of protected forests in Palamau to the Civil Department for management by the Deputy Commissioner, and the disforestation of 79 square miles from the Sundarbans forests to be leased for cultivation.

Settlements, surveys and demarcation.

Progress was made in demarcation work in Chittagong, Singhbhum and Manbhum; and in detailed survey in Singhbhum and Hazaribagh. Progress was not so good in Chittagong as was anticipated; and discrepancies in the boundary of the Khurda forests still remain to be reconciled. Arrangement should be made to push on this work in these two Divisions during this cold weather.

3. The programme of working plans for the year was carried out fully. Mr. Lace has learned that the restrictions placed by the working plan on the size of the *Sundri* timber that may be felled in the Sundarbans have never been fully enforced, and that much undersized timber has been removed, though the working plan has been nominally followed for nine years. This careless administration must injuriously affect the revenue in future years; and the Conservator will be requested, when he is revising the working plan this year, to explain the results of the past working and how they were attained, and to state what steps are being taken to secure that the restrictions shall not be transgressed in future.

Working Plans.

4. On the whole, forest offences were fewer than in the previous year, increases in the Darjeeling, Jalpaiguri and Singhbhum Divisions being counterbalanced by noticeable decreases in the Tista, Buxa and Sundarbans Divisions. It is not explained why offences are so much more numerous in the Darjeeling and Tista forests than in other forests.

Breaches of Forest Law.

5. Protection of the forests from fire was more successful than in the preceding year in the Kurseong, Jalpaiguri and Buxa Divisions, but was less successful in Palamau, Angul and Puri, and especially in Singhbhum. The Conservator is not dissatisfied, however, with the results in the Singhbhum forests as compared with those of preceding dry years; and it is to be hoped that the closure to grazing of areas burned in these forests has had the desired effect of impressing upon the people the need of co-operating with Government in protection of the forests. The Conservator notices that the benefit that the forests derive from fire-protection is most marked in the Darjeeling Terai and in the Buxa Division, where the *Sâl* and the *Dalbergia Sissoo* are fast reproducing themselves.

Forest fires, creeper-cutting and other works of improvement.

Mr. Lace lays stress on the importance of creeper-cutting; and it is hoped that this matter will receive careful attention in the Buxa forests, where the *Sâl* trees suffer much from creepers. Improvement fellings should be more generally undertaken in favour of natural reproduction of valuable species of the indigenous timbers and should not be confined to cases in which revenue can be obtained.

6. The total amount of wood—timber and fuel—extracted from the forests is somewhat in excess of the preceding year; but the increased outturn of timber is only in the working of the Sundarbans and Buxa Forests where there was an increased demand for *Sundri* and *Sâl*. As compared with the preceding year, there was a falling off in the value of minor produce extracted from the forests chiefly in the case of the Sundarbans, where stormy weather was unfavourable to the working of small boats, and where tigers killed eighty-six wood-cutters. Since the transfer of the Saoria Tract in the Sonthal Parganas Protected Forests to the Civil Department on 1st December 1900, the Forest Department has ceased to be credited with the revenue derived from *sabai* grass

Gross yield and outturn of Forest Produce

.7 The gross revenue of the year has only once been exceeded and the net surplus was Rs. 6,09,151; but after allowing for an extraordinary payment of Rs. 77,578 made to the Raja of Porahat on account of the profits of the working of the Porahat Forests during the five years ending March 1901, there was a net income of Rs. 6,86,729, which is the highest annual surplus on record. The working of the Palamau and Angul Divisions has again resulted in deficits; but the deficits have decreased.

Financial results.

8. The Lieutenant-Governor notices with pleasure that officers in charge of Divisions have done good work, and that the subordinate staff has also worked well.

Conclusion.

The Lieutenant-Governor's thanks are due to Mr. Lace for the zeal with which he has entered upon his duties as Conservator of Forests, Bengal.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secy. to the Govt. of Bengal.

RESOLUTION ON THE BOARD'S ANNUAL LAND REVENUE ADMINISTRATION REPORT FOR THE YEAR 1901-1902.

REVENUE DEPARTMENT—LAND REVENUE.

Calcutta, the 17th November 1902

RESOLUTION—No. 3990.

READ—

The Report of the Board of Revenue on the Land Revenue Administration of the Lower Provinces for the year 1901-1902.

THE Report was punctually submitted to Government.

2. *Collections, balances and remissions.*—The collections of land revenue from all the three classes of estates were good, and the total balance outstanding at the close of the year was the lowest during the past five years. The remissions granted were below the average.

On Government estates the total collections were over 99 per cent. of the current demand; the balance outstanding at the close of the year was smaller than at the end of the preceding year, and it is reported that by eliminating the doubtful and irrecoverable arrears amounting to over a lakh of rupees, the true recoverable balance would be reduced to about six lakhs, which represents 14 per cent. on the current demand. Collections on Government estates were unsatisfactory only in the districts of Hooghly, Monghyr, Balasore, Ranchi, and Palamau; much the worst result was in Balasore, where the collections amounted to 12·02 per cent. only on the demand. The Lieutenant-Governor agrees with the Board that the explanations furnished by the Collector with regard to the failure to collect in Balasore are not satisfactory, and he will await the special report called for from this district. The condition of the Palamau estate is being separately considered.

3. *Road and Public Works cesses.*—The current demand of cesses increased during the year by about a lakh and a half of rupees, mainly owing to revaluations in the districts of the 24-Parganas, Nadia, Dacca, Backergunge, Tippera, Noakhali, Shahabad, and Ranchi, to assessment of coal mines and resumed *chakaran* lands in Burdwan, and to the valuation of ghatwali lands in Birbhum. The collections were generally good, and were above the prescribed standard in 25 districts. Notable exceptions were Burdwan and Ranchi. It is not understood why the Court of Wards should have allowed the Burdwan Raj to default in payment of the cess demand, nor is such a default shown in the Report on Wards' Estates. The difficulties of the Maharaja of Chota Nagpur in collecting cesses from his tenure-holders are due to a defect of the Tenancy law in Chota Nagpur which it is proposed to amend.

4. *Remittance of land revenue and rent by means of money-orders.*—Over twenty lakhs, or one-twenty-fifth of the land revenue and cesses, was remitted to the Collector during the year by special money-orders. To increase the popularity of such remittances, the Board have under consideration the adoption of separate forms of money-orders for (1) land revenue and dâk cess and (2) road and public works cesses, and promise a report to Government on the subject.

Payment of rent by money-orders is not so popular, but is increasing in amount. The Lieutenant-Governor has before expressed his regret that this system is spreading. If it protects raiyats from persecution by the landlord's servants, it also often tends to weaken friendly relations with the landlord.

5. *Coercive processes.*—Defaults in payment of revenue were fewer than in the preceding years and the Sale law was leniently worked, the number of estates sold being less than 11 per cent. of the number which became liable to sale for arrears. The Board observe that there has been a considerable decrease in defaults and sales in the past two years, and that this is specially satisfactory in view of the fact that these years have not been remarkable for great agricultural prosperity. Possibly improvement in tauzi work has helped proprietors

to understand their accounts and is promoting punctuality in payment of revenue.

The number of certificates made under the Public Demands Recovery Act increased on the whole; and under the head "Cesses" there was an increase of 13,031, shared by all Divisions, except Burdwan and Orissa, which is explained to be chiefly due to more prompt action in enforcing demands. The Lieutenant-Governor has recently had under consideration the Board's special report regarding the measures proposed for improving the system of realising cesses for roads and public works, and has agreed in the conclusion that the marked increase in the number of certificates issued since the year 1891 for collection of cesses has been due not to recalcitrance on the part of the payers, but chiefly to changes introduced in the tauzi procedure. The orders of the Lieutenant-Governor on this subject and on the question of collection of cesses from rent-free holdings have been recently communicated to the Board.

6. *Condition of the raiyats on Government estates and expenditure on improvements.*—On account of unfavourable harvests, the condition of the raiyats of Government estates was generally not so good as in the preceding year. Calamities of seasons occurred in the districts of Hooghly, Bankura, Midnapore, the 24-Parganas, and Chittagong. The effects of the storm-wave of 1897 have not entirely disappeared in Chittagong. In the Bihar districts the condition of the raiyats on Government estates was on the whole good, but unusual floods caused damage on deara estates. In the Chota Nagpur Division where, except in Manbhum, crops were much below the average, the raiyats of the Government estates of Hazaribagh, Palamau, and Singhbhum were not prosperous. The condition of the Palamau estate has formed the subject of recent correspondence, and the Board have promised a further report which is awaited.

Over 2½ lakhs of rupees were expended by Government on improvements of its estates, chiefly under the heads of drainage, irrigation, embankments, tanks and wells, roads and bridges. The Lieutenant-Governor approves the plan which the Board have adopted of making a provisional allotment in anticipation of the receipt of Government orders sanctioning the total grant for the Province, as by this arrangement it is hoped that more time will be available to the District Officers for carrying out the works of each year.

7. *Drainage.*—The crops in the Rajapur and Howrah drainage basins were good, and the collections during the year from the landlords on account of drainage dues were satisfactory.

The Bill to amend the Bengal Drainage Act, VI of 1880, which was introduced into the Bengal Legislative Council on the 25th March 1902, and of which the object is to enable landholders to realise their claims from tenants and from co-sharers by means of the certificate procedure, was passed by the Council on the 25th August 1902.

8. *Land Registration and Partitions.*—Good progress was made in registration of mutations and in partition cases.

In paragraph 11 of last year's Resolution it was suggested that the percentage of mutations registered in the year on the actual number of existing interests should be indicated. The Board have not yet obtained correct figures, but express a hope that next year they will be in a position to report accurately the number of interests recorded in the registers and the percentage of mutations registered during the year. The Lieutenant-Governor hopes that such information will be given in the next report.

As regards the effect of the Partition Act of 1897 in preventing the enhancement of rents, which used frequently to follow a partition, the Board, agreeing with the Commissioner of Patna, say that it is too early as yet to form a decided opinion. The Collector of Patna observes that the only defect in the proceedings under the Act of 1897 is that they are not final so far as they relate to rents. But neither are rents recorded under Chapter X of the Tenancy Act final unless they are also settled in connection with a settlement of land revenue or on application of landlords or tenants. The advantage of the procedure under both Acts consists in the authoritative record of the existing rent. The Lieutenant-Governor desires that District Officers should continue to watch the effect of the provisions of the Act which relate to record of rent.

9. *Zamindari cesses.*—It is reported by the Board that the levy of illegal cesses in addition to the rent is a very old practice throughout the Province, which has remained practically unchecked by the provisions re-enacted in the Bengal Tenancy Act for its suppression. The Lieutenant-Governor believes that where a survey and record-of-rights is made a very practical check has been imposed, but in the unsurveyed districts he regrets that there is good reason to believe that illegal cesses of many kinds and many names are still levied.

The Lieutenant-Governor has learned that on many estates, especially in the Eastern Bengal districts, landlords not only do not help, but impose fines or *nazarana*, which discourage, when they do not wholly prevent, any improvement of the village water-supply being made by those who are willing to dig or re-excavate tanks for the public good. Accordingly in January last Commissioners of Divisions were requested to institute enquiries as to how far such restrictive customs prevail. The replies received are under the consideration of Government.

10 *Takavi advances.*—The Government of India asked last year that in addition to the current accounts contained in Appendices XVI and XVII of the Land Revenue Report, information might be briefly given in the body of the report as to the net financial results to the State of its loan business during each of the five preceding years. The Board do not clearly understand what information is required, and propose to address the Government separately on the subject. Their report will be awaited by the Lieutenant-Governor.

11. *Working of the Bengal Tenancy Act of 1885.*—The falling off in the number of applications for survey and record-of-rights under section 103 of the Tenancy Act, to which the Board refer in their 147th paragraph, and which is due to a technical construction of the section, appears to be much more than counterbalanced by an increase in the number of notifications of areas for survey under section 101(2)(*a*) of the Act. In proceedings under section 103, as the law officers have advised, fair rents cannot be settled or disputes be formally decided. Section 101 (2)(*a*) requires that when application is made by a landlord or landlords, the interest or interests represented must make up a large proportion of the interests of all the landlords, and also that the order for record-of-rights must be passed by the Local Government. Section 103 allows a Revenue officer to take action under rules made by Government on the application of a single landlord.

The Board in paragraph 152 of their report notice the increase of rent suits in the Orissa Division, and have attributed the increase to the fact that with the enhancement of the land revenue demand at the last settlement, the zamindars cannot afford to allow large arrears to remain outstanding. It is also stated that the settlement records have given facilities to the zamindars to prove areas and rental of holdings. The large increase of rent suits in the districts of the Orissa, Patna, and Chittagong Divisions, which were surveyed in recent years, has attracted the attention of Government, and is being carefully examined.

12. *Weather and crops, prices of food, and wages of labour.*—The rainfall during the year was deficient in Bihar, Chota Nagpur, and Orissa, and was also badly distributed. Early cessation of the monsoon and the drought throughout the cold weather caused widespread injury to the winter rice and the *rabi* crops, especially in the North Bihar districts. The short outturn of crops over the greater part of the Province had the effect of raising the price of common rice, and in some districts prices were especially high. Wages remained stationary, except in a few localities, such as parts of the Midnapore and Palamau districts, where special demand on account of railway construction or other work caused some rise.

13. *Material condition of the people.*—The Board write that the high prices of the year pressed somewhat heavily on the classes dependent on money wages or fixed incomes. The year was no doubt generally one of diminished agricultural prosperity. The development of the industries of the mines and the mills was important, but still falls far short of counterbalancing to labourers deficient harvests.

The report called for on the *utbandi* system of tenure of lands in the district of Nadia is awaited.

14. *Agricultural Banks.*—The Lieutenant-Governor notices with satisfaction that, as the result of the deputation of Mr. P. C. Lyon, ten agricultural banks or co-operative credit societies of raiyats were established chiefly on Government estates and wards' estates during the year, and that 22 more such banks have been opened since the close of the year. The special reports on the working of these banks, which have been received from the Commissioners of Divisions, will be separately examined.

15. The thanks of the Lieutenant-Governor are due to the Board for their efficient administration of the Land Revenue Department and for their excellent Report. The paragraphs in which officers are mentioned as deserving of special commendation will be communicated to the Appointment Department.

In a Notification dated the 29th April 1902, the Lieutenant-Governor expressed his deep regret in announcing the sudden death of the Hon'ble Mr. Philip Nolan, Member of the Board of Revenue, who had long been a trusted counsellor of Government in the Revenue administration and who was on the eve of retirement. Mr. Nolan's intimate knowledge of questions relating to the land and his sound judgment were of the greatest service to the Province.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE REPORT OF THE BOARD OF REVENUE ON WARDS' AND ATTACHED ESTATES FOR 1901-1902.

REVENUE DEPARTMENT—LAND REVENUE.

Calcutta, the 17th November 1902.

RESOLUTION—No. 3994.

READ—

The Report of the Board of Revenue on the Wards' and Attached Estates in the Lower Provinces for the year 1901-1902.

THE Report on the administration of Wards' Estates and Attached and Encumbered Estates has been punctually submitted by the Board of Revenue.

Number of estates under management.

2. In all, 140 such estates were under management during the year, or five more than in the previous year. The aggregate current demand of these estates on account of rents and cesses amounted to 119¼ lakhs of rupees, or about one-fifteenth of the whole cess and rent demand of these Provinces. The Burdwan Raj, which with its rental of 48 lakhs and land revenue of nearly 35 lakhs is much the most important estate under the management of the Board, has just passed into the hands of its proprietor after seventeen years of management by the Court of Wards. The estates next in importance, viz., Bettiah, Hatwa and Tikari, are all in the Patna Division; 70 of the estates, including all the Encumbered estates, are in the Chota Nagpur Division.

Payment of rent and cesses due (1) to Government, (2) to superior landlords.

3. Revenue and cesses due to Government were generally punctually paid, the total payments representing 98 per cent. of the demand of the year. The outstandings due to superior landlords were much heavier in proportion. The obligation to discharge such liabilities is similar to that owed to Government and should have the best attention of the Collectors The failure to pay the Government demands due from the Nawada and Maghra estates in Patna is not satisfactorily explained.

Collections of rent and cesses.

4. The total collections of rent and cesses during the year just exceeded 100 per cent. on the current demand, a percentage not quite so high as that of the preceding year, 100·4, which, however, was the highest percentage obtained in twenty years with one exception. The Bhagalpur Division did least well, and Orissa did best with a percentage of 108·9 obtained by good collections in the Kanika and Madhupur estates. Other districts in which collections were over 105 per cent. were Dinajpur, Chittagong, Saran, Muzaffarpur and Darbhanga. Short collections are insufficiently explained in the case of the Khagra estate in Purnea and the Majdiha estate in Dinajpur.

Balances were slightly reduced, and would have been further diminished but for poor collections in Sujamutha and Kujang, where there was failure of crops. More rent suits were instituted, and for larger sums than in the previous year; but there was a larger decrease in the number of certificates filed. On the whole, the collections made in a year of short harvests were generally sufficient.

Reduction of debts.

5. Altogether twelve and-a-half lakhs of debts outstanding against the estates were paid during the year, and substantial reductions were made in the case of the Bettiah, Shiuhar and Satkhira estates, in the Khujwa estate and Mubarik Hussain's estate in Saran, and in Mrs. Lucas's estate in Backergunge. The Lieutenant-Governor is pleased to learn that in the case of two encumbered estates in Chota Nagpur, which were released during the year, the debts had been fully paid, and that in twenty-seven more of the encumbered estates, the payments on account of debt during the year exceeded the sums provided in the schemes of management.

Expenditure on improvements.

6. Under the head of expenditure on improvements, the Lieutenant-Governor notices with approval the large expenditure of the Burdwan Raj on schools and on its experimental farm, the expenditure of the great estates of Hatwa, Bettiah and

Tikari on hospitals, and of the Hatwa estate on the cattle-breeding farm at Sripur.

Education of wards.

7. The arrangements for education of minor wards, which are detailed in paragraph 21 of the Board's Report, show that careful attention is paid to this important subject.

8. The Lieutenant-Governor thanks the Board for their careful and effective supervision during the year of the estates under their charge.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE POLICE DEPARTMENT IN BENGAL FOR THE YEAR 1901.

RESOLUTION—No. 4645J.

POLICE.

Calcutta, the 15th November 1902.

READ—

The Report on the Administration of the Police Department for the year 1901.

READ also—

The Report for the year 1900 and the Resolution of Government recorded thereon.

The results of the working of the Police in Bengal during the year 1901 are set out in a more condensed form than the preceding year. The percentages of convictions to cases sent up are somewhat lower than in 1900. There has been an increase in the number of riots, in particular in those cases that were attended with loss of life, and under the serious head of dacoity 17 cases more than in 1900 are reported. No special cause can be assigned for these fluctuations in the statistics, which do not betoken any noticeable increase of crime.

2. During the past eighteen months this Government has made a very close and detailed examination of the present system of Police administration of the Province, and the result of the elaborate enquiries made has been to force upon the Lieutenant-Governor the conclusion that until far-reaching and costly changes in the present system in the direction both of strengthening the Police force generally and of bettering their prospects are carried out, no material or enduring improvement can be hoped for in this Department, though it calls more loudly for reform than any branch of the administration in the Province. To this end, proposals have been submitted to the Government of India for adding considerably to the superior cadre, for largely increasing and bettering the prospects of the inspecting and investigating agencies, and for securing the better conduct of police prosecutions before the Courts. Similarly, detailed proposals for the improvement of other portions of the force, including the Calcutta Police, the Municipal constabulary and Railway and River Police, have been more recently under consideration, and the Lieutenant-Governor has formulated his definite recommendations on these remaining branches of the whole subject for the Government of India, and for the consideration of the Police Commission, who are now visiting Bengal.

3. In reviewing the work of the Police for 1900, the Lieutenant-Governor, while acknowledging that the force had been largely hampered by circumstances beyond its control, in particular by being undermanned and overworked, reminded the Inspector-General of the advantageous results to be expected from a more judicious employment of the discretion to abstain from enquiries into petty cases of theft and burglary, and from a wiser and more sympathetic treatment of the village chaukidar. He is glad to see that these remarks have been taken to heart. Chaukidari administration generally has been more effective than in the preceding year, and the percentage of refusals to investigate under section 157, Criminal Procedure Code, has risen from 7·4 to 20·5 in house-breaking cases, and from 10·1 to 14·1 in cases of theft.

Of the total cases not enquired into, 98 per cent. were cases of house-breaking and theft. The following percentages (of cases not enquired into) deal with these 98 per cent. of the total number of cases:—

Division	House-breaking		Theft.	
	1900.	1901.	1900.	1901
Burdwan	18·4	28·7	10·1	14·0
Presidency	5·4	12·1	6·3	7·9
Rajshahi	4·5	10·5	13·0	17·7
Dacca	8·0	16·3	4·3	15·7
Chittagong	8·6	17·9	16·9	24·7
Patna	4·2	28·9	2·9	5·6
Bhagalpur	9·6	26·9	3·6	6·3
Orissa	2·2	5·0	26·2	31·9
Chota Nagpur	5·3	22·2	3·8	6·0

Thus in every Division there has been an improvement, under both heads. These percentages are still far below the standards which the Lieutenant-Governor thinks might properly be attained, but they undoubtedly show that at last a real endeavour has been made by the local officers to carry out the wishes of Government in the matter.

4. In view of this advance, and of the improvement in Chaukidari administration, the Lieutenant-Governor had some expectation that the results for the year, on which the working of the Police is judged, would be better than those of the preceding year. As a matter of fact, the percentage of persons convicted in police cases under classes I—V to those sent up for trial has fallen slightly from 56 to 54, and that of persons convicted under classes I—VI from 71 to 69.

Turning to the number of cases, the percentages of convictions to cases sent up have fallen as follows:—

	Police cases only.		Police and Magistrates' cases together.	
	1900.	1901.	1900.	1901.
(a) Grand total	86·4	85·9	83·7	83·0
(b) Class III. Serious offences against property	74·3	73·2	70·4	69·9
(c) Class V. Minor offences against property	79·1	78·5	74·6	73·2

An examination of the Divisional and District figures in detail shows that as was to be expected these fluctuations are the net outcome of rises of percentages in certain districts and Divisions and of falls of percentages in others, and further enquiry will be made as to the cause of these variations. Whatever may be the ultimate effect of a new measure, it is certain that the immediate effects in different districts will vary according to the attitude towards it and interest in it of the district authorities, and the Inspector-General must now devote his special attention to the district analysis which the Lieutenant-Governor caused to be prepared. The details are not a little curious and an attentive study of them should yield useful material for our further assistance in this matter. The Lieutenant-Governor does not remember that the Inspector-General ever even forwarded for his information any comments of the Inspecting Deputy Inspector-Generals on the introduction of this measure, and would be glad to be assured this has not escaped their attention. It may be that a still wider employment of the discretion to dispense with local investigation given by section 157, Criminal Procedure Code, and continued care in developing the Chaukidari agency may enable the Police eventually to arrive at better results, but an examination of the figures of the year under review confirms the Lieutenant-Governor in the conclusions he had previously formed as to the necessity for large improvements in the numbers and prospects of the Police force generally.

5. The conduct of the Police during the year, as shown by the punishments inflicted upon them judicially and departmentally, has been on the whole satisfactory. Only one case of torture was returned as true, and in 26 cases of extortion punishment (judicial or departmental) was inflicted. None of the cases presented any features of importance. The number of men in the District and Railway police holding good-conduct stripes increased from 12,109 to 12,914, and of those holding three or more stripes from 4,635 to 5,111. Those of the latter class are entitled to an extra allowance of one rupee a month, subject to the proviso that not more than one-tenth of the total number of constables sanctioned can be given it. The result of this limit is that, of the 5,111 men who have qualified for the allowance, considerably less than half, or only 2,039, are permitted to draw it. The removal of the numerical limit, which was fixed so long ago as 1863, would entail considerable recurrent expenditure, but, so far as can be ascertained, it is a purely arbitrary one; and in view of the dissatisfaction that must prevail among the 3,000 men who have qualified for the extra allowance, but are debarred for no fault of their own from drawing it, the Lieutenant-Governor is prepared to consider any recommendation the Inspector-General may wish to make for its removal or extension.

6. To proceed to an examination of the crime of the year—the total of cognizable offences reported is only 250 below that of 1900 and more than 30,000 in excess of the decennial average. The increase, as compared with 1899, is almost entirely under the head of offences against property, and is undoubtedly

the result of the high prices which prevailed during the year to even a more marked extent than in 1900. Non-cognizable crime shows a small decrease from the previous year's figures of about 4 per cent.

7. The chief fluctuation in the offences shown under class I appears under "rioting," which returns 79 cases more than in the previous year. The number of true cases (2,068) is considerably below the quinquennial average, but the unsatisfactory feature of the figures is the number of cases attended with loss of life. Last year's total of such cases (61) was considerably above the average of preceding years, and this year the number has risen to 73. This unsatisfactory state of things is apparently not the result of any retrogression in the preventive measures taken under sections 106 and 107, Criminal Procedure Code; for, though the number of cases instituted under these sections during 1901 is considerably below that of 1900, rather more persons were bound down than in the previous year. The reason is probably to be found in the fact that the police in some districts, as in Khulna, report under section 107, Criminal Procedure Code, against the wrong persons, and that in others, as in Pabna, Magistrates fail to bind down parties who have been properly reported against. Magistrates are reminded of the necessity for thoroughly satisfying themselves, before striking off proceedings in such cases, that the cause of dispute no longer exists; a specious compromise is often filed in Court merely to give the parties an opportunity of going back to their villages and settling their disputes in another and less peaceful fashion. The figures under class II show no great variation from those of the previous year. The number of cases of murder and of grievous hurt has slightly decreased, and there has been a very satisfactory diminution in the number of outrages on women in Mymensingh. Judicial results under this class have been generally bad. The percentage of cases convicted to cases decided has fallen from 58 to 54, and of persons convicted to persons tried from 52 to 47. Murder trials have been particularly unsuccessful. The percentage of convictions to cases is only 41 as against 45 in 1900, and only 24 per cent. of those put on their trial have been found guilty of the offences charged against them.

8. Under class III dacoities show an increase of 17 cases, though the total number of cases (358) is practically the same as the quinquennial average. It is to be regretted that the efforts made to repress this most serious form of crime apparently indigenous in Bengal have so far been unsuccessful, and the Lieutenant-Governor trusts that the Inspector-General will give this class of offence his particular attention during the current year. The Presidency Division is the only one which shows any considerable fluctuation from the figures of the previous year. The district of the 24-Parganas returns no fewer than 32 true cases, and it is to be hoped that the special measures taken in this district towards the end of the year will have the effect of largely checking this form of crime. It is satisfactory to find that convictions under this head show material improvement over the figures of the preceding year. Burglary and theft cases numbered 2,023 more than they did in 1900, when the figures were unusually high. The small increase as compared with the preceding year may possibly, as suggested by the Inspector-General, be the outcome of improved reporting consequent on the increased use by the police of their power to refuse investigation, as well as of the pressure caused by high prices. With regard to the use made by the police of section 157, Criminal Procedure Code, it is difficult to understand the extraordinary variations which appear in the divisional figures on this subject. The Orissa police investigate 95 per cent. of their house-breaking cases and only 68 per cent. of their theft cases. The police of the Patna Division, on the other hand, investigate 94½ per cent. of theft cases and only 76 per cent. of burglary cases. Similarly, in the Bhagalpur and Presidency Divisions, 94 and 92 per cent., respectively, of theft cases are enquired into. In the Chittagong Division, only 75 per cent. of such cases are investigated. An absolutely uniform standard is neither possible nor desirable, but the Lieutenant-Governor is not aware that there is any sound reason for these wide fluctuations, which would appear to be the result of divergent interpretations by the local investigating officers of the instructions on the point issued for their guidance, and the Inspector-General is requested to make an examination of the figures brought to notice with a view to seeing whether a closer approach to uniformity cannot be achieved.

9. The number of persons bound down in bad-livelihood cases has increased from 4,127 to 4,410. Of the 3,782 cases instituted, only 2,061 were

tried locally. The Patna Division is the worst in this respect. Of 1,318 cases instituted, only 585 were tried in the villages of the accused. Of the 1,042 persons from whom security was demanded, the security of only 44, or 4 per cent., was accepted. In a separate communication the Lieutenant-Governor has addressed Commissioners on the question of the divergent practice followed in the various districts of the Province in regard to the amount of security demanded in bad-livelihood cases, and has asked whether the standard taken for such bonds is not generally too high. In the case of the Patna Division, there would appear to be little doubt on this point; before, however, coming to a final decision on the matter, the Lieutenant-Governor will await the reply of the local officers to the enquiry which he has addressed to them. He wishes now to lay emphatic stress on the danger of abuse by the local police officers of the powers conferred on them by law in the matter of these prosecutions, if not controlled with the greatest care, especially in the direction of local trials. When crime is at all prevalent in his jurisdiction, the expedient of getting shut up, as far as possible, every one to whom the least suspicion attaches is one that readily suggests itself to an idle or unscrupulous officer, though the process is one that must obviously entail a good deal of innocent suffering. It is easy for the police to procure half-a-dozen witnesses who will go to Court and swear that one of their neighbours is a bad character and fit to be bound down, and it is often only by a visit to the village of the accused that the Magistrate can satisfy himself as to the necessity or otherwise of the proceedings. Practically, every one of the cases instituted in the Patna Division was taken up on a report by the police or after investigation by them, and in view of this and of the divisional attitude in the matter of taking security, it is unsatisfactory to find that lŏcal enquiry was dispensed with in so large a percentage of the cases. Granted that it is most desirable that these proceedings when instituted should be carried through as quickly as possible, there is *primâ facie* no reason why this should not be as compatible with a local trial in the Patna Division as in other Divisions, and the necessity for the latter in the Patna Division is accentuated by the fact that, of the total number of persons in Bengal sent to jail for bad-livelihood, that Division contributes nearly one half. The attention of the Commissioner will be drawn to the matter, and he will be asked to report whether, in view of the above figures, a much larger proportion of these cases cannot be tried locally in the districts under him.

10. A satisfactory feature of the year is the decrease in the number of maliciously false cases: the percentage of these to cases reported has steadily declined during the last four years, and is now only 2·9. The Patna Division returns the highest percentage (4·0), and the Patna district the largest number of cases (426). It is disappointing to find that in only 19 of the latter were prosecutions instituted The Lieutenant-Governor is aware that conviction on these charges is as a rule very difficult to secure, but it would seem better to take the risk of an acquittal rather than encourage those who harass their neighbours by bringing such cases, in the belief that they can do so with impunity.

11. The figures under remands are worse than they were last year. Pabna, which was at the bottom of the list last year and the year before, is now last but one; and Manbhum, which in 1900 was last but one, is now actually the last. Unlike previous years, Pabna has on this occasion no explanation to offer, and the Commissioner will be asked to report why this district so persistently returns such bad results. There is no doubt that remands are very frequently necessitated by obstructive tactics on the part of the accused and those who appear on their behalf before the Courts, but there is no reason for supposing that Magistrates in the Pabna district have greater difficulties to contend with than those in other districts of the Province, and, in the absence of any other explanation, the Lieutenant-Governor is constrained to believe that the bad results shown in this respect by the district, which by the way calls for unfavourable criticism in many other details of its Police administration, must be attributed to a want of proper supervision on the part of the higher district authorities. The same remark is to be applied to remands in Manbhum, and the Commissioner of the Division will be asked to report why this district has occupied so low a place in the figures of the last two years. In the matter of re-convictions the usual divergencies appear in the district percentages of previous convictions, which vary from 22 in Muzaffarpur to 3½ in Jalpaiguri. From the Darbhanga figures as compared with those of the

district for the two previous years, and the Divisional figures for the three years 1899—1901, only one of two inferences can be drawn—either that old offenders, though they still have a weakness for the other districts of the Division, have given up going to Darbhanga to commit crime, or that the local officers have not attached sufficient importance to the desirability of proving, wherever possible, previous convictions. The Lieutenant-Governor is glad to notice the continued good work done by the Criminal Identification Department.

12. The process of substituting chaukidars under Act VI (B.C.) of 1870 for the men under the old Regulation XX of 1817, and for those holding service lands, has continued during the year, and the Dafadari system is now in force practically throughout the Province. Difficulty continues to be experienced in getting high-caste men to enlist as chaukidars. The Lieutenant-Governor is not sure that he understands the argument of the Inspector-General, in favour of the retention of a certain proportion of low-caste men as chaukidars, that high-caste men will not do all the work required of them. It is conceivable that there are localities in which, or conditions under which, it is advisable to appoint low-caste men, but it is not His Honour's intention that any chaukidar should be called on to perform duties, which any man of however high caste would feel it repugnant to undertake. The duty of carrying dead bodies for *post-mortem* examination, or of burying them, which has been imposed on chaukidars in the Burdwan district, is certainly not one which chaukidars should be called on to perform. Payments to chaukidars during the year have been more regular, and, as already remarked, there has been a satisfactory improvement in Chaukidari administration generally throughout the Province. The percentage of men rewarded has risen from 7·3 to 11·1. As usual, the difference in the treatment meted out to chaukidars in the various districts is very striking. In Puri, it was found necessary to punish 28 per cent. of the chaukidari force; in Balasore, only 3·8 were punished. In Hooghly, 33 per cent. came in for punishment; in the neighbouring districts of Midnapore and Howrah, 7 and 8 per cent., respectively, only were punished. In Nadia, over 51 per cent. were punished, only 3½ per cent. rewarded: corresponding percentages in Dinajpur are 41 and 4½: yet the Nadia Reward Fund closed with a balance of Rs. 8,599; that of Dinajpur with one of Rs. 4,144; Purnea fined 16½ per cent. of its chaukidars, and rewarded 1 per cent. Instances might be multiplied. In view of the importance attaching to the judicious and considerate treatment of the members of this valuable adjunct to the Police force of the Province, the Lieutenant-Governor would ask Commissioners to carefully examine the figures of their respective districts, with a view to seeing that Magistrates and District Superintendents do not allow punishments and rewards to be a mere matter of routine, but satisfy themselves that punishments are awarded only where merited, and that rewards are given wherever deserved, provided the state of the Chaukidari Fund allows of it. In a separate communication, the Lieutenant-Governor has already commended to the notice of Commissioners the good results to be expected from the system of recognizing merit on the part of chaukidars by the grant to them of silver badges, if consistently and intelligently administered.

In a number of districts the rewards distributed have been low in amount the figures of the worst districts of 1901 have been for the three years indicated;

	1899.	1900.	1901.
	Rs.	Rs.	Rs.
Burdwan	156	195	537
Bankura	119	104	208
Jalpaiguri	147	132	240
Darjeeling	143	127	212
Monghyr	465	539	316
Bhagalpur	840	1,052	846
Purnea	284	625	435
Malda	237	594	559
Balasore	86	90	125
Palamau	71	345	160
Manbhum	191	180	286
Singhbhum	849	118	169

Several of these districts were worse than in both the two years preceding; several are worse than in one of the two years: several exhibit greater carelessness in obeying orders for the first time. The officers concerned are being called upon to submit explanations.

The average amount paid as rewards varies enormously in the districts: in those where the Reward Fund is low, the amount must of necessity be small, but in Rangpur, where the Fund closed with a balance of nearly Rs. 8,000, it is at least open to consideration whether the average reward of Rs. 2 and a fraction might not be materially increased. In Pabna, though 28 per cent. of the chaukidars were punished, only Rs. 979 were paid in rewards. Last year only Rs. 496 were so expended, and yet it appears that the Fund closed with a balance of Rs. 7,823. The Commissioner will be asked to report whether this large balance is really due to the fact that so few of the chaukidars have merited rewards.

In certain districts, though the sums credited to the Chaukidari Fund were large and the balances were considerable, the payments were altogether inadequate, as the following statement shows:—

	Collections.	Payments.	Balances.
	Rs.	Rs.	Rs.
Burdwan	683	537	1,530
Nadia	3,586	1,264	3,599
Dinajpur	1,660	1,238	4,144
Rangpur	4,219	2,776	7,974
Pabna	1,257	979	7,823
Faridpur	1,970	1,671	3,819
Backergunge	3,007	1,206	2,838
Chittagong	481	638	1,504
Saran	2,217	3,005	4,557
Muzaffarpur	2,427	4,921	5,757
Purnea	984	375	1,846
Puri	917	873	1,073
Singhbhum	250	126	798

The attention of the Magistrates will be called to the neglect of Government orders in these districts. It is no sufficient answer that in Bengal, as a whole, the rewards to Chaukidars increased from Rs. 41,692 in 1899 to Rs. 47,600 in 1900 and Rs. 55,655 in 1901. Much more ought to have been done, and it is clear from these figures that money was available for the purpose.

13. The Inspector-General submitted his report with excellent punctuality, and has compressed it within the limits prescribed by Government without any corresponding diminution in its value.

ORDER—Ordered that copies of this Resolution be forwarded to the Inspector-General of Police, the Commissioner of Police, Calcutta, and all Commissioners of Divisions for information.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Chief Secretary to the Govt. of Bengal.

LIBERALITY OF BABU DHON KRISHNA GOSWAMI OF CHERLA.

No. 2747Medl., dated Calcutta, the 13th November 1902.

From—H. C. WOODMAN, Esq., Under-Secretary to the Government of Bengal Municipal Department,

To—The Commissioner of the Burdwan Division.

I AM directed to acknowledge the receipt of your memorandum No. 902M., dated the 27th October 1902, with which you forward a copy of a letter from the Magistrate of Birbhum, reporting that the whole of the sum of Rs. 20,000 offered by Babu Dhon Krishna Goswami for the establishment of a Dispensary at Cherla has been paid in, and that the District Board has agreed to make up the deficit in the cost of management.

2. In reply, I am to request that you will be so good as to convey to the donor the thanks of Government for his liberality and public spirit.

WEATHER AND CROP REPORT.

For the week ending the 17th November 1902.

Burdwan.—No rain. Weather fine. Sowing of *rabi* continues. Fodder and water sufficient. Condition of cattle good. Common rice sells at 11 seers per rupee.

Birbhum.—Rainfall at Sadar nil, Rampur Hât nil. Weather fair. Harvesting of *aus* nearly finished. Coarse rice sells at 13 seers per rupee. Fodder and water sufficient.

Bankura.—No rain. Weather seasonable. Harvesting of paddy continues. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Midnapore.—No rain during the week. Weather seasonable. *Rabi* sowings going on. Fodder and water sufficient. Cattle-disease reported from Binpur thana. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Contai	12	8	
Tamluk	11	0	
Ghatal	12	0	

Hooghly.—Rainfall nil. Prospect of standing crop fair. More rain wanted. Cultivation of *rabi* crops continues. Weather seasonable. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Serampore	10	0	
Arambagh	10	10	

Howrah.—Rainfall at Sadar and Uluberia nil. No rain wanted now. Harvesting of *aman* paddy on high lands has commenced. Washing of jute finished. Sugarcane doing well. No cattle-disease. Fodder and water-supply sufficient. Common rice sells at 11 seers per rupee.

24-Parganas.—Rainfall nil. Weather cool in the morning and evening. State and prospects of crops fair. Sowing of *rabi* crops continues. Reaping of *aman* on high lands commenced. Common rice sells at 11 seers per rupee. Condition of cattle good. Supply of fodder and water sufficient.

Nadia.—Rainfall nil. Weather seasonable. Standing crops at Ranaghat are suffering for want of rain. Sowing of *rabi* and oilseeds over. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Ranaghat	12	0	
Chuadanga	11	0	
Kushtia	11	4	
Meherpur	11	5	

Murshidabad.—Rainfall nil. Weather seasonable. Prospect of *aman* and *kalai* good. Sowing of *rabi* crops still continues. No cattle-disease reported from anywhere. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Kandi	14	0	
Jangipur	14	0	
Lalbagh	12	0	

Jessore.—No rain. Prospect of crops fair. Fodder and water sufficient. Cattle-disease reported from Kotechandpur and Lohagara. Common rice sells at 12 seers per rupee.

Khulna.—Rainfall nil. Weather seasonable. *Aman* paddy progressing well. Cultivation and sowing of *rabi* crops still continue. Fodder and water sufficient. Cattle-disease reported from Dumuria and Paikgachha. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	10	per rupee.
Bagerhat	12	0	
Satkhira	10	8	

Rajshahi.—Condition of standing crops favourable. Sowing of *rabi* continues. Fodder and water sufficient. Condition of cattle good. Common rice selling at 13½ seers per rupee.

Dinajpur.—Rainfall nil. Weather seasonable. Standing crops good. No cattle-disease. Fodder and water plentiful. Rice selling at 18 seers per rupee.

Jalpaiguri.—Rainfall nil. Weather seasonable. Standing *haimanti* paddy doing well Trasplantation of tobacco going on. Common rice sells at 11 seers a rupee. Fodder and water sufficient.

Darjeeling.—Rainfall nil. Weather seasonable. *Hills—Haimanti dhan*, *bara marua*, *phaphar*, and *kalai dal* doing well. *Jow* and wheat being cultivated. *Terai*—Prospects of standing crops good. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	8	0	per rupee.
Terai	10	0	

Maize sells at Darjeeling at 20 seers and at Kalimpong at 24 seers per rupee.

Rangpur.—Rainfall nil. Weather seasonable. Sowing of potato and mustard going on. Prospect of standing crops good. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	9	8	per rupee.
Nilphamari	10	8	
Kurigram	10	8	
Gaibanda	11	0	

Bogra.—No rain. Weather seasonable. Lands being prepared for and sown with *rabi* crops. Prospects good. Fodder and water sufficient. Common rice sells at 13½ seers per rupee.

Pabna.—Rainfall nil. Weather fair and cool. Sowing of *rabi* continues, *aman* being reaped. Prospects of standing crops fair. Fodder and water sufficient. No cattle-disease. Common rice sells at 10 seers per rupee.

Dacca.—Rainfall nil. Prospects of crops good. Weather seasonable. Fodder available. No cattle-disease. Common rice sells at 11½ seers per rupee.

Mymensingh.—Rainfall nil. Weather seasonable. *Rabi* sowing going on. Harvesting of winter rice commenced. Fodder and water sufficient. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Kishoregunge	12	0	
Jamalpur	11	14	
Netrakona	13	6	

Faridpur.—Rainfall nil. Cold weather regularly set. State and prospects of crops good. Common rice sells at 11½ seers a rupee. Fodder available. No cattle-disease.

Backergunge.—Rainfall nil. Weather seasonable. Prospects good. Fodder sufficient. Common *aman* 11 and *aus* 12 seers per rupee.

Tippera.—Rainfall nil. Weather seasonable. Prospects of standing crop good. Cultivation of *rabi* going on. Reaping of early *aman* paddy commenced at places. Fodder and water available. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	13	0	per rupee.
Brahmanbaria	13	5	
Chandpur	11	0	

Noakhali.—No rain. Weather seasonable. Lands being ploughed for *rabi* crops. Crops slightly damaged by insects in Feni. Prospects good. Outturn of betelnut good. No cattle-disease. Fodder and water sufficient. Common rice sells at Sadar at 12 seers and at Feni at 13½ seers per rupee.

Chittagong.—No rain during the week. Cultivation of *rabi* crop is going on. A little rain wanted. Fodder and water sufficient. Common rice selling at 13 seers per rupee.

Chittagong Hill Tracts.—Rainfall nil. Weather seasonable. Prospects of standing crops fair. Sowing of *rabi* and oilseed crops commences. No cattle-disease. Rice sells at 17 seers a rupee.

Patna.—Weather seasonable. Standing crops doing well. *Rabi* sowing going on. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	ch.	
Patna	...	...	...	14	8	per rupee.
Barh	...	...	...	13	0	
Bihar	...	...	...	11	0	
Dinapore	...	...	...	14	8	

Gaya.—Rainfall nil. Weather cold. Harvesting of early paddy commenced. Sowing of *rabi* and poppy continues. No cattle-disease. Fodder and water sufficient. New common rice selling at 15 seers per rupee.

Shahabad.—Rainfall nil. *Rabi* sowing approaching completion. Paddy and sugarcane doing well. Fodder and water abundant. Rice sells at Sadar at 13 seers per rupee.

Saran.—Rainfall nil. Weather seasonable. *Rabi* sowing almost finished. Standing crops doing well but rain wanted. Poppy sowing practically finished in Siwan subdivision. Fodder and water sufficient. No cattle-disease. Common rice sells at 14 seers per rupee.

Champaran.—Rainfall nil. *Rabi* and poppy being sown. Standing crops doing well. Outturn of winter rice estimated at 120 per cent. No cattle-disease. Fodder and water sufficient. Common rice sells at 17 seers and maize at 32 seers per rupee.

Muzaffarpur.—Rainfall nil. Weather fair. *Rabi* sowings going on. Prospects of crops good. Fodder and water sufficient. Common rice selling at 12 seers and maize at 26 seers per rupee.

Darbhanga.—Rainfall nil. Prospect of standing crops good. *Rabi* sowings in progress. Fodder and water sufficient. Cattle-disease reported from thana Phulparas. Common rice sells as follows:—

				Srs.	ch.	
Sadar	...	...	...	14	4	per rupee.
Samastipur	...	...	...	14	0	
Madhubani	...	...	...	13	0	

Monghyr.—No rain. Weather seasonable. *Rabi* sowing continues, seed germinating well. Poppy being sown. Paddy-cutting and sugarcane-pressing commenced in places. Prospect of standing crops hopeful. Fodder and water sufficient. Cattle-pox reported from a village in Begusarai thana. Common rice sells at Sadar and Jamui at 13 seers and at Begusarai at 12 seers and 8 chitaks per rupee.

Bhagalpur.—Rainfall nil. Weather seasonable. Harvesting of paddy and sugarcane commenced in Supaul and Banka subdivisions respectively. Sowing of *rabi* crop going on in Banka subdivision. Cattle-disease reported from Madhipura and Supaul. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	ch.	
Sadar	...	...	...	13	14	per rupee.
Banka	...	...	...	12	8	
Madhipura	...	...	...	13	8	
Supaul	...	...	...	14	8	

Purnea.—Weather getting cool day by day. Prospects of winter rice generally good. *Rabi* sowings going on. No cattle-disease. Fodder and water sufficient. Common rice sells at Sadar and Kishanganj at 11 seers and at Araria at 14 seers per rupee.

Malda.—Rainfall nil. Weather seasonable. Prospects of *kalai*, winter rice and other standing crops good. Sowing of *rabi* still going on. No cattle-disease. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Sonthal Parganas.—Rainfall nil. Weather seasonable. Harvesting of early winter rice continues. Standing crops doing well. Fodder and water sufficient. Common rice sells at 13 seers per rupee at Sadar.

Cuttack.—No rain. Weather seasonable. Want of rain has affected standing crops and *rabi* sowings on high lands. Prospects of crops on low and irrigated lands good. Fodder and water available. Common rice (new) 16⅞ seers and (old) 13¾ seers per rupee at Sadar.

Balasore.—Rainfall at Sadar nil. Early winter paddy being harvested. Sugarcane thriving. Other crops doing well. Rice sells at 16 and 14 seers per rupee at Bhadrak and Sadar respectively. Fodder and water sufficient.

Angul.—No rain. Weather seasonable. *Laghu* paddy being harvested. *Rabi* crop stunted and not sown in many places for want of rain. Cattle-disease reported from Angul. Common rice sells at 15 seers per rupee at Sadar and Khondmals.

Puri.—Rainfall nil. Weather seasonable. Harvesting of winter rice on upland continues. Normal outturn not expected. Rain wanted for low land crops. Pressing of sugarcane continues in places. Miscellaneous crops doing well. Fodder and water sufficient. Common rice sells at 14 seers per rupee.

Hazaribagh.—Rainfall nil. Weather seasonable. Cattle disease reported from one thana. Harvesting of paddy and sowing of *rabi* continue. Standing crops doing well. Fodder and water sufficient. Common rice sells at 15 seers per rupee.

Ranchi.—Rainfall nil. Weather seasonable. Harvesting of winter paddy in full swing. Sowing of *rabi* continues. Cattle-disease reported from several thanas. Fodder and water sufficient. Common rice selling at 14½ seers per rupee.

Palamau.—No rain. Weather seasonable. Rain wanted for *rabi*. Sowing of mustard retarded. Outturn of winter rice expected 75 per cent. Sugarcane doing well. Cattle-disease continues in places. Fodder and water sufficient. Rice sells at Sadar at 14 seers and maize at 24 seers per rupee.

Manbhum.—Rainfall nil. Weather seasonable. Prospects of crops good. Fodder and water sufficient. Cattle-disease reported from thana Manbazar. Average price of common rice at Sadar is 15 seers and at Gobindpur 11½ seers per rupee.

Singhbhum.—Rainfall nil *Rabi* crops need rain. Harvesting of paddy nearly finished. Average price of rice is 14 seers per rupee at Sadar.

General Summary.—No rain. In Orissa the paddy crop and the *rabi* sowings have suffered for want of rain. Hooghly, Nadia, Saran, Palamau and Singhbhum also require rain for the young *rabi* crops; elsewhere prospects of crops are generally good and in some districts excellent. Harvesting of winter rice has commenced in places *Rabi* and poppy being sown. Cattle-disease reported from 10 districts. No want of fodder or water. The price of common rice has risen in 4 districts, fallen in 17, and is stationary in the rest.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

	Inches.
The mean pressure of the seven days	29·936
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29·957
	Hours.
The total number of hours of bright sunshine	56·0
The maximum possible number of hours of sunshine	77·5
	°
The mean temperature of the seven days	72·8
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	76·0
The extreme variation of temperature	22·1
The maximum temperature	84·1
	Miles.
The highest velocity of the wind in one hour	10
	%
The mean relative humidity	75
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	73
	Inches.
The total fall of rain from 9th to 15th November 1902	Nil.
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·35
The total fall from 1st January to 15th November 1902	61·62
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65·13

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

△, dew.

Per mile of railway corresponding week of previous year.	... .	228 11 0	......	375 3 11	12 7 6	616 7 2	.....	.....	......
Total for corresponding 16½ weeks of previous year.	6,615,628	69,08,985 5 4	8,64,16,282 10	1,51,47,846 5 0	3,50,753 13 6	2,24,07,585 7 10	1,851,849½	3,270,037½	5,121,887

(a) The decrease is due (1) to the movements of pilgrims in connection with an eclipse of the Moon, (2) to passengers leaving Calcutta for the Durga Puja holidays, and (3) to the running of a mule train from Kidderpore Docks to Meerut in the corresponding period of 1901.

(b) The increase is chiefly in food-grains, salt, piece goods, and coal traffic.

* Deducted No. of passengers 5,500 and Rs. 12,924 } On account of difference between the approximate and audited figures for the week ended 6th September 1902.
† Added mds. 1,20,324 and deducted ... ,, 11,738 }
‡ Deducted ... . ,, 8,018 }

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF OCTOBER 1902.

WEATHER during October was more settled than is usual in that month. Pressure was almost uniformly high; no cyclonic disturbance of any importance entered the Province from the Bay, and rainfall was deficient over the whole land area, more especially in the western districts. In Orissa the defect in rainfall was more than 5 inches on an average for the Division; in Chota Nagpur and Orissa was more than 2 inches, and in North and East Bengal and Bihar, between 1 and 2 inches.

Though in general settled, weather was in some respects peculiar. The high pressure was not so marked in the north of the Province as in the south-western districts, and consequently light southerly winds were fairly continuous over the central districts. From the north-east, on the other hand, north-easterly winds were equally steady, and it was probably owing to the interaction of these two wind systems that rainfall continued in North Bengal during the greater part of the first half of the month. Temperature also, probably owing to the northerly winds in North Bengal and Assam, was generally below the normal. In Assam the mean defect was 2°·5 and in North Bengal 1°·3, while in Orissa and Chota Nagpur there was excess of 1°.

A slight depression moved northwards from the Bay into East Bengal in the early days of the month and caused general rainfall over the greater part of the Province on the 3rd. The falls were most heavy in Lower Bengal, and a number of stations in East Bengal received more than 3 inches on the 3rd and 4th. It was chiefly owing to the rainfall on those two days that the average fall in East Bengal was so much as 3·9 inches. Only a few showers fell after the 4th, and after the 11th East Bengal was practically rainless.

A disturbance of a kind unusual in October passed over the western districts about the 19th. There appears to have been a series of thunderstorms of the nature of nor'westers, occurring in rapid succession, first in Bihar, then in the west of Chota Nagpur and the Sonthal Parganas, and afterwards in South-West Bengal, late in the 18th or early in the 19th. The changes of pressure at 8 A.M. on the 19th showed that the area of disturbance included Raniganj, Purulia, Bankura, and Burdwan, and about an hour later a thunderstorm with a rapid rise of pressure commenced at Calcutta. It was probably owing to that disturbance that most of the stations in Bihar, and over a tract of country extending from the west of Bihar to South-West Bengal reported moderate rainfall on the 19th.

About the same time there was a shallow depression in the east of the Bay, which was of brief duration. It caused some increase of wind at Burma stations, and on breaking up a slight disturbance entered the north of the Bay, but had little influence on the general weather conditions over the Province.

Towards the end of the month another shallow depression crossed the Madras coast between Madras and Cuddalore from the south-east. The greatest deficiency in pressure was only ·1 inch, but the disturbance was remarkable because of the exceptionally heavy rain which fell on the coast between Madras and Vizagapatam between the 28th and 30th, and the strong winds between Masulipatam and Vizagapatam. The rainfall caused by the disturbance extended slowly northwards, but did not reach Orissa, as the only falls in that Division during the last week occurred before the 27th

The only other noteworthy feature was the cloudy and in places showery weather in the south-western districts in the latter part of the month. The cause of these local showers is not apparent. The most general rainfall occurred in Orissa, and the showers in South-West Bengal were very scattered and generally light. Contai received 2 inches on the 26th and Calcutta on the 27th.

Pressure was above the normal throughout the month and generally by rather large amounts. The averages for the month show two areas in which this excess was largest, one over Orissa and the Circars, and the other in North Bengal. To some extent the peculiar weather conditions noted above were no doubt due to a pressure distribution such as these averages indicate: and, in particular, the local storms with scattered rainfall in the south-western districts were probably due to the interaction of winds blowing from two centres of high pressure, the one in the north-east probably extending beyond the Himalayan range, the other in Central India.

The absence of cyclonic storms in the north of the Bay and the extreme shallowness of the two depressions which entered the Province in the early part of the month were probably due to the same causes as the prevailing high pressure rather than a direct result of the high pressure.

Excess in Orissa and North Bengal on an average for the month was more than ·1 inch, and in other parts between ·07 and ·1 inch.

Temperature.—As northerly winds were fairly continuous in the north-east of the Province, cool weather for the season was experienced in that part of the Province. Both night and day temperatures were below the normal in North and East Bengal, Assam and Bihar. In the south-western districts when southerly winds were more general, maximum and minimum readings were above the normal, most so in Orissa as regards the former.

The mean excess in Chota Nagpur was 1°, and in Orissa just under 1°. In Bihar and South-West Bengal there was either a small defect or a small excess, and in East Bengal, North Bengal and Assam there was defect increasing towards the north-east.

Rainfall—as already stated, was much lighter than usual over the greater part of the Province. The rainfall caused by disturbances from the Bay was largely confined to the eastern districts, while in the west only scattered showers occurred, due apparently to local disturbances.

Cyclonic storms from the Bay at times cause very heavy rainfall in the south-west of the Province in October, and hence the normal fall for Orissa is large in that month, viz., 6·3 inches. The tendency for such storms at the end of the season is to move either northward or north-eastward in Bengal, so that all parts of the Province are subject to their influence. The comparative absence of rainfall during the month just past is therefore due to the absence of cyclonic disturbances. North and East Bengal, the only two divisions for which the rainfall for the month approximates to the normal, received fairly large amounts owing to a slight depression which entered East Bengal about the 4th and caused disturbed weather over the eastern districts. In North Bengal the average fall for the month was 3·3 inches, and in East Bengal 3·9 inches, in each case about 70 per cent. of the normal. In the other divisions the fall was below 50 per cent., and in Orissa and Chota Nagpur only 20 per cent. of the normal.

The following table gives a comparison between the actual monthly and total rainfall and the normal rainfall of the Province up to the end of October in the same form as has been employed in the previous monthly abstracts of the present year. The figures represent the ratio of the rainfall of each month of the present year to the normal rainfall expressed as a percentage The table thus gives a condensed summary of the rainfall data of the year for each meteorological division. The first ten columns give the percentage amount of rainfall received in each month, and the last column the percentage rainfall of the whole period from the 1st of January to the end of October:—

METEOROLOGICAL DIVISIONS	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	Actual rainfall of first ten months of 1902 expressed as a percentage of the normal fall for the period.
South-West Bengal	Nil	2	166	250	136	57	110	89	104	38	95
North Bengal	11	2	261	154	112	108	112	123	162	74	122
East Bengal	Nil	1	85	308	127	131	129	92	111	68	121
Bihar	13	4	263	177	99	60	111	71	144	44	95

	Inches.
The mean pressure of the seven days	30·056
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29·992
	Hrs.
The total number of hours of bright sunshine	56 9
The maximum possible number of hours of sunshine	76 7
	°
The mean temperature of the seven days	70·3
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	73·8
The extreme variation of temperature	26·5
The maximum temperature	83·8
	Miles.
The highest velocity of the wind in one hour	13
	%
The mean relative humidity	71
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	70
	Inches.
The total fall of rain from 16th to 22nd November 1902	Nil.
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·01
The total fall from 1st January to 22nd November 1902	61·62
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65·14

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌂, dew.

G. W. KÜCHLER,
for *Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.*

RESOLUTION ON THE REPORTS ON INLAND EMIGRATION FOR THE PERIOD FROM THE 1st JANUARY TO THE 30th JUNE 1902.

GENERAL DEPARTMENT—EMIGRATION.

Calcutta, the 1st December 1902.

RESOLUTION—No. 3611.

READ—

The Reports on Inland Emigration, for the period from the 1st of January to the 30th of June 1902, of the Superintendents of Emigration, Calcutta, Sonthal Parganas, Hazaribagh, Ranchi and Palamau, and Manbhum and Singhbhum, and the remarks of the Commissioners of the Bhagalpur and Chota Nagpur Divisions on the reports of the Superintendents in their respective Divisions.

THE Government of India having ordered that the reports on Inland Emigration shall in future be prepared for the year ending the 30th June instead of for the calendar year in order that recruiting operations, which are most active from October to June, may be summarised for an entire season, and reports having already been submitted for the year ending December 1901, the Superintendents of Emigration were called upon to submit supplementary reports for the broken period, 1st January to 30th June 1902.

Working of Act VI of 1901.

2. The most important order issued by Government, under Act VI of 1901 during the six months under review, was a notification under section 91(*b*) of the Act, exempting garden sardars working under the control of the officers of the Tea

Districts Labour Supply Association from the provisions of sections 72 to 75 of the Act, on the understanding that when a labour contract is not executed in the presence of the Registering Officer under section 72, no penal contract will be made in the case of an emigrant recruited under these circumstances, whether under Act XIII of 1859 or otherwise before his arrival in the labour district. Intending emigrants recruited by such sárdars will be registered; and it will be ascertained that they are willing to proceed to the tea districts, and that there has been no coercion, undue influence, fraud, misrepresentation, or mistake in their recruitment. It is too early to judge of the popularity and success of this arrangement which has been made at the instance of the Labour Supply Association who recruit two-thirds of the emigrants sent to Assam.

District Officers should carefully distinguish in their statistics between emigrants merely registered and emigrants put under contract; and it is desirable that the Superintendent of Emigration, Calcutta, should bring together in his Report, after necessary correspondence with the District Officers and the local Superintendents of Emigration, the entire figures for the Province relating to licensing of contractors, registration of emigrants, and execution of contracts.

Number of emigrants.

3. In all 17,774 emigrants of all classes, of whom 9,422 were recruited in Bengal and the rest in Madras and the Central Provinces, embarked at Goalundo and Jatrapur for the labour districts during the period under review. Seventy-nine per cent. of the whole number were recruited by garden sardars and only 523 or less than 3 per cent. went as free emigrants. Emigration from the districts of the Chota Nagpur Division has not improved: the reasons assigned by the local officers are that the re-action after the heavy emigration in the famine years of 1897 and 1900 still continues; that recent harvests have been good and that the condition of the people is fairly prosperous; and that the new Act and Rules are more stringent than the old Act, especially with regard to recruitment of women. The Commissioner of the Chota Nagpur Division adds that the coal mines attract much of the available labour. In the Sonthal Parganas recruitment both by garden sardars and by contractors was more brisk during the year under review than in the first half of the preceding year; and in the contractors' depôts in Calcutta and Raniganj there was a small increase of the number of registered emigrants.

The health of the emigrants in transit was good, and there were only five cases of cholera on the river journey.

Measures taken to ensure registration of emigrants in the district of recruitment and to prevent irregularities.

4. The measures taken to ensure registration of emigrants in the district of recruitment and to prevent irregularities were stated in the Resolution of the 15th July last. In the six months under review, the conduct of garden sardars in Manbhum and Singhbhum was not altogether satisfactory; and in seven cases registration had to be refused for irregular recruitment. In the Ranchi and Palamau districts registration was refused in 16 cases of females recruited under the sardari system. In the Hazaribagh district no instance of unauthorised recruitment or of any irregularity on the part of certificated or specially empowered garden sardars came to light during the half year; and in the Sonthal Parganas there was no prosecution in connection with the system of garden sardars.

It has been brought to notice by the Superintendent of Emigration, Manbhum and Singhbhum, that persons formerly employed as arkatis or unlicensed recruiters are being sent to Assam under contract with a view to their being sent back from the gardens as recruiting sardars. Provided that these men work in conformity with the Act and Rules, no legal objection can be taken to their employment as garden sardars. The Commissioner of Chota Nagpur has rightly ordered that it should be reported how many of the garden sardars punished for offences against the Act or the Rules were formerly arkatis, with a view to taking prompt steps in order to cancel the licenses of offenders.

By order of the Acting Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION REVIEWING THE REPORTS ON THE WORKING OF MUNICIPALITIES IN BENGAL (EXCEPT CALCUTTA) DURING THE YEAR 1901-1902.

MUNICIPAL DEPARTMENT.—MUNICIPAL.

Calcutta, the 27th November 1902.

RESOLUTION—No. 3021 M.

READ—

The Reports from the several Commissioners of Divisions on the working of Municipalities in Bengal (except Calcutta) during the year 1901-1902.

Read again—

The Resolution reviewing the Divisional Commissioners' Reports on the working of Municipalities during the year 1900-1901.

The number of Municipalities in Bengal during the year ending with the 31st March 1902 was 157. Two new Municipalities were formed during the year at Tollyganj and Giridih, the former by dividing the South Suburban Municipality which had been found too large for efficient administration. The inhabitants of the 157 Municipalities number 2,839,764 persons. As the Giridih Municipality came into existence towards the close of the year, this review deals with the statistics of 156 Municipalities.

2. The total number of rate-payers rose from 478,519 to 487,767, representing 17·1 per cent. of the total municipal population. The increase was shared by all the Divisions except Orissa and Chota Nagpur, where there was a slight decline. The percentage of rate-payers to population varied between 18·7 in the Presidency Division and 14·3 in the Dacca Division. Taking, however, the case of individual Municipalities the percentage varied between 34·7 at Chapra and 5·1 at Kurseong. Unfavourable mention was made in last year's Resolution of the low percentage of rate-payers in the Municipalities of Arrah, Motihari, Darbhanga, Cuttack, Comilla and Dacca, which form the head-quarters of districts. Of these Comilla shows an increase from 13·2 to 16·5 per cent. due to revision of assessment. Among the rest there was a slight rise in the percentage at Motihari and Dacca, whilst the figures returned from Arrah, Darbhanga and Cuttack showed further decline. The decline at Darbhanga is attributed to the fact that many poor people left the town on the appearance of the plague. In Cuttack a revision of assessment is proceeding, in which the existing defects will, it is hoped, be rectified.

The percentage of rate-payers to population was below the Provincial average in no less than 72 towns, and the attention of the Commissioners of those towns is specially drawn to the remarks on the subject recorded in the last Annual Resolution.

3. *Results of Elections held during the year.*—General elections were held only in the Municipalities of Cossipur-Chitpur and Maniktala. All the elections, but one, were contested, and at those elections the percentage of attendance of persons qualified to vote varied between 65 and 43.

4. *Constitution of Committees and attendance at Meetings.*—There was little variation in the composition of Municipal Committees There were in all 2,541 meetings held during the year, almost the same number as in the previous year, and of these only 214, or 8·4 per cent had to be adjourned. Twenty-nine Municipalities held more than 20 meetings during the year; whilst twenty-one failed to hold at least one meeting every month, as required by the law. Ranaghat again held the largest number of meetings, viz., 35 against 32 in the previous year, and Cossipur-Chitpur and Burdwan stand next with 30 and 29 meetings, respectively. The smallest number of meetings, viz., 7, was held in the Revelganj Municipalty. Of the seven Municipalities noticed in the previous year's resolution for holding too few meetings, Garden Reach alone complied during the present year with the requirements of the law, the number of meetings held being 13: and the rest all failed to hold 12 meetings —Jagadispur and Sahebganj again holding only 8 and 9 meetings, respectively. The North Barrackpore Municipality has for the third year in succession failed to hold regular monthly meetings. The Commissioner has drawn the attention of the Municipal Commissioners to the law on the point. Throughout the province the average percentage of attendance of Commissioners was 52 as in the previous year. In 91 Municipalities as against 108 in the previous year, an average of

more than one-half of the total number of Commissioners attended at each meeting. The highest percentages of attendance were at Garulia (81 per cent.), Tollyganj and Bihar (75 per cent.), Daltonganj (74 per cent.), and Kamarhati and North Barrackpore (73 per cent.): and the lowest, 21 per cent. at Jhalda. On the whole the frequency of the meetings and the attendance at them were sufficient for practical purposes.

5. *Assessments and taxation.*—The main form of Municipal taxation is either the rate on holdings, or the alternative tax on persons according to their circumstances and property within the Municipality. The former system was in force in 43 towns, and the latter in the remaining 113 exclusive of the Municipality of Bhadreswar, where both forms of taxation are in force in different wards. The rate on holdings was levied at less than the maximum rate allowed by the law in 13 towns, among which the Municipalities of Howrah, Hooghly and Chinsura, Krishnagar and Darjeeling again find place, and the lowest rate, viz., 5 per cent. on the annual value of holdings, was levied at Sahebganj. The tax on persons is levied at varying rates according to requirements. Of the special rates the latrine-rate was levied in 103 towns, the water-rate in 10 towns which have been provided with a filtered water-supply (excepting the town of Dacca, where no water-rate is levied although the town is supplied with filtered water), and the lighting-rate only in two towns, viz., Howrah and Darjeeling, no rate being levied for the purpose in the other Municipalities adjoining Calcutta which are lighted with gas, or at Dacca which is lighted with electricity.

6. The incidence of Municipal taxation (excluding Calcutta) varied between Rs. 7-7-10 per head at Darjeeling and Re. 0-4-5 at Ramjibanpur. The average for the whole Province was Rs. 1-2-10 against Rs. 1-1-5 of the previous year. The number of Municipalities in which the taxation is below 8 annas per head fell from 38 in 1900-1901 to 32 during the year under review.

7. *Revision of Assessment.*—A revision of assessment, general or partial, came into force in several Municipalties, the best financial results being attained in the following towns:—

Name of Municipality.	Amount of increase.	Name of Municipality.	Amount of increase.
	Rs.		Rs.
Dacca	22,422	South Suburban ...	2,398
Howrah	8,775	Rangpur	2,206
Gaya	8,559	Krishnagar	2,080
Arrah	5,319	Jamalpur	1,940
Puri	5,149	Serajganj	1,722
Maniktala	4,975	Bettiah	1,580
Chapra	4,596	Barh	1,529
Patna	4,126	Sasaram	1,414
Titagar	3,668	Narainganj	1,286
Nasirabad	2,556	Bankura	1,260

At Ranchi the demands for the rate on holdings and the latrine-rate declined by Rs. 2,310 as the result of a partial revision of assessment. No explanation has been furnished of this unsatisfactory result. The Commissioners of the North Barrackpore Municipalty have twice revised their assessments, but on both occasions the results were found to be unsatisfactory. They were moved to appoint a paid assessor to make a further revision, and have at last resolved to do so.

8. *Demands, collections, remissions and outstandings on account of Taxes.*—The current demand amounted to Rs. 32,79,297, showing an improvement of Rs. 92,520 as compared with the previous year; and the total demand on the Municipal books, including arrears, rose from Rs. 37,35,303 to Rs. 37,94,123. The total collections also rose from Rs. 30,25,244 to Rs. 32,39,390, and the outstanding balance at the close of the year stood at Rs. 3,66,274 against Rs. 5,18,670 at the beginning of the year, whilst the remissions fell again by Rs. 2,930. The collections of the year averaged 98·8 per cent. of the current demand, against 95 per cent. in the previous year. The collection of the current demand shows, as in the preceding year, an improvement of about 4 per cent. The year's administration in this respect was very creditable, and it is to be hoped that the general improvement will be maintained.

9. When the results attained by the groups of Municipalities in each Division are considered, it appears that the highest percentage of total collections on current demand was 101·7, which was attained in the Patna

15. The increase of Rs. 1,81,119 in the revenue shown above does not represent the real increase in the ordinary revenues of the Municipalities for they borrowed Rs. 1,48,900 less than in 1900-1901. Excluding the receipts under "6—Extraordinary and debt," the total real income amounted to Rs. 42,50,552 against Rs. 39,20,539 in the previous year, showing an increase of Rs. 3,50,013, or 8·4 per cent.

The permanent increase in income derived from taxation proper amounted to Rs. 2,48,753, or 8·0 per cent. The increase was shared by all the Divisions, and was largest in the Burdwan Division.

16. *Tax on houses and lands.*—This tax yielded a revenue of Rs. 11,96,554, which was Rs. 1,02,151 in excess of the income during the previous year. The increase was shared, more or less, by the groups of Municipalities in all the Divisions. The largest increase of Rs. 24,207 and Rs. 24,863, occurred, respectively, in the Burdwan and Presidency Divisions. There were large increases in the Municipalities of Burdwan (Rs. 7,234), Hooghly and Chinsura (Rs. 4,381), Serampore (Rs. 2,330), Howrah (Rs. 11,948), Garden Reach (Rs. 4,032), Dacca (Rs. 13,790), Chittagong (Rs. 5,080), Patna (Rs. 2,699), Gaya (Rs. 3,457), Muzaffarpur (Rs. 9,132), Monghyr (Rs. 3,953), Jamalpur (Rs. 2,162), Puri (Rs. 3,720) and Ranchi (Rs. 2,393). At Budge-Budge, which was formed into a Municipality only in the previous year, the income rose from Rs. 4,197 to Rs. 16,297. The increase at Chittagong was due to the realisation of taxes due from the Assam-Bengal Railway for the last three years. Revised assessments brought into operation during the year and better collection of both arrear and current demand, contributed generally to the increases under this head in the other towns.

17. *Tax on animals and vehicles.*—There was an increase of Rs. 7,137, or 3·0 per cent., in the revenue under this head, which was shared by several Municipalities, the largest increase of Rs. 3,009 occurring in the Rangpur Municipality, where the rate of fees on the registration of carts was raised from Rs. 2 to Rs. 3 per annum. At Barasat, in the Presidency Division, the revenue derived from this source (Rs. 5,319) exceeded the income from the tax on persons levied in that town, and the fairness of this arrangement should be investigated.

18. *Tax on professions and trades.*—The comparatively small revenue from this source shows a small increase of Rs. 2,080. This was shared by all the Divisions, except Bhagalpur and Orissa, where there was a decline of revenue, whilst the income was stationary in the Burdwan Division. In the Chota Nagpur Division the income rose from Rs. 680 in 1900-1901 to Rs. 1,179.

19. *Tolls on roads and at ferries.*—Tolls are nowhere levied on roads in Bengal but 49 Municipalities derive an income from ferries. The largest increase of income under this head occurred in the Municipalities of Patna (Rs. 4,014), Bhagalpur (Rs. 2,807), Chandpur (Rs. 1,265) and Chittagong (Rs. 1,187); while there was a decline of Rs. 1,558 at Muzaffarpur, Rs. 1,257 at Narainganj and at Daudnagar where the income fell from Rs. 1,025 in 1900-1901 to Rs. 256. The realisation of arrears accounts for the increase at Patna and Bhagalpur; the increase in the other places, and part of that at Bhagalpur, was due to competition among the lessees of the ferries.

20. *Water-rate.*—This rate was in force in 10 Municipalities against 9 in the previous year, having for the first time been levied in the South Dum-Dum Municipality during the year under reveiw. The income of Rs. 2,58,125 shows an increase of Rs. 22,143, which was shared by the Municipalities of Burdwan (Rs. 4,566), Howrah (Rs 9,917), Maniktala (Rs. 4,555), Berhampore (Rs. 1,023) and Arrah (Rs. 1,999). The income fell off at Cossipore-Chitpur, and at Bhagalpur, where the decline amounted to Rs. 1,377. The increase at Howrah and Burdwan was due to the extension of the service and at Maniktala to the raising of the rate from 1½ to 3 per cent. on the annual value of holdings. Recovery of arrears accounts for the increase at Arrah. There was a decline at Bhagalpur, due to the causes mentioned in paragraph 10.

21. *Lighting-rate.*—The income which amounted to Rs. 86,208 rose both at Howrah and Darjeeling, where the rate is in force by Rs. 2,754 and Rs. 13,049, respectively. At Darjeeling the increase was due mainly to the inclusion under this head of the amounts realized for making private connections during the year under report, which in previous years were credited under "Actual cost of private works."

22. *Conservancy, including scavenging and latrine rates.*—The revenue under this head, which amounted to Rs. 7,45,156, shows an increase of Rs. 74,382, or 11·0 per cent., over the income during the previous year. The increase occurred mainly in the Municipalities of Burdwan (Rs. 3,393), Hooghly and Chinsura (Rs. 2,312), Howrah (Rs. 23,052), Titagur, (Rs. 2,645), Garden Reach (Rs 2,767), Dacca (Rs. 2,947), Gaya (Rs. 5,062), Muzaffarpur (Rs. 7,907) and Jamalpur (Rs. 2,208). The increase is generally attributed to more efficient administration, whilst at Gaya the previous year's accounts showed only the income for three months, and at Titagur the rate was raised.

Several Municipalities continued their efforts towards making the trenching-grounds a source of income; but, as in previous years, the result was trifling. Monghyr and Ranchi were most successful in the disposal of their sewage.

23. *Tax on persons according to their circumstances and property within the Municipality.*—The total revenue of Rs. 5,70,632 shows a small increase of 8,217 as compared with the previous year. The increase was shared by several Municipalities and was marked in Arrah (Rs. 2,735) and Balasore (Rs. 2,235). Revision of assessment and collection of arrears account for the increase. The income declined by Rs. 2,567 at Dinajpur, Rs. 2,059 at Puri, and Rs. 1,565 at Cuttack. At Dinajpur the decline is only apparent, as there was a corresponding increase in the income under the tax on houses and lands of Rs. 2,022, and at Puri this system of taxation, which was introduced experimentally, was abandoned. Short collections are responsible for the decline at Cuttack.

24. *Grants from Provincial and Local Funds and contributions by private individuals.*—The total receipt amounted to Rs. 3,14,786, showing an increase of Rs. 19,143. The contributions were for medical purposes Rs. 1,74,267, education Rs. 8,487, and for general purposes Rs. 1,32,032.

25. *Gifts of money or land and works of public utility executed by private individual.*—Many instances of private liberality are brought to notice in the Commissioners' reports which will be noted in a separate Resolution. The most important were a gift of Rs. 15,000 from the late Nawab of Dacca for a hospital at Patuakhali, and another of Rs. 12,000 from Babu Ugar Mal Lohia for the construction of a building at the burning ghat at Sibpur in Howrah.

Expenditure.

26. The total expenditure in the Municipalities of the Province (excluding Calcutta,) amounted during the year to Rs. 45,56,164, against Rs. 43,72,575 in 1900-1901, being an increase of Rs. 1,83,589. The year closed with a balance of Rs. 6,06,188, against Rs. 6,05,075 in the preceding year. The percentages which the expenditure under each of the principal heads bore to the total outlay (excluding debt and suspense heads) in each of the past five years) are as follows:—

YEAR.	General establishment.	Lighting.	Water-supply.	Drainage.	Conservancy.	Medical.	Vaccination.	Public Works.	Education.
1	2	3	4	5	6	7	8	9	10
1897-98 ...	10·4	7·2	7·4	3·2	30·3	9·7	·57	17·1	3·7
1898-99 ...	10·6	4·4	5·9	3·4	31·7	10·5	·5	16·3	3·4
1899-1900 ...	10·4	5·8	6·5	3·5	29·5	10·5	·5	18 3	3·4
1900-1901 ...	11·4	5·7	6·7	5·2	31·1	11 5	·53	15·0	3·3
1901-1902 ...	10·0	6 0	6·1	4·2	31·3	11·8	·53	16·5	3·2

The percentages for the past year shown in the table above are exclusive of expenditure met from loan funds.

Division; the Burdwan Division stands next with a percentage of 99·9; the lowest percentage, viz., 93·0, is returned by the Municipalties in the Chittagong Division. In individual Municipalties the percentage of total collections on current demand varied between 115·9 at Chittagong and 76·9 at Tollyganj. Calculating the total collections on the current demand, they failed to reach 95 per cent. in 26 towns. In 19 towns the Commissioners succeeded in realising the demand without leaving any arrears outstanding at the close of the year, or only a small amount not exceeding Rs. 10 in any case. The most successful were Assansol, Titagarh, Jhalakatti, Jamalpur, Dumraon, Hajipur, Deoghur, and Kendrapara. It appears that in all these towns there were no arrears at the beginning of the year, or only small outstanding balances to collect, and it is evident that if the taxes are promptly realised, the large remissions, which are such an unsatisfactory feature of some towns, can be avo ded.

At Howrah, where the administration of this Department has been defective for some years past, the total collections rose from Rs. 4,48,600 in 1900-1901 to Rs. 4,96,121, and the collection of the current demand showed an improvement of Rs. 56,479. Although the percentage of total collections on the current demand shows a satisfactory rise from 92 per cent. to 100·4 per cent., the percentage of current collections on current demand stood only at 81·5. The balance was 1¼ lakhs out of a demand of 5 lakhs, and Rs. 62,045 were remitted during the year. The results, though better than in the preceding year, cannot be considered satisfactory. Of the other Municipalities which were the subject of adverse criticism in the last Resolution, Bally shows an advance of 5·5 per cent. in the percentage of total collection on total demand, but, in spite of large remissions, the outstanding balance was Rs. 11,410 out of a total demand of Rs. 38,103. The Commissioners only succeeded in raising 62·3 per cent. of their current demand for the year. The Hooghly and Chinsura Municipality also shows an advance of 6 per cent. in the percentage of total collections on total demand, but the collection of the current demand (71·4 per cent.) was unsatisfactory. A satisfactory advance was made at Chittagong, where 96·4 per cent. of the total demand was collected, against 55·3 per cent. in the previous year. The collections in Burdwan were unsatisfactory. Only half the arrears were realised, and the outstanding balance was about one-fifth of the current demand. In Ranchi large arrears accumulated in previous years, and only a small portion could be collected. The collection of the current demand was also unsatisfactory, although it is said that punctual payments are being enforced. The Officiating Lieutenant-Governor observes with regret that four out of the six towns just mentioned are in the Burdwan Division: the special attention of the Commissioner will doubtless be given to the matter.

10. The percentage of total remissions on current demand for the whole Province fell from 6·0 to 5·7 during the year. It is satisfactory to note that, with this fall in the percentage of remissions, the percentage of outstanding balance on the total demand, which stood at 9·6 per cent., also shows a decline of 4·3 per cent., as compared with the previous year. Calculated on the current demand, the percentage of remission varied between 9·7 per cent. in the Burdwan Division to 1·9 per cent. in the Chittagong Division. The Bhagalpur and Chota Nagpur Divisions return large percentages of remissions, viz., 7·8 per cent. and 8·2 per cent. The Bhagalpur Municipality allowed a total remission of Rs. 12,799, or 17·3 per cent. of the current demand in order to clear off old accounts which were unrealisable owing, it is reported, to persons having left the town, and to the reduced circumstances of some of the rate-payers. There was still a large outstanding balance of Rs. 25,370, or about 34 per cent. of the current demand, at the close of the year. These results compare unfavourably with those at Patna, where the remissions were only 1·8 per cent., and the balance about 3 per cent. of the current demand. Large remissions were also allowed in the Municipalities of Hooghly and Chinsura (19·1 per cent. of the current demand), Bhadreswar (10·4 per cent.), Bansberia (10·8 per cent.), Howrah (12·5 per cent.), Garden Reach (21·6 per cent.), Rajpur (14·6 per cent.), Samastipur (12 per cent.), Ranchi (10·7 per cent.), Lohardaga (13·8 per cent.) and Purulia (19·8 per cent). The defective administration of the Hooghly and Chinsura Municipality has already attracted the notice of Government, and a special report on the subject from the Commissioner is awaited.

11. *Fresh imposts levied during the year.*—The tax on animals and vehicles under section 86(*a*) of the Bengal Municipal Act, 1884, was introduced into the

Municipalities of Barh and Madhubani. License fees under section 261 of the Municipal Act, for carrying on offensive and dangerous trades, were levied for the first time in the North Dum-Dum, Jessore, Faridpur and Rosera Municipalities. Fees for the cleansing of private privies were levied in the Municipalities of North Dum-Dum and Jajpur, and in portions of the South Suburban and North Barrackpore Municipalities.

Income.

12. The total funds available for expenditure were Rs. 51,62,352 against Rs. 49,77,650 in the previous year. The total expenditure was Rs. 45,56,164 against Rs. 43,72,575 in 1900-1901.

13. *Closing balances of Municipalities.*—The aggregate closing balances of the Municipalities, which stood at Rs. 6,06,188, shows a slight increase of Rs. 1,113 as compared with the previous year. In several cases funds are being accumulated for schemes of Municipal reforms, and in others money was reserved for probable plague charges. Savings effected in estimated expenditure, and the inability to fully utilise loan funds or contributions also led to the increase in some Municipalities. In Monghyr the closing balance was over Rs. 25,000, a large part of which is required for the drainage scheme, but it would be wise to spend as much as can be spared on conservancy requirements, which are urgent. It is said that many of the public latrines are in ruins, and plague and cholera are always present. The working balances fell below Rs. 100 in several Municipalities, which must have caused some inconvenience.

14. The following statement shows the total income of the Municipalities under various heads during the past year and the variations from the previous year:—

Head of Revenue.	Total receipts 1901-1902.	Comparison with 1900-1901.		
		Increase.	Decrease.	Percentage of variation.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.

Net increase ...	...	1,83,589		+ 4·1

28. *Office and Collection Establishment.*—The expenditure under this head is growing in spite of the careful scrutiny of the annual estimates by the Commissioners of Divisions. A standard has recently been prescribed by the Presidency Commissioner fixing 7½ per cent. of the collections as the standard cost of management in Municipalities. It is hoped that this order will produce a good effect in the future, but at present the average is over 10 per cent. In the case of two Municipalities in this Division a preaudit of establishment bills by the Magistrate's office was ordered, and was successful in checking irregular and unauthorised expenditure.

29. *Prevention of Fire.*—The expenditure under this head shows a decline of Rs. 1,326. As in previous years, almost the entire amount of the charge was incurred in the Municipalities adjoining Calcutta which are served by the Metropolitan Fire-brigade.

30. *Street Lighting.*—The expenditure rose from Rs. 2,20,292 in 1900-1901 to Rs. 2,44,816, showing an increase of Rs. 24,524, or 11·1 per cent., which occurred mainly in the Municipalities of Howrah (Rs. 15,805) and Darjeeling (Rs. 10,001). The payment of arrear gas-bills at Howrah and the purchase of materials for the electric-light installation at Darjeeling account for the rise of expenditure in those places. The only other Municipality which is lighted with electricity is Dacca, but the installation, which was a gift of the late Nawab Sir Khwaja Ahsanullah Bahadur, K.C.I.E., is in the hands of a board of trustees, the Municipality only contributing for the lighting of the streets the amount it formerly used to spend on oil-lamps.

31. *Water-supply.*—The expenditure under this head was Rs. 2,49,351, showing a decline of Rs. 10,911, or 4·1 per cent. The decrease was mainly in the Municipalities of Darjeeling, Dacca and Bhagalpur, where the expenditure declined by Rs. 15,576, Rs. 2,051 and Rs. 13,030, respectively, whilst on the other hand the expenditure increasd in the Municipalities of Cossipore-Chitpur (Rs 3,078), Maniktala (Rs. 3,112) and Berhampore (Rs. 5,978). The whole of Cossipore-Chitpur and a portion of Maniktala receive a supply of filtered water from the mains of the Calcutta Corporation. The Municipal Commissioners of Maniktala spent Rs. 4,828 in replacing 2,450 feet of existing pipes by others of a larger dimension. The Commissioners intend to extend the water supply further in that Municipality at an estimated cost of Rs. 99,981, and the proposals are under the consideration of Government.

The scheme for the supply of filtered water in the Garden Reach Municipality has already been sanctioned, and a loan of Rs. 45,000 has been granted for the purpose. The work will be undertaken during the current year. The filtered water scheme for the South Suburban Municipality, as well as a loan of Rs. 29,000 for its execution, has also been sanctioned by Government. Some of the Mill authorities in Naihati, Bhatpara, Titagur and Garulia continued to supply filtered water to the public free of charge from their mills. It is proposed to extend this system, so as to provide the entire population of these Municipalities with filtered water at a small cost. The supply of filtered water at Berhampore is giving general satisfaction, and the Larymore boiler put up at Barasat continued to yield excellent water. The decrease of expenditure at Darjeeling was due to the absence of expenditure on new works. A revised scheme has been sanctioned for the improvement and extension of the water supply, which is estimated to cost Rs. 1,87,893. The decline at Dacca was in the cost of maintenance of the water-works in that town. At Bhagalpur the payments of the previous year were unusually high, which accounts for the decrease of expenditure during 1901-02 The difficulties of connection with the river have been partially removed, but the reservoirs and house-connections gave trouble during the year.

The Officiating Lieutenant-Governor is gratified to find from the reports that considerable activity was displayed during the year in several Municipalities in excavating tanks and sinking masonry and tube-wells, in improving existing sources of supply, and especially in reserving selected tanks and wells for drinking and culinary purposes. The provision of a filtered water-supply is beyond the means of any but the larger and more wealthier municipalities, but almost every town can do something to extend or improve its water-supply, a measure of real and widespread beneficence.

32. *Drainage.*—The total expenditure was Rs. 1,72,151, showing a decrease of Rs 31,368, or 15·4 per cent., as compared with the expenditure of the previous year. This decrease occurred under capital outlay, the maintenance charges showing a small increase of Rs. 1,637. The decrease was shared mainly by the Municipalities of Krishnagar (Rs. 5,101). Darjeeling (Rs. 3,395), Rangpur (Rs. 4,459), Patna (Rs. 22,486), Tikari (2,051) and Monghyr (2,013), whilst there were comparatively large increases at Howrah (Rs. 3,134), Asansol (Rs. 2,899) and Raniganj (Rs. 3,240). Large capital expenditure which was incurred in the previous year on the improvement of drains accounts for the apparent decline in the Municipalities named above. The improvements at Monghyr were continued, and an outfall scheme is being carried out. Schemes

for the improvement of drainage have been prepared for the Municipalities of Cossipur-Chitpur and Maniktala, and the latter is now before the Sanitary Board. It is satisfactory to find from the reports that steps are being taken in several other Municipalities for the improvement of drainage. The report of the Commissioner of Dacca is, however, silent on the subject, although the need of a drainage system in Dacca is urgent, and specially attracted the attention of the late Lieutenant-Governor when he visited the town in August last. In Howrah, where a good system of drainage has long been urgently required, nothing was done beyond the appointment of a surveyor and some *coolies* to take levels. The Officiating Lieutenant-Governor hopes that more effective action will be taken during the course of the current year. The Chairman of the Chittagong Municipality complains of the injury to the health of the town caused by the overgrowth of jungle and want of drainage in private premises. Section 195 of the Act is intended to meet such cases, and should be put in force if necessary.

33. *Conservancy, including road-cleaning, road-watering and latrines.*—The expenditure of Rs. 12,68,329 shows a large increase of Rs. 59,715, or 4·9 per cent., as compared with the previous year. Taking the Municipalities in groups of Divisions, the increase was shared by those of the Burdwan, Presidency, Rajshahi, Orissa and Chota Nagpur Divisions, those in the two first named Divisions showing the largest increases of Rs. 35,803 and Rs. 29,015, respectively. The expenditure declined in the rest of the Divisions, and most markedly in the Patna Division, where it fell by Rs. 13,554. The increased expenditure of Rs. 20,742, Rs. 3,195 and Rs. 2,476 incurred by the Municipalities of Howrah, Burdwan and Midnapore contributed mainly to the large increase returned from the Burdwan Division. At Howrah the increase was due to the large purchase of disinfectants, higher prices of fodder, acquisition of land, the construction of bacteriological filters, purchase of a number of sullage carts, and the payment of all bills received up to March. The other Municipalities which returned comparatively large increases of expenditure in the other Divisions were Cossipore-Chitpur (Rs. 5,139), Maniktala (Rs. 3,013), Garden Reach (Rs. 2,182), Budge-Budge (Rs. 4,313), Titagarh (Rs. 4,239), Darjeeling (Rs. 3,674) and Cuttack (Rs. 2,355). On the other hand the expenditure declined largely in the Municipalities of Naraingani (Rs. 4,169), Patna (Rs. 3,594), Bihar (Rs. 15,670) and Monghyr (4,890). At Monghyr the decline was due to the fact that in the previous year an increased expenditure was incurred to secure greater cleanliness of the town so as to prevent the importation of plague. No explanation has been given of the decline of expenditure in the other towns, and the decline in Dacca, where the Magistrate reports "a crying necessity for further improvements in conservancy," is especially to be regretted. The Commissioner of the Presidency Division brings to notice the refusal of the Commissioners of the Santipur Municipality to introduce the provisions of Part IX of the Act in spite of the proved pollution of the wells, which are the source of water-supply, by well-privies, which abound in the town. The Officiating Lieutenant-Governor hopes that the Commissioner will be able to overcome this difficulty. A scheme for the conservancy of the town has been prepared, and should be introduced without delay. The improvement of *bustees* in Municipalities near Calcutta is being taken up systematically under section 245 of the Municipal Act, but progress is necessarily slow.

The expenditure on conservancy exceeded 50 per cent. of the total expenditure in five towns, viz., Titagarh (64·5), Baranagar (53·2), Garulia (53·4), Bhatpara (50·7) and Noakhali (51·0) The first four Municipalities are largely managed by the mill authorities, and the Officiating Lieutenant-Governor congratulates them on the attention paid to this important branch of administration.

34. *Hospitals and Dispensaries.*—The expenditure under this head rose from Rs. 4,45,642 in 1900-1901 to Rs. 4,48,847. The increase was shared by the Burdwan, Presidency, Chittagong and Chota Nagpur Divisions, and was largest in the Presidency Division. The expenditure declined in the remaining Divisions, and the fall was largest in the Dacca Division, where it amounted to Rs. 9,517. The increase of Rs. 12,460 at Howrah accounts mainly for the increase in the Burdwan Division; but no explanation has been given. Large increases of expenditure are also returned by the Municipalities of Baranagar (Rs. 7,654),

Cossipur-Chitpur (Rs. 4,951), Maniktala (Rs. 2,367), Darjeeling (Rs. 4,035), Rangpur Rs. (2,306), Monghyr (Rs. 4,358), Bhagalpur (Rs. 3,314), Comilla (Rs. 3,217) and Purulia (Rs. 3,694). The employment of two plague Health Officers and a gang of *coolies* accounts for the increase at Baranagar and Cossipur-Chitpur, and at Darjeeling it was due to the purchase of more European medicines and instruments for the dispensary and the provision of increased accommodation in the small-pox hospital. The construction of a ward for female patients contributed to the increase at Comilla and Purulia, and at the latter place a separate hospital was also built for contagious diseases. Large decreases of expenditure occurred in the Municipalities of Narainganj (Rs. 10,241), Dinapur (Rs. 3,328), Gaya (Rs. 10,691) and Puri (Rs. 4,826). The cost of a new dispensary building, constructed at Narainganj in the previous year, accounts for the apparent decline in the year under review. Payment of arrear bills in the previous year, reduction of plague charges, and the completion of certain works of improvement in the previous year were, respectively, responsible for the decline of expenditure in the other towns. Only two Municipalities, against five in the previous year, incurred no expenditure whatever on medical aid.

35. *Vaccination.*—The total expenditure under this head of Rs. 21,523 shows a small increase of Rs. 749. The best work was done in the Monghyr and Bhagulpur Municipalities, where each operator performed over 1,400 operations at an average cost of about 8 annas.

36. *Public Works.*—The expenditure under this head rose from Rs. 5,83,174 to Rs. 6,69,533, showing a large increase of Rs 86,359. The increase occurred under all the sub-heads—"Establishment," "Buildings," "Roads," and "Stores," and was largest under "Roads," being Rs 55,824.

37. *Public Instruction.*—The expenditure under this head, which amounted to Rs. 1,32,340, shows a small increase of Rs 5,417. The expenditure on primary education was Rs. 67,090, or 2·5 per cent. of the aggregate ordinary income of the Municipalities in Bengal. This falls below the standard of 3·2 per cent. prescribed by Government, and the Officiating Lieutenant-Governor desires that the controlling authorities will see that during the current year a proper provision, suitable to the different Municipalities, is made for the extension of primary education. Mr. Stevenson-Moore has shown the great need for this in the industrial Municipalities of the 24-Parganas, and his remarks will be considered in the Education Department. The wealthy Municipalities of the Burdwan and Dacca Divisions are the most backward in providing for primary schools.

38. *Loans.*—The South Suburban and Baraset Municipalities in the Presidency Division, and the Dinajpur and Darjeeling Municipalities in the Rajshahi Division, obtained loans of Rs. 29,000, Rs. 1,100 (being the second instalment of the loan), Rs. 10,000, and Rs. 20,000, respectively, from Government. The first two loans were for the improvement of water-supply, and the others for improvement of drainage and for the electric light installation at Darjeeling.

39. *Financial condition of Municipalities in debt to Government.*—All the Municipalities indebted to Government paid the interest and instalments on their loans in full, and no instance of default was brought to the notice of Government. There appears from the accounts to be no danger that any of the Municipalities in debt to Government will be unable to meet their liabilities in future.

40. *Audit of accounts and embezzlements*—A considerable number of cases of embezzlement came to notice during the year under review, most of them being facilitated by laxity of supervision over the collection establishment. The defalcations occurred in the Municipalities of Hooghly and Chinsura, Serampur, Azimganj, Garulia, Narainganj, Netrokona, Patna, Gaya, and Bhagalpur. Considering the simple nature of Municipal accounts, the carefully prepared account rules, and the system of regular audits, it is much to be regretted that so many cases of embezzlement have to be chronicled every year. No less than six cases occurred in Bhagalpur, the offenders being the tax-collectors of the Municipality. The circumstance is discreditable to the administration of the collection department.

41. *Working of the Porters and Dandiwallas Act.*—Bengal Act V of 1883 for the control of porters and *dandiwallas* was in force only in the Darjeeling Municipality. The total number of porters and *dandiwallas* registered during

the year was 843, against 775 in the previous year. There were 12 prosecutions against 23 in 1900-1901, and the amount of fines realized was Rs. 11-10 Three licenses were cancelled during the year. The law continued to be worked carefully and to produce good results.

42. The Divisional Commissioners have reported favourably on the general working of the Municipalities of the Province, with a few exceptions, which include those situated in the Nadia District and the Municipality of Pabna. The main difficulty is to secure a full and equitable assessment, and suggestions are made that in all cases joint assessors should be appointed. The defects in assessments are responsible not only for insufficient revenues, but also for delay and friction in the collection of taxes, which react upon the whole system of administration. In other respects there is evidence that the Commissioners have worked well for the improvement of their Municipalities and there are few complaints of lethargy or of difficulties caused by party spirit. The year has generally been one of steady improvement. Taxes have on the whole been collected with greater punctuality. The percentage of expenditure on administration has decreased, while the amounts spent on the main branches of municipal administration have increased. A readiness has been shown to initiate and carry out large schemes for water-supply and drainage, especially in the towns near the metropolis. The Chairmen and Vice-Chairmen are generally reported to have done good work, and the Officiating Lieutenant-Governor gladly acknowledges the services of those gentlemen, who have been especially mentioned by the Divisional Commissioners. It would be well if, as required by the Commissioner of Burdwan, the mass of the Commissioners would take interest in the daily work of their establishments and would supervise local works and prevent encroachments and nuisances, but so long as the presiding officers of the Municipalities are active and zealous, the Officiating Lieutenant-Governor is confident that the progress of the last few years will be maintained. He is glad also to notice that the relations between the Committees and the local authorities are satisfactory, and that the latter have been careful to give that personal attention to Municipal administration which is so valuable in stimulating local interest and in improving efficiency.

By order of the Offg. Lieutenant-Governor of Bengal,

E. W. COLLIN,

Offg. Secretary to the Government of Bengal.

FORM No. I.

STATEMENT SHOWING THE CONSTITUTION OF THE MUNICIPALITIES IN BENGAL

RESOLUTION ON THE REPORT ON PLAGUE IN CALCUTTA FOR THE YEAR MAY 1901 TO JUNE 1902.

MUNICIPAL DEPARTMENT—MEDICAL (PLAGUE)

Calcutta, the 27th November 1902.

RESOLUTION No. 1795 Medl./P.

READ—

The letter of the Chairman, Calcutta Corporation, No. 9922H., dated the 2nd September 1902, forwarding the Annual Report of the Special Health Officer on Plague in Calcutta during the year 1901-1902.

THE Acting Lieutenant-Governor has read with great interest the report submitted by Major H. E. Deane, R.A.M.C., Special Health Officer, on plague in Calcutta for the year May 1901 to June 1902.

2. Following the course which it took in the two previous years, the disease, which existed in a sporadic form from May to December, broke out in an epidemic form in January, and died down again in June. Compared with the outbreak in 1901, the epidemic began earlier in the year under review, its growth and decline were rapid, and it failed to reach the same degree of intensity. The total number of recorded deaths is shown as 6,925 against 7,398 in 1901 and 7,373 in 1900. The number of attacks reported was 7,418, and the percentage of deaths was 93·3. The mortality among cases seen alive was 71·6 per cent. and among cases admitted to hospital 82·2. This would appear to indicate that a number of cases in which the patients recovered were not reported. The ratio of deaths to attacks in India generally is 77·3 per cent., while the ratio in the chief towns of India is 83·3 per cent. In Bengal, outside Calcutta, the percentage of deaths last year was 85·1, but it is impossible to say whether this lower percentage is due to more healthy conditions in the mufassal and to the greater facilities which there exist for evacuating houses, or to defective reporting and diagnosis. Separate enquiries show that in Calcutta there is still some concealment of cases which do not end fatally, especially among Muhammadans, but the Acting Lieutenant-Governor is disposed to agree with Major Deane that on the whole the mortality from plague is accurately recorded. The proof of this is that the record accounts fully for the excess of mortality in the town.

3. Major Deane's report discusses with great caution the various conclusions which may be suggested from the experience of the last three years as to the course of the disease, the cause of infection, and the methods of preventing the spread of plague, and it would appear that our knowledge of the subject has not materially advanced. He is inclined to think that the spread of the disease in Calcutta, as compared with other towns of India, is to some extent checked by the comparatively free ventilation of the city and the exposure of the germs to the action of sun and wind which is caused by the existence of *bustis* and other open spaces. The conditions specially favourable for plague are darkness and absence of ventilation; and where they prevail, as in Wards Nos. V, VI, VII and VIII, the epidemic is severe. In *bustis* the cases are more scattered than among the crowded masonry buildings and narrow streets of the wards noted above. These facts show the necessity of opening up these wards with streets, and of carrying out the improvements suggested by the Building Commission which considered the subject in 1897. With regard to infection, Major Deane is disposed to think that the disease is not highly contagious, but that the infectious matter is conveyed by the air or some other medium to the localities which are suitable for its growth. He is not in favour of the theory that infection is carried by rats, though this opinion is strongly held by the District Medical Officers.

4. With regard to the measures of defence against plague, Major Deane argues that it is of the greatest importance to provide for the immunity of man and his surroundings. It appears to be impracticable in the present conditions of life in Calcutta to provide an artificial immunity, and the fact that only 40

persons were inoculated during the year confirms the conclusion. The Acting Lieutenant-Governor, however, observes that in some conditions inoculation is practicable, and attention is directed to the successful results which were obtained in the district of Gaya during the epidemic of 1901, an account of which is given in the extract appended.

5. Of the other more practicable measures of defence against plague, the report adds testimony to the value of disinfection, especially when it is accompanied by the demolition of infected huts. The effect of demolition could not be fully tested, as it was, in accordance with the rules, confined to non-masonry buildings, and in many cases could not be carried out until the epidemic had effected a lodgment. The result, as stated by Major Deane, was that "many lives were saved by demolition. Only three or four cases occurred among the inhabitants after removal," and these may have been due to previous infection. The Acting Lieutenant-Governor is pleased to observe that the action taken in this direction was successful. It is not, however, capable of great extension, as it is difficult to house the families whose huts are destroyed. But such demolition is evidently of considerable value in clearing away centres of the disease, which could not be removed by disinfection. The evidence of the value of disinfection continues to increase, and it is satisfactory to learn that the disinfection of every plague-infected room and of the surroundings of the houses has been carried out with the general good-will of the people. There is no suggestion in the report that a general disinfection of dangerous localities should be carried out in anticipation of plague, as was done in 1900, and the experience of the past year seems to show that such action is not required. It is satisfactory to find that no serious difficulty has been found in carrying out the work of the department. Advice and warnings have generally induced the owners or occupants of huts to carry out the work of demolition, while there was no opposition to the disinfecting operations. The Corporation are co-operating in the efforts to stop the disease by the sanitary improvement of *bustis* and other parts of the town.

6 The Acting Lieutenant-Governor cordially acknowledges the good work done during the year by the Special Health Officer and the District Officers and their staffs. He regrets to notice that there were 13 cases of plague among the staff, but it appears that the cases were, generally of mild type, and it is not clear that they were contracted in the course of plague duty. The thanks of the Government are due to Major Deane and the District Medical Officers for their reports and notes on the year's work.

By order of the Acting Lieutenant-Governor of Bengal,

E. W. COLLIN,

Offg. Secretary to the Govt. of Bengal.

INOCULATION AGAINST PLAGUE.

Extract from a Note recorded by the District Magistrate of Gaya in regard to the Inoculation against Plague in that District in 1901.

PARA.—8. In the Gaya town some 3,716 persons were inoculated by the Civil Surgeon and his assistants up to the 31st March 1901. Careful enquiry was made to discover if any of these persons became attacked with plague, and if they were, to record the result. I should note here that the plague germ is supposed to incubate for eight or ten days, which means that the germ may attack a person to-day, but that person may not develop signs of the disease for eight or ten days. Now, of all the 3,716 persons inoculated in Gaya town up to the 31st March, we discovered 31 that were subsequently attacked with the disease. Of these 27 recovered and 4 died. Of those that died, 3 died within ten days after inoculation, that is to say, that they may have had the disease before inoculation, in which case inoculation had not a fair trial: only 1* died after the period of ten days. So we find, as far as our information goes, that of 3,716 persons inoculated, only 31 were attacked with the disease, and only 1 died after the ten-days' period. Now the population of Gaya town at the census of 1891 was about 80,000. Of these a large number had left the town at the outbreak of the epidemic; say 60,000 remained in the town. This is possibly a large estimate, but let it be said then that 56,000 were not inoculated. The total number attacked from plague and suspected fever up to the 31st March was 4,720, and the total number of deaths was 4,643. Allowing for the persons inoculated, we may assume that of 56,000 persons not inoculated, 4,689 were attacked by plague and suspected fever, and 4,639 of these died. Taking the returns of only such attacks and deaths as the people themselves admitted to be plague, we have 56,000 persons not inoculated, 1,558 attacks from plague, and 1,517 deaths.

* And this was declared a doubtful case of plague by the Civil Surgeon.

9. Taking only such as the people admitted to be plague, we find that among uninoculated persons about 2·8 per cent. were attacked and 2·7 per cent. died. Taking all cases of suspected fever as well as admitted plague, we get 8·3 per cent. attacked and 8·2 per cent. died, whereas among those inoculated only 1·2 per cent. were attacked, and only 0·2 per cent. died.

10. Taking, therefore, only cases admitted to be plague, we find the proportion of deaths among the uninoculated to be 11 times greater than among the inoculated; and taking all deaths from suspected fever as well, the greater part of which were no doubt deaths from plague, we get the proportion of deaths among the uninoculated to be 41 times greater than among the inoculated. These figures are for the town of Gaya. They should be regarded as only approximately accurate; but they are as accurate as possible in the circumstances.

11. Mr. Musavi, the officer then in charge of the Jehanabad Circle of the Tikari Ward's Estate, kindly prepared for me figures showing the result of inoculation carried out under his supervision in the Jehanabad Circle, obtained by personal enquiry and by checking the reports of his own subordinates. I give his figures—

Number of persons in houses in which inoculation was done	...	985
Ditto in those houses that were inoculated	...	302
Ditto ditto that were not inoculated	...	683
Number of deaths among inoculated	...	6
Ditto ditto uninoculated	...	57

These figures show that of persons uninoculated 8·3 per cent. died, while among those that were inoculated only 1·9 per cent. died, and of those many may have been attacked before inoculation. These figures are collected from the statistics of many villages, the details of which are in the Magistrate's office.

12. Mr Wright, the Manager of the Deo Estate, writes that 937 persons were inoculated in Deo. Of these, 11 persons only were attacked with plague and only 6 died within 10 days of inoculation. These figures show that only 1·1 per cent. of inoculated persons were attacked, and 0·6 per cent. died, and that all the deaths occurred within the ten-days' period. These figures may be regarded as reliable, as the inoculations were performed under Mr. Wright's own supervision, and he made personal enquiry as to the result.

13. On the 31st day of May last, the late Mr. Burton, then in charge of the Aurangabad Circle of Tikari Ward's Estate, wrote to me as follows of the results of inoculation carried out under his supervision:—

"In all 5,780 persons were inoculated while the Doctor Babus were with me. Up to date I have not had a report of a single death after inoculation from 'plague.'"

14. Mr. Ogilvy, Manager of the Tikari Estate, gave me the following statistics on the 11th May last:—

"*Singhi.*—Every inhabitant, male and female, inoculated. One or two deaths after inoculation within the first week. None, as far as I know, later."

"*Gandrap.*—Every inhabitant inoculated. Deaths ceased afterwards. Had been three or four deaths."

"*Dhanhsar.*—Every soul inoculated. No case. Village infected (rats dying)."

"*Bham.*—Every soul inoculated. No cases (rats died)."

"*Birnana.*—Every soul inoculated. No cases (rats died)."

"*Anti.*—A large proportion of inhabitants inoculated. No cases after inoculation: 25 to 30 deaths amongst uninoculated."

"*Achhki.*—General deaths prior to inoculation. Every soul inoculated. No subsequent cases as far as heard."

"*Simri.*—Almost whole village inoculated. No cases."

"*Banchar.*—Whole village inoculated. No cases."

Mr. Coates, District Superintendent of Police, gave me the following account of his enquiries:—

"*Khaira.*—Outpost Rafiganj; some inoculated; most not. Inoculated, no deaths: uninoculated, a number of deaths. Results—all uninoculated subsequently got done."

"*Bhadwa.*—Outpost Rafiganj; some inoculated; most not done. Amongst those inoculated 7 got plague and recovered; amongst uninoculated no recoveries."

"*Pogar.*—Outpost Rafiganj, 4 miles west. Numerous cases of plague. Daily deaths. Messrs. Ogilvy and Burton then went there and got every man, woman and child done. Not another case of plague after it was done."

"*Baruna.*—Near Pogar. Every man, woman and child inoculated. Subsequently village became plague-infected. Rats died, but not one case of plague amongst the inhabitants."

"*Khiriwan.*—Near Madanpur outpost. Deo Raj arranged to inoculate 200 or 250, but when Civil Hospital Assistant went there, all refused: reason, the Mullah (a Julaha) had forbidden it. Result—200 or 300 deaths from plague, mostly Jolahs, and amongst the number our friend the Mullah."

15. Making every allowance for the unavoidable difficulty of obtaining accurate statistics in respect of inoculated persons after they have gone to their houses, it must be admitted that the figures afford conclusive evidence of the marked efficacy of inoculation. Looking at inoculation from the point of view of a preventive, the results are still more striking; while in the case of uninoculated we find that nearly all who were attacked died, in the case of those who had been inoculated we find that out of the 42 attacks of which we have authentic information, only 1 died after the ten-days' period. It must also be recollected that the people were at first doubtful of the value of inoculation and were inclined to ascribe bad effects to it, and hence perhaps the tendency was to exaggerate the number of deaths after inoculation rather than to minimise it. But the most striking evidence of the value of the measure as a preventive was its great popularity latterly, after its effects had been experienced by the people, which was shown by the readiness with which they came forward to be inoculated in February, March, April and May in the western parts of the district, where trained medical officers had been deputed for the purpose. In all some 23,000 persons were inoculated of their own free will in the Gaya district.

REPORT ON THE STATE OF THE SALT MARKET FOR THE SECOND QUARTER OF 1902-1903.

No. 1348B., dated Calcutta, the 22nd November 1902.

From—H. WHEELER, Esq., Secretary to the Board of Revenue, L. P.,

To—The Secretary to the Government of Bengal, Financial Department.

THE HON'BLE MR. BOLTON, C.S.I.

I AM directed to submit the following report on the state of the salt market for the second quarter of the year 1902-1903, comprising the months of July, August and September 1902.

2. The quantity of salt of every description cleared during the quarter amounted to 28,29,527 maunds, as compared with 32,49,311 maunds in the preceding quarter, and 28,29,273 maunds in the corresponding quarter of the previous year; and the net amount of duty levied thereon was Rs. 66,14,043, against Rs. 76,80,087 in the previous quarter, and Rs. 66,07,664 in the corresponding quarter of the previous year.

3. The balance in hand of locally-made salt in Orissa was exhausted in the previous quarter and there was no fresh manufacture.

4. The subjoined Table (I) shows in detail the importations into the port of Calcutta and the total clearances of sea-imported salt during the quarter, as compared with the figures of the corresponding quarters of the two previous years:—

TABLE I.

7. The quantity of salt despatched during the quarter by the East Indian Railway to stations beyond Buxar amounted to 810 maunds, against 1,620 maunds in the previous quarter and 810 maunds in the corresponding quarter of the previous year.

8. The quantity of saltpetre salt excised in the refineries of the Lower Provinces during the quarter amounted to 3,187 maunds as compared with 4,742 maunds in the previous quarter, and 2,814 maunds in the corresponding quarter of the previous year.

9. The shipments of Liverpool salt during the quarter for the port of Calcutta, according to the published market reports, amounted to 18,300 tons. It is reported that no vessel for Calcutta with salt from Hamburg was afloat at the end of the quarter.

10. Table IV shows the average wholesale prices per 100 maunds of Liverpool and other descriptions of salt during each fortnight of the quarter:—

TABLE IV.

No transactions in sea-imported salt have been reported for the quarter from Cuttack and Puri.

WEATHER AND CROP REPORT.

For the week ending the 1st December 1902.

Burdwan.—No rain. Weather fine. Harvesting of *aman* continues. Fodder and water sufficient. No cattle-disease. Common rice sells at 11 seers per rupee.

Birbhum. No rain. Weather fair. *Rabi* sowing nearly over. Harvesting of *aman* commenced. Sugarcane doing well. Fodder sufficient. Common rice sells at 13½ seers per rupee.

Bankura. No rain. Harvesting of winter rice in progress. For want of rain *rabi* showing not satisfactory. Fodder and water sufficient. No cattle-disease reported. Common rice selling at 13 seers per rupee.

Midnapore.—No rain. Weather seasonable. Harvesting of winter rice going on. Sugarcane doing well. Fodder and water sufficient. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Contai	12	0	
Tamluk	11	0	
Ghatal	12	0	

Hooghly.—Rainfall nil. Prospect of standing crop fair. Cultivation of *rabi* crop continues. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee
Serampore	10	0	
Arambagh	10	14	

Howrah.—No rain. Weather seasonable. Harvesting of *aman* paddy on high lands continues. Cultivation of *rabi* commenced. Fodder and water sufficient. No cattle-disease. Common rice sells at 11 seers per rupee.

24-Parganas.—Rainfall nil. Weather moderately cold. State and prospects of standing crops fair. Sowing of *rabi* crops nearly finished. *Aman* being harvested. Common rice sells at 11 seers per rupee. Condition of cattle good. Supply of fodder and water sufficient.

Nadia.—Rainfall nil. Harvesting of winter rice commenced. *Kalai* and *mung* crops in Meherpur subdivision suffering for want of rain. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Ranaghat	report not received		
Chuadanga	13	0	
Kushtia	11	4	
Meherpur	11	5	

Murshidabad.—Rainfall nil. Weather seasonable. Cultivation of *rabi* crops still going on except at Sadar. Harvesting of *haimanti* paddy commenced at Jangipur and Lalbagh. Prospect of standing crops good. No cattle-disease reported from anywhere. Fodder and water sufficient, but former not so at Noada and Daulatabad. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Kandi	14	0	
Jangipur	13	0	
Lalbagh	12	4	

Jessore.—No rain. Weather seasonable. Prospects of crops fair. Fodder and water sufficient. Cattle-disease reported from Magura, Muhammadpur and Lohagara thanas. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Bangaon	12	4	
Narail	11	8	
Magura	12	0	
Jhenida	12	0	

Khulna.—Rainfall nil. Weather seasonable. State of *aman* paddy favourable. Harvesting commenced in some places. Cultivation and sowing of *rabi* crops nearly completed.

Fodder and water sufficient A few cases of cattle-disease reported from Dumuria and *Paikgachha*. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Bagerhat	12	0	
Satkhira	10	8	

Rajshahi.—Weather seasonable. Prospects of standing crops good. Winter rice is being harvested. Sowing of *rabi* continues. Condition of cattle good. Fodder and water sufficient. Common rice selling at 12¾ seers per rupee.

Dinajpur—Rainfall nil. Weather seasonable. Standing crops good. No cattle-disease. Fodder and drinking water plentiful. Rice selling at 13 seers per rupee.

Jalpaiguri.—Rainfall nil. Weather seasonable. State of *haimanti* paddy favourable. Trasplantation of tobacco continues. Common rice sells at 11¼ seers a rupee. Fodder and water sufficient.

Darjeeling.—Rainfall nil. Weather seasonable. *Hills—Haimanti dhan, bara marua, phaphar, kalai dal, jow* and barley doing well. *Terai*—Prospects of standing crops good. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	8	0	per rupee.
Terai	11	0	

Maize sells at Darjeeling at 20 seers and at Kalimpong at 24 seers per rupee.

Rangpur.—Rainfall nil. Weather seasonable. Sowing of mustard and transplantion of tobacco going on. Harvesting of *aman* commenced. Prospects of standing crops favourable. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	9	8	per rupee.
Nilphamari	11	8	
Kurigram	11	0	
Gaibanda	11	0	

Bogra.—No rain. Weather seasonable. *Rabi* sowings and harvesting of winter rice going on. Prospects good. Fodder and water sufficient. Common rice sells at 14¼ seers per rupee.

Pabna.—Rainfall nil. Weather cool. Linseed and tobacco sown about 50 to 60 per cent. Prospects of standing crops fair. Water and fodder sufficient. Common rice sells at 10 seers in the rupee.

Dacca.—Rainfall nil. Prospects of crops good. Weather seasonable. No cattle-disease. Common rice sells at 11¼ seers per rupee.

Mymensingh.—Rainfall nil. Weather seasonable. *Rabi* sowings and harvesting of winter rice continue. Fodder and water sufficient. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Kishorganj	12	2	
Jamalpur	12	4	
Netrakona	15	0	
Tangail	11	8	

Faridpur.—No rain. Weather seasonable. State and prospects of crops good. Harvesting of *aman* begun and *rabi* crops being sown. Fodder sufficient. No cattle disease. Common rice sells at 11⅓ seers a rupee.

Backergunge.—Rainfall nil. Weather seasonable. Prospects good. *Aghani* paddy being cut. Fodder and water sufficient. Common *aman* 10 and *aus* 12 seers per rupee.

Tippera.—Rainfall nil. Weather seasonable. Prospects of crops good. *Aman* paddy is being harvested. Sowing of *rabi* crops going on. No cattle-disease. Fodder and water available. Common rice sells as follows:—

	Srs.	ch.	
Sadar	14	0	per rupee.
Brahmanbaria	13	5	
Chandpur	11	0	

Noakhali.—No rain Weather seasonable. Ploughing of land for *rabi* crops and harvesting of *aman* continue. Prospects good. Cattle-disease at Companygunge Fodder and water sufficient. Common rice sells at Sadar at 13¼ seers and at Feni at 14 seers per rupee.

Chittagong.—No rain during the week. Cultivation of *rabi* crop is going on. Rain wanted. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Chittagong Hill Tracts.—Rainfall nil. Weather seasonable. Winter rice crop being harvested. *Rabi* sowings continue. No cattle-disease. Rice selling at 17 seers per rupee.

Patna.—No rain. Weather seasonable. Harvesting of paddy and sugarcane going on. *Rabi* sowing nearly finished. Poppy germinated. Prospects good. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Patna	14	0	per rupee.
Barh	15	0	
Bihar	13	0	
Dinapore	15	0	

Gaya.—Rainfall nil. Weather bright and cold. Harvesting of paddy continues. Sowing of *rabi* and poppy practically completed; germination good. No cattle-disease. Fodder and water sufficient. Common rice selling at 14 seers in the rupee.

Shahabad.—Rainfall nil. Paddy harvesting in progress. *Rabi* sowing nearly finished. Sugarcane doing well. Fodder and water abundant. Rice sells at Sadar at 13 seers per rupee.

Saran.—Rainfall nil Weather seasonable. Standing crops doing well. Harvesting of paddy commenced. *Rabi* crops are being weeded and irrigated. No cattle-disease. Fodder and water sufficient Common rice sells at 15 seers and maize at 28 seers per rupee at Sadar.

Champaran.—Rainfall nil. Prospects of standing crops good. Harvesting of paddy commenced in places. *Rabi* and poppy sowings approaching completion. Outturn of indigo estimated at 54 per cent. No cattle-disease. Fodder and water sufficient. Common rice sells at 18 seers and maize at 31½ seers per rupee.

Muzaffarpur.—Rainfall nil. Weather fair. *Rabi* sowings approaching completion. Harvesting of winter rice in progress. Prospects good. Fodder and water sufficient. Common rice sells at 13 seers and maize at 28 seers per rupee.

Darbhanga.—Weather seasonable. Prospect of standing crops good. *Rabi* sowings nearly completed. Harvesting of paddy commenced. Fodder and water sufficient. Cattle-disease is reported from Warisnagar and Darbhanga police-stations. Common rice sells as follows:—

	Srs.	ch.	
Sadar	14	4	per rupee
Samastipur	14	0	
Madhubani	17	0	

Monghyr.—Weather seasonable. Harvesting of winter paddy going on. *Rabi* crops doing well. Fodder and water sufficient. Cattle-disease reported from thana Begusarai. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	7	per rupee.
Begusarai	12	2	
Jamui	12	0	

Bhagalpur Rainfall nil. Weather seasonable. Harvesting of winter paddy progressing in every subdivision. Sowing of *rabi* over at Madhipura, but still going on in Banka. Fodder and water sufficient. Cattle-disease reported from Madhipura and Supaul. Common rice sells as follows:—

	Srs.	ch	
Sadar	15	4	per rupee.
Banka	16	4	
Madhipura	20	0	
Supaul	18	0	

Purnea.—No rain. Weather cold. Harvesting of winter rice commenced. *Rabi* sowings nearly completed. No cattle-disease. Fodder and water sufficient. Common rice sells at Sadar and Kishanganj at 11 seers and at Araria at 14 seers per rupee.

Malda.—Rainfall nil. Weather seasonable. Harvesting of winter rice going on. Sowing of *rabi* nearly finished. Prospects good. Cattle-disease reported from thana Nawabganj. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Sonthal Parganas.—Rainfall nil. Weather seasonable. Harvesting of winter rice continues. State of winter rice and other standing crops good. Cattle-disease reported from Pakaur. Common rice sells at 11 seers per rupee at Sadar.

Cuttack.—No rain. Weather seasonable. Transplantation of tobacco progressing. Prospects unchanged. Fodder and water available. New common rice sells at 18 seers 6 chitaks per rupee at Sadar.

Balasore.—Rainfall nil Winter rice being harvested. Sugarcane being pressed. Rice sells at 16 and 14 seers per rupee at Bhadrak and Sadar respectively. Fodder and water sufficient.

Angul.—No rain. Weather seasonable. Harvesting of paddy and pressing of sugar-cane continue. Cattle-disease reported from Angul. Common rice sells at 17 and 15 seers per rupee at Sadar and Khondmals respectively.

Puri.—Rainfall nil. Weather seasonable. Harvesting of winter rice crop continues on uplands. Outturn expected to be slightly below normal. Miscellaneous crops doing well. More rain wanted for land sown with crops. Fodder and water-supply sufficient. Common rice sells at 14 seers per rupee.

Hazaribagh.—Rainfall nil. Weather seasonable. Harvesting of winter paddy still going on. Standing crops doing well. Fodder and water sufficient. Common rice sells at 15 seers per rupee.

Ranchi.—Rainfall nil. Weather seasonable. Harvesting of paddy in progress. Standing crops doing well Cattle-disease reported from Rahe and Tarpa outposts. Fodder and water sufficient. Common rice selling at 18 seers per rupee.

Palamau.—No rain. Weather seasonable. *Rabi* doing fairly well. Paddy is being harvested and sugarcane pressed. Cattle-disease continues in places. Fodder and water sufficient. Rice sells at Sadar at 14 seers 10 chitaks and maize at 27 seers per rupee.

Manbhum.—No rain. Weather seasonable. Prospects of crops good. Harvesting of paddy continues. Fodder and water sufficient. Cattle-disease not reported. Average price of common rice at Sadar 15 seers (new) and at Gobindpur 10 seers 14 chitaks per rupee.

Singhbhum.—Rain nil. Harvesting of paddy nearly finished. Average price of rice is 14½ seers per rupee in the district.

General Summary.—No rain fell during the week. Rain is needed for the *rabi* crops in Bankura, Nadia, Chittagong and in Orissa. Harvesting of winter rice and pressing of sugarcane continues. Sowing of *rabi* and poppy approaching completion. Prospects generally good. Cattle-disease reported from 11 districts. Fodder and water generally sufficient. The price of common rice is cheaper in 12 districts, dearer in 6, and unchanged in the rest (29).

By order of the Offg. Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

The total fall from 1st January to 29th November 1902	61·62
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65·15

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew.

G. W. KÜCHLER,
for Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;

(a) The decrease is due to movements of pilgrims on the occasion of an eclipse of the sun and to the running of special and extra troop trains in the corresponding period of 1901.

(b) The increase is chiefly in coal, cotton, food grains and military stores.

* Deducted No. of passengers 8,344 and Rs. 21,023 } On account of difference between the approximate and audited figures for the week ended 4th October 1902.

RESOLUTION REVIEWING THE ADMINISTRATION REPORT OF THE CALCUTTA MUNICIPALITY FOR THE YEAR 1901-1902.

MUNICIPAL DEPARTMENT—MUNICIPAL.

Calcutta, the 3rd December 1902.

RESOLUTION—No. 3106M.

READ—

The Administration Report of the Calcutta Municipality for the year 1901-1902;

Read again—

The Reports for the years 1899-1900 and 1900-1901 and the Resolutions recorded by Government thereon.

THE Calcutta Municipal Administration Report for 1901-1902, which is the second year during which the amended Municipal Act has been in force, shows that the revised constitution continues to work smoothly and to produce good results. The Commissioners have discharged their duties zealously. The Corporation met 23 times during the year, and on an average over two-thirds of the Commissioners attended each meeting. The General Committee held 56 meetings, and the average attendance was 10 out of 12. There were

10 Special Committees and 19 Sub-Committees appointed during the year, and it is evident from the report that much good work was done by them. The report is not altogether in the form which was accepted by the Corporation in their Secretary's letter No. 2884M., dated the 14th March 1902, and upon this point separate orders will be passed. Nor has the report been reviewed by the General Committee, as required by section 17 of Act III of 1899. In the Resolution of Government, dated the 21st September 1900, reviewing the report for 1899-1900, it was pointed out that (as in the present year) the Chairman had forwarded copies of the proceedings of the General Committee and of the Corporation at meetings held to consider the report, but that this action was not in exact compliance with the law. What is required is an expression of the views of the General Committee and the Corporation respectively as a whole, and not the opinions of individual members. If any Commissioner has criticisms to make on the report, it would be more convenient that they should be made by way of definite motions on which the general opinion of the Committee or Corporation could be taken: these instructions should be complied with in future years. The map submitted with the report would be more useful if it showed the division of the town into wards.

2. The main features of the year were the reorganization of Administrative Departments, and the completion of arrangements for undertaking works of improvement. Defects of previous years and old obstructions to good administration are being cleared away. Outstanding claims have been settled by arbitration, with the result that demands amounting to Rs. 10,69,602 have been reduced to Rs. 4,27,945 and have been paid off. Simultaneously, by a reorganization of the Collection Department, the large balance of outstanding taxes, amounting to Rs. 9,23,095 on 31st March 1901, has been reduced by collections and cancellations to Rs. 4,19,197. Of the total outstandings, only Rs. 3,29,157 could be collected, but the Acting Lieutenant-Governor recognises the value of the work done in clearing up the confusion in this department. Since the close of the year further cancellations have been ordered, and it is expected that only about 1¾ lakhs will remain, which must be realised by civil suits. From the report of the preceding year (paragraph 15), it appears that there was a difference of about Rs. 30,000 between the amounts shown as balance by the Warrant and Accounts Departments, and numerous bills were missing in the Warrant Department. The final report does not say how the accounts have been reconciled, and it is presumed that the difference has been struck off.

3. Among the schemes of reorganization may be noticed the division of the town into four districts, which was experimentally begun in 1900. Each district is now completely manned with a Health Department and an Engineering Department, so arranged as to be easily controlled by the Central Office. The control of the Conservancy Department has been transferred from the Health Officer to the Engineer, and the working of this arrangement should be noticed in future reports. The co-operation of Ward Commissioners has been invited, and has been made possible by the division of the town into districts for administrative purposes, and the development of this system by which the services of Municipal Commissioners interested in the conservancy and improvement of their districts can be fully utilized promises excellent results. The Collection Department was reorganized during the year by the amalgamation of the Collection and Warrant Departments. The previous Collector had no coercive powers, and the issue of warrants by a separate department involved delays which resulted in a large accumulation of arrears, as already mentioned. Warrants are now issued generally within three months of the tax becoming due. The consequence was that during the past year over 98 per cent. of the real current demand was collected. The results cannot be compared with those of previous years, as the collections were made from the current demand only, whereas for previous years the percentage of collections was calculated on the current and arrear demand, but the figures as they stand are eminently satisfactory. It does not appear that any undue coercion had to be exercised during the year. Out of the total collections of Rs. 42,05,935, only Rs. 1,07,393, or 2·5 per cent., were collected by coercive measures. Distrained property was removed in 117 cases and sold in 32 cases. It was not to be expected that a system which seeks to enforce punctual payment could be introduced

without some discontent, but it is satisfactory to read in the report that "the pressure of the Warrant Department is now a thing of the past, and that rate-payers have become habituated to the prompt and punctual payment of municipal demands." The working of the License Department was less satisfactory, for the revenue has not increased in proportion to the growth of the city, and the system is obviously deficient in certain particulars, while the percentage of collections was only 79·88. It appears that the attention of the Commissioners has been directed to the defects of this department.

4. Other improvements during the year which remain to be noticed were the reorganization of the workshop and the abolition of the Store Department, which has been a source of much wasteful expenditure in the past. The Secretary's office was placed on a better footing, and there is now less delay in dealing with correspondence and complaints. The revision of the system of accounts is in progress, and it is hoped that this difficult matter will soon be satisfactorily concluded. The Municipal Market, which has become an increasing source of income, has been improved and is about to be extended. A better system of lighting the streets has become possible under the new contract, and Welsbach lamps are to be generally introduced: during the year 5,000 new burners were supplied. The Building Department was reorganized and placed under the Deputy Chairman with four qualified surveyors, who have taken the place of the large establishment previously employed under the Road and Engineering Department. The Health Department is now altogether dissociated from the Building Department, and it is a question whether this is altogether desirable. It appears that the Health Department is restricted to independent action in connection with existing nuisances only, but special cases must sometimes arise where the opinion of the Health Officer would be valuable in regard to applications for new buildings. If it be the case, as stated in the report, that the insanitary condition of certain areas in Calcutta is due more to structural defects than to any other cause, the importance of intimate relations between the Building and Health Departments is obvious, and the Acting Lieutenant-Governor feels no doubt that the matter will receive attention. It is satisfactory that the methods for dealing with building applications have been clearly laid down, and are being enforced by qualified surveyors. It is observed that there are still difficulties of procedure to be overcome, and that it has not been possible to give full effect to the provisions of the Act on the subject. It is especially difficult to deal with mistakes of the past, but something has been done to define the legal position, and it is hoped that arrangements will be made to prevent the delays in procedure which have hitherto operated against the usefulness of the Department. The Building Department dealt with 7,148 applications during the year, but it is not said how they were disposed of. Apparently a large number were summarily rejected on the ground that they were not accompanied by plans: of the applications properly submitted, about 65 per cent. were sanctioned. The work of the Department has been considerably helped by the appointment of the new Municipal Magistrate, who has after local enquiries caused many works to be carried out in accordance with the regulations. On the other hand, it is unsatisfactory that out of 725 cases in which demolition was ordered by him, the orders were obeyed in only 80 cases, and a further report on the subject will be called for. Bye-laws were framed on certain subjects during the year, but there has been considerable delay in submitting, for the final approval of Government, a set of bye-laws dealing with obstructions and encroachments on streets and the regulation of markets and slaughter-houses.

5. The report is comparatively silent on the subject of conservancy, and there are indications that more might be done towards the cleansing of the streets, especially in the poorer parts of the town. The difficulty appears to lie in the provision of carts and bullocks or ponies, though there was a considerable increase of expenditure on this account. The report, however, does not contain the usual tabular information on this subject, and the omission will be dealt with in a separate letter. It is hoped that the Corporation will be successful with the improved system of incineration which is about to be introduced, and that an extension of the *gowkhanas* will enable the municipal cattle to be used to greater advantage.

6. The outturn of work done by the Engineering Department would have been greater but for the delay in carrying out the Suburban Drainage Scheme. This subject has already been dealt with by Government. The scheme had been well advanced on lines generally approved by Mr. Baldwin Latham, but, on a further reference to him upon certain disputed points, he recommended a new design for the outfall, by which the sewage should flow direct from the drains into a tidal channel. Government has agreed with the Commissioners that this proposal is unsuitable, and it is hoped that the scheme, as now approved, will be completed as rapidly as possible. Four lakhs of rupees were expended during the year on the town and suburban sewage outfall and the works connected therewith. The most important work in hand is the completion of the main sewer from Kidderpore to Ballygunge, and of the outfall. It appears that this sewer has been constructed on a scale which is not approved by Mr. Latham, and care will be necessary to prevent the deposit of silt. The other sewers will be constructed in accordance with his recommendations. Some progress was made in the extension of the filtered and unfiltered water-supply, and a scheme was worked out for the prevention of waste and for a continuous supply. The works in hand are estimated to cost about 50 lakhs of rupees, and it is hoped that the Corporation will make sure that the Engineering Department is manned with a fully qualified staff.

7. The health of the town was not as good as usual during the year. The number of deaths from plague was less than in 1900-1901, but there was an epidemic of small-pox, while diarrhœa and dysentery were slightly above the normal. The work of disinfecting plague infected rooms was carried on without opposition and with good results. The demolition of huts, which had been proved to be centres of the disease, was also successfully undertaken, compensation being paid to the owners. The registration of births is still unsatisfactory, being only 10·7 per thousand, while as to the birth-rate a comparison of the Calcutta figures with those of other towns and the statistics of infant vaccination lead to the conclusion that the true birth rate must be at least double the reported figure. The usual method adopted for improving the system of registration is to prosecute those who are found not to have reported births, but no information is given on this subject. The low registered birth-rate must account to a great extent for what is apparently a very high death-rate among infants, amounting to 350 per thousand, but if the death-rate is true, it is satisfactory to notice that it has fallen considerably, inasmuch as during the ten previous years the average exceeded 400 per thousand. The policy of bustee improvement was pushed on with vigour, and work is either going on or in contemplation in more than 100 bustees. The progress of the work is, however, almost unavoidably slow, and the Corporation have not solved the difficult question of housing those who are compelled to quit the condemned bustees. It is hoped that they will seriously take in hand the necessary improvement of the suburban area, where, as suggested by one of the members of the General Committee, it may be possible to lay out the unoccupied spaces so as to house the poorer classes and to provide good roads and easy communications. The general introduction of electric traction on the tramways should make the solution of this problem easier, since it will make the Suburbs more easily accessible. Something was done in this direction by the erection of a model dwelling-house in Bhowanipore, but such houses are more suited to supply the wants of the artizan classes. The Corporation are to be congratulated on the improvements which they have introduced, and which they propose to introduce, in the Vaccination Department. The work of the year showed a great improvement in regard to infant vaccination over that previously recorded. In connection with the health of the town, it is satisfactory to note that six new squares are being opened out, and that steps have been taken to remove the cemeteries from within the town limits.

8. Although good progress has been made during the year in strengthening the organization for the improvement of Calcutta, the actual expenditure on the main schemes was, as already noted, comparatively small, and the demands in the near future will be very great. It is therefore satisfactory to find that the finances of the Corporation are in a sound condition. The valuation of the town has increased by about 50 lakhs of rupees in the last ten years, and, since

the introduction of the new Municipal Act, the increase has been over 14 lakhs. During the last year four wards were re-assessed, and the total increase of valuation of the year was over 9¼ lakhs. The income from the general rates increased by Rs. 2,15,000 owing to new assessments and better collections. It is observed from the discussion on the report in the meeting of the Corporation that there is some dissatisfaction with the valuation of residential houses in the north of Calcutta. This question was settled in 1888, when the Act of that year provided that such houses should be valued, not on the rent which they might be expected to pay, but on the cost of construction. The former system had been previously in force, but owing to the prejudice which exists among Hindus against living in hired houses, it was found that under it residential houses were valued at from 30 to 50 per cent. below their real value. In order to remedy what was then stigmatised as a scandal, the system was altered to a valuation on the cost of construction. Protests were made at the time from influential quarters, but after full inquiry, the principle was maintained by Government, and it was again reaffirmed when the law was amended in 1899. When the first revaluations were made under the amended Act of 1888, it was impossible to give full effect to the change of system, and the revisions of assessment were not strictly made. It is therefore not a matter of surprise that the revision now being made should add considerably to the valuation. This method of assessment, however, possesses the elements of certainty. The houses are measured, and the cost of construction can be accurately ascertained. If mistakes are made, they can be easily corrected, if necessary, by a judicial decision as to the measurements or the rates of construction. The results are checked by the prices which are ascertained to have been realised in sales, or to have been calculated for purposes of partition. It is reported that a considerable portion of the increase in the valuation is due to the rise in the value of land which is included for the purposes of assessment. Government has no reason to doubt the fairness of a system by which a residential house is valued on the capital which would be expended in constructing it, in addition to the value of the land. It appears that the assessment work of the year gave rise to 3,687 objections, but no information is given as to the percentage of this number on the total assessments made or as to the ultimate fate of these objections. However, in Table No. XXXV, Appendix A, it is shown that the total increase of valuation was Rs. 12,64,412, of which Rs. 4,90,060 was obtained after disposal of objections, so that the percentage of objections may be estimated at about 38. In future years some further information should be given showing how these objections are disposed of, and the extent to which reductions of assessment are allowed owing to exceptional circumstances under proviso (iii) to section 151 of the Municipal Act.

9. The outstanding loans at the close of the year amounted to Rs. 3,21,92,158, but with their present valuation the Corporation are in a position to borrow a further crore of rupees, and with the growth of the revenue of the town their capacity to borrow will increase yearly. During the past year, 21 lakhs were raised at favourable rates, and the year closed with a considerable cash balance. Government was unable to accept a proposal made during the year to borrow 30 lakhs at 4 per cent. to pay off the balance of the present debt to the Imperial Government, which is being paid off by half-yearly instalments of principal and interest. The whole debt will be cleared off in 1909, and as the Corporation is now well able to meet its liabilities, it appeared better to allow this debt to be paid off in the next few years rather than to incur a liability for a further period, when fresh and heavier demands are likely to be made on the resources of the Municipality. The income was Rs. 1,14,000 better, while the expenditure was Rs. 6,18,000 less, than the estimate. The shortage of expenditure is considerable. It is not easy to ascertain from the report why all the funds provided for works during the year were not expended, but the result was apparently due to the stoppage of work on the Suburban Drainage Scheme pending the reference to Mr. Latham. The main expenditure on this account, viz. Rs. 6,73,834, was for works executed before the year under report. In reviewing the report for 1900-01, the Lieutenant-Governor expressed the hope that the scheme for disposing of

the suburban sewage and surface drainage, and for providing a continuous water-supply, would be pressed on to completion as rapidly as possible. The execution of such important works no doubt requires the fullest consideration but it is to be regretted that more has not been done during the year under report. Similarly the difficulties with which the Corporation have to contend are very great, but it is by their success in overcoming these difficulties, and in bringing to a completion the various projects for the improvement of the town and suburbs, that the efficiency of the Corporation and the value of the new constitution will be judged.

10. Mr. Greer was Chairman throughout the year except for 2½ months, when Mr. Silk officiated for him, and Mr. Blackwood continued to fill the office of Deputy Chairman; these officers discharged their onerous duties with zeal and ability. The thanks of the Acting Lieutenant-Governor are due to them and to the other officers of the Corporation, while the valuable services rendered throughout the year by the General Committee and the Commissioners in their respective spheres merit his cordial acknowledgments.

By order of the Acting Lieutenant-Governor of Bengal,

E. W. COLLIN,

Offg. Secy. to the Govt. of Bengal.

RESOLUTION REVIEWING THE DIVISIONAL REPORTS ON THE WORKING OF THE DISTRICT BOARDS IN BENGAL DURING THE YEAR 1901-1902.

MUNICIPAL DEPARTMENT—LOCAL SELF-GOVT.

Calcutta, the 8th December 1902.

RESOLUTION No. 3225L.S.-G.

READ—

The Reports from the Commissioners of Divisions on the working of the District Boards in Bengal during 1901-1902.

Read again—

The Resolution reviewing the Divisional reports on the working of the District Boards in Bengal during 1900-1901.

The number of District Boards and Union Committees remained unchanged during the year, but the number of Local Boards increased from 105 to 106 owing to the formation of a Local Board in the Alipur subdivision of the district of Jalpaiguri.

2. *Constitution of District Boards.*—On the 31st March last the 42 District Boards contained in all 845 members, against 814 in 1901-1902. The fluctuations in their composition are slight, and do not call for any remarks. The Boards held altogether 640 meetings, or 30 more than in the previous year. The District Board of Saran, as in the previous year, heads the list with 31 meetings: Puri stands second with 26, followed by the District Boards of Faridpur, Purnea, and Jalpaiguri with 25, 21 and 20 meetings, respectively. On the other hand, the District Boards of Midnapore, Pabna, Hazaribagh, and Palamau held 10, 9, 5, and 10 meetings only, respectively, during the year. In the cases of Pabna and Palamau no explanation has been given of the neglect of the rule that a meeting should be held at least once a month. In Midnapore it is said to be due to the neglect of the Secretary, who has since been removed. In Hazaribagh it is explained that there was no necessity for more meetings, as the Chairman was unwilling to call the members together merely for the transaction of routine business. The Commissioner of Bhagalpur reports that there has been a general falling off in the attendance of official members, and that he has taken notice of their default. The number of meetings that had to be adjourned and of those that proved abortive for want of a quorum was 47 against 51 in 1900-1901; 8 of these failures occurred in Puri, 7 in Jalpaiguri, and 5 each in Faridpur and Cuttack.

3. *Constitution of Local Boards.*—The 106 Local Boards had a total strength of 1,268 members, or 6 more than in the previous year. Only trifling variations are noticeable in the composition of these Boards. The number of meetings held was 1,205, or 24 more than in 1900-1901, of which 203, as compared with 198 in the previous year, had to be adjourned or proved abortive owing to failure to form a quorum. Forty-eight Local Boards, as against 54 in the previous year, failed to meet once a month, and of these, 5, viz., Raniganj, Murshidabad, Naugaon, Alipur (Jalpaiguri), and Darbhanga held only 5 meetings, or less, during the year. The last named Board was abolished in the course of the year. The Gaya Local Board heads the list with 21 meetings Kishorganj following close with 20. There was a slight decline in the attendance of non-official members.

4 *Elections.*—General elections of members were held in the districts of Burdwan, Birbhum, Bankura, Hooghly, 24-Parganas, Nadia, Rajshahi, Pabna, and Dacca. In some districts, and notably in Burdwan, the elections evoked

but little interest; in some places the elections failed owing to the non-attendance of the requisite number of voters, and in others to the fact that nominations were not received in time.

5. *Powers of Local Boards.*—The only changes in respect of the powers delegated to Local Boards were the withdrawal of the management of ferries from the Boalia Local Board and of the charge of dispensaries from the Local Boards in Bhagalpur. In Purnea the maintenance of some of the district and village roads was made over to the Sadar Local Board, while the Subdivisional Boards were entrusted with the management of pounds in addition to the maintenance of roads. Some of the Local Boards in the Rajshahi Division worked unsatisfactorily, and it is doubtful whether they should be retained. The Commissioner is requested to consider the subject.

6. *Union Committees.*—There was no change in the number of Union Committees or of their members, but the number of meetings held by them increased from 255 to 263. The total income declined from Rs. 19,891 to Rs. 19,205, and the expenditure from Rs. 18,247 to Rs 18,203. Twenty-five out of the fifty-six Unions expended the whole, or nearly the whole, amount placed at their disposal, while no expenditure was incurred by the Memari, Baddipur, and Jara Union Committees, and only a nominal sum by those at Garapata and Harinakundu. Four out of the five Union Committees in the district of Balasore had no income or assignment made to them under section 56 of the Act, and consequently remained inactive during the year. Of these, the Jellasore Committee has had a balance of Rs. 30 since the close of the year 1898-99, which appears annually in its accounts: if it cannot spend this amount, the District Board should resume it. The Union Committees of Pandua, Haripal, and Bali in the district of Hooghly, and all the Union Committees in the districts of Khulna and Noakhali are reported to have done good work during the year. Elsewhere, however, they had either no opportunity or no desire to make themselves useful. The object of Union Committees is to stimulate local interest in the improvement of areas where population is fairly dense, and one intention of the Act was to enable the residents of such areas to supplement the funds received from the District Boards by local taxation for the improvement of drainage and the supply of drinking-water. These objects have not been realized, and Government does not propose to extend the system of Union Committees except to localities where the residents show signs of a desire to help themselves.

7. *Financial results.*—The year opened with a gross credit balance of Rs. 21,69,657, and the total receipts of the forty-two District Boards from all sources amounted during the year to Rs. 80,65,037. The total amount available for expenditure was therefore Rs. 1,02,34,694, of which Rs. 83,11,738 were spent. The year closed with a credit balance of Rs. 19,22,956.

The table below compares the income and expenditure of District Boards under all main heads for 1900-1901 and 1901-1902:—

INCOME.

	1900-1901.	1901-1902.
	Rs.	Rs.
Provincial rates	42,35,060	42,19,181
Interest	47,139	40,940
Police (including Pounds)	4,73,430	4,81,306
Education	66,374	81,152
Medical	34,585	49,674
Scientific and other Minor Departments ...	10,802	8,825
Miscellaneous	1,85,466	2,09,776
Railways	27,841	Nil
Irrigation Minor Works and Navigation ...	15,145	16,607
Civil Works (including Ferries)	12,88,441	12,23,333
Contributions	6,26,313	5,65,188
Deposits and Advances	3,87,010	11,68,132
Total under above and all other heads ...	73,98,167	80,65,037

EXPENDITURE.

	1900-1901.	1901-1902.
	Rs.	Rs.
Administration	2,80,259	2,94,244
Police (Pounds)	21,829	24,969
Marine	10,362	9,886
Education	12,91,247	13,31,926
Medical	4,59,422	4,41,939
Scientific and other Minor Departments ...	25,765	36,136
Miscellaneous	55,585	53,809
Famine Relief	6,032	3,604
Civil Works	45,36,741	46,85,791
Contributions	1,22,048	2,24,853
Debt	4,37,118	11,05,666
Interest on Debt	24,310	33,678
Total under above and all other heads ...	73,71,070	83,11,738

INCOME.

8. *Provincial rates (Rs. 42,19,181).*—The amount shown under this head represents the proceeds of the road cess, less the cost of collection and revaluation. Compared with the figures for the previous year, the income derived from this source shows a slight decrease, which occurred in all the Divisions with the exception of the Presidency, Dacca, and Chittagong Divisions, and which was mainly due to the increase of establishment and other collection charges. The decrease was largest in Saran, where it is explained to be due to a reduction in the amount of arrears recoverable and to greater difficulty experienced in collecting them.

9. *Interest (Rs. 40,940).*—The cess collections, as stated above, were smaller, and this reacted on the realisation of interest.

10. *Police (Rs. 4,81,306).*—The number of pounds under the management of District Boards increased from 4.252 to 4,330, and the income from them from Rs. 4,73,430 to Rs. 4,81,306. There was a considerable decrease in Bhagalpur, which is ascribed partly to the failure to settle several pounds, and partly to the receipts for the previous year having been swelled by the realisation of arrear rents. It is believed that some private pounds have been started by zamindars and enquiries are being made. The income from pounds in the Dacca Division is very small, and the subject is under enquiry. The collections on the whole improved, and the balances were less than 8½ per cent. of the demands. They were worst in Orissa, where the arrears were nearly 25 per cent. of the demand—a result attributed to the mismanagement of the Local Boards. The necessity for a continual inspection of pounds remains, and in several cases pound-keepers were punished for failure to supply food and water to the animals under their charge.

11. *Education (Rs. 81,152).*—The receipts under this head increased by Rs. 14,778. The increase is marked in the district of Rajshahi, where it is said to be due to larger collections of donations promised towards the Diamond Jubilee Industrial School at Boalia.

12. *Medical (Rs. 49,674).*—The increase of income under this head by Rs. 15,089 is chiefly attributed to larger realisation of subscriptions and contributions—a result especially welcome as evincing an increased interest on the part of the public in medical charity, which is now more directly under their own management.

13. *Scientific and other Minor Departments (Rs. 8,825).*—The receipts under this head declined by Rs. 1,977, chiefly owing to transfer to other heads of account.

14. *Miscellaneous (Rs. 2,09,776).*—Miscellaneous receipts increased by Rs. 24,410. The increase occurred chiefly in the district of Howrah, and was due to the transfer of the receipts from the Howrah-Amta Railway, amounting to Rs. 28,128, to this head.

15. *Irrigation Minor Works and Navigation (Rs. 16,607).*—Canal revenue in Chittagong increased by Rs. 1,458, the increase being due to higher bids for leases.

16. *Civil Works (Rs. 12,23,333).*—The receipts under this head, which are derived mainly from "Tolls on ferries" and "Contributions," declined by

Rs. 65,108. The falling off is noticeable under both heads. The income from ferries will necessarily decrease as railways are extended, and this cause accounts for the reduction in many districts. In other cases, as in Cuttack, the decrease was due to the payment of deposits in the previous year. Inspections of ferries were conducted as usual and disclosed some causes for complaint, which, it is hoped, will be avoided in future. The receipts from contributions, principally from Government, vary from year to year according to the provincial works entrusted to District Boards for execution. In the year under review they fell short of the amount received during the previous year by Rs. 45,295.

17. *Contributions (Rs. 5,65,188).*—The annual contributions made by Government to equalise the assets and charges of the several District Boards were less than the amount contributed in 1900-1901 by Rs. 59,299.

18. *Deposits and Advances (Rs. 11,68,132).*—The sums deposited as security for the payment of revenue by ferry farmers, contractors and others, and the recoveries and adjustments on account of advances made from District Funds increased by Rs. 7,81,122. The increase, though large, was due to casual variations.

EXPENDITURE.

19. *Administration (Rs. 2,94,244).*—The expenditure under this head increased by Rs. 13,985. The increase is chiefly attributed to grants of annual increments to employés and heavier expenditure on account of travelling allowances and office contingencies.

20. *Police (Rs. 24,969).*—There was an increase of Rs. 3,140 in the expenditure on cattle-pounds. The increase was largest in Gaya due to the renewal and repairs of pound-sheds. In other districts costs were incurred in recovering arrears, which should not have accrued if the rules had been observed.

21. *Marine (Rs. 9,836).*—The small decrease of Rs. 476 occurred in Pabna, Malda, and Noakhali—three out of the four districts which show expenditure under this head. The expenditure is for the subvention of private steamer services.

22. *Education (Rs. 13,31,926).*—There was a net increase of Rs 40,679 in the expenditure of District Boards under this head, which was shared by all classes of schools. There was a decrease in direct expenditure on primary schools which was more than compensated by the increase in grants in-aid. It is intended to largely add to the grants from public revenues for the extension of primary education.

The number of Sub-Inspectors employed by District Boards during the year remained the same, but the number of Inspecting Pandits decreased from 438 to 422. Of schools maintained by District Boards, the number of high schools remained unchanged, but there was a decrease of 6 in the number of middle schools. The number of upper primary and lower primary schools and industrial schools also remained unaltered. Of schools aided by District Boards, the number of high schools, middle schools, and industrial schools decreased by 7, 10, and 2, respectively, but the number of upper and lower primary and other schools increased by 125, 447, and 19, respectively. The total number of girls undergoing tuition in the schools aided by District Boards were 4,193 in upper primary and 48,838 in lower primary schools.

The Director of Public Instruction, in noting on the educational work of District Boards in the Annual Report on Education, has observed that the Boards generally worked in harmony with the Department, and accepted the suggestions of the Deputy Inspectors Where the Local Boards have been given charge of primary education, difficulties have arisen, and in the opinion of the Lieutenant-Governor it would be well for District Boards to keep the control of this Department in their own hands.

Vacancies in the post of Sub-Inspector occurred in the districts of Khulna, Dinajpur, Rangpur, Pabna, Faridpur, Backergunge, Gaya, Mozaffarpur, Darbhanga, Monghyr, Balasore, and Hazaribagh, to all of which, with the exception of those in Muzaffarpur, Darbhanga, and Hazaribagh, qualified Muhammadans were appointed. In the case of Dinajpur and Backergunge out of two and three vacancies, respectively, one in the former and two in the latter were conferred upon Muhammadans.

Special Schools.—The changes to note under this head are that the Kashi Kishor Technical School at Mymensingh was reopened during the year in a remodelled form, and the Barisal Technical School was amalgamated with the local zilla school. The District Board of Mymensingh granted a scholarship to a boy attending the Sericultural School at Rampur Boalia, and the District Boards of Patna and Malda gave stipends for the training of students in the Sibpur Engineering College. The Bhagalpur District Board granted eight scholarships of Rs. 8 a month tenable for three years and a half to boys studying in the Bihar School of Engineering. The Patna, Shahabad, Muzaffarpur and Darbhanga District Boards sent up students with scholarships to the Veterinary College at Belgachia. The Cuttack District Board provided three scholarships for technical education in the Jobra Workshop. Another industrial school was opened in Balasore during the year, making a total of three, out of which one only is aided by the Board. Carpentry, needle-work, and the use of the fly-shuttle loom are taught in these schools. The District Board of Noakhali sanctioned a monthly subsidy of Rs. 25 to the local Madrassa. The District Board of Chittagong aided two Sanskrit *tóls* with stipends of Rs. 15 and Rs. 10 each a month. The Industrial School at Hurlong in Hazaribagh was abolished during the year.

In circular No. 17T.—G., dated the 31st October 1901, the Chairmen of certain District Boards were requested to report the progress made in extending the use of the fly-shuttle loom. It does not appear from the reports received that any real progress has been made in any district except in Noakhali. In Pabna a loom has been set up by some pleaders.

The encouragement of female education continued to receive attention from the Boards, and, as usual, those bodies provided scholarships for the training of female students in medical schools.

23. *Medical* (*Rs. 4,41,939*).—The expenditure under this head decreased by Rs. 17,483, the decrease occurring chiefly in the Patna Division. The decrease is satisfactory, because the expenditure incurred by the District Boards of Patna and Gaya in the previous year was largely swollen by the adoption of measures to check the progress of plague and the decrease means that these measures were not necessary to the same extent last year.

District Boards continued to afford gratuitous medical relief to localities affected with cholera and malarial fever. It is stated that eucalyptus oil, which was distributed by the District Board with instructions for its administration, afforded much relief in cholera cases in Faridpur. The Pasteur Institute at Kasauli continued to receive contributions from District Boards.

There was an increase of 17 in the number of dispensaries maintained by District Boards, and of Rs. 13,942 in the cost incurred in their maintenance, the District Board of Backergunge, as in previous years, maintaining the largest number of dispensaries, viz., 34. The number of dispensaries aided by District Boards increased by six and the contributions to those dispensaries by Rs. 28,923. The District Board of Faridpur aided the largest number of dispensaries, 15 in all.

24. *Sanitation* (*Rs. 35,728*).—The expenditure under this head increased by Rs. 4,579, the increase being largest in Gaya. The sanitary works undertaken during the year were of the same nature as those noticed in the last Resolution. The system of cleansing villages and rural towns, inaugurated by the Patna Sadar Local Board during the previous year, was continued during the year and 67 villages are reported to have been cleansed. The work done consisted mainly in the removal of filth and rank vegetation and the filling up of ditches and hollows, and it was carried out under the supervision of the members of the Patna District Board. Further details as to the scheme will be obtained, as it appears to promise good results at a small cost.

25. *Veterinary charges* (*Rs. 17,243*).—The charges under this head show an increase of Rs. 7,419, the increase being largest in Patna, where the District Board contributed to the Patna Municipality the sum of Rs. 417, being a moiety of the costs incurred in the maintenance of a veterinary dispensary at that place and in the employment of a Veterinary Assistant. The Board also imported two Australian bulls at a cost of Rs. 1,000, and spent Rs. 1,248 on the acquisition of land and construction of stables. Veterinary

dispensaries were opened during the year at Suri and Bogra. A Veterinary hospital was also established at Darbhanga under the auspices of the Municipality, to which the District Board contributed one-sixth of the total maintenance charges. Veterinary Assistants were employed during the year by eleven District Boards, and six Boards provided by means of scholarships for the training of students at the Belgachia College. Cattle-disease broke out during the year in an epidemic form in two of the thanas of the Khulna district. A Veterinary Inspector was deputed for the inoculation of cattle with anti-rinderpest serum, and it is reported that the results were, on the whole, satisfactory in one of the thanas. The Veterinary Dispensary at Champaran had to be closed during the year, as the Board was not able to obtain the services of an efficient substitute in the place of the Veterinary Assistant who had resigned his post.

26. *Civil Works (Rs. 46,85,791).*—The total expenditure shows an increase of Rs. 1,49,050, which occurred under all the sub-heads, except repairs of buildings and communications, establishment, and contingencies. There was a considerable increase in the expenditure on original works. A decreased expenditure in some districts was due to a change of classification introduced during the year under which the expenditure on Provincial roads and civil buildings, which was hitherto shown under this head, is now debited to "Deposits." The chief works taken in hand by the several District Boards were the construction of an office for the District Board of Dacca at an estimated cost of Rs. 66,408, the metalling of a portion of the road leading from Berhampore to Kandi at an estimated cost of Rs. 51,750 (it is noticed with regret that the arrangements for this work were not satisfactory), the construction of the Hazarat-Jandaha-Mahnar road in Muzaffarpur at an estimated cost of Rs. 31,670, the improvement of the Motihari-Maisai road and the Motihari-Tetaria road at an estimated cost of Rs. 3,01,739, and the construction of six pontoon bridges in Darbhanga at a cost of Rs. 42,625 and of a screw pile bridge on the Sakri road in the same district at a cost of Rs. 30,102.

27. It is satisfactory to note that the amount spent on water-supply and water-works (columns 78 and 79 of Form III) advanced from Rs. 1,14,268 to Rs. 1,56,130, the increase being largest in Tippera. The works undertaken under this head were, as usual, the re-excavation of tanks and the construction and repair of wells. The District Boards of Shahabad and Bhagalpur contributed Rs. 4,500 and Rs. 5,000, respectively, towards the maintenance of the water-works of the town. In Chittagong water-pipes were laid from the Sambhunath Temple to Sitakund Bazar at a cost of Rs. 5,000, which was contributed by Raja Sreenath Roy Bahadur and his brothers. It appears that in the districts of the Presidency Division the Boards are not able to spend as much as they are willing to allot for the improvement of tanks, as the zamindars refuse to agree to the terms imposed by the Boards for the maintenance of tanks after re-excavation. Government regrets that such obstacles should be placed in the way of the District Boards in the much-needed improvement of village water-supply, and hopes that the Commissioner will find a way to overcome the opposition of the zamindars, or modify the demands of the Boards. The expenditure on water-supply in this Division was only Rs. 11,862, which compares unfavourably with the Rs. 49,411 spent in the Dacca Division. The Acting Lieutenant-Governor is disposed to agree with the Commissioner of Bhagalpur that the duty of the District Boards is to provide for water-supply along the main roads, as has been done in Monghyr, and that the improvement of tanks and wells in villages is more specially the duty of zamindars and local residents. He would welcome such expenditure whenever it can be made on satisfactory conditions for the maintenance of the works, and would suggest that the small funds available would be best spent in contributions in aid of local efforts, where a supply of good water is not otherwise obtainable.

28. Since the close of the year 1900-1901 Commissioners have been appointed to carry out the scheme for the removal of the obstructions to the drainage of the Chalan Bil and for draining the tract known as the Cheriol Bil, lying within the districts of Pabna and Rajshahi. For the first named project an Engineer has been appointed by Government for the preparation

of the scheme, and for the latter the District Engineer has prepared one which is under the consideration of the Commissioners.

29. *Roads.*—During the year 8,666 roads, with a total length of 44,472 miles, were maintained by the several District Boards at a total cost of Rs. 32,02,917, as against Rs. 30,01,378 spent in the preceding year. There was an increase of 2,864 miles of roads, and the Acting Lieutenant-Governor is disposed to regard this increase with some doubt, as in some districts the number of roads under the Boards is already more than they can maintain properly. Of the total length, 3,170 miles were metalled, 24,406 miles unmetalled, and village roads accounted for 16,89) miles against 3,425, 22,570, and 15,611 miles, respectively, in the year 1900-1901. Of the total cost incurred on metalled roads, Rs. 2,15,187 were expended on original works and Rs. 7,79,624 on repairs, and of that incurred on unmetalled roads Rs. 9,14,952 were spent on original works, and Rs. 9,39,241 on repairs. The expenditure on account of metalled roads was highest in Burdwan, Rs. 96,581, Midnapore coming next with Rs. 85,865. There are said to be no metalled roads within the jurisdiction of the District Board of Palamau though it has not been explained what has become of the four roads of this class with a total length of 26 miles which were shown in last year's report. The cost per mile of district metalled roads was highest in Howrah (Rs. 1,295), and lowest in Malda (Rs. 42), and that of unmetalled roads was again highest in Howrah (Rs. 438) and lowest in Nadia (Rs. 14). The Inspector of Works should be directed to watch the expenditure in Howrah and in other districts where it may appear unduly high. The cost per mile of village roads varied from Rs. 115 in Backergunge to Rs. 6 in Champaran.

30. *Miscellaneous Public Improvements.*—With the exception of Chittagong, all the District Boards incurred expenditure in planting and maintaining trees on the sides of roads. Working plans for arboricultural operations for the period of five years, commencing from 1902-1903, have, in accordance with the orders of Government, been prepared in the majority of the districts, though the reports submitted by the Commissioners of the Dacca and Chittagong Divisions do not furnish any information on the subject.

31. *Railway feeder roads.*—The construction of new roads as feeders to railways and the maintenance of existing feeder roads continued to receive attention from District Boards. So far as can be gathered from the reports, the total amount spent on this object was Rs. 3,20,119, but the information is not complete. The District Boards of the Patna, Chota Nagpur, and Orissa Divisions were specially active in constructing these classes of roads, while good work was done in Howrah, the 24-Parganas, Monghyr, and Bhagalpur districts. The works in connection with the feeder roads in Rangpur and Bogra, for which Government made contributions of Rs. 5,000 and Rs. 60,000, respectively, were in progress during the year; but the feeder road from Jamalganj railway station to Itakhola in Bogra, and the Goborchapa feeder road in Rajshahi, for which contributions amounting to Rs. 16,000 and Rs. 16,800, respectively, were made from the Provincial Revenues, could not be taken in hand. The due provision of such roads is a subject that is receiving the close attention of Government, and the Acting Lieutenant-Governor is glad to find that local bodies are not backward in a matter that is one of the greatest importance to the development of the country.

32. *Railways and Tramways.*—The scheme for the construction of a steam tramway on the existing road from Barasat to Basirhat has now been finally accepted and a revised provisional agreement entered into between the District Board and Messrs. Martin and Company, the promoters of the Railway. The proposal for the construction of a steam tramway from Memari to Chukdigi has been abandoned. The extension of the Howrah-Amta Light Railway from Jagatballabpur to Champadanga with a branch from Autpur to Rajbalhat has recently been sanctioned by Government. A project for a tramway between Dacca and Sealo, opposite Goalundo, is under consideration. Some progress is reported to have been made in the construction of a light railway between Buktiarpur and Bihar, and the negotiations for the construction of tramways in Saran have reached a further stage. In Purnea it is proposed to start a steam tramway between the civil station and the city. The question of the extension of Light Railways with the assistance

of private enterprise is under the consideration of Government. The experience at present gained of such schemes has not been entirely satisfactory, and the lines which have been laid, though very useful to the public, have not succeeded, except in one or two cases, in earning at once the large profits which appear to be necessary to attract private capital. The delays in sanctioning such schemes, caused by the necessity of reconciling the conflicting interests of the promoters, local bodies, and neighbouring railways, have also been obstacles to their extension.

33. *Contributions (Rs. 2,24,853).*—The contributions made by District Boards towards the cost of the Police force employed at plague camps, refund of the unexpended balance of Government grants for special works, payments on account of cost of establishments in the offices of account and control, and contributions made by District Boards to Union Committees increased by Rs. 1,02,805. The fluctuations are due to ordinary causes of no special importance.

34. *Deposits and Advances (Rs. 10,58,016).*—The large increase under this head amounting to Rs. 6,78,236 is chiefly due to the change in the classification of accounts explained in paragraph 26 of this Resolution.

35. *Closing balances (Rs. 19,22,956).*—The actual credit balance of the year was less than that of the previous year by Rs. 3,09,046. This is satisfactory, as the closing balances are swollen by the unspent portions of the special grant of five lakhs from Government, and there must, therefore, have been a greater expenditure of the regular income of the Boards than in the preceding year. In several districts, however, it is reported that the full programme of works could not be carried out owing to failure of contractors and other causes. The closing balance was more than one-third of the year's income in Dacca, Faridpur, Dinajpur, Shahabad, Darbhanga, and Palamau. In the four latter districts the large balances have been accounted for, but no explanation on the subject has been furnished in the cases of Dacca and Faridpur and this will be asked for.

36. *Amendment of the Bengal Local Self-Government Act.*—In the Resolution for the year 1897-98, it was stated that in view of the famine and the measures required to guard against plague, it was not considered advisable at that juncture to proceed with the Bill to amend the Local Self-Government Act. Since then further proposals for the amendment of the Act have been considered. Opportunity has also been taken to remove defects and omissions in the Act, and a Bill is now ready for submission to the Government of India.

37. In the penultimate paragraph of the Resolution for 1900-1901, it was stated that a grant of Rs. 5,00,000 had been made from Provincial Revenues for the improvement of communications in the several Divisions of Bengal. The reports from the Commissioners of Divisions show that the allotments were satisfactorily made, and the money distributed with due consideration for the relative needs of each district. About one-third of the amount was allotted for feeder roads, about the same amount for bridges, about one-fifth for extensions of communications, and the balance for metalling existing roads. It was found possible to renew the grants during the current year, and a second assignment of five lakhs of rupees has been made from Provincial Revenues.

38. The question of providing for a more efficient professional control over the civil works undertaken by District Boards, which was referred to in paragraph 34 of the Resolution on the working of the Boards for the year 1900-1901, was decided by the revision of the rules under clauses (*g*), (*l*) and (*m*) of section 138 of the Bengal Local Self-Government Act, so as to admit of an increase of the control exercised by the Inspector of Works, the enhancement of the Inspector's influence with the Boards, the maintenance of a standard of qualification for the post of District Engineer, and the establishment of a closer audit of accounts.

39. The District Boards continue to administer the large funds entrusted to them with care and efficiency, and the work of the year shows considerable progress in all Departments. The income increased by about seven lakhs and the expenditure by nearly ten lakhs of rupees. The Commissioner of Bhagalpur reports that the roads in his Division have improved, and the Acting Lieutenant-Governor would be glad to see in future reports some further record of the personal observations of the Commissioners as to the results of the

work carried out by the Boards. It is satisfactory to find that all Commissioners agree that the members of the District Boards have continued to show interest in their work, and to co-operate loyally with the executive in promoting efficiency. The only dissentient note comes from Orissa, where the Commissioner bewails the growing decrease of public interest in District Boards, as evidenced by the apathy shown in seeking for membership, and by the falling off in the attendance of members. It is possible that this result in Orissa is due to the inelasticity of the revenue, but a revision of the cess valuation is now in progress in this Division, and, with an increase in the revenue and greater opportunities for action, it is hoped that the interest of the District Boards will revive, and that they will prove equal to the work of providing for an advancing population and a general increase of wealth in the districts. The reports as to Local Boards is less favourable except in the Patna Division. It is to be regretted that the problem of devolution of duties to these local bodies has not been satisfactorily solved. That Local Boards can be useful is shown by the example of those in the Patna Division and of the Sadar Local Board of the 24-Parganas, but it is possible that, considering the small funds available they can only be worked satisfactorily where active Chairmen or Vice-Chairmen are available. The Acting Lieutenant-Governor hopes that the local officers will do all that is possible to increase the efficiency of these institutions.

By order of the Acting Lieutenant-Governor of Bengal,

E. W. COLLIN,

Offg. Secy. to the Govt. of Bengal.

FORM No. I (*a*).

Statement showing the constitution of the District Boards in Bengal during the year 1901-1902.

Serial number	Name of District Board.	Act under which constituted.	Area, in square miles.	Population within the area.	Number of Members. Ex-officio.	Nominated.	Elected.	Total.	Officials.	Non-officials.	Europeans and Eurasians.	Natives.	Number of meetings held.	Number of meetings proved abortive for want of quorum or adjourned.	Average attendance at each meeting. Officials. REPORT ON THE EARLY COTTON CROP OF BENGAL, 1902.

THE following report is published for general information.

W. C. MACPHERSON,
Offg. Secy. to the Govt. of Bengal.

The 9th December 1902.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Report on the Early Cotton Crop of Bengal, 1902.

Explanatory.—This note furnishes the estimates of the area and outturn of the early cotton crop which is sown during the rains and is harvested in winter. In February next will be published a forecast of the late cotton crop of the Province, which is sown at the close of the rainy season and harvested in the hot weather.

2. *Character of the season.*—The early cotton crop is principally grown in the Chittagong Hill Tracts and in the districts of the Bhagalpur, Orissa, and Chota Nagpur Divisions. In all these districts, except the Chittagong Hill Tracts, the rainfall in June was greatly in defect, while in July the fall was practically normal all over the Province. In the following month the fall was again deficient everywhere, except in Cuttack and Puri, while in September there was heavy rain in all the districts, except the Chittagong Hill Tracts and districts of the Orissa Division. There was little or no rain in October, when the crop was in flower or pod, and November has been literally a rainless month. Thus the season has been anything but favourable to the early cotton crop.

3. *Area sown.*—It will be seen from the appended statement which summarises the district returns, that the normal area under early cotton in these Provinces is estimated at 79,800 acres. The area actually sown this year is estimated at 67,700 acres against 72,500 acres of the past year. The decrease is probably attributable to the competition of imported cotton twists in the market and to the consequent unremunerative character of the industry.

4. *Character of the crop.*—From the annexed abstract of the district returns, it will be observed that out of the 15 districts which grow early cotton, only two, namely, Monghyr and Bhagalpur, report a normal crop. Midnapore,

the Sonthal Parganas, Cuttack, Balasore, Manbhum, and Singhbhum have returned a crop of between 90 and 100 per cent. Hazaribagh anticipates an outturn of 81 per cent.; Puri and Ranchi 75 per cent. each; Jalpaiguri and Angul 55 per cent. each; Palamau 50 per cent., while in the chief cotton-growing area in the Province, viz., the Chittagong Hill Tracts, the outturn is estimated as low as 40 per cent. of an average crop. The outturn for the Province as a whole amounts, according to the district returns, to only 77 per cent. of a normal crop. This may be accepted as the probable outturn.

5. *Gross outturn.*—The total yield of the early cotton crop this year is estimated at 5,287,400 lbs., against 4,986,700 lbs. produced last year. The average yield of the preceding eight years amounted to 6,495,000 lbs.

C. G. H. ALLEN,

Offg. Director of Land Records and Agriculture, Bengal.

CALCUTTA,

The 3rd December 1902.

Forecast of the Early Cotton Crop of Bengal, 1902.

Division	District.	Total area of the district in acres.	Total area under cultivation in acres.	Approximate normal area under *early* cotton in acres.	Approximate area sown last year (1901) in acres.	Estimated area sown this year (1902) in acres.	Taking 100 to represent the normal outturn, how much represented outturn last year (1901)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1902)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9	10	11
Burdwan ...	Midnapore ...	3,319,040	2,190,600	1,930	1,900	1,900	100	90	Rains were not seasonable.	
Rajshahi	Jalpaiguri .	1,594,600	925,000	400	300	300	63	55	The decrease is due to excessive rain during the year.	
Chittagong ...	Chittagong Hill Tracts.	3,288,320	44,600	17,000	17,000	17,000	25	40	The poor outturn is due to heavy rainfall and insufficiency of sun. The outturn in the Chakma and Mong Circles is very poor, but that of the Bohmong to the south of the district is better, and raises the average.	
Bhagalpur ...	Monghyr ...	2,509,440	1,582,500	500	400	300	100	100		
	Bhagalpur ..	2,704,640	2,097,000	11,300	11,300	11,300	75	100		
	Sonthal Parganas	3,500,160	1,545,300	10,700	9,900	9,900	87	96	Owing to unseasonable heavy rainfall the average outturn has been below the normal.	
Orissa ...	Cuttack ...	2,268,149	1,161,200	2,100	3,150	3,100	92	94	Owing to the cessation of rain at the time when the crop was in flower and pod, the outturn was affected to a certain extent.	

DIVISION.	District.	Total area of the district in acres.	Total area under cultivation in acres.	Approximate normal area under *early* cotton in acres.	Approximate area sown last year (1901) in acres.	Estimated area sown this year (1902) in acres.	Taking 100 to represent the normal outturn, how much represented outturn last year (1901)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1902)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9	10	11
Orissa—concld.	Balasore ...	1,334,368	870,800	1,000	500	200	95	95	The gradual decrease in area is due to the competition of imported cotton twists in the market.	The normal area should be revised.
	Angul ...	1,075,840	260,000	2,200	2,000	2,000	50	55	Short outturn due to want of rain in September.	
	Puri	1,599,360	788,200	6,600	2,000	1,200	50	75	The decrease in area is due to the introduction of the machine-made thread to a large extent in this district, and to the fact that the cultivation of the crop has become less profitable than before.	Ditto ditto.
Chota Nagpur.	Hazaribagh ...	4,493,440	1,703,000	3,500	3,500	3,000	70	81	Owing to unfavourable rainfall, the whole areas could not be sown in some of the thanas.	
	Ranchi	4,569,600	1,573,300	2,000	2,100	2,000	75	75	The low outturn is due to insufficient rainfall in September and October. The figures in columns 5, 6 and 8 have been revised after further enquiry by the police.	
	Palamau ...	3,139,200	627,600	5,900	5,500	4,300	75	50	The decrease is due to want of timely rainfall.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE COMMISSIONERS OF THE PORT OF CALCUTTA FOR THE YEAR 1901-1902.

No. 2162 Marine.

Government of Bengal.

MARINE DEPARTMENT.

Dated Calcutta, the 4th December 1902.

RESOLUTION.

READ—

The Administration Report of the Commissioners of the Port of Calcutta for the year 1901-1902.

Revenue receipts and expenditure.

THE revenue earned in the year 1901-1902 amounted to Rs. 76,74,782, exclusive of outstanding bills. This closely approximates to the budget estimate for the year of Rs. 77,07,719. The expenditure amounted to Rs. 73,95,123, so that the net result was a surplus of Rs. 2,79,659. Adding to this the balances of previous years, the total revenue balance stands at Rs. 12,11,082, exclusive of outstanding bills. The Commissioners have rightly decided that a sufficient balance shall be reserved against any temporary depreciation of revenue from transient causes, and they have accordingly established a revenue reserve fund made up of the accumulated balances of previous years.

Capital expenditure during the year.

2. A sum of Rs. 14,85,497 was expended on various capital works, of which Rs. 6,80,185 were obtained from the balance of loans raised in 1900, and miscellaneous receipts on capital account, and the difference of Rs. 8,05,312 was financed by temporary advances made from the revenue cash balance in order to postpone the issue of a loan and thereby save interest. On the other hand, a sum of Rs. 2,20,955 has been paid to the Government, so that the total capital debt of the Trust was reduced from Rs. 4,74,63,127, at which it stood on the 31st of March 1901, to Rs. 4,72,42,172.

Value of assets.

3. Against this debt, the Commissioners hold properties, including works in progress, stock of stores in cash, and securities in hand of the value of Rs. 6,09,57,162. This does not include the Strand bank lands, the capitalized value of which, at present rates of rent, would represent a considerable sum of money. The position of the Commissioners in respect of their debts may, therefore, be considered to be satisfactory. At the same time, Sinking Funds, amounting to Rs. 34,20,593, have been accumulated by annual contributions from revenue for the extinction of debts, and may be added to the value of assets.

Insurance Fund.

4. A Fire Insurance Fund has been instituted to cover all the Commissioners' buildings except the petroleum sheds, and the practice of insuring some of the buildings with public companies has therefore been discontinued. The fund, which amounted on the 31st March last to Rs. 3,81,577, is invested in public securities, and the interest, as it accrues, is added to the fund.

Jetties.

5. The receipts at the "Jetties" amounted to Rs. 14,03,807, against Rs. 12,63,610 in 1900-1901, showing an increase of Rs. 1,40,167, the improvement being due to an increase in the Foreign Import trade. The jetty warehouses are fully occupied, and as more storage accommodation is demanded, steps are being taken to provide additional space. The expenditure amounted to Rs. 4,94,966, as compared with Rs. 5,01,175 of the previous year, showing a decrease of

Rs. 6,209. This decrease is noteworthy, inasmuch as the revenue has increased. The most important item of expenditure is the cost of labour, and the actuals under this head show a decrease of 30 per cent. The result is, however, not so good, as there have been adjustments between the jetties and the docks for work done for the docks by the jetties which previously appeared in the jetty account, and is now debited to the docks. Allowing for this adjustment there is still a large decrease of 25 per cent.

The total charges on teas passed through the Tea Warehouse during 1901-1902, together with the rent received for the portion let out for storing piece-goods, amounted to Rs. 1,05,201. There was a decrease of Rs. 19,147 in the receipts, as compared with those of the previous year, due to a short crop and competition with Chittagong.

Petroleum Wharf.

6. The income derived from the Petroleum Wharf amounted to Rs. 3,80,766, as compared with Rs. 3,98,653 in 1900-1901. The expenditure rose from Rs. 92,317 in 1900-1901 to Rs. 1,59,200 in 1901-1902. The increase was mainly due to the heavy importation of case oil, on which the Commissioners had to pay handling charges to the contractors.

The importation of oil from Russia was 72 per cent. of the total quantity imported in the year under review. Only 7 per cent. was American oil, and 21 per cent. was imported from Rangoon.

Owing to the large expansion of the bulk oil trade, the Commissioners have sold to the Standard Oil Company and Messrs. Shaw, Wallace and Company two sheds at Budge-Budge with a lease for 10 years of the ground on which those sheds stand. The Commissioners are also considering proposals for more accommodation for this trade.

Vessels berthed at the Jetties.

7. During the year 230 vessels with an aggregate tonnage of 699,226 tons were berthed at the Jetties, against 212 vessels with a tonnage of 605,171 tons during 1900-1901. The average number of days each vessel occupied the Jetties was 7·6.

Port and Port Approaches.

8. The receipts under the head "Port and Port Approaches" amounted to Rs. 11,73,553. There was an increase of Rs. 12,983 in the income of the previous year. There was also an increase of expenditure of Rs. 20,735, of which Rs. 14,352 were outstanding, so that there was a net improvement of Rs. 6,600. There is still a considerable deficit on the working of these two branches. This deficit is, however, steadily diminishing year by year; the improvement being due to the increased number of vessels visiting the port.

The receipts from Port dues, which are included in the revenue of the Port Approaches Department, amounted to Rs. 5,45,246 against Rs. 5,29,495 in 1900-1901, while the expenditure during the year was Rs. 5,82,139 against Rs. 5,92,956 in the previous year. The increase in receipts was due, as stated above, to the larger amount of tonnage which entered the port.

Condition of the river.

9. The growth of commerce and the increased size of the vessels now trading to the Port rendered it necessary to enlarge the scope of the River Survey Department, and the following statement shows the extension that has taken place in the operations of the Department:—

	1885.	1900.	1901.
Miles sounded	1,295	5,864	7,231
Small charts and River Notices ...	20	606	718
Number of buoys	7	30	36
River marks	57	115	115

The most important feature of the year has been the improved state of the bars of the river, particularly that of the Eastern Gut. This improvement has generally been maintained, except in the case of the Royapore bar and the Sankrail reach, but in neither of these has any serious detention been caused to shipping.

Casualties to vessels.

10. There were 29 casualties to vessels in charge of Assistant Harbour Masters, against 18 in the preceding year and an average of 16 during the previous 10 years. In

17 cases the Assistant Harbour Masters were exonerated, and in 12 they were held, more or less, to blame. In two cases the casualties were of a serious nature, and investigations were held under the orders of the Government.

Railway.

11. The revenue derived from the Commissioners' railway was Rs. 5,32,515, while the expenditure amounted to Rs. 4,35,923, leaving a balance of Rs. 96,593, against Rs. 1,37,184 in the preceding year. The decrease was due to a decline in the receipts from the hire of wagons lent to the various railway companies.

Kidderpur Docks.

12. The receipts from the Docks were Rs. 24,14,147, against Rs. 23,77,451 in 1900-1901, while the expenditure exclusive of interest and sinking fund charges amounted to Rs. 22,14,895, against Rs. 21,03,031 in 1900-1901.

The receipts from the hire of wagons, which were credited to the Docks in 1900-1901, have been treated this year as an asset of the Railway and credited to that head. There was a surplus balance of Rs. 1,99,252 at the close of the year to meet the interest and sinking fund charges. In these charges, however, there was an increase of Rs. 84,188 during the year owing to fresh loans incurred in 1900.

The details of the receipts and charges are given below :—

	Receipts. Rs.		Expenditure. Rs.
Graving Dock ...	2,56,347	Salaries	4,71,491
Rent and miscellaneous ...	3,15,778	Working expenses ...	14,99,028
Imports ...	82,627	Repairs	93,400
Exports ...	17,56,745	Municipal taxes ...	1,50,476
Hopper barges ...	2,650		
Total ...	24,14,147	Total ...	22,14,895

After deducting the receipts on account of the Graving Dock, the income of the Wet Docks amounted to Rs. 21,57,800, while the expenditure, after deducting Rs. 58,308, directly chargeable to the Graving Docks, amounted to Rs. 21,56,587. There was thus a small deficit of Rs. 1,213. The net results are, however, actually more favourable, inasmuch as the revenue of the Docks last year was augmented by a credit of Rs. 94,120 on account of hire of wagons, and the expenditure of the current year includes a sum of Rs. 95,412 on account of demands payable and stores issued which should have been charged against the budget of the previous year. Making due allowance for these items, the working of the Docks shows an improvement.

Second dry dock.

The second Dry Dock is approaching completion. It will permit of vessels being docked for heavy repairs—an arrangement which has not hitherto been possible.

Prospective improvement of traffic.

With the object of ensuring more general use being made of the facilities available for shipping from the Dock quays, the Commissioners resolved to provide arrangements to suit the requirements of each section of the trade. During the year these views were given effect to as regards the wheat and seed trade, for which additional sheds were erected to provide the necessary accommodation. The result has been that the whole of this trade has practically moved to the Docks.

New works.

The hide sheds, leased to Messrs. Schröder Smidt and Company, were the most important of the new works executed during the year.

Special tolls.

13. A sum of Rs. 9,97,201 was realized from special tolls, levied under section 108 of the Calcutta Port Act of 1890, against Rs. 9,15,748 collected during the previous years. The expenditure was reduced from Rs. 21,153 in 1900-1901 to Rs. 16,235 in 1901-1902. The increase in the receipts is due to an increase in the volume of trade.

14. The proposal to connect Saugor and the Eastern Channel Light Ships by means of wireless telegraphy awaits the result of the experiments and enquiries now being conducted by the Government of India, Telegraph Department.

Wireless Telegraphy.

Mr. F. G. Dumayne held the office of Vice-Chairman from the 25th April 1901. The thanks of the Lieutenant-Governor are due to the Commissioners and specially to Mr. Dumayne for the able management of the Trust during the year under review.

By order of the Lieutenant-Governor of Bengal,

D. B. HORN,

Secretary to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 8th December 1902.

Burdwan.—No rain. Weather cloudy. Harvesting of *aman* continues. Fodder and water sufficient. Condition of cattle good. Common rice sells at 11 seers per rupee.

Birbhum.—Rainfall nil. Weather fair. Harvesting of *aus* crop is over and that of *aman* crop has commenced. Fodder sufficient. Sugarcane flourishing. Common rice sells at 13¼ seers per rupee.

Bankura.—No rain. Weather cloudy. Harvesting of paddy going on. *Rabi* crops suffering for want of rain. Fodder and water sufficient. Common rice sells at 13¼ seers. per rupee.

Midnapore.—No rain. Weather seasonable. Harvesting of winter rice going on. State of *rabi* crops fair. Fodder and water sufficient. Cattle-disease reported from Keshpur and Garhbeta. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Contai	14	0	
Tamluk	11	0	
Ghatal	12	0	

Hooghly.—Rainfall nil. Weather seasonable. Prospect of standing crops fair. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Serampore	10	0	
Arambagh	10	14	

Howrah.—No rain. Weather seasonable. *Aman* paddy is being reaped. Outturn 16 annas. Sugarcane doing well. Cultivation of *rabi* crops still in progress, but sowing nearly finished. Common rice selling at 11 seers per rupee. No cattle-disease reported. Fodder and water-supply sufficient.

24-Parganas.—Rainfall nil. Weather cool. State of standing crops fair. Yield of *aman* normal in all subdivisions excepting Diamond Harbour, where it is only 12 annas. Sowing of *rabi* crops doing well. Harvesting of *aman*, continues. Common rice sells at 11 seers; in Basirhat at 12 seers. Condition of cattle good. Supply of fodder and water sufficient.

Nadia.—Rainfall nil. Weather cloudy. Harvesting of *aman* paddy going on. Standing crops suffering for want of rain in Ranaghat subdivision. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Ranaghat	12	0	
Chuadanga	12	8	
Kushtia	12	0	
Meherpur	11	5	

Murshidabad.—Rainfall nil. Weather seasonable. Harvesting of *haimanti* paddy commenced. *Rabi* crops doing well. Prospect of paddy not good at Daulatabad thana where fodder is sufficient. No cattle-disease reported from anywhere. Water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Kandi	15	0	
Jangipur	14	0	
Lalbagh	13	0	

Jessore.—No rain. Prospects of crops fair. Fodder and water sufficient. Cattle-disease reported from Salikhah outpost in Magura subdivision. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Bangaon	12	5	
Narail	11	8	
Magura	12	0	
Jhenida	12	0	

Khulna.—Rainfall nil. Weather seasonable. Harvesting of *aman* paddy continues. Cultivation and sowing of *rabi* crops completed. Fodder and water sufficient. A few cases of cattle-disease reported from Dumuria and Paikgachha. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	10	per rupee.
Bagerhat	13	0	
Satkhira	10	8	

Rajshahi.—Weather cold with promise of rain. Prospects of crops good. Sowing of *rabi* and harvesting of *aman* continue. Fodder and water plentiful. Common rice selling at 12¾ seers per rupee.

Dinajpur.—Rainfall nil. Weather seasonable. Standing crops good. No cattle-disease. Fodder and drinking water plentiful. Rice selling at 13 seers per rupee.

Jalpaiguri.—Rainfall nil. Weather seasonable. Harvesting of *haimanti* paddy commenced. Transplantation of tobacco still continues. Common rice sells at 11 seers a rupee. Fodder and water sufficient.

Darjeeling.—Rainfall nil. Weather seasonable. *Hills—Haimanti dhan, bara marua, phaphar, kalai dal,* and *jow* doing well. *Terai*—Reaping of *haimanti* paddy commenced. Prospects good. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	8	0	per rupee
Terai	10	0	

Maize sells at Darjeeling at 18 seers and at Kalimpong at 24 seers per rupee.

Rangpur.—Rainfall nil. Weather seasonable. Transplantion of tobacco, sowing of mustard and harvesting of *aman* going on. Standing crops doing well. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	0	per rupee.
Nilphamari	11	8	
Kurigram	10	8	
Gaibanda	11	0	

Bogra.—No rain. Weather seasonable. *Rabi* sowings and harvesting of winter rice going on. Prospects good. Fodder and water sufficient. Common rice sells at 16 seers per rupee.

Pabna.—Rainfall nil. Weather very cool. Prospects of standing crops fair. Water and fodder sufficient. Common rice sells at 10 seers in the rupee.

Dacca. Rainfall nil. Weather seasonable. Prospects of crops good. Fodder available. No cattle-disease. Common rice sells at 11½ seers per rupee.

Mymensingh.—No rain. Weather cloudy. *Rabi* sowings and harvesting of winter rice continue. Fodder and water sufficient. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	14	0	per rupee.
Kishorganj	12	8	
Jamalpur	12	4	
Netrakona	15	0	
Tangail	12	0	

Faridpur.—No rain. Weather cold. Harvesting of *aman* progressing. State and prospects of crops good. Common rice sells at 12 seers a rupee. Fodder available. No cattle disease.

Backergunge.—Rainfall nil. Weather seasonable. Harvesting of *aghani* paddy continues. Fodder and water sufficient. Common *aman* 10 and *aus* 12 seers per rupee.

Tippera.—Rainfall nil. Weather seasonable. Prospects of crops good. Harvesting of *aman* in progress. Sowing of *rabi* crops continues. Fodder and water available. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	14	0	per rupee.
Brahmanbaria	14	8	
Chandpur	11	0	

Noakhali.—No rain. Weather seasonable. Ploughing of land for *rabi* crops and harvesting of *aman* continue. Prospects good. Cattle-disease in five thanas. Fodder and water sufficient. Common rice sells at Sadar at 13 seers and at Feni at 14 seers per rupee.

Chittagong.—No rain. Cultivation of *rabi* crop is still going on and reaping of *aman dhan* commenced. Water and fodder sufficient. Rice sells at 13 seers per rupee.

Chittagong Hill Tracts.—Rainfall nil. Weather seasonable. Winter rice harvesting and *rabi* sowings continue. Cattle-disease reported from Chandraghona thana. Rice selling at 12 seers a rupee.

Patna.—No rain. Weather seasonable. Harvesting of paddy going on. Sowing of *rabi* nearly completed. Sugarcane being crushed. Poppy germinated. Standing crops look well. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Patna	15	0	per rupee.
Barh	15	8	
Bihar	15	0	
Dinapore	15	8	

Gaya.—Rainfall nil. Weather cloudy. Harvesting of paddy continues. Sowing of *rabi* and poppy completed; young plants flourishing. Rain wanted for *rabi*. Fodder and water for cattle sufficient. No cattle-disease. Common rice selling at 14 seers per rupee.

Shahabad.—Rainfall nil. Paddy harvesting continues. Sugarcane doing well. Fodder and water abundant. Rice sells at Sadar at 14 seers per rupee.

Saran.—Rainfall nil. Weather seasonable. Standing crops doing well. Harvesting of paddy continues. No cattle-disease. Fodder and water sufficient. Common rice sells at 16 seers and maize at 28 seers per rupee at Sadar.

Champaran.—Rainfall nil. Weather seasonable. Prospects of standing crops good. *Rabi* sowing nearly completed. Harvesting of paddy going on. Outturn of sugarcane estimated at 90 per cent. No cattle-disease. Fodder and water sufficient. Common rice sells at 18 seers and maize at 29½ seers per rupee.

Muzaffarpur.—Rainfall nil. Weather cool. *Rabi* sowings almost finished. Harvesting of winter rice going on. Prospects good. Fodder and water sufficient. Common rice sells at 13 seers and maize at 28 seers per rupee.

Darbhanga.—Rainfall nil. Weather seasonable. Prospects of standing crops good. Harvesting of paddy and pressing of sugarcane in progress. Fodder and water sufficient. Cattle-disease is reported from Warisnagar thana. Common rice sells as follows:—

	Srs.	ch.	
Sadar	19	12	per rupee.
Samastipur	14	0	
Madhubani	17	10	

Monghyr.—No rain. Weather seasonable. Harvesting of winter paddy going on. *Rabi* crops doing well. Fodder and water sufficient. Cattle-disease reported from thana Begusarai. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	7	per rupee.
Begusarai	12	2	
Jamui	12	0	

Bhagalpur.—Rainfall nil. Weather seasonable. Harvesting of winter paddy still going on. Prospects of *rabi* crops good in Madhipura and Banka. Cattle-disease reported at Madhipura. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	15	0	per rupee.
Banka	16	0	
Madhipura	20	0	
Supaul	18	0	

Purnea.—No rain. Weather cold and cloudy for the last two days. Harvesting of winter rice progressing. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	0	per rupee.
Kishanganj	12	0	
Araria	15	0	

Malda.—Rainfall nil. Weather cloudy. Harvesting of winter rice still going on. Sowing of *rabi* finished except in one or two places. Prospects of standing crops good. No cattle-disease. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Sonthal Parganas.—Rainfall nil. Weather seasonable. Harvesting of winter rice continues. Sugarcane being pressed. Standing crops doing well. Cattle-disease reported from Pakaur. Fodder and water sufficient. Common rice sells at 14 seers per rupee at Sadar. Jamtara report not received.

Cuttack.—No rain. Weather seasonable. Prospects unchanged. Transplantation of tobacco progressing. *Guru Sarad* being harvested. Fodder and water available. Common rice sells at 15¾ seers per rupee at Sadar.

Balasore.—Rainfall nil. Winter rice being harvested. Sugarcane being pressed at places. Other crops doing well. Rice sells at 16 and 14 seers per rupee at Bhadrak and Sadar respectively. Fodder and water sufficient.

Abstract of the Results of Meteorological Observations taken at the Alipore Observatory in the month of November 1902.

	Inches.	Date.	Hour.
The mean pressure of the month	30·006		
The average pressure of November from 44 years' registers (Alipore Observatory)	29·961		
The highest pressure in the month	30·179	21st	10
The lowest pressure in the month	29·849	1st	16
The range of pressure	0·330		
	Hours.		
The total number of hours of bright sunshine during the month	231·8		
The maximum possible number of hours of sunshine ...	330·8		
	⊖		
The mean temperature of the month	71·6		
The average temperature of November from 20 years' registers (Alipore Observatory)	72·4		
The highest temperature in the month	88·1	3rd	
The lowest temperature in the month	56·9	26th	
The range of temperature during the month	31·2		
The mean daily range of temperature	19·1		
The greatest range of temperature in one day	22·2	26th	
	Per cent.		
The mean humidity of the month	77		
The average humidity of November from 20 years' registers (Alipore Observatory)	73		
	Inches.		
The mean vapour tension of the month	0·589		
The average vapour tension of November from 20 years' registers (Alipore Observatory)	0·584		
The mean cloud proportion of the month	1·37		
The average cloud proportion of November from 25 years' registers (Alipore Observatory)	2·30		
	Inches.		
The total rainfall of the month	0·05		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	0·02		
The average fall of November from 24 years' registers (Alipore Observatory)	0·62		
The greatest fall in 24 hours	0·03	5th	
	Days.		
The number of rainy days in the month	Nil		
The average number of rainy days in November from 24 years' registers (Alipore Observatory)	1		
	⊖		
The mean maximum equilibrium temperature of solar radiation during the month	135·4		
The mean difference of sun and air temperatures	52·9		
The greatest sun temperature	150·8	3rd	
The greatest excess of sun over air temperature	62·7	3rd	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	58·4		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	5·0		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	6 9	23rd	
	Miles.		
The mean movement of the wind per day	59·3		
The greatest movement of the wind in one day	107·0	1st	
The greatest movement of the wind in one hour	13·0	22nd	11 to noon

The number of hours with winds from each of the eight points—

	Inches.
The mean pressure of the seven days	29·999
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	30·014
	Hours.
The total number of hours of bright sunshine	56·5
The maximum possible number of hours of sunshine	75·6
	°
The mean temperature of the seven days	67·3
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	70·3
The extreme variation of temperature	27·7
The maximum temperature	81·0
	Miles.
The highest velocity of the wind in one hour	? [illegible]
The mean relative humidity	70
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	71
	Inches.
The total fall of rain from 30th November to 6th December 1902 ...	Nil.
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·04
The total fall from 1st January to 6th December 1902	61·62
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65·19

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew.

N.B.—In the weekly abstract from 9th to 15th November 1902 read 65·9 as mean wet bulb on the 14th November 1902.
Ditto ditto 16th to 22nd November 1902 read 66 miles recorded on the 15th November 1902.

FINAL FORECAST OF THE WINTER RICE CROP OF BENGAL, 1902.

THE following Note is published for general information.

W. C. MACPHERSON,
Offg. Secy. to the Govt. of Bengal.

The 9th December 1902.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Final Forecast of the Winter Rice crop of Bengal, 1902.

Character of the Season.—The rainfall of the season, from May to November, is given in Appendix II of this forecast. The *ante*-monsoon showers were exceptionally heavy, especially in Eastern Bengal, but the monsoon broke late, and the fall in June was short, the deficiency being most marked in Bihar and Chota Nagpur. July brought good rain though there was defect in parts of Bihar and Lower Bengal. On the other hand, the fall was excessive in Orissa and parts of Eastern Bengal. In August the fall was

deficient in Bihar, Chota Nagpur, and in parts of the Burdwan and Presidency Divisions, but was good elsewhere. In the following month, however, there was plentiful rain in Bihar and Chota Nagpur, and in Northern Bengal the fall was greatly in excess of the normal, while elsewhere it was, on the whole, slightly in defect. October was unusually dry almost all over the Province, so that the monsoon may be said to have terminated in September. November has been literally a rainless month. On the whole, the season, though capricious, has not been unfavourable to the winter rice crop.

Area sown.—The normal area under the winter rice crop in this Province is estimated at 29,879,300 acres. The area actually sown this year is estimated at 29,307,900 acres, as compared with 27,175,400 acres sown last year, the increase being due to seasonable weather during transplantations.

Character of the Crop.—From the summary of the district returns given in Appendix I, it will be seen that Birbhum, Rajshahi, Dinajpur, Jalpaiguri, Darjeeling, Rangpur, Bogra, Dacca, Faridpur, Backergunge, Chittagong, Champaran, Purnea, Malda, Sonthal Parganas, and Manbhum estimate an outturn of 100 per cent., or over. In twelve districts (24-Parganas, Khulna, Mymensingh, Tippera, Noakhali, Gaya, Shahabad, Muzaffarpur, Bhagalpur, Cuttack, Puri, and Singbhum) the estimate varies between 90 and 99 per cent., and in six it varies from 80 to 89 per cent. In nine others the outturn is estimated at between 70 and 79 per cent., while the remaining two districts show an outturn below 60 per cent. Since the submission of the preliminary forecast of this crop in October last, prospects have deteriorated in 20 districts, have remained unchanged in thirteen (Murshidabad, Khulna, Rajshahi, Dinajpur, Jalpaiguri, Darjeeling, Dacca, Faridpur, Backergunge, Noakhali, Champaran, Purnea, and Hazaribagh), and have improved slightly in twelve districts (Rangpur, Bogra, Tippera, Patna, Gaya, Shahabad, Saran, Monghyr, Bhagalpur, Manbhum, Muzaffarpur, and Darbhanga). Had it not been for the deficiency of the October rains, the crop would have been much above the average. In the first forecast of this crop issued in October, I anticipated a normal outturn for the Province as a whole, if the rest of the season were favourable and especially if the Hathiya rains in Bihar did not fail. But the October rains partially failed, and the final estimates now made by the District Officers give an outturn of only 94 per cent. for the whole Province, which may be accepted.

Gross outturn.—Taking the Provincial outturn at 94 per cent., as estimated by me, the gross outturn for the Province will amount to about 303,605,900 cwts. this year, as compared with an estimated outturn of 221,618,200 cwts. in 1901.

C. G. H. ALLEN,

Offg. Director of the Department of Land Records and Agriculture, Bengal.

CALCUTTA;

The 4th December 1902.

Appendix I.

Final Report on the Winter Rice Crop of Bengal, 1902.

Jalpaiguri	Sadar	1,072,000	659,600	356,100	302,400	344,500	75	100	The figures in columns 4 and 5 have been revised.
	Alipur Duars ...	822,600	265,400	158,800	144,200	152,700	100	100	
	District Total ...	1,894,600	925,000	514,900	446,600	497,200	83	100	
Darjeeling	Sadar (including Kalimpong).	464,640	66,000	11,500	11,500	11,500	100	108	
	Kurseong ...	118,400	13,000	......	......	......	......	.....	
	Siliguri ...	161,920	69,200	52,700	42,200	52,700	100	117	
	District Total ...	744,960	148,200	64,200	53,700	64,200	100	115	
Rangpur ...	Sadar	730,240	486,800	309,000	290,000	300,000	75	100	Since the submission of the preliminary forecast a larger area, viz., 10,000 acres in Gaibanda and 2,000 acres in Nilphamari, was subsequently cultivated. Hence the increase in area under crop. The outturn is due to favourable rainfall during the year.
	Kurigram	602,880	458,900	209,400	209,400	209,400	60	100	
	Gaibanda ...	457,650	371,200	215,000	175,000	200,000	75	100	
	Nilphamari ...	414,720	275,800	92,500	88,000	92,000	100	110

ANNUAL ADMINISTRATION REPORT OF THE ZOOLOGICAL GARDENS CALCUTTA, FOR THE YEAR 1901-1902.

NOTIFICATION.

No. 4601 Mis.—The 15th December 1902.—The Annual Administration Report of the Zoological Gardens, Calcutta, for the year 1901-1902 and Government letter No. 4602, dated 15th December 1902, acknowledging receipt of the report, are published for general information.

W. C. MACPHERSON,
Offg. Secretary to the Government of Bengal.

The length of the report with its appendices should not in future exceed four pages in print.

REPORT OF THE HONORARY COMMITTEE

FOR THE MANAGEMENT OF THE

ZOOLOGICAL GARDEN, CALCUTTA,

FOR THE YEAR

1901-1902.

THE Honorary Committee have the honour to submit their report for the year ending 31st March 1902.

2. The acknowledgments of the Committee are due to the following gentlemen for contributing the amounts shown against their names:—

	Rs.
RAI BAHADUR CAMALESHWARI PRASAD SINGH OF MONGHYR	4,000
BABU RAMANATH GHOSE, ZAMINDAR	1,000
SYUD HOSSAIN HAIDER, ZAMINDAR OF COMILLA	1,000

also to the Burdwan Raj Estates for a grant of Rs. 3,600 for repairing the Burdwan House in the Garden; and lastly to the Maharaja Surya Kanta Acharya of Mymensingh for the very handsome donation of Rs. 10,000 for construction of an open air enclosure for the larger carnivorous animals behind the Burdwan House.

FINANCE.

3. The donations and subscriptions amounted to Rs. 20,691, against Rs. 17,588 in the previous year. The number of visitors, which, in the previous year, had been 156,061, was 182,310, without taking into account the number of students from different schools, members of some charitable institutions, and children under age, who were admitted free of charge.

The total entrance receipts were Rs. 14,242-4, against Rs. 12,145-8 in the previous year.

The Society of St. Vincent de Paul held their Annual Fancy Fair in the Garden on the 1st and 2nd January 1902, as usual, and paid to the Committee Rs. 1,480, being 25 per cent. of the receipts collected at the gate.

The expenditure under the head "Establishment" was Rs. 13,041-14-1, against Rs. 13,384-11-3.

The charges for feeding the animals were Rs. 14,372-3-6, against Rs. 13,116-5-6. The excess was due to the fluctuating rates at which food-grains were sold during the year, and to cost of supplying fresh meat for some sick and delicate

Malda ...	1,216,000	672,800	*Bhadoi* paddy	190,000	190,000	190,000	94	100	No increase or decrease since the submission of the preliminary forecast.
			Jowar	300	300	300	100	100	
			Bajra	600	....	500	......	100	
			Indian-corn (maize)	17,700	17,000	16,800	87	100	
			Other *bhadoi* cereals and *bhadoi* pulses.	8,100	4,300	5,000	100	100	
			Other *bhadoi* food-crops (*e.g.*, vegetables).	2,800	2,000	2,000	87	100	
			Other *bhadoi* non-food-crops ...	7,000	6,000	6,000	87	100	
			Total ...	226,500	219,600	220,300	93	100	
Sonthal Parganas.	3,500,100	1,545,800	*Bhadoi* paddy	338,400	337,900	316,700	85	94	The figures have been revised in light of the survey records.
			Jowar	8,200	1,200	5,400	60	100	
			Bajra	40,500	31,100	31,000	100	108	
			Mandua (*marua* or *ragi*) ...	19,700	17,100	18,400	65	97	Owing to seasonable rainfall the outturn is expected to be nearly normal.
			Indian-corn (maize)	171 400	168,100	153,700	98	105	
			Other *bhadoi* cereals and *bhadoi* pulses.	115,300	96,600	104,900	85	100	
			Other *bhadoi* food-crops (*e.g.*, vegetables).	6,400	6,400	5,400	100	85	
			Other *bhadoi* non-food-crops ...	48,400	44,300	40,100	112	92	
			Total ...	748,300	702,700	675,600	91	98	
Cuttack ...	2,203,149	1,161,200	*Bhadoi* paddy	163,100	159,600	159,100	71	97	But for the abrupt cessation of rains at the time of maturity, we would probably have had a bumper crop.
			Mandua (*marua* or *ragi*) ..	15,100	15,000	15,100	72	92	
			Other *bhadoi* cereals and *bhadoi* pulses.	8,300	8,300	8,400	71	93	
			Other *bhadoi* food-crops (*e.g.*, vegetables).	3,000	3,000	3,000	79	95	
			Other *bhadoi* non-food-crops ...	5,500	4,300	4,300	78	94	
			Total ...	195,000	189,600	189,900	71	96	
Balasore ...	1,334,368	870,800	*Bhadoi* paddy	88,200	107,400	107,400	75	100	The increase in area and outturn is due to seasonable rains.
			Other *bhadoi* cereals and *bhadoi* pulses.	800	1,900	1,800	75	100	
			Other *bhadoi* food-crops (*e.g.*, vegetables).	600	1,100	1,100	75	100	
			Other *bhadoi* non-food-crops ...	200	200	3,200	80	100	
			Total ...	89,800	110,600	113,600	75	100	

DISTRICT.	Total area of district in acres.	Total area in district estimated to be under cultivation in acres.	Names of *bhadoi* crops.	Approximate normal area under each specified *bhadoi* crop in acres.	Approximate area last year (1901) under each specified *bhadoi* crop in acres.	Estimated area this year (1902) under each specified *bhadoi* crop in acres.	Taking 100 to represent the normal outturn, how much represented the outturn last year (1901)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1902)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9	10	11

	Of current year's crop.	Of previous year's crop.	Average of five preceding years (viz., 1896 to 1900).	Average of eight preceding years (viz., 1893 to 1900).	Percentage by which column 2 exceeds (+) or falls short of (—) area in—			Estimated yield of current year, i.e., of area in column 2.	Yield of previous year, i.e., of area in column 3.	Average of five preceding years (viz., 1896 to 1900).	Average of eight preceding years (viz., 1893 to 1900).	Percentage by which column 9 exceeds (+) or falls short of (—) outturn in—			
					Column 3.	Column 4.	Column 5.					Column 10.	Column 11.	Column 12.	
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
Bengal ...	7,302,000	7,431,300	7,522,400	7,396,100	—1·74	—2·93	—1·27	47,209,700	47,499,700	46,891,300	45,702,300	—0·61	+0·68	+3·30	The outturns in columns 9 and 10 have been calculated with reference to the area and percentage outturn and to the normal rate of yield, which has been assumed to be 10 maunds of cleaned rice to the acre.

CONSTITUTION OF A JUDGING COMMITTEE TO AWARD PRIZES TO EXHIBITORS AT THE DELHI ART EXHIBITION.

THE following is published for general information.

W. C. MACPHERSON,
Offg. Secy. to the Govt. of Bengal.

REVENUE DEPT.,
The 16th December 1902.

No. 50—32-6, dated Calcutta, the 12th December 1902.

RESOLUTION—By the Government of India, Department of Revenue and Agriculture.

THE Governor-General in Council is pleased to apppoint the following gentlemen, who have kindly intimated their willingness to undertake the task, to form a Judging Committee for the award of the prizes, medals and certificates, which will be presented to successful exhibitors and craftsmen at the forthcoming Exhibition of Indian Art Manufactures at Delhi.

President.

1. Colonel Sir Swinton Jacob, K.C.I.E., I.S.C., Superintending Engineer, Jaipur State.

Members.

2. Colonel Stuart Beatson, C.B., I.S.C., Inspector-General, Imperial Service Troops.
3. C. L. Burns, Esq., Acting Principal, Sir Jamsetjee Jeejeebhoy School of Art, Bombay.
4. Chevalier O. Ghilardi, Acting Principal, Government School of Art, Calcutta.
5. Colonel T. H. Hendley, I.M.S., C.I.E., Inspector-General of Civil Hospitals in Bengal.
6. R. D. Mackenzie, Esq.
7. The Honourable Munshi Madho Lal, Member of the Council of His Honour the Lieutenant-Governor, United Provinces.
8. Bhai Ram Singh, Vice-Principal, Mayo School of Art, Lahore.
9. E. Thurston, Esq., Superintendent, Central Museum, Madras.

Secretary.

R. E. V. Arbuthnot, Esq., I.C.S., Under-Secretary to the Government of India, Department of Revenue and Agriculture.

The Committee will assemble at Delhi on Monday, December 22nd.

WEATHER AND CROP REPORT.

For the week ending the 15th December 1902.

Burdwan.—No rain. Weather fine. Harvesting of *aman* continues. Fodder and water sufficient. Condition of cattle good. Common rice sells at 11 seers per rupee.

Birbhum.—Rainfall nil. Weather fair. Harvesting going on. *Rabi* crop doing well. Fodder and water sufficient. Common rice sells at 13½ seers per rupee.

Bankura.—No rain. Weather fair and seasonable. Harvesting of paddy going on. *Rabi* crops suffering for want of rain. Fodder and water sufficient. Common rice sells at 14 seers per rupee.

Midnapore.—No rain. Weather seasonable. Harvesting of winter rice progressing. Fodder and water sufficient. Cattle-disease reported from Keshpur and Garhbeta thanas. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Contai	14	0	
Tamluk	11	0	
Ghatal	12	0	

Hooghly.—Rainfall nil. Weather seasonable. Prospect of standing crops fair. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Serampore	10	0	
Arambagh	10	12	

Howrah.—No rain. Weather seasonable. *Aman* paddy is being reaped. Outturn 16 annas. Sugarcane doing well. Cultivation of *rabi* crops in progress. Common rice selling at 11 seers per rupee. No cattle-disease. Fodder and water-supply sufficient.

24-Parganas.—Rainfall nil. Weather cool. State and prospects of standing crops fair. Sowing of *rabi* crops and harvesting of *aman* continues. Common rice sells at 11 seers; in Barashat at 12 seers per rupee. Condition of cattle good. Supply of fodder and water sufficient.

Nadia.—Rainfall nil. Weather cold. Sky cloudy first half of the week. Harvesting of *aman* going on. Standing crops fair, but at Chuadanga more rain required. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows:—

	Srs.	ch.	
Sadar	13	0	per rupee.
Ranaghat	12	0	
Chuadanga	13	0	
Kushtia	12	8	
Meherpur	11	5	

Murshidabad.—Rainfall nil. Weather seasonable. Harvesting of *haimanti* paddy going on. Prospect of *rabi* crops good. No cattle-disease reported from anywhere. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	0	per rupee.
Kandi	15	8	
Jangipur	15	0	
Lalbagh	13	0	

Jessore.—No rain. Weather seasonable. Prospect of crops fair. Fodder and water sufficient. Cattle-disease reported from Magura police-station. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Bangaon	12	5	
Narail	12	5	
Magura	12	12	
Jhenida	12	0	

Khulna.—Rainfall nil. Weather seasonable. Harvesting of *aman* paddy continues. Transplantation of *boro* commenced. State of rape and mustard crops favourable. Fodder and water sufficient. A few cases of cattle-disease reported from Dumuria and Paikgachha. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	12	per rupee.
Bagerhat	13	8	
Satkhira	11	8	

Rajshahi.—Prospect of standing crops good. Harvesting of *aman* and sowing of *rabi* going on. Condition of cattle good. Fodder and water sufficient. Common rice selling at 13¾ seers per rupee.

Dinajpur.—Rainfall nil. Weather seasonable. Standing crops good. No cattle-disease. Fodder and drinking water plentiful. Rice sells at 13 seers per rupee.

Jalpaiguri.—Rainfall nil. Weather seasonable. Harvesting of *haimanti* paddy going on. Trasplantation of tobacco still continues in places. Common rice sells at 11 seers a rupee. Fodder and water sufficient.

Darjeeling.—Rainfall nil. Weather seasonable. *Hills—Haimanti dhan, bara marua, jow, barley, phaphar,* and *kutai dal,* doing well. Reaping of *haimanti* paddy continues. Prospects of standing crops good. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	8	0	per rupee.
Terai	10	0	

Maize sells at Darjeeling at 20 seers and at Kalimpong at 24 seers per rupee.

Rangpur.—Rainfall nil. Weather seasonable. Harvesting of *aman* going on. Condition of standing crops good. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	8	per rupee.
Nilphamari	11	0	
Kurigram	10	8	
Gaibanda	12	0	

Bogra.—No rain. Weather seasonable. *Rabi* sowings and harvesting of winter rice going on. Prospects good. Fodder and water sufficient. Common rice sells at 16 seers per rupee.

Pabna.—Rainfall nil. Weather cool. Prospects of standing crops fair. Fodder and water sufficient. No cattle-disease. Common rice sells at 14 seers and 11 chitaks per rupee.

Dacca.—Rainfall nil. Prospects of crops good. Weather seasonable. Fodder available. No cattle-disease. Common rice sells at 11½ seers per rupee.

Mymensingh.—Rainfall nil. Weather seasonable. The state of winter rice and rape and mustard good. *Rabi* sowings in progress. Fodder and water ample. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	14	0	per rupee.
Kishorganj	13	0	
Jamalpur	14	8	
Netrakona	14	14	
Tangail	12	3	

Faridpur.—No rain. Weather cold. State and prospects of crops good. Common rice sells at 12½ seers a rupee. Fodder available. No cattle-disease.

Backergunge.—Rainfall nil. Weather seasonable. Harvesting of *aman* continues. Fodder and water sufficient. Common *aman* (old) 10½ and (new) 12 seers per rupee.

Tippera.—Rainfall nil. Weather seasonable. Prospects good. Harvesting of *aman* and sowing of *rabi* continues. Fodder and water available. No cattle-disease. Common rice sells as follows:—

	Srs.	ch.	
Sadar	14	0	per rupee.
Brahmanbaria	14	8	
Chandpur	11	0	

Noakhali.—No rain. Weather seasonable. Harvesting of *aman* continues. Prospects good. No cattle-disease. Fodder and water sufficient. Common rice sells at Sadar at 13 seers and at Feni at 14 seers per rupee.

Chittagong.—No rain. Cultivation of *rabi* crop is nearly over and reaping of *aman* crop commenced. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Chittagong Hill Tracts.—Rainfall nil. Weather seasonable. Harvesting continues Slight cattle-disease in Chandraghona. Rice sells at 11 seers per rupee.

Patna.—Rainfall nil. Weather cloudy. Paddy harvesting continues. Weeding of *rabi* commenced. Sugarcane being pressed. Poppy germinated. Prospects good. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Patna	15	8	per rupee.
Barh	16	0	
Bihar	15	0	
Dinapore	15	8	

Gaya.—Rainfall nil. Weather cloudy, latterly bright. Standing crops promising. Harvesting of paddy in progress. Fodder and water for cattle sufficient. No cattle-disease. Common rice selling at 15½ seers in the rupee.

Shahabad.—Rainfall nil. Paddy being harvested and sugarcane being pressed. Poppy doing well. Fodder and water abundant. Rice at Sadar 14 seers per rupee.

Saran.—Rainfall nil. Weather cold and cloudy. Standing crops doing well. Harvesting of paddy continues. *Rabi* crops are being irrigated. No cattle-disease. Fodder and water sufficient. Common rice sells at 16 seers and maize at 28 seers per rupee at Chapra.

Champaran.—No rain. Weather cold and cloudy. Prospects of standing crops good. Harvesting of paddy continues. *Rabi* sowings still going on in places. Poppy doing well. No cattle-disease. Fodder and water sufficient. Common rice sells at 18¼ seers, and maize at 29 seers per rupee.

Muzaffarpur.—Rainfall nil. Weather cool and cloudy at times. *Rabi* sowings nearly completed. Harvesting of winter rice continues. Prospects good. Fodder and water sufficient. Prices are—common rice 13, maize 29 seers a rupee.

Darbhanga.—Rainfall nil. Weather seasonable. Prospects of standing crops good. Harvesting of paddy in progress. Fodder and water sufficient. Cattle-disease is reported from Warisnagar thana. Common rice sells as follows:—

	Srs.	ch.	
Sadar	19	12	per rupee
Samastipur	14	0	
Madhubani	17	15	

Monghyr.—No rain. Weather cold and cloudy. Prospects of crops good. Harvesting of winter rice continues. Sugarcane pressing going on. Early sown poppy flourishing. Prospects hopeful. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	14	8	per rupee.
Begusarai	16	0	
Jamui	12	0	

Bhagalpur.—Rainfall nil. Weather seasonable. Harvesting of winter paddy still going on. Outlook of *rabi* crop in Madhipura and Banka favourable. Cattle-disease reported from Madhipura thana. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	15	2	per rupee.
Banka	16	7	
Madhipura	19	0	
Supaul	20	0	

Purnea.—No rain. Weather cold. Harvesting of winter rice going on briskly. Sowing of *rabi* crops over. Prospects good. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Kishanganj	12	0	
Araria	14	0	

Malda.—Rainfall nil. Weather cloudy. Harvesting of winter rice in progress. Sowing of *rabi* finished. Cattle-pox reported from thana Nawabganj. No want of fodder and water. Common rice sells at 16 seers per rupee.

Sonthal Parganas.—Rainfall nil. Weather cool and cloudy. Harvesting of winter rice in progress. Sugarcane and other standing crops doing well. Cattle-disease reported from Pakaur. Fodder and water sufficient. Common rice sells at 14 seers per rupee in Dumka.

Cuttack.—No rain. Weather seasonable. Prospects unchangeable. *Guru Sarad* being harvested. Fodder and water available. Common rice sells at Sadar at 15¾ seers per rupee.

Balasore.—Rainfall nil. Sarad being harvested. Sugarcane being pressed at places. Other crops doing well. Rice sells at 15 and 14 seers at Bhadrak and Sadar respectively. Fodder and water sufficient.

Angul.—No rain. Weather seasonable. Harvesting of paddy and crushing of sugarcane continue. Cattle-disease reported from the interior. Common rice sells at 17 and 16¼ seers at Sadar and Khondmals respectively.

Puri.—Rainfall nil. Weather seasonable. Harvesting of winter rice going on. Outturn expected to be slightly below normal. Pressing of sugarcane continues at places. Miscellaneous crops doing well. More rain is wanted for the *rabi* crops. Fodder and water-supply sufficient. Common rice sells at 14 seers 7 chitaks per rupee.

Hazaribagh.—No rain. Weather cool. Harvesting of winter paddy still going on. Cattle-disease reported from two thanas. Standing crops doing well. Fodder and water sufficient. Common rice sells at 14¼ seers per rupee.

Ranchi.—Rainfall nil. Weather seasonable. Reaping of *Sirguja* and *Kurthi* in progress. Threshing of paddy nearly finished. Cattle-disease reported from Ranchi and Khunti thanas. Fodder and water sufficient. Common rice sells at 17 seers per rupee.

Palamau.—No rain. Weather seasonable. Rain wanted for standing crops. Cattle-disease continues in places. Fodder and water sufficient. Rice sells at Sadar at 15¾ seers and maize 23 seers 10 chitaks per rupee.

Manbhum.—No rain. Weather cold. Prospects of crops good. Harvesting of winter rice nearly over. Fodder and water sufficient. Cattle-disease not reported. Average price of common rice at Sadar 16 seers and at Gobindpur 12¾ seers per rupee.

Singhbhum.—Rainfall nil. *Rabi* crops need rain. Price of rice 16 seers per rupee at Sadar.

General Summary.—No rain. Standing *rabi* crops need rain in the districts of Bankura, Nadia, Puri, Palamau and Singhbhum. Prospects otherwise good. Harvesting of winter rice going on. Poppy doing well. Pressing of sugarcane continues. Cattle-disease reported from 12 districts. Fodder and water sufficient. The price of common rice has fallen in 20 districts, risen in 4, and is stationary in the rest (23).

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

The total fall from 1st January to 13th December 1902	61·62
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65·22

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast, g, gloomy; ⌓, dew.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF NOVEMBER 1902.

WEATHER during November was fine and settled over the Province and the north of the Bay, almost continuously. A few showers fell, chiefly in the western districts, during the first week. These showers being in all cases light, the total rainfall for the month was relatively much below what usually falls in November. Chota Nagpur received 91 per cent. of the normal fall, South-West Bengal 48, North Bengal 36 and the other divisions less than 30 per cent.

The cause of the light rainfall during the first week was probably connected with the disturbance which entered Madras at the end of October and caused very heavy rain in North Madras and the Circars. The depression was shallow when it crossed the coast and appeared to become stationary and fill up soon afterwards. But probably a slight residual depression recurved and entered Bengal a few days later causing the prevailing cloud and scattered showers of those days. The heaviest rainfall amounting, on an average, to a third of an inch fell in the south-western districts between the 1st and 4th, and a few light showers in the central and northern districts between the 5th and 7th.

After the slight disturbance of the first week ceased, the usual cold season conditions became established with light northerly winds, cloudless skies and an entire absence of rainfall with the exception of light showers in the Darjeeling hills between the 15th and 17th. The usual oscillations of pressure and temperature occurred; and during a considerable portion of the month pressure was in rather large excess. Owing to that excess in pressure the gradient was steeper than usual over the Province and the Bay, a probable result of which was strongish northerly winds over the north of the Bay and comparatively cool weather inland.

Towards the south of the Bay conditions were almost continuously unsettled, with strong winds and rough sea, but no definite cyclonic disturbance developed. As usually happens under such circumstances rainfall was of almost daily occurrence on the Madras Coast, and at times heavy rain fell, notably between the 17th and 21st.

The only noticeable feature in the east of the Bay was the strong winds at Diamond Island, where velocity was almost continuously above the normal for the season. This was more marked towards the end of the month, when daily average velocity was for several days over 20 miles an hour.

These strong winds in the east and the unsettled weather with rough sea in the south-west of the Bay show that squally weather was probably general over the south of the Bay and more continuous than usual.

Pressure.—The only depression which occurred during November was very slight. Its existence was shown more by the disturbed weather which it caused during the first week than by the pressure differences. The recovery of pressure which was brisk on the 3rd and 6th resulted in a considerable excess over the whole area, but greatest in Bengal Proper, and in consequence there was a steeper gradient over the Bay. This excess slowly increased till the 9th, after which a slow to moderate fall set in and by the 11th the distribution was again normal. From that date till the 16th a small defect was general and then excess again developed and continued up to the end of the month. The greatest excess during the month was ·16 inch in parts of Bengal on the 21st.

The average excess for the month was fairly uniform in different parts of the Province. It was about ·05 inch except in the west of North Bihar where it was less than ·04 inch.

The changes in the north of the bay throughout the month were similar to those at inland stations, though smaller in amount. In the south different conditions prevailed and more than one slight depression moved westward towards the Madras coast with squally weather and heavy rainfall accompanying them. These depressions were so shallow and the increase of wind force so slight that the name of storm is scarcely applicable to them.

Temperature.—Was more generally below than above the normal during the month, but not by large amounts. At the beginning of the month when weather was disturbed over Bengal a small excess was almost general, but after the recovery of pressure and the steeper gradient with northerly winds temperature began falling in the north. The change extended steadily southwards over the Bay between the 5th and 9th. On the latter date mean defect was 4° in Orissa, 2° in Bengal generally, and irregular in amount on the west coast, the greatest being 4° at Nellore. About the middle of the month there was generally a small excess in the western districts and a small defect in the east; and during the latter half general defect except towards the close when higher temperature prevailed with a mean excess of about 2°.

On an average for the month mean temperature was 1°·6 below the normal in Assam and about 1° in East Bengal. In the other divisions the variation was less than half a degree.

Rainfall.—Scattered showers fell during the first week, chiefly in the south-western districts and thereafter it was rainless except for a few very light showers in the Darjeeling hills about the middle of the month.

The total fall was a third of an inch on an average in Orissa, South-West Bengal and Chota Nagpur. In North and East Bengal and Bihar it was not more than a tenth of an inch.

As in November cyclonic storms occasionally move into the north of the Bay and from there northward or north-eastward into Bengal Proper and Assam, heavy rainfall occasionally occurs in the southern and eastern districts. The normal rainfall in November is most heavy in Orissa, 1·6 inches, in East Bengal it is 1 inch and in South-West Bengal ·6 inch. As no storm of any importance occurred during the past month the rainfall was everywhere below the normal, the greatest defect being 1·3 inches in East Bengal.

The following table gives in a condensed form the rainfall information for each of the six large meteorological divisions of Bengal for the present year up to the close of November. The numbers there given, as in the case of the former months of the year, are the actual average rainfalls in each division, expressed as a percentage of the normal fall for the period, and the last column also gives the total rainfall up to the close of November, expressed in the same way:—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	Actual rainfall of first eleven months of 1902 expressed as a percentage of the normal fall for the period.

TRIENNIAL REVENUE REPORT OF BENGAL.

No. 1691*I.A.*

Government of Bengal.

IRRIGATION DEPARTMENT.

ACCOUNTS.

Dated Calcutta, the 17th December 1902.

RESOLUTION.

The Canal Revenue Reports for the triennial period ending 31st March 1902.

READ—

The Canal Revenue Reports for the triennial period ending 31st March 1902, and the Chief Engineer's Note on the same.

The **Major Irrigation Works** are divided into two classes—

I.—Productive Works.

II.—Protective Works.

The Productive Works comprise the Orissa, the Midnapore, the Hijili Tidal, and the Sone Canals. These works are all in operation. The Protective Works,

which are now in process of construction, are the Tribeni and Dhaka Canals. The **Minor Works** for navigation are the Calcutta and Eastern Canals, the Orissa Coast Canal, the Nadia Rivers, and the Gaighata and Buxi Khal: while the works for irrigation are the Saran, the Eden, and the Madhuban Canals.

2. The capital outlay on the Major Works in operation was Rs. 6,43,16,069* up to the end of March 1902. Their total length during the period under review remained the same, viz., 748 miles. Of this length, 495¼ miles were both for irrigation and navigation, 223¾ miles for irrigation only, and 29 miles for navigation only. There was an increase of 19½ miles in the total length of distributaries, which now stands at 2,634 miles. The total area irrigable at the end of the triennial period was 1,416,374 acres.

On the Protective Works in progress the capital outlay (direct charges) incurred during the period under review was Rs. 4,39,907. Their total length, as estimated, is 78½ miles, and the area irrigable 127,500 acres.

Paragraphs 3 to 22 below will deal with the four **Major Works** in operation, viz., the Orissa, Midnapore, Hijili Tidal and Sone Canals, while paragraphs 23 to 31 will treat of the canals classed as **Minor Works** only.

3. The average receipts of the canal systems from all sources during the triennial period were Rs. 17,98,015 against the average working expenses of Rs. 13,00,301, showing an average net revenue of Rs. 4,97,714. This was less than the average net revenue for the period ending March 1899 by Rs. 63,111, but greater than that of the average for the period ending March 1896 by Rs. 3,95,938. Notwithstanding that the average working expenses were reduced by Rs. 1,10,317, the smaller surplus was entirely owing to the greater diminution in navigation receipts, caused by the opening of the Bengal-Nagpur and the Mogulserai-Gaya Railways.

4. The capital outlay up to the end of the year 1901-1902 on each of the canal systems and the financial results during the period under review are shown in the following statement:—

Names of Canals.	Capital expenditure (direct and indirect) to end of 1901-1902.	Average receipts during the triennial period ending March 1902 (less refunds).	Average expenditure during the triennial period ending March 1902, including indirect charges.	Average net income of the triennial period ending March 1902.	Average net income of the triennial period ending—	
					March 1899.	March 1896.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Major Works in operation.						
Orissa Canals ...	2,64,83,501	3,98,994	4,51,297	− 52,303	− 13,604	− 1,22,226
Midnapore Canal ...	84,74,988	2,37,273	2,08,503	+ 28,770	+ 11,305	+ 51,319
Hijili Tidal Canal ...	26,15,154	49,470	35,697	+ 13,773	+ 42,358	+ 4,791
Sone Canals ...	2,67,42,426	11,12,278	6,04,804	+ 5,07,474	+ 5,20,666	+ 1,67,892
Total ..	6,43,16,069	17,98,015	13,00,301	+ 4,97,714	+ 5,60,825	+ 1,01,776

* Includes Rs. 17,55,652 on account of indirect charges.

In the table below the average financial results of the canals during the period under review are compared with those of the five previous periods :—

Particulars.	Average of the triennial periods ending—					
	March 1902.	March 1899.	March 1896.	March 1893.	March 1890.	March 1887.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Receipts from all sources (less refunds).	17,98,015	19,71,443	16,64,287	16,07,032	13,24,244	14,14,609
Working expenses (including indirect charges).	13,00,301	14,10,618	14,62,511	14,51,821	14,93,944	12,67,281
Net revenue	4,97,714	5,60,825	1,01,776	1,55,211	(—) 1,69,700	1,47,328
Charges for interest ...	25,00,725	24,97,888	24,79,424	24,15,282	23,39,112	22,56,780

The canals rather more than pay their working expenses, but the net revenue does not go far towards paying the interest charges; the financial results are, however, improving, and with the prospects of enhanced water-rates will continue to improve.

5. The following statement shows the average areas irrigated by the Orissa, Midnapore and Sone Canals during the triennial period under review and the two previous periods :—

Year.	Orissa Canals.	Midnapore Canal.	Sone Canals.			All Canals.	Rainfall.
			Kharif, inclusive of hot weather.	*Rabi*.	Total.		
1	2	3	4	5	6	7	8
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Inches.
1893-94	103,526	85,763	300,318	66,458	366,776	556,065	64·03
1894-95	122,561	70,116	275,470	41,664	317,134	509,811	58·15
1895-96	119,460	65,251	279,879	115,343	395,222	579,933	46·05
Triennial average ...	115,182	73,710	285,222	74,489	359,711	548,603	56·08
1896-97	185,048	65,183	339,766	215,390	555,156	805,387	60·51
1897-98	195,602	72,206	330,074	103,371	433,445	701,253	52·70
1898-99	194,847	76,578	330,761	110,035	440,796	712,221	55·36
Triennial average ...	191,832	71,322	333,534	142,932	476,466	739,620	52·86
1899-1900	200,828	73,105	330,795	123,298	454,093	727,026	59·73
1900-1901	203,540	80,330	341,429	90,984	432,413	716,283	60·53
1901-1902	201,498	82,134	362,081	195,413	557,494	841,126	43·77
Triennial average ...	201,955	78,190	344,768	136,565	481,333	761,478	54·67

There is very little *rabi* irrigation from the Orissa and Midnapore Canals. Of the average areas irrigated from the Sone Canals under *kharif* during the last nine years, the season leases only averaged 18 per cent. of the total, the balance of the area irrigated being under long lease for seven years.

The areas irrigated are increasing every year. This shows that the people in the districts commanded by the Sone Canals are realizing more and more the benefits of canal irrigation, which assures them a bumper crop in time of drought and an increased outturn in years of ordinary rainfall.

In the famine year of 1896-97 and in 1901-1902 it is estimated that not less than 33 and 35 lakhs of maunds of grain were added to the food-supply of Bihar by these canals.

6. The progress made in the collection of water-rates during the triennial period under review and the two previous triennia is exhibited in the following table:—

Year.	Balance at the beginning of the year.	Total demand of the year.	Cash realizations of the year.	Remissions.	Irrecoverable items.	Balance at the end of the year.	Certificates issued during the year.
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1899-1900 ...	5,718	13,71,061	13,65,741	3,726	466	1,128	988
1900-1901 ...	1,128	14,51,307	14,46,100	4,501	608	198	876
1901-1902 ...	198	14,41,424	14,32,901	1,506	89	6,928	693
Triennial average	2,348	14,21,263	14,14,914	3,214	354	2,751	852
Triennial average for the period ending March 1899.	32,860	14,24,471	13,96,985	1,108	12,281	14,097	2,504
Triennial average for the period ending March 1896.	1,58,636	12,65,327	10,97,193	57,501	4,902	1,05,731	7,560

This table is instructive showing, as it does, that the very small outstanding balance at the end of the year continues to be one of the satisfactory features of the administration of these Canals. Excluding the sum of Rs. 6,141, which was uncollected in the Orissa Circle owing to a certain number of leases having been received late in March, the outstanding balance, out of a demand of Rs. 14,41,424, was only Rs. 787. This in itself is eminently satisfactory, but the decrease in the number of certificates and the small amount of irrecoverable items all clearly indicate, not only the excellent work done by the collecting establishment, but also the accuracy of the measurements made by the Canal Officers on which the demand statements are prepared.

7. The navigation receipts during the triennial period under review and the two previous periods are shown below:—

Year.	Orissa Canals.	Midnapore Canal.	Hijili Tidal Canal.	Sone Canals.	Total.	Miles open.	Tollage per mile.
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs	Rs.	Miles.	Rs.
1899-1900	99,740	89,789	51,796	85,526	3,26,851	524½	623
1900-901	90,188	97,730	45,472	36,247	2,69,587	524½	514
1901-1902	78,163	89,835	45,909	23,571	2,37,468	524½	453
Triennial average ...	89,344	92,451	47,726	48,448	2,77,968	524½	530
Triennial average for the period ending March 1899.	1,52,916	1,30,044	84,675	71,513	4,39,148	524½	838
Triennial average for the period ending March 1896.	1,19,291	1,31,468	58,658	50,422	3,59,839	524½	686

The above statement is interesting, but it is also disappointing as it brings to notice the very marked decrease of revenue under navigation.

In the previous triennial period, the average receipts were the highest on record, and were due, in a great measure, to the large quantities of building materials which were boated along the canals for the adjoining railways then under construction. It is the opening of these same railways to traffic, viz., the Bengal-Nagpur and Mogulsarai-Gaya Railways, which has caused this great loss of revenue from navigation.

The receipts in 1901-1902 were barely one-half of what they were in 1895-1896, and unfortunately they continue to show a steady decrease each year This is the more astonishing, as it has hitherto been an accepted fact that railways could never compete successfully with canals for the carriage of goods.

On the Sone canals the diminution of traffic is not surprising, as navigation never made much progress either in the Shahabad or Patna district. On the other canals, the results are very disappointing, inasmuch as, although it was foreseen that the pilgrim traffic to Puri would take to the railway, it was assumed that the canals would still retain the goods traffic. The whole question is under examination, and the Government of India will shortly be addressed on the subject.

8. The average miscellaneous revenue for the triennial period under review was Rs. 94,959 against the average of Rs. 92,010 during the previous period.

9. On the **Orissa Canals** the capital outlay incurred during the period under review amounted to Rs. 1,05,941. This sum was expended mainly on the construction of permanent outlets on distributaries, and on the Dudhai Canal.

10. The average receipts were Rs. 3,98,994, or Rs. 97,794 less than the average of the previous triennial period. The decrease took place under both water-rates and navigation. The falling off under navigation alone was more than Rs. 85,000. It was mainly due to the opening of the Bengal-Nagpur Railway and the consequent abolition of the transport service.

11. The average area irrigated was 201,955 acres, or 10,123 acres more than the average of the previous period. The increase took place under *kharif*.

12. The average working expenses during the last three years were Rs. 4,51,297 against Rs. 5,10,292 and Rs. 4,97,064, the averages for the two previous triennial periods. The decrease in the working expenses was due to there being no heavy flood damage repairs since no high floods occurred in the rivers.

13. Notwithstanding the decrease in the working expenses, the net result was a deficit of Rs. 52,308 against a deficit of Rs. 13,504 in the previous period. This was due mainly to the compitition of the Bengal-Nagpur Railway already referred to.

14. On the **Midnapore Canal** there was a great reduction in the working expenses during the period under review. This was due partly to the absence of high floods in any of the rivers crossed by the canal, and partly to the withdrawal of the daily mail steamer service from 1st January 1901, owing to the opening of the Bengal-Nagpur Railway. With the cessation of the steamer service it was no longer necessary to dredge the entrance channels to the locks, or to revet the canal banks, in order to protect them from the wash caused by the steamers.

There was some improvement in the collection of water-rates, the average having increased to Rs. 1,23,812 against the average of Rs. 1,09,360 in the previous period. The navigation receipts, however, showed a considerable falling off, the average for the triennial period under review being Rs. 92,451

against Rs. 1,30,014 and Rs. 1,31,468, the averages for the two previous periods. The cause of the great decrease has already been explained. The average net revenue for the period ending March 1902 was Rs. 17,465 in excess of that for the preceding period, and was in great measure due to the abolition of the steamer service whereby great savings were effected in the maintenance of the canal. The capital outlay incurred was Rs. 9,223, of which Rs 8,000 were expended on the purchase of an office and residence for the Executive Engineer, Cossye Division, and Rs. 1,223 on the construction of permanent outlets to improve the water distribution.

15. The area irrigated, which was mostly under *kharif*, increased from an average of 73,710 acres in the three years ending March 1896 to an average of 78,190 acres in the triennial period under review. The *rabi* irrigation is very small. The area under long-term leases in 1901-1902 was 81,784 acres. This exceeded the maximum area of 75,000 acres as laid down in the revised water-rate rules for the Midnapore Canal.

16. The number of certificates issued during the triennial period shows a marked improvement compared with the number issued during 1898-1899.

17. The traffic on the **Hijili Tidal Canal** suffered considerably owing to the opening of the Bengal-Nagpur Railway. The average receipts from navigation decreased from Rs. 84,675 during the triennial period ending March 1899 to Rs 47,725 during the period under review, the result being a reduction in the average net revenue from Rs. 42,358 to Rs. 18,773. There was a slight improvement in the working expenses

18 On the **Sone Canals** Rs. 24,070 were spent on works chargeable to the Capital Account, but the net outlay shown in the accounts, owing to sales of plant, was a *minus* figure [Rs. (—) 18,833].

19. The receipts from all sources averaged Rs. 11,12,278 against Rs. 11,28,616, the average for the previous period. The decrease was mainly under navigation receipts, which fell from Rs. 87,999, the average for the triennial period ending March 1899, to Rs. 48,832, the average for the period under review. The decrease was mainly due to the opening and competition of the Moghulserai-Gaya Railway. The receipts from water-rates increased from Rs. 10,09,662, the average for the triennial period ending March 1899, to Rs. 10,26,459, the average for the period ending March 1902.

There was a slight improvement in the miscellaneous revenue.

20. The rainfall of the year 1899-1900, though above the average, on the whole was deficient and unseasonable during the *kharif* season. In the early part of October, during the *hathiya*, there was no rain, and none fell till the end of the month. In the *rabi* season the rainfall in January was very beneficial to the crop. The rainfall of the year 1900-1901, though below the average and much less than that in the previous year, was heavier during both the *kharif* and *rabi* seasons. The year 1901-1902 was one of very scant rainfall—in fact the lowest on record since 1877-1878. It was deficient in the *kharif* season, and consequently there was a brisk demand for canal water during the rice transplanting season and the *hathiya* as well. Very little rain fell during the *rabi* season, the result being that a much larger area was leased than is ordinarily the case.

21. The area irrigated during the year 1901-1902, viz., 557,494 acres was the maximum on record. It exceeded the previous maximum of 1896-1897 by 2,338 acres. The average area irrigated was 481,338 acres against 476,466 acres in the previous period. The increase took place mainly under *kharif*, while there was a decrease under *rabi* and hot-weather irrigation. Compared with the average for the period ending March 1896, the average for the period under review was better by 121,622 acres, a result which shows that the people do appreciate the benefits of canal irrigation. This is also proved by the fact that the area under long term leases has gradually increased, the average for the triennial period under review being 318,011 acres against 297,544

and 271,552 acres for the periods ending March 1899 and March 1896, respectively.

22. The working expenses averaged Rs. 6,04,804 or Rs. 3,146 less compared with the average of the previous period. The net result of the working of the triennial period under review was a profit of Rs. 5,07,474, which is equivalent to a percentage of 1·89 on the capital outlay.

23. The capital outlay (direct and indirect charges) on canals classed a **Minor Works and Navigation** was Rs. 2,86,724 during the period under review and Rs. 1,27,48,403* up to the end of this period. The average receipts and working expenses amounted to Rs. 6,05,205 and Rs. 4,98,763 respectively, the net revenue being Rs. 1,06,442 against Rs. 1,21,913, the average for the period ending March 1899.

The financial results of each of the canals during the triennial period and the capital expenditure to date are exhibited in the following table:—

	Capital expenditure (direct and indirect)—		Average receipts of the triennial period, less refunds.	Average expenditure of the triennial period, including indirect charges.	Average net increase of the triennial period.	Average net increase of the triennial periods ending—	
	Of the triennial period.	To end of the triennial period.				March 1899.	March 1896.

* Includes the amount expended on the Tirhut and Damodar Projects.

24. The **Calcutta and Eastern Canals** are a series of navigable channels, partly natural and partly artificial, connecting Calcutta with the Eastern Districts of Bengal. The average receipts and working expenses amounted to Rs. 4,23,132 and Rs. 2,66,435, respectively, the result being a profit of Rs. 1,56,697 against Rs. 1,87,527 in the previous triennial period. The decrease was due to a falling off in the navigation receipts during the two years, 1900-1901 and 1901-1902. The average number of boats using the canals during the triennial period under review was 125,008 against 123,584 in the preceding period.

25. In order to provide a shorter and easier route for steamers during the rainy season, certain improvements of the Madaripore *bhil* route between the rivers Kumar and Madhumati from Khulna to Madaripore in the district of Faridpur were undertaken during the latter end of the year 1899-1900. The capital expenditure during the years 1900-1901 and 1901-1902 was solely incurred on the improvement of this route. Three estimates for the project have been sanctioned to date. The first estimate was for a channel about 22 miles in length to connect the Kumar and Madhumati rivers. This has shortened the distance between Khulna and Madaripore by 89 miles. The second estimate was for widening the route, and the third for deepening it by two feet throughout, for the purpose of allowing steamers and flats drawing six feet of water to use the route during the jute season only between August and

September. Works in connection with the first estimate have been completed; those for widening and deepening the route are in progress. The question of still further improving the channel so as to make it navigable throughout the year is under consideration.

26. The **Orissa Coast Canal** is a continuation of the Hijili Tidal Canal and is for navigation purposes only. The average receipts for the triennial period under review amounted to Rs. 48,896 against Rs. 81,562 in the preceding period. This great falling off is mainly due to (1) the opening of the Bengal-Nagpur Railway to which most of the *rice* and other goods traffic have been diverted owing to the very low rates charged by the Railway, and (2) the consequent withdrawal by the steamer companies of their steamers since February 1900. The working expenses, however, were much reduced during the last two years, and the average for the triennial period under review showed a decrease of Rs. 9,674 compared with the average for the preceding period. The financial results are far from satisfactory, the average net revenue being a deficit of Rs. 18,469 against a profit of Rs. 4,523 in the preceding triennial period.

27. The **Saran Canals** practically remained closed during the past three years. They were opened for a short time only during the *kharif* and *rabi* seasons of the years 1900-1901 and 1901-1902 owing to the great demand for water caused by the scanty rainfall in the district commanded by them. The water was given free of charge at the request of the Collector and under the sanction of Government.

28. The work in the **Nadia Rivers** consists of the improvement and maintenance of the main offshoots from the Ganges, viz., the Bhagirathi, Bhairub, Jalangi, and Mathabhanga rivers. These rivers have been steadily losing their position as a great trade route to Calcutta, and with the prospect of increased railway competition it is probable that they will still further decline in importance. It is intended to improve the head of the Bhagirathi by means of a powerful suction dredger with the object of rendering the river navigable for a longer time during the cold-weather months, but, until the experiment is made, it would be futile to attempt to predict what the result will be. The receipts averaged Rs. 99,263 during the triennial period under review against Rs. 90,644 in the preceding period. Compared with the average for the period ending March 1896 the receipts show a falling off of Rs. 45,069. The average working expenses for the two periods were Rs. 1,17,345 and Rs. 1,13,033 respectively, so that the net revenue was a deficit of Rs. 18,082 for the period ending March 1902 compared with a deficit of Rs. 22,389 in the preceding period. For the triennial period ending March 1893 the average profit was Rs. 68,432. This steady decline in revenue is due to the deterioration of the rivers and also to the competition of the railways.

29. The **Gaighata and Buxi Khal** was maintained during the triennial period at an average cost of Rs. 235. The lease of the right to collect tolls expired at the close of the year 1900-1901. It was renewed for another five years on the original term, viz., Rs. 4,500 per annum.

30. The **Eden Canal** was worked during the triennial period at a smaller loss than usual. The average receipts were Rs. 27,653 against Rs. 33,698 in the preceding triennial period. The working expenses amounted to Rs. 38,256 against Rs. 71,624, the net result being a reduction in the average deficit from Rs. 37,926 to Rs. 10,603, which was entirely due to the fact that there was no expenditure on original works.

The area irrigated during the triennial period averaged 27,494 acres against 25,179 acres, the average of the preceding period.

31. The average area irrigated from the **Madhuban Canal** was 3,128 acres against 5,480 acres in the previous period. The average outlay incurred for maintaining the canal was Rs. 5,805 against Rs. 7,277 in the previous period. No charge is made for water given for irrigation from the canal.

32. An abstract of the result of the experiments made on "average" rice crops in the irrigated and unirrigated lands and the value of the outturn per acre during the triennial period under review is given below:—

Canals.	Average yield per acre weighed dry.				Value of outturn to cultivators per acre from—				Rate per rupee.
	Irrigated land.		Unirrigated land.		Irrigated land.		Unirrigated land.		
	Paddy.	Straw.	Paddy.	Straw.	Rice.*	Straw.	Rice.*	Straw.	
1	2	3	4	5	6	7	8	9	10
1899-1900.	Mds.	Mds.	Mds.	Mds.	Rs	Rs.	Rs.	Rs.	
Orissa Canals	24¼	41	18¼	35	39	4	28	4	Rice 17 seers. Straw 9 maunds.

Midnapore Canal ...	19	38	17½	36	32	6	29	6	Rice 16 seers. Straw 6 maunds.
Eden do. ...	31¾	41½	20¼	27½	67	14	43	9	Rice 12½ seers. Straw 8 maunds.
1900-1901.									
Orissa Canals	26	47	20½	30	38	5	32	3	Rice 17 seers. Straw 9 maunds.
Sone do.	19¾	34	14½	26	24	4	17	3	Rice 22 seers. Straw 8 maunds.
Midnapore Canal ...	21	38	14½	28	39	7	26	6	Rice 14 seers. Straw 5 maunds.
Eden do. ...	28¼	49½	14½	22½	60	25	3[illegible]	11	Rice 12¾ seers. Straw 2 maunds.
1901-1902.									
Orissa Canals	23	42	16	34	29	5	20	4	Rice 20 seers. Straw 9 maunds.
Sone do.	21	36	12¾	24	31	12	19½	8	Rice 18 seers. Straw 3 maunds.
Midnapore Canal ...	22¾	41	17¼	3[illegible]½	51	9	40½	6¾	Rice 1[illegible] seers. Straw 4[illegible] maunds.
Eden do. ...	24¼	45½	18¾	29½	57	30	44	20	Rice 11¼ seers. Straw 1½ maunds.

* Rice = ⅔rds of paddy

In 1901-1902 the rainfall in the month of October was scanty, so that where canal irrigation was not available the rice crop was below an average crop. If the differences in value for that year are compared, it is seen that the increased value of the outturn of crops due to irrigation was Rs. 10 from the Orissa Canals, Rs. 15 from the Sone Canals, Rs. 13 from the Midnapore Canal and Rs. 23 from the Eden Canal. The great difference of value on the Eden Canal is due to the high price obtained for straw in the Hooghly district.

33. The Irrigation Department of this Province was in charge of Mr. R. B. Buckley, C.S.I., Chief Engineer, during the triennial period under review. He has since retired from the Public Works Department having served in it for 32 years. The Lieutenant-Governor has recorded his appreciation of the work done by Mr. Buckley in the *Calcutta Gazette* of the 5th March 1902.

The Superintending Engineers, Mr. Inglis, Mr. Lees, Mr. Toogood and Mr. Butler were in charge of the four Irrigation Circles. The Lieutenant-Governor acknowledges the efficiency of their services. The large reduction

in the expenditure on repairs during the last three years in the Midnapore Canal is due to the able management of Mr. C. A. White, Executive Engineer.

ORDER.—Ordered that a copy of this Resolution and of the Chief Engineer's note be submitted to the Government of India, in the Public Works Department, and published in the *Calcutta Gazette*; also that it be circulated to other Governments and to all Governments and to all Departments and officers of this Government as usual.

By order of the Lieutenant-Governor of Bengal,

D. B. HORN,

Secy. to the Govt. of Bengal.

Government of Bengal.

IRRIGATION DEPARTMENT.

REVENUE REPORT.

Note by D. B. Horn Esqr., Chief Engineer, on the Canal Revenue Reports of Bengal for the triennial period ending 31st March 1902.

THIS is the first triennial revenue report prepared in accordance with the orders of the Government of India, conveyed in their Resolution No. 670C.W.I., dated the 6th June 1901. The tables introduced by the Chief Engineer for the preparation of the report were approved by the Government of India in their letter No. 1136C.W.I., dated the 2nd October 1901.

Previous to the year 1899-1900 two annual reports were prepared in the Irrigation Department—one being the Irrigation Chapter of the Administration Report and the other the Canal Revenue Report. With a view to reducing the number and bulk of the Revenue Reports on Irrigation Works, and facilitating their earlier submission, the Inspector General of Irrigation in a note, dated the 18th June 1900, recommended—

(1) that the Annual Revenue Report should consist of a brief administration report, together with the statistical statements of irrigation works prescribed by the Secretary of State, and the administrative accounts of irrigation works,

(2) that other statistical information relating to the working of the canals, of which it may be important to maintain a permanent and continuous record, should be embodied in a triennial report, in which the results attained in successive periods on the different systems may be brought into effective comparison.

These recommendations were accepted by the Government of India, and only one annual report is being issued since 1899-1900 in place of two annual reports.

2. The canals in Bengal are for irrigation and navigation purposes and they are divided into two classes, *viz*:—Major Irrigation Works, and Minor Works and Navigation.

The Major Irrigation Works are—

The Orissa canals.	The Sone canals.
,, Midnapore canal.	,, Tribeni canal.
,, Hijili Tidal canal.	,, Dhaka canal.

and the Minor Works and Navigation are—

The Calcutta and Eastern canals.	The Eden canal.
,, Orissa Coast canal.	,, Madhuban canal.
,, Saran canals.	,, Tirhut project.
,, Nadia rivers.	,, Damodar project.
,, Gaighatta and Buxi khals.	

The Orissa, Midnapore and Sone canals are both for irrigation and navigation, while the Hijili Tidal canal is for navigation only.

The Tribeni and Dhaka canals are for irrigation only. They were sanctioned in the year 1900-01 and are now under construction. Under Minor Works, the Calcutta and Eastern canals, Orissa Coast canal, Nadia rivers and Gaighatta and Buxi khal are for navigation only, and the Saran canals, Eden Canal and Madhuban canal are for irrigation. The Tirhut project was designed for irrigation and the Damodar project for navigation. After some expenditure had been incurred, mostly on preliminary operations, it was considered advisable by Government to close the construction estimates of both projects.

The work on the Tirhut project has, therefore, been kept in abeyance since 1877-78, and that on the Damodar project was abandoned in 1871-72.

3. The Capital Account and financial results of the canals classed as Major Irrigation Works in operation up to end of the year 1901-1902 are shown in the following statements:—

(I) CAPITAL ACCOUNT.

HEAD OF ACCOUNT.	Outlay to end of March 1899.	OUTLAY DURING—			Outlay to end of March 1902.

7. The results of the working of each of the canal systems of the Province during the triennial period will now be treated of separately.

MAJOR IRRIGATION WORKS.

ORISSA CANALS.

8. The Capital outlay and other particulars of these Canals are given below :—

TABLE I.—CAPITAL ACCOUNT.

Head of Account.	Outlay to end of March 1899.	Outlay during— 1899-1900.	1900-1901.	1901-1902.	Outlay to end of Mar. 1902.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Direct Charges.					
Works	1,88,53,980	32,332	26,243	32,764	1,89,45,319
Establishment	46,81,444	7,242	5,614	7,116	47,01,416
Tools and plant	20,71,667	— 674	173	126	20,71,292
Suspense	12	— 12	......	......	......
Loss by exchange	2,68,070	......	......	......	......
Total	2,58,75,173	38,888	32,030	40,006	2,59,86,097
Less—Receipts on capital account ...	86,795	......	......	4,983	91,778
Total direct charges	2,57,88,378	38,888	32,030	35,023	2,58,94,319
Indirect charges	5,84,773	1,213	1,335	1,861	5,89,182
Total outlay, direct and indirect ...	2,63,73,151	40,101	33,365	36,884	2,64,83,501

The construction estimate of these canals is closed. The outlay during the triennial period under review, chargeable to the open Capital Account under the head 43—Minor Works and Navigation Provincial, was incurred mainly on the construction of permanent outlets, minor distributaries and drainage works. On the construction of the Dudhai Canal in the Cuttack District, an estimate for which amounting to Rs. 81,797 was sanctioned by the Government of India in October 1901 chargeable under the same head, Rs. 16,392 were expended during the year 1901-1902. The work is in progress.

9. TABLE II.—LENGTHS OF CHANNELS.

Description of Channel.	Length of Channel in miles. At end of March 1899.	Increase or decrease during— 1899-1900.	1900-1901.	1901-1902.	At end of Mar. 1902.
1	2	3	4	5	6
Navigable canals (both for irrigation and navigation) ... Miles	204¾	Nil	Nil	Nil	204¾
Branch canals (for irrigation only) ...	75	Nil	Nil	Nil	75
Distributaries (with minor channels) ...	1,101¼	+4¾	+17	+9¾	1,132¾
Village channels	Nil	Nil	Nil	Nil	Nil
Permanent outlets ... No.	559	+918	+538	+708	2,723
Temporary „ ... „	5,601	—768	—80	—6	4,747
Drainage channels ... Miles	279¾	Nil	11	Nil	290¾
Area protected from flood ... Acres	562,114	Nil	Nil	Nil	562,114
Gross area under command ... „	596,878	Nil	+914	Nil	597,792

There was no change in the lengths of the main and branch canals during the triennial period. In distributaries there was an increase of 31½ miles, owing to the construction of several minor channels. The increased length will supply water to lands not previously leased.

The permanent outlets increased from 559 to 2,723 and the temporary outlets decreased from 5,601 to 4,747. The drainage channels increased by 11 miles. In the area under command an addition of 914 acres was made in the year 1900-1901.

* Includes Rs. 371 on account of compensation.

There was a considerable decrease in navigation receipts owing mainly to the opening of the Benga Nagpur Railway and the consequent withdrawal of the Government transport service. The workin expenses, however, showed a considerable falling off during the triennial period compared with the previou periods ending March 1896 and 1899. The decrease was mainly due to the absence of high floods i the rivers.

TABLE III(*d*)—INTEREST.

11. The interest charges for and up to the end of the triennial period are given below :—

	To end of March 1899.	Period under Review.			To end of March 1902.

The rainfall during the year 1901-1902 was considerably less than that of the previous year and the average of 18 years. It was, however, well distributed in the Cuttack District but not so in the Balasore District, which led to the wholesale renewal of leases of the large area which lapsed on the 31st March 1901 on the High Level Canal, Range III. The average rainfall recorded at nine stations in the Central Provinces, from which area of country the Mahanadi river derives the greater part of its supply, was 41·65 inches in 1901-1902, 68·08 inches in 1900-1901, and 37·66 inches in 1899-1900.

	Grand Total ...	115,182	191,832	200,828	203,540	201,498	201,955

The area under long term lease practically remained stationary during the triennial period. This area was however, considerably more than the averages of the triennial periods ending March 1896 and 1899. In 1901-02, 343 acres of kharif were irrigated in an unauthorized manner, and the amount Rs. 816 assessed for it was realized in full. There was no sale of water by volume for irrigation purposes during the period under review.

TABLE VII.—AREAS IRRIGATED BY DIVISIONS.

Triennial average	76,288	686	144	...	77,118	40·90	3·80	59 00
Akhoyapada-Jajpur Division. 1899-1900	66,321	57	3,350	792	70,520	34·97	1·05	59·17
1900-1901	66,299	453	5,048	491	72.291	63·77	5·15	82·24
1901-1902	74,211	852	2,234	111	77,408	30·77	5·00	46·08
Triennial average	68,944	454	3,544	464	73,406	43·17	3·73	62 50

In a few cases in the Brahmini-Byturni and Akhoyapada-Jajpur Divisions the provisional leases have not yet been converted into long lease. The area shown under lease will probably be slightly affected when these are completed.

TABLE VIII.—LONG-TERM LEASES.

Division.	Leases lapsed on 31st March 1899.	1899-1900. Leases entered into during the year.	1899-1900. Total area under lease in the year.	Leases lapsed on 31st March 1900.	1900-1901. Leases entered into during the year.	1900-1901. Total area under lease in the year.	Leases lapsed on 31st March 1901.	1901-1902. Leases entered into during the year.	1901-1902. In the Mahanadi Division nearly one-half of the lapsed leases has not been renewed. The greater portion of this area is under the new distributaries of the Taldunda and Machgong Canals. The land being low canal water is not required except in a year of drought. There was rain in the critical time in October, and no fresh lease was applied for. In the Brahmini-Byturni and Akhoyapada-Jajpur Divisions much larger areas than those lapsed were secured.

2

The following supplementary table shows the average outturn from irrigated and unirrigated lands as well as the prices realized by the cultivators during the two preceding triennial periods *vide* Government of India's letter No. 1136 C. W. I., dated 2nd October 1901 :—

		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1	Opening balance of the year...	61,769	13,201	...	...	...	...
2	Assessment added during the year.	1,97,000	2,75,076	2,67,976	2,89,305	2,45,234	2,67,505
3	Surplus and excess recoveries	...	...	61	14	19	31
	Total ...	2,58,769	2,88,277	2,68,037	2,89,319	2,45,253	2,67,536
4	Ordinary remissions ...	4,578	8,182	923	1,499	...	807
5	Extraordinary remissions ...	...	...	...		70	23
	Deduction ...	4,578	8,182	923	1,499	70	830
6	Net demand (including arrears).	2,54,191	2,80,095	2,67,114	2,87,820	2,45,183	2,66,706
7	Irrecoverable	1,666	379	31	8	7	16
8	Written off under special sanction.						
9	Actually collected ...	2,09,247	2,77,963	2,67,022	2,87,798	2,39,016	2,64,612
10	Surplus and excess recoveries	...	...	61	14	19	31
11	Total Collections and Adjustments.	2,10,913	2,78,342	2,67,114	2,87,820	2,39,042	2,64,659
12	Outstanding balance (line 6—line 11).	43,278	1,753	...	......	6,141	2,047
13	Percentage of collection (11) to net demand (6).	·82·9	99·4	100	100	97·8	99·2
14	Number of certificates issued	4,949	1,336	352	363	305	340

The apparent falling off in the current demand during the year 1901-02 is attributable to the fact that some provisional leases, the assessment for which amounted to Rs. 14,943 were not completed during the year. It also excludes Rs. 13,142, for which leases were received by the Deputy Collector between the 26th and 31st March, so that receipts could not be written up and issued before the end of the year. Including these two amounts the assessment of the year amounted to Rs. 2,73,319. The total demand brought to account was collected with the exception of Rs. 6,141, for which leases were received by the Deputy Collector towards the close of March. The average collections during the triennial period under review were Rs. 13,351 less than the realization in the preceding period and Rs. 55,365 more than was realized during the period ending March 1896. The decrease in the number of certificates issued is satisfactory. Of the 305 certificates issued during the year 1901-02, 297 were satisfied, one was struck off and 7 were pending at the end of the year. The amount involved was Rs. 3,669 or on an average of Rs. 12 per certificate.

11	Rate of total establishment (8) per acre irrigated.	1·83	1·24	1·16	1·19	1·12	1·15

The triennial average of the establishment under the Deputy Collector is less than that the two preceding periods, but some increase took place during the year 1901-1902 in the item :emporary establishment," due to the employment of extra men for the completion of new and the ıewal of old leases.

4

19. TABLE XVII.—NAVIGATION.

		Average of Triennial Period Ending—		Period under Review.			Average of triennial period ending March 1902.

(a) Including tollage on Government traffic.
(b) Tollage on private traffic only.
In both cases the Transport Service and hire of boats have been excluded.

Compared with the period ending March 1899, the receipts for the period under review fell by 41·6 per cent. This decrease was due to (1) the abolition of the Transport Service; (2) the permanent opening of the Bengal Nagpur Railway in 1899-1900; and (3) less Railway materials having been sent by the Canals and less rice for export.

20. TABLE XVIII.—MISCELLANEOUS REVENUE.

Water is now supplied to the Railway Station at Jenapur and receipts from this source are likely to increase.

These has been a satisfactory increase in the receipts from "plantations" due to reneawl of leases and better administration.

The receipts from "Cost of process" diminished as there has been a satisfactory decrease in the number of certificates issued.

The floods in the rivers during the triennial period under review were moderate to low, except in 1900, when the Byturhi river rose to within 0·60 of the recorded flood. In 1901 the Brahmini rose to 2·40 ft. below the highest recorded flood. Very little damage was done to Government works by the floods of the last three years.

23. TABLE XXI.—MAINTENANCE AND REPAIRS.

HEADS.	Average of Triennial Period Ending—		Period under Review.			Average of triennial period, ending March 1902.

Total ...	2,30,114	2,16,795	1,83,759	1,58,955	1,52,868	1,65,194

There has been diminished expenditure under all heads, except "Extensions and Improvements," under which several minor distributaries, some permanent outlets, several quarters and office buildings for the revenue subordinates were constructed.

The decrease under the heads "Head Works and Main Canal" is due to less damage done by floods. The expenditure under "Distributaries" practically remained the same as in the two preceding periods, while under "Drainage and Protective Works" there was less expenditure than that incurred during the preceding triennial period. The transport service was abolished during 1900-1901, which accounts for the diminished expenditure under that head.

The first reach of the Taldanda Canal was heavily silted up, specially in the first three miles. Forty-six and-a-quarter lakhs of cubic feet of silt were removed, which accounts for the excess expenditure of the year.

The general average cost of maintenance was considerably less than in the preceding triennial period, a result which is due to the absence of any extraordinary floods in the rivers.

Mr. Barlow reports as follows on flushing and scouring Lock entrances of the Kendrapara Canal, &c., during the years 1899-1900, 1900-1901 and 1901-1902 :—

"The lock entrances at Jumbu and Alba silt up yearly towards the end of the rains, and except at high tide there is not enough water to pass steamers and boats. The silt deposited is cleared partly by hand at low tides and partly by tying up a deeply laden iron boat across the Channels and scouring under it by opening the lock valves, &c. This can only be done when there is a good head, *viz.*, when the water in the river is low.

"To avoid silting in the first reach as far as practicable full supply is run down continuously during the rains, and any excess water not required for irrigation purposes, is run off through the escapes. This has been found to be most successful since the channel has been remodelled and only excavated to the minimum section required. After the floods are over and even after the irrigation is over, full supply is kept running whenever a bar of silt deposits near the head, and it has been found that this deposit is always moved down and generally more or lees dispersed.

"As regards Alba—In 1899 scouring was done by boat—

During October	...	... 7 days.
" November	...	... 7 "
" December	...	... 4 "

"In 1900 scouring was done by boat—

During October	...	... 9 days.	
" November	..	... 10 "	
" December	...	... 3 "	
" January	...	... 10 "	This was necessitated owing to slight flood and fresh silt deposit.
" February	...	... 12 "	

"In 1901 scouring was done by boat—

During October	...	... 4 days.
" November	...	... 6 "
" December	...	... 9 "
" January	...	... 2 "

"The result was slow but fairly sure, and each period of working improved the channel though sometimes silt would again deposit. As regards the Pattamoondi Canal, scouring is not required at present as the channel is still in excess of requirements."

For the High Level Canal the first portion of the channel has been contracted in width by throwing excavated silt on the sides of the channel and turfing the same. The Executive Engineer remarks : "The contraction of the channel has been effective in reducing the sand deposit in the entrance channel, but at the same time it has been the cause of heading up the water so much so that hardly 4 inches of head could be obtained in this irrigation season. Hence supply of more than 500c. ft., which is the requirement for irrigation, can hardly be got into the Canal for the purpose of escape in scouring the silt. The contracted state of the channel at the entrance has reduced silt deposit and will further reduce. Any silt brought in will be taken down the Cannal where the section is wide enough."

The following extracts are from a note by Mr. Arnott, Executive Engineer, on the Taldanda Canal. "In the irrigation season of 1900 there was great difficulty in getting sufficient water down the first reach of the canal owing to the silted up state of the first three miles. It was settled to lower the bed of the canal by 3 inches from Jobra to Biribati, and to reduce the width of the channel below the head sluice by depositing the excavated sand from the bed on to the sides until it was above full supply line. The canal was kept running full for the whole season and whether owing to the low state of the river or to the flush which a full supply gives, tending to send the silt down to the lower reaches, the first 3 miles of the Taldanda canal after the irrigation season of 1901 were remakably free from silt. Mr. Arnott is of opinion that this was due to the flushing maintained during the season, and he considers that if his suggestions to cut down the weirs were adopted, a still further 'draw' to the water would be given."

The average expenditure incurred during the triennial period under review in clearing silt from the Taldanda Canal is more than three times as large as in the preceding period, the reasons for which are explained above.

During 1900-1901, 41½ lakhs of silt were removed from the 1st reach of the Kendrapara Canal, which was choked with it. The sill of the first weir was lowered, so that full discharge can be passed through the reach with less than full depth of water in the canal.

Very little silt is cleared from the other canals, and no special remarks are called for in respect to them. The general average expenditure for the period under review was Rs. 4,000 in excess of the previous one.

Under the head 'dredging' the expenditure on the Taldanda Canal was practically the same as in the previous three years, while there was a satisfactory decrease under all other canals.

MIDNAPORE CANAL.

The construction estimate of this canal was closed on 31st March 1899. The sum of Rs. 8,000 spent in 1899-1900 represents half cost of the purchase of the Executive Engineer's office and residence at Midnapore. The expenditure incurred during the year 1901-1902 was on account of constructing permanent outlets to improve the water distribution.

Gross area under command... "	180,000	......	......	......	180,000

There was no change in the lengths of navigable channels and distributaries during the triennial period. There was an increase of 0·37 miles in the length of village channels owing to the construction of Madhpur village channel. The number of permanent, as compared with the number of temporary outlets, is still very small, but it has not been considered desirable or necessary to incur the great expense of making all the outlets permanent, and it was decided to take in hand only the more important ones at the heads of distributaries. The construction of 48 of these outlets at an estimated cost of Rs. 5,682 was begun in 1901-1902, and the work is still in progress. On the whole, the canal may be considered to be fairly well equipped for the distribution of water.

The reduction in the average receipts for the triennial period under review compared with those f the two previous periods is mainly due to the opening of the Bengal-Nagpur Railway which has tappe the canal traffic and caused the withdrawal of the Steamer Service by the Calcutta Steam Navigatic Company. There was however a considerable falling off in the working expenses. The reduction h been mainly effected under the head Maintenance and Repairs, as owing to the cessation of the Steam Services no extensive silt clearance and revetting of canal banks, &c., were required. In consequen of the great reduction effected in the working expenses the net revenue increased from (—) Rs. 43,7 in 1899-1900 and Rs. 60,971 in 1900-1901 to Rs. 69,069 in 1901-1902 notwithstanding the great decre in navigation receipts. The result is highly satisfactory.

During each of the past three years the rainfall in the *Kharif* season was well up to or above the normal. In October 1900-1901 and 1901-1902 there was a marked deficiency which created a strong demand for Canal water.

30. TABLE V.—AREAS IRRIGATED.

Year.	Kharif.	Rabi.	Perennial.	Total.	Rainfall.		
					Kharif season.	Rabi season.	Year.

Triennial average ...	77,565	625	...	78,190	41·01	3·83	63·44

The increase in the area irrigated during the *Kharif* season of 1901-02 was due to the excessive demand for canal water caused by the scanty rainfall in October.

40. TABLE VI.—AREAS IRRIGATED BY LEASES.

Nearly the whole of the irrigation during the year 1901-02 was carried out under the system of long-term leases. The area irrigated exceeded the limit which was formerly laid down as the maximum for which long leases should be granted. The area under season leases was very small.

TABLE VIII.—LONG-TERM LEASES.

Division.	Leases lapsed on 31st March 1899.	1899-1900.		Leases lapsed on 31st March 1900.	1900-1901.		Leases lapsed on 31st March 1901.	1901-1902.

The Superintending Engineer writes: "The duty of water on a canal which for the most part merely supplements the rainfall cannot be very accurately gauged, and the figures given have not much value. Mr. White, in replying to questions put by the Irrigation Commission, gives some interesting information regarding the duty during months of greatest pressure. The instances which he records give duties varying from 120 to 220 acres, and he considers that a duty of 160 acres represents the average during times of pressure."

A "good" crop is one decidedly above the ordinary crop in the village in which the experiment is taken.

An "average" crop is one considered a fair average of the whole crop in the village in which the experiment is taken.

MIDNAPORE CANAL—						
Average Paddy ...	31 12 0	29 6 0	38 9 0	26 4 0	51 5 0	40 8 0
Ditto Straw ...	6 5 0	6 0 0	7 3 0	5 10 0	9 0 0	6 13 0
Total ...	38 1 0	35 6 0	45 12 0	31 14 0	60 5 0	47 5 0

N.B.—$\frac{1}{3}$rd deducted from the weight of paddy to arrive at the quantity of rice. The Executive Engineer, however, found $\frac{3}{8}$th husk from actual experiment in the year 1900-1901.

The average value of the outturn for the triennial period under review and the two previous triennial are :—

			Irrigated.	Unirrigated.
			Rs. A.	Rs. A.
Period ending	March	1902	41 2	No observation.
Ditto	ditto	1899	42 7	36 4
Ditto	ditto	1896	44 7	38 2

The high value of the outturn in 1901-1902, as compared with that in the two previous years, was due to the high price of rice in 1901-1902.

33. TABLE XIII.—ASSESSMENTS, REMISSIONS, AND COLLECTIONS.

The Superintending Engineer writes:—

"*Item 1.*—The opening balance for the triennial period ending March 1902, was less than that of the first and second This was due to the Deputy Collector being vested with the powers of Certificate Collector. The rate-payers have learn by experience that the non-payment of their dues within the prescribed time is followed by the prompt filing of certificates against them, and the issue of processes for distraint, and that this puts them to trouble and expense.

Item 2.—The increase was due to a larger area irrigated during the triennial period ending 31st March 1902.

Item 4.—The average remission granted during the triennial period ending March 1902 was less than that of the first and second. This was due to correct assessment having been made after test and re-test of the maps of the village under lease.

Item 14.—The investment of certificate power to the Deputy Collector in charge of the Canal Revenue Division Midnapore, has been followed by a gradual reduction in the number of certificates."

46. The following Supplementary Table XIII (*a*) shows the remissions of original demand made as the result of admitted complaints.

11	Rates of total establishment (8) per acre irrigated.	0·84	1·03	1·09	0·89	0·89	0·95

The Superintending Engineer states :—

"The increase in the cost of establishment under Engineers during the triennial period under review (which includes patrols only) is due to an increase in their number from 16 to 24. Their wages have also had to be raised from Rs. 6 to Rs. 7 and Rs 8. The additional outlay has resulted in greater efficiency.

36. TABLE XVII.—NAVIGATION.

		Average of triennial period ending—		Period under Review.			Average of triennial period ending March 1902.
		March 1896.	March 1899.	1899-1900.	1900-1901.	1901-1902.	
1		2	3	4	5	6	7

The falling off in navigation receipts durıng the triennial period under review is mainly due to the opening of the Bengal-Nagpur Railway which has monopolized the transport of timber. The passenger traffic has also considerably decreased.

37. TABLE XVIII.—MISCELLANEOUS REVENUE.

Particulars.		Average of trennial period ending—		Period under Review.			Average of triennial period ending March 1902.
		March 1896.	March 1899.	1899-1900.	1900-1901.	1901-1902.	
1		2	3	4	5	6	7
		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Sales of water		1	45	250	250	250	250
Water-supply of towns ...		...	...	...	...	...	...
Plantations		39	56	3	28	22	18
Other canal produce ...		30	15	99	47	99	82
Water-power		...	...	...	...	...	...
Rents of buildings		858	1,060	1,021	824	639	828
Fines		...	2	...	...	88	29
Miscellaneous...	Rents of lands	11,636	18,034	18,134	13,158	13,624	14,972
	Fisheries ...	1,476	1,465	1,138	1,189	2,365	1,564
	Cost of process	1,076	588	381	262	245	296
	Sale of old materials.	336	...	...	...	...	...
	Other items ...	7,429	2,386	107	1,805	9,039	3,650
Total ...		22,881	23,651	21,133	17,563	26,371	21,689

The revenue during the year 1901-1902 was much greater than that for the two preceding years. This was due to the increase in the sale proceeds of the Koyalighats which rose from Rs. 583 in 1900-1901 to Rs. 4,698 in 1901-1902.

38.

Do.										
Do.										

There was a very satisfactory reduction in the maintenance charges per mile of both Main Canal and Distributaries. The rate for the Main Canal was brought down from Rs. 2,416 in 1899-1900 to Rs. 1,094 in 1901-1902, and that for the distributaries from Rs. 109 to Rs. 31; the rates are probably as low as can be expected in the future.

41. TABLE XXIII.—SILT-CLEARANCE AND DREDGING.

LOCALITY.	Silt-clearance by hand.

There was great reduction in the quantity of silt dredged during the triennial period under review as, on account of the discontinuance of the mail steamer service, the tidal entrances had not to be dredged as low as before. The tidal reach between Kultapara and Kantapookur was closed for silt clearance in 1899-1900, which explain the large expenditure incurred during that year in silt clearance.

HIJILI TIDAL CANAL.

42. TABLE I.—CAPITAL ACCOUNT.

17	Percentage of net revenue on capital outlay.	0·19	1·62	0·31	0·58	0·68	0·53

The receipts have decreased considerably, owing to the opening of the Bengal-Nagpur Railway. The working expenses, however, show a gradual reduction from Rs. 45,061 in 1899-1900, to Rs. 29,955, in 1901-1902. On account of the reduction effected in the working expenses the net revenue has increased from Rs. 8,076 in 1899-1900 and Rs. 15,272 in 1900-1901 to Rs 17,970 in 1901-1902.

45. The interest charges for and up to the end of the triennial period are given below:—

TABLE III(*a*).—INTEREST.

	To end of March 1899.	PERIOD UNDER REVIEW. 1899-1900.	1900-1901.	1901-1902.	To end of March 1902.

The construction estimate of these canals is closed. During the triennial period under review a sum of Rs. 24,070 for works only was spent as chargeable to the open Capital account under 43—Minor works and navigation. The following were the principal works constructed: A gangway to the Dehri headsluices for working the kurries and shutters; alterations to the Kao syphon to enable it to be utilised as an escape during the *kharif* season; an additional escape to the Bhojepur distributary, an escape channel to the Katherain distributary and a number of permanent outlets for village channels.

53. TABLE II.—LENGTH OF CHANNELS.

Area protected from flood ..	Acres					
Gross area under command	„	1,733,509	...	...	...	1,733,509

There were no changes in the lengths of the main and branch Canals. In distributaries there was a decrease of 12 miles due to the abandonment of a portion of the Emamganj distributary taking off the Patna Canal. The mileage of village channels increased from 2,981 miles 3,001 feet to 3,114 miles and 4,673 feet at the end of March 1902. The number of permanent outlets increased from 3,596 to 4,206, while the temporary outlets decreased from 2,095 to 1,880. The gross area under command remained the same

In the following supplementary tables are given the details of the lengths, &c. of the channels by Divisions at the close of the triennial period under review:—

TABLE II(*a*).—CANALS AND DISTRIBUTARIES.

* Inclusive of I. C.—Compensation.

The receipts from water-rates and miscellaneous revenue show a steady increase during the period under review, whereas navigation receipts have decreased by almost fifty per cent. owing to the opening of the Mogulsarai-Gaya Railway The average cost of maintaining the canals has remained almost stationary, so that the net financial result is slightly lower than that of the previous triennial period.

55. The interest charges for and up to the end of the triennial period are given below :—

TABLE III(a).—INTEREST.

In the year 1899-1900 the rainfall of the year although above the average, was deficient and unseasonable during the *kharif* season. In June and July there was heavy rainfall. In August the season for the transplantation of rice, the rainfall decreased and was irregularly distributed. In September the falls were very light, and the rain practically ceased about the middle of the month. In the early part of October during the *hathiya* there was no rain, and none fell till almost the end of the month. In the *rabi* season the rainfall in January was very beneficial to the crop.

In the year 1900-1901 the rainfall, though below the average and much less than that of the previous year, was heavier during both the *kharif* and *rabi* seasons. In August during the transplanting period for rice it was deficient and there was, consequently, a great demand for canal water. The rainfall during the *hathiya* was heavy. The excessive fall during the *rabi* season did much damage to the crop.

The year 1901-1902 was one of very scant rainfall—in fact the lowest on record since 1877-78. Owing to deficiency of rainfall in the *kharif* season, there was a brisk demand for canal water during the rice transplanting season and also in the *hathiya*. Very little rain fell during the *rabi* season, with the result that a very much large area was irrigated than usual.

The following supplementary table shows the rainfall during the "Hathia Nachatra," and for the succeeding ten days since 1888; it is based on the 22 stations mentioned in subsidiary form IV E(*a*):—

TABLE IV(*a*).—RAINFALL DURING *HATHIA*.

Year.	Average rainfall during the "Hathia," 25th September to 8th or 9th of October.	Average rainfall during ten days after the "Hathia."	In the Shahabad District only.	
			Period of maximum demand for a water in any period of ten days.	Average daily discharge during that period per 100 acres leased.
1	2	3	4	5
	Ins.	Ins.		C. ft.
1888	0·18	Nil	12th to 31st October	2·00
1889	0·02	0·31	6th to 15th " ...	1·92
1890	4·15	0·86	10th to 19th " ...	1·48

1896-97 ...	316,941	215,390	22,825	555,156	12·50	2·15	32·05
1897-98 ...	299,061	103,371	31,013	433,445	22·90	1·39	52·98
1898-99 ...	304,778	110,035	25,983	440,796	32·51	1·93	54·91
Triennial average	306,927	142,932	26,607	476,466	22·64	1·82	46·65
1899-1900 ...	305,464	123,298	25,331	454,093	16·46	3·60	54·68
1900-1901 ...	323,438	90,984	17,991	432,413	19·01	4·88	39·90
1901-1902 ...	331,909	195,413	30,172	557,494	17·80	0·50	29·19
Triennial average	320,271	136,565	24,498	481,333	17·76	2·99	41·26

The average area irrigated during the period under review was greater than that of the two preceding periods. There has been a steady increase of rice-irrigation: the area under *rabi* irrigation is dependent entirely on the amount of rainfall after the 25th September.

TABLE VI.—AREAS IRRIGATED BY LEASES.

Crop.		Average of triennial period ending—		Period under review.			Average of triennial period ending March 1902.

The former rate for long leases was Rs. 2 per acre. The existing rate, which was introduced from 1st April 1897 and which will remain in force up to the end of March 1903, is Rs. 2-8 per acre.

To show the popularity of these long leases, and the eagerness of the people for canal irrigation, the areas applied for and refused in each Division during the triennial period under review are entered in the following table :—

TABLE VIII(a)—AREAS APPLIED FOR AND REFUSED.

DIVISION.	1899-1900. Area for which applications were received.	1899-1900. Area for which applications were refused.	1900-1901. Area for which applications were received.	1900-1901. Arrah	33,149	9,726	24,233	6,485	36,079	8,647
Buxar	35,413	21,943	38,866	23,099	27,012	15,939
Total ...	90,811	40,412	79,753	39,138	81,829	33,098

On this question of the renewal of leases the Executive Engineer, Arrah Divison, writes as follows:—"The canals are now practically leased up to their limit, and any new lease can only be taken if it is very favourably situated. Additions are possible, however, by reducing the amount of water given to the lease by taking a higher duty or adding to existing blocks without increasing the size of the outlet, and it is chiefly by these means that the increase in the area has been attained, and in a few years will be the only way of extending the area."

Leases cancelled during the triennial period are noted in the following statement:—

TABLE VIII(*b*).—LEASES CANCELLED.

Division	Under Rule 22 (*iii*).						Under Rule 24.					
	1899-1900.		1900-1901.		1901-1902.		1899-1900.		1900-1901.		1901-1902.

Buxar	Nil	Nil	Nil	Nil	Nil	Nil	1	153	5	839	2	93

TABLE VIII(*c*)—UNAUTHORIZED IRRIGATION.

58. The table below shows the areas and amounts assessed under unauthorized irrigation during the triennial period under review:—

Division.	Kharif.		Rabi.		Hot-weather.		Total.		
	Area assessed.	Area irrigated but not assessed.	Area assessed.	Area irrigated but not assessed.	Area assessed.	Area irrigated but not assessed.	Area assessed.	Area irrigated but not assessed.	Amount assessed.
1	2	3	4	5	6	7	8	9	10
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Rs.
Eastern Sone ...	313	1,970	385	413	7	84	705	2,467	4,359
Arrah	848	1,678	933	489	58	189	1,839	2,356	9,220
Buxar	449	2,318	156	1,228	......	141	605	3,687	3,726
Total 1901-02 ...	1,610	5,966	1,474	2,130	65	414	3,149	8,510	17,305
Total 1900-01 ...	863	3,338	464	1,111	195	251	1,522	4,700	9,460
Total 1899-1900 ...	1,717	3,950	1,025	1,854	133	244	2,875	6,048	17,461

The favourable *Hathia* rain in 1900 caused a reduction in that year. The increase in the other two years was due to the fact that there was no rain during the *Hathia*. The Executive Engineer, Arrah Division, notes:—

"If unauthorized irrigation is to be stopped at all, it can only be done by imposing such a rate as will make the cultivator understand that it will be no benefit to him to take water without authority, even though by so doing he may save his crop and get a fair outturn."

The Superintending Engineer agrees with this, and recommends that the rate should be deterrent. The Chief Engineer, however, does not share this opinion. The average area irrigated but not assessed during the past three years was 4,418 acres. This is not a large area when it is remembered how many long leases there are and the facilities which the villagers have of passing water on to the unleased fields. There can be only one solution of this difficulty and that is for the Canal Officers to see that leases are only granted where the boundaries are suitable and that the outlets are carefully proportioned to the areas leased.

59. The assessments under wastage of water were:—

TABLE VIII(*d*).—WASTAGE OF WATER.

Division.	1899-1900.	1900-1901.	1901-1902.
1	2	3	4
	Rs.	Rs.	Rs.
Eastern Sone ...	183	......	475
Arrah	908	660	1,493
Buxar	171	7	531
Total	1,262	667	2,499

For purposes of irrigation wastage occurs principally in the hot-weather season, when *aharas* are filled in order to supply water for cattle.

60. The approximate area irrigated under the head "Sale by volume" is given below—

TABLE VIII(e)—SALE BY VOLUME.

DIVISION.		1899-1900.	1900-1901.	1901-1902.
1		2	3	4
		Acres.	Acres.	Acres.

Arrah ...	...	728	183	4,748
Buxar ...	...	363	.. ...	1,854
Total	...	1,277	445	9,275

The great demand for water in 1901-02 was owing to the failure of the *hathia* rain. Fortunately the supply in the river was ample, otherwise so large an area could not have been irrigated—

The Superintending Engineer writes:—

"The kharif duty in the last two triennial periods is less than that in the preceding three years. This is due to the introduction of the flushing system. It is calculated on the gross discharge entering the Canals and is of no practical value, as discharges in excess of requirements are run as frequently as the state of the river permits for flushing out the silt deposited at the head of the Canals.

"On the assumption that the whole kharif area was irrigated during the ten days of maximum demand, or 'period of pressure,' generally between the 5th and 14th October, the duty during the period under review is given in the statement following:—

CANAL SYSTEM.	1899-1900.			1900-1901.			1901-1902.		
	Area irrigated Kharif.	Average discharge from 5th to 14th October 1899.	Duty per cubic foot of discharge.	Area irrigated Kharif.	Average discharge from 18th to 27th October 1900.	Duty per cubic foot of discharge.	Area irrigated Kharif.	Average discharge from 5th to 14th October. 1901.	Duty per cubic foot of discharge.
1	2	3	4	5	6	7	8	9	10
	Acres.			Acres.			Acres.		
Eastern Main Series	74 948	1,233	60·78	79,275	1,800	44·04	80,142	2,008	39·91
Western Main Series	230,516	3,083	74·77	244,163	3,822	63·88	261,767	4,104	61·34

"It has been the practice for the last five years to commence increasing the Canal discharges about the beginning of October, so as to have everything in order and a full supply ready to meet a heavy 'hathiya' demand, should rain fail during that period. The higher duty obtained in 1899-1900, was due to the cultivators being compelled, owing to the short supply in river, to economise water as much as possible.

"In the early part of October 1901 owing to high floods in the river the Canals had to be closed. Consequently in 1900-1901 the period of pressure has been taken between the 18th and 27th of that month.

* * * * * *

"The duty during the rabi season increases with the increase of area irrigated It is often vitiated by flushes being run in January and February, when the river is in flood, with a view to killing weeds in the Canals.

"The Executive Engineer of the Arrah Division repeats the table which has now been given for some years, showing the aggregate depth of water placed at the rice-fields, on the hypothesis that the entire 'utilised' discharge of the Canal reached the fields. The figures take cognizance of the months July to October inclusive, thus:—

YEAR.	AVERAGE DEPTH DUE TO		Total.
	Rainfall.	Canal water.	
1	2	3	4
	Feet.	Feet.	Feet.
1887-88 ...	2·56	2·60	5·16

A "good" crop is one decidedly above the ordinary crop in the village in which the experiment is taken.
An "average" crop is one considered a fair average of the whole crop in the village in which the experiment is taken.

	Total ...	1,232	1,432	129	736	800	97	1,968	2,232	226
1901-1902	Eastern Sone ...	209	195	11	75	51	4	284	246	15
	Arrah ...	725	983	227	184	382	141	909	1,365	368
	Buxar ...	516	713	142	165	374	167	681	1,087	309
	Total ...	1,450	1,891	380	424	807	312	1,874	2,698	692

The Superintending Engineer remarks:—

"The increase in the number of complaints pending at the end of the triennial period is said to be due to the larger area of *rabi* irrigated in 1901-1902 and the extra work thrown on the staff whereby they could not investigate all the complaints before the close of the year, the areas over which the complaints were distributed being very large."

TABLE XV.—CLASSIFICATION OF COMPLAINTS.

Class	Subject.	1899-1900.			1900-1901.			1901-1902.		
		Granted.	Refused.	Total.	Granted.	Refused.	Total.	Granted.	Refused.	Total.
1	2	3	4	5	6	7	8	9	10	11
		No.	No.	No.	No.	No.	No.	No.	No.	No.
I	Claims for remission in which liabity to water-rate is denied.	994	1,327	2,321	1,232	1,432	2,664	1,460	1,891	3,341
II	Claims for remission in which liability to water-rate is not denied.	603	780	1,383	689	534	1,123	321	495	816
III	Complaints of damage caused by the canals.	26	45	71	21	53	74	22	54	76
IV	Complaints against individuals.	8	47	55	36	49	85	43	71	114
V	Other complaints.	57	182	239	90	164	254	98	187	225
	Total ...	1,688	2,381	4,069	1,968	2,232	4,200	1,874	2,698	4,572

Out of this large number of complaints only 25 were appealed to the Collector during the period under review, of which three were allowed and the rest dismissed.

65. The statement below gives details of "certificate cases" for the three years under review:—

Year.	Cases instituted including those pending from previous year.		Disposed of during the year.		Pending at close of the year.	
	Number.	Amount	Number.	Amount.	Number.	Amount.
1	2	3	4	5	6	7
		Rs.		Rs.		Rs.
1899-1900 ...	352	5,354	352	5,354	Nil.	Nil.
1900-1901 ...	327	3,053	327	3,053	Nil.	Nil.
1901-1902 ...	220	3.210	219	3,197	1	13

The gradual reduction in the number of cases, considering the increase of the demand, is a most satisfactory feature as shewing the greater readiness of the cultivators to pay without enforcement.

Only one "Magisterial case" was instituted during the triennial period and it was discharged.

66. TABLE XVI.—ESTABLISHMENT.

Item.	HEAD OF ESTABLISHMENT.	AVERAGE OF TRIENNIAL PERIOD ENDING—		PERIOD UNDER REVIEW.			Average of triennial period ending March 1902.
		March 1896.	March 1899.	1899-1900.	1900-1901.	1901-1902.

There has been a considerable falling off in the receipts from navigation owing to the opening and competition of the Mogul-Serai-Gaya Railway.

The Steamer service on the Sone Canals continued to be worked by Messrs. Radford and Company.

The following Table shows the extent of the steamer-traffic worked by them for the years 1901-1902 and 1898-1899:—

TABLE XVII(a).—STEAMER SERVICE.

Particulars.			Patna Canal.	Arrah Canal.	Buxar Canal.	Total.
1			2	3	4	5
1901-1902.						
Passengers carried ...	Up ...	No.	3,440	6,751	......	10,191
	Down ...	„	3,587	8,152	......	11,739
Cargo carried ...	Up ...	Tons.	985	1,155	......	2,140
	Down ...	„	966	820	......	1,786
1898-99.						
Passengers carried ...	Up ...	No.	4,165½	11,863½	6,133	22,162
	Down ...	„	4,017	13,435½	6,315	23,767½
Cargo carried ...	Up ...	Tons.	1,129	887	520	2,536
	Down ...	„	1,249	829	889	2,967

The falling off in the passenger traffic was considerable, so much so that on the Buxar Canal the Company had to discontinue the service from January 1901.

On a representation of the Company that the returns from the Patna and Arrah Canals were not sufficiently renumerative, a concession in the matter of tollage was made to them.

68. The receipts and expenditure of the last three years are given below:—

TABLE XVII(*b*).—MILLS.

Total ...	32,782	37,983	38,027	40,006	46,296	41,444

A lease for a term of three years at Rs. 1,200 per anuum having been granted for the Nasriganj turbine in 1900-1901, the receipts under water-power have increased during the last two years. There has also been a satisfactory increase in the rents obtained from canal lands.

71 TABLE XX.—MAXIMUM FLOODS OF THE YEAR.

NAME OF RIVER.	Locality.	1899-1900. Date.	1899-1900. Reading.	1900-1901. Date.	1900-1901. Reading.
1	2	3	4	5	6
			R. L.		R. L.
Sone	Dehri ... Above weir	8th July 1899	335·90	27th September 1900 ...	339·30
	Dehri ... Below "	8th ditto	332·30	27th ditto ...	338·30
	Barun ... Above "	8th ditto	336·25	27th ditto ...	340·50
	Barun ... Below "	8th ditto	333·20	27th ditto ...	338·40
Ganges	Buxar	26th July 1899... ...	197·47	7th September 1900 ...	198·97
	Digah	28th ditto	166·63	8th ditto ...	166·53

The R. L. of the crest of the Sone weir is 334·00 and the floors of the under-sluices and head-sluices 326·00.

The floods of the year 1899-1900 were very low, owing to the scant rainfall in the Sone basin. They were on a par with those of 1880, though not so low as those of 1883. The Superintending Engineer writes:—

"The floods in the Sone in 1900-1901 were more continuous and of longer duration than in the preceding three or four years. The first flood occurred on the 15th June.* * * The next high flood was not until the 14th July.* *

"In 1901-1902 the advent of the first of the Sone floods occurred rather late. It was not until the 12th July that 30 of the under-sluice shutters fell. * * This flood lasted but 6 days. The succeeding floods occurred on the 25th July, 16th and 24th August, the latter continuing up to 13th September, the maximum level, R. L. 341·40, on the Dehri gauge being reached on the 4th September. This is the highest recorded flood since 7th July 1876, when the Dehri gauge registered 342·10. * * * The only damage done to the Head-works by this extraordinary high flood was a small pooling below the centre sluices of the weir, and the packing in front being displaced and thrown on the apron. In its course lower down the flood breached the Koelwar Distributary and the Arrah Canal in the 56th and 57th miles on the left bank of the river. On the right bank the Patna Canal, 41st mile, was cut by villagers to drain off impounded water, and the Manair Distributary breached between 20th mile and end on the right bank. The level reached by the flood at Lock XI of the Arrah Canal, viz., R. L. 192·60, was 1·16 feet higher than the previously recorded maximum, which occurred in 1888. The River Gauges at Buxar rose higher in this year than in the two preceding years, but at this station did not exceed the maximum. At Digha, however, the flood of 5th September reached R. L. 169·83, which is the highest ever observed, the former maximum being R. L. 169·58 on 14th August 1879."

72 TABLE XXI.—MAINTENANCE AND REPAIRS.

HEADS.	AVERAGE OF TRIENNIAL PERIOD, ENDING— March 1895.	AVERAGE OF TRIENNIAL PERIOD, ENDING— March 1899.	PERIOD UNDER REVIEW. 1899-1900.	PERIOD UNDER REVIEW. 1900-1901.	PERIOD UNDER REVIEW. 1901-1902.	Average of triennial period ending March 1902.

Total ...	2,19,002	1,64,844	1,61,677	1,74,906	1,60,726	1,65,769

The expenditure under "Extensions and Improvements" was principally incurred in constructing regulators in distributaries; also a large number of permanent outlets, and several bridges, syphons and culverts connected with village channels.

The great reduction shown during the triennial periods ending March 1899 and 1902 over the triennial period ending March 1896 is due to the introduction of the flushing system.

The Superintending Engineer writes—

"The increases in the quantities cleared by hand in 1900-1901 were due to the silt removed during the closures of the Eastern Main series, portion of the Western Main Canal; below regulator in 6th mile and the Buxar Canal. Silt was excavated in the Eastern Main at the head-lock channel which silts very heavily, also at the bifurcation of the Patna Canal; in the Patna Canal above and below the locks; in the Western Main Canal in miles 13th to 15th below the off-take of the Buxar Canal, in the Buxar Canal above and below locks and Nokha Dock; in the distributaries of the Arrah and Buxar Divisions, where found necessary. These hand clearances, however, caused a reduction in the quantities dredged in these canals. Dredging, however, is necessary at bifurcation of canals and lock channels, which silt up in the flood season, to keep them open for navigation. In the 53rd and 54th miles of the Arrah Canal, where the high banks have a tendency to slip in, dredging had to be resorted to by working the English dredgers with shoots on to the bank, in the first 2 years of the period under review. As the level of the river Sone was able to be maintained at a sufficient height for the very small amount of traffic that now crosses it, less dredging has annually been necessary."

The Capital cost of the dredging plant now on the Sone canals is given below:—

TABLE XXIII (a)—DREDGERS.

	Two English dredgers.	Two old Bruce's dredgers.	Nine Fouracre's dredgers.	Two new Bruce's dredgers.*	Mud-punts.	Total.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Capital cost to end of 1900-1901.	1,21,205	33,027	80,176	547	2,70,863	5,05,818
Ditto during 1901-1902.	Nil	Nil	Nil	Nil	Nil	Nil
Total ...	1,21,205	33,027	80,176	547	2,70,863	5,05,818

* These two dredgers have been transferred to the South Western Circle.

With the exception of two English dredgers and one Bruce's dredger all the plant is necessary. The expenditure on repairs to dredgers is shown below:—

Dredgers.	Average for the triennial period ending 1898-1899.	1899-1900.	1900-1901.	1901-1902.	Average for the triennial period ending 1901-1902.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs,
9 Fouracre's dredgers	1 917	3,782	353	2,319	2,150
2 Bruce's dredgers ..	115	109	13	...	43
2 English ditto ..	173	538	2,475	...	1,003
53 Mud punts ...	660	294	827	1,453	858
1 Hopper barge ...	...	...	...	...	...
Total ...	2,865	4,723	3,668	3,772	4,054

The gross cost of dredging work done on the Sone canals, exclusive of hand clearances, is given below. The figures do not include provision for depreciation of the plant :—

Period.	Gross quantity dredged in all divisions.	Cost of "lifting" and "dredging."	Repairs to dredging plant.	Total cash expenditure.	Interest on capital cost of plant.	Grand Total.
1	2	3	4	5	6	7
	Cubic Ft.	Rs.	Rs.	Rs.	Rs.	Rs.
Year 1899-1900	3,626,306	13,442	4,723	18,165	20,232	38,397
Year 1900-1901	1,794,522	8,891	3,668	12,559	20,232	32,791
Year 1901-1902	1,096,313	5,340	3,772	9,112	20,232	29,344
Average of three years ending 31st March 1902.	3,172,380	9,224	4,054	13,278	20,232	33,510
Average of three years ending 31st March 1899.	3,717,694	10,684	2,865	13,549	21,812	35,391
Average of three years ending 31st March 1896.	8,832,911	39,958	10,181	50,140	22,469	72,609

74. The following figures give the cost of weed-clearing for the last three triennial periods:—

TABLE XXIII (b)—WEED-CLEARING.

Division.	Average of three years ending 1895-96.	Average of three years ending 1898-99.	1899-1900.	1900-1901.	1901-1902.	Average of three years ending 1901-1902.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Eastern Sone ...	196	1	...	...	...	...
Arrah ...	792	63	14	36	6	19
Dehri Workshop	1,892	468	82	26	12	40
Buxar ...	479	342	...	29	...	10
Total ...	3,359	874	96	91	18	69

The reduction in the cost of weed clearing is thus explained by Superintending Engineer :—

"The expenditure incurred was only for clearing silt where the discharge observations are taken in the Main Western and Arrah Canals. The system of running larger discharges than what are actually necessary during the cold season and increasing the surface slope, and also taking advantage of any small flood that may occur in the river in January or February to let in a good supply of muddy water, has been most effective in keeping down the weeds."

MINOR WORKS AND NAVIGATION.

CALCUTTA AND EASTERN CANALS.

75.

1.—CAPITAL ACCOUNT.

Heads of Account.	Outlay to end of March 1899.	Outlay during— 1899-1900.	1900-1901.	1901-1902.	Outlay to end of March 1902.

Less—Receipts on capital account ...	54,467	...	...	...	54,467
Total direct charges ...	63,69,011	23,503	1,66,770	1,44,766	67,04,050
Indirect charges ...	92,241	595	4,305	3,418	1,00,559
Total outlay, direct and indirect ...	64,61,252	24,098	1,71,075	1,48,184	68,04,609

The expenditure incurred during the year 1899-1900 was mainly for completing the works in connection with the canalization of the Bhangore khal. The outlay on the project up to the end of 1899-1900 amounted to Rs. 8,76,857 for works only. In order to provide a shorter and easier route for steamers during the rainy season, certain improvements of the Madaripur Bhil route between the rivers Kumar and Madhumati from Khulna to Madaripur in the district of Faridpur were undertaken during the latter end of the year 1899-1900. The expenditure during the years 1900-1 01 and 1901-1902 was solely incurred on the improvement of the Madaripur Bhil route. Three estimates for the project have been sanctioned. The first amounting to Rs. 1,90,602 was for a channel about 22 miles in length to connect the Kumar and Madhumati rivers. This has shortened the distance between Khulna and Madaripur by 89 miles. The second is for widening the route. It amounts to Rs. 1,01,491. The third amounting to Rs. 2,25,000 is for deepening the route by two feet throughout. The works in connection with the second and third estimates, which were sanctioned in the latter part of the year 1901-1902 for the purpose of allowing steamers and flats drawing 6 feet of water to use the route during the jute season only between August and September, are in progress. The question of still further improving the channel so as to make it navigable throughout the year is under consideration.

76.

2.—LENGTHS OF CHANNELS.

Description of Channel.	Length of Channel in miles. At end of March 1899.	Increase or decrease during— 1899-1900.	1900-1901.	1901-1902	Total at end of March 1902.
1	2	3	4	5	6
	Miles.		Miles.		Miles.
Navigable canals (and river channels).	737	...	— 2	...	735

The canals being navigable, there are no branch canals, distributaries, village channels, outlets and drainage channels.

The decrease of two miles in length is due to straightening the Bhil route between Tetulia and Julirpar.

17	Percentage of net revenue on capital outlay.	2·78	2·99	2·92	2·41	1·77	2·35

Items 18, 19, 20 and 21 have been omitted, as the canals are for navigation only.

There was a gradual decrease in the navigation receipts during the two years 1900-1901 and 1901-1902. This was partly due to the fact that the rice crop in the Eastern Districts was below the average. The working expenses during the triennial period were practically normal. Owing to the decrease in the receipts the net revenue during the year 1901-1902 was Rs. 40,000 less than that of the previous year.

* Twenty-two miles from the year 1900-1901.

The bulk of the expenditure on maintenance and repairs was incurred in the Circular and new cut canals and Eastern Canals, the most important item being dredging. Other items, of repairs such as tow-path, rustic bridges, locks, sluices, channels, banks and buildings, were of an ordinary nature. In 1900-1901 a sum of Rs. 19,000 was expended on the re-building of the east abutment of the Tollygunge bridge over Tolly's Nala.

Owing to the canalization of the Bhangore khal the expenditure on silt clearance by hand has been greatly reduced.

The expenditure on silt clearance by dredging during the triennial period under review was normal. Constant dredging was necessary in the Circular Canal at Chitpur and in the Lake Channel below Dhappa to keep them open for traffic.

The expenditure on dredging shows a tendency to increase. This is due to the deterioration of the channel below the Dhappa lock which necessitate periodical dredging in order to keep it clear for boat traffic.

ORISSA COAST CANAL.

85. TABLE II.—LENGTHS OF CHANNELS.

DESCRIPTION OF CHANNEL.	LENGTH OF CHANNEL IN MILES.				
	At end of March 1899.	Increase or decrease during—			At end of March 1902.
		1899-1900.	1900-1901.	1901-1902.	
1	2	3	4	5	6
Navigable canal ...	102½	...	...	27¼	129¾

There are no branch canals, distributaries, village channels, outlets and drainage channels.

The increase of 27¼ miles in the length of the canal shown in the year 1901-1902 is due to the inclusion of four miles of the Russulpur river, 6½ miles of the canalised Sarpai river, and 16¾ miles of the Baliaghai drain, which were left out in the previous years.

FOOT NOTE.—The canal being a navigable one, items 18, 19, 20 and 21 have been left blank.

The navigation receipts for 1901-1902 were the lowest since the Canal was opened. This great falling off is almost entirely due to the opening of the Bengal-Nagpur Railway to which most of the rice and other goods traffic which hitherto were transported by country boats have been diverted. The working expenses, however, were much reduced during the last two years, and it is hoped that in normal years they may be still further reduced.

87. TABLE XVII.—NAVIGATION.

		Average of triennial period ending—		Period under review.			Average of triennial period ending March 1902.
		March 1896.	March 1899.	18 9-1900.	1900-1901.	1901-1902.	
1		2	3	4	5	6	7
Number of miles open	Miles	102½	102½	102½	102½	129¾	111 7/12
Toll collections ...	Rs.	81,444	80,075	45,861	48.349	44,296	46,359

There was considerable falling off in all items of traffic during the triennial period under review. As already explained, the main cause of the decrease may be attributed to the diversion of nearly the whole of the canal traffic to the railway, and the withdrawal by the Steamer Companies of their steamers since February 1900.

* These items of expenditure are for repairs to the dredging plant, which worked both in the Orissa Coast and Hijili Tidal Canals.

The Balliaghye branch drain in Range III of the canal having silted up badly was closed for silt-clearance from Chowmuk to Balliaghye from the 15th February to the 16th June 1900. The main drain was also silt-cleared in 1901-1902.

Most of the dredging was done in Ranges III, IVB and V of the canal and in the Balliaghye drain and the Surpai cross bund.

The average cost of removing silt during the triennial period under review was higher than that of the previous period. This was due to the frequent breaking down of some of the dredgers.

SARAN CANALS.

* Areas irrigated free of charge.

The canals were closed in January 1898 and they have practically remained closed during the triennial period. They were opened for a short time only during the *kharif* and *rabi* seasons of the years 1900-1901 and 1901-1902, owing to the great demand for water caused by the scanty rainfall in the district. The water was given free of charge at the request of the Collector and under the sanction of Government.

The receipts which are almost entirely from tolls on boats have been steadily decreasing. This is due to the deterioration of the river channels, which are gradually silting up. A scheme for making the Bhagirathi navigable for steamers throughout the year, by the employment of powerful suction dredgers, is being matured. The working expenses have been much reduced during the year 1901-02.

GAIGHATA AND BUXI KHAL.

109. The Gaighata and Buxi khal is 7½ miles in length. It was taken over by the Irrigation Department from the District Board, Howrah, on the 1st April 1894.

The financial results of the khal for the triennial period under review are given below :—

	Receipts *less* refunds.	Expenditure. (direct charges).	Net revenue.
	Rs.	Rs.	Rs.
1899-1900 ...	4,500	244	4,256
1900-1901 ...	4,500	127	4,373
1901-1902 ...	3,831	334	3,497
Average ...	4,277	235	4,042

The right of collecting tolls on the khal had been leased for five years commencing from the year 1896-97, at an annual rental of Rs. 4,500. The lease having expired at the close of the year 1900-1901, it was renewed on the some terms for another five years.

* Information beyond six years is not available.

The rainfall during the triennial period under review was considerably more than the average of the six years ending March 1899. The fall during 1901-1902 was however less than that of the two previous years and the average of the three years ending March 1902.

113. TABLE V.—AREAS IRRIGATED.

YEAR.	Kharif.	Rabi.	Perennial.	Total.	RAINFALL.		
					Kharif season.	Rabi. season.	Year.
1	2	3	4	5	6	7	8
	Acres.	Acres.	Acres.	Acres.	Inches.	Inches.	Inches.
1893-94 ...	11,601	138	...	11,739	34·06	0·69	65·72
1894-95 ...	20,370	20	...	20,390	30·65	2·53	45·25

Triennial average ...	23,901	1,278	...	25,179	35·02	1·01	55·97
1899-1900 ...	26,730	821	...	27,551	48·51	1·33	74·38
1900-1901 ...	26,625	164	...	26,789	43·29	3·65	63·89
1901-1902 ...	27,924	217	...	28,141	35·07	2·64	54·48
Triennial average ...	27,093	401	...	27,494	42·30	2·54	64·25

There was a slight increase in the area irrigated during the year 1901-1902, compared with the two previous years. The increase was partly due to the thorough silt clearance of Channel No. 1 at Jujuty, which facilitated the supply of water and partly to the failure of rain in October, when there was a great demand for water.

TABLE VI.—AREAS IRRIGATED BY LEASES.

GRAND TOTAL ...		22,783	25,179	27,551	26,789	28,141	27,494

The average area under long term leases during the triennial period under review was in excess of the average areas of the two previous triennial periods. There was one case of unauthorised *kharif* irrigation during the year 1901-1902 of 355 acres in the Hooghly district. The area was assessed at 8 annas per bigha.

TABLE VIII.—LONG-TERM LEASES.

Northern Drainage and Embankment Division.	9	20 13	27 22	9	14 17	22 25	8	18 29	29 23

The average outturn of rice on an acre of land which received the benefit of canal water was far better than the outturn of the land irrigated without canal water.

No experiments were made with *rabi* crops.

TABLE XII.—RELATIVE VALUE, IRRIGATED AND UNIRRIGATED CROPS

12	Outstanding balance (line 6—line 11.)	32,878	21,277	9,726	9,075	8,974	9,258
13	Percentage of collection (11) to net demand (6).	52	61	78	74	75	76
14	Number of certificates issued.	146	131	158	163	143	154

* This figure has been arrived at by deducting Rs. 902 on account of realization in excess of the actual assessments from 1892-93 to 1895-96.

There was a marked and steady improvement in the collection of water-rates, and a very satisfactory reduction in the outstanding balance. The average during the triennial period under review was Rs. 9,258 only compared with the averages Rs. 32,878 and Rs. 21,277 of the two preceding triennial periods ending March 1896 and 1899.

In the remissions granted during the triennial period there was considerable decrease. This was due to more accurate assessments.

* The information previous to the year 1897-98 is not available.
† Included in Rabi.

The area irrigated during the year 1901-1902 was much in excess of that of the two previous years. The average of the triennial period under review was, however, less than that of the two previous periods.

No charge is made for irrigation effected from the canal.

128. TABLE XVIII.—MISCELLANEOUS REVENUE.

There was an increase in the number of trees during the year 1901-1902 compared with the previous year 1900-1901, but it was less than that of the year 1899-1900. The receipts during the triennial period was Rs. 7 only, while the expenditure was Rs. 176, or Rs. 169 in excess.

130. TABLE XX.—MAXIMUM FLOODS OF THE YEAR.

GENERAL RESULTS.

NET REVENUE.

132. The net results of the triennial period ending March 1902, compared with those of the two previous periods, are shown below:—

PARTICULARS.	Receipts from all sources.	Working expenses, including refunds of revenue (direct and indirect charges).	Profit or Loss.
1	2	3	4
MAJOR IRRIGATION WORKS.	Rs.	Rs.	Rs.
(In operation).

MINOR WORKS AND NAVIGATION.			
(In operation).			
(1) Works for which Capital and Revenue accounts are kept—			
Average of three years ending March 1896 ...	5,27,208	3,79,501	+1,47,707
Ditto ditto 1899 ...	5,11,388	3,25,937	+1,85,451
Ditto ditto 1902 ...	4,73,752	3,37,457	+1,36,295
(2) Works for which only Revenue accounts are kept—			
Average of three years ending March 1896 ..	1,46,333	1,58,562	(−)12,229
Ditto ditto 1899 ...	95,154	1,13,634	(−)18,480
Ditto ditto 1902 ...	1,03,685	1,17,735	(−)14,050
(3) Works for which neither Capital nor Revenue accounts are kept.—(Direct charges only).			
Average of three years ending March 1896 ...	32,746	60,059	(−)27,313
Ditto ditto 1899 ...	34,230	79,288	(−)45,058
Ditto ditto 1902 ...	27,873	44,125	(−)16,252

COLLECTION OF WATER-RATES.

133. The work done in the recovery of water-rates is shown in the following statement:—

CANALS.	Average outstanding for the triennial period ending March 1899.	Average of the demand for the triennial period ending March 1902.	Average of the amount collected or adjusted for the period ending March 1902.	Average of the outstanding balance for the period ending March 1902.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Orissa	1,753	2,66,706	2,64,659	2,047
Midnapore... ...	6,891	1,24,577	1,24,067	510
Sone	3,637	10,26,737	10,26,543	194
Total ...	12,281	14,18,020	14,15,269	2,751

The small outstanding balance is highly satisfactory, and is an index not only of the excellent administration of the collecting establishment, but also of the accuracy of the assessments made by the Canal officers.

VALUE OF CROPS.

134. In the following table a comparison is made between the approximate value of crops irrigated by Major Irrigation Works during the periods ending March 1899 and 1902:—

CANALS.	AVERAGE OF THE TRIENNIAL PERIOD ENDING MARCH 1899		AVERAGE OF THE TRIENNIAL PERIOD ENDING MARCH 1902.	
	Area irrigated.	Value of crops.	Area irrigated.	Value of crops.
1	2	3	4	5
	Acres.	Rs.	Acres.	Rs.
Orissa	191,832	69,80,823	261,955	73,53,218
Midnapore	71,322	21,55,766	78,190	26,87,189
Sone	476,466	1,88,99,653	481,333	1,72,81,756
Total ...	739,620	2,83,36,242	761,478	2,73,22,163

The average value per acre of the various crops irrigated has decreased from Rs. 38·31 to Rs. 35·88.

135. The results of the working of the canals in Bengal for the period under review may be considered as fairly satisfactory.

ORISSA CANALS.

The average area irrigated from the Orissa Canals during the period under review was slightly in excess of that irrigated during the preceding period; but there was a general decrease in the receipts. The average collections were Rs. 3,98,995, against Rs. 4,96,788, thereby showing a falling off of Rs. 97,793. The reduction was mostly under navigation, owing to the opening of the Bengal-Nagpur Railway and the abolition of the Government transport service. It is, however, satisfactory to note that the working expenses were reduced from Rs. 5,10,292 to Rs. 4,51,297. The floods in the rivers were of ordinary character, and, as a result, very little damage was done to the canals.

MIDNAPORE CANAL.

The average net revenue from this canal was Rs. 17,465 in excess of that earned during the previous triennial period. This was due to the fact that the average working expenses were reduced by Rs. 40,670, owing in a great measure to the cessation of the Steamer Service, which rendered dredging in the entrance channels to the locks and revetting of the canal banks almost unnecessary.

HIJILI TIDAL CANAL.

There was a marked decrease in the navigation receipts from this canal. This was mainly due to the opening of the Bengal-Nagpur Railway, which diverted most of the traffic.

SONE CANALS.

The area irrigated during the year 1901-1902 was the highest on record, and the average for the period under review exceeded that for the preceding period by 4,867 acres. The average receipts from water-rates increased from Rs. 10,09,662 to Rs. 10,26,459, but the navigation receipts decreased from Rs. 87,999 to Rs. 48,833. There was no appreciable improvement in the working expenses.

The most disappointing feature in the working of these canals during the past three years is the very marked decrease of navigation receipts, due to the opening of the Bengal-Nagpur and the Mogal Sarai-Gaya Railways. This is clearly shown in the following statement:—

CANAL.	Average of triennial period ending—		Period under review.			Average of triennial period ending March 1902.
	March 1896.	March 1899.	1899-1900.	1900-1901.	1901-1902.	
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Orissa Canals ...	1,4[illegible],497	1,9[illegible],676	1,47,689	90,485	78,153	1,05,442
Midnapore Canal ...	1,[illegible]1,168	1,30,044	89,789	97,730	89,8[illegible]5	92,451
Hijili Tidal Canal ...	58,658	84,675	51,796	45,47[illegible]	45,[illegible]09	47,725
Sone Canals ...	6[illegible],061	87,999	86,396	36,507	23,595	48,832
Total ...	3,92,684	4,96,394	......	......	......	2,94,450

CALCUTTA AND EASTERN CANALS.

The most important work in progress is the improvement of the Madaripur Bhil route, which was taken up during the latter end of the year 1899-1900. There was a gradual decrease in the navigation receipts during the years 1900-1901 and 1901-1902, due partly to the general depression in trade and partly to the fact that the crops in the Eastern districts were below the average.

SARAN CANALS.

The Saran canals practically remained closed during the period under review, except for two short intervals during the years 1900-1901 and 1901-1902, when they were opened for the irrigation of the *kharif* and *rabi* crops, and water was given free of charge.

ORISSA COAST CANAL.

As in the case of the other navigable canals in Bengal, there was a considerable decrease in the navigation receipts of this canal, due mainly to the opening and competition of the Bengal-Nagpur Railway.

NADIA RIVERS.

The receipts have been steadily decreasing owing to the deterioration of the rivers, which are gradually silting up.

MADHUBAN CANAL.

There is nothing of importance to note under this canal.

EDEN CANAL.

There was a slight increase in the collection of water-rates and in the area irrigated. The average amount of expenditure during the period under review was Rs. 38,256, against Rs. 71,624 during the previous period. This was simply due to the fact that there was no expenditure on original works during the last three years.

DATE FOR SUBMISSION OF REPORTS.

136. The date fixed for the submission of the triennial Revenue reports to the office of the Chief Engineer was the 5th September 1902. The dates when the different reports were received are shown below:—

Orissa Circle ...	Superintending Engineer's Report.	5th	September 1902.
South-Western Circle	Ditto	29th	ditto.
Sone Circle ...	Ditto	8th	ditto.
Gandak Circle ...	Ditto	8th	ditto.

All were punctually submitted, except the report of the South-Western Circle.

CALCUTTA:

The 29th November 1902.

D. B. HORN,

Chief Engineer, Bengal.

FINAL FORECAST OF THE INDIGO CROP OF BENGAL, 1902.

THE following Note is published for general information.

W. C. MACPHERSON,
Offg. Secy. to the Govt. of Bengal.

The 16th December 1902.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Final Forecast of the Indigo Crop of Bengal, 1902.

Character of the season.—In forecasting the indigo crop, it is only necessary to consider the character of the season in the districts of Saran, Champaran, Muzaffarpur, Darbhanga, Monghyr, Bhagalpur, Purnea, Nadia and Murshidabad, which are the chief indigo-growing districts in the Province. The previous monsoon terminated very early and the winter rains failed; there was consequently serious lack of moisture in the early part of the season. There was practically no rain in February, but in March there was good rain everywhere. In Bihar, however, there were hailstorms and rain at the time of germination which rendered extensive re-sowing necessary. The rainfall in April was copious and general, except in Muzaffarpur and Darbhanga where it was slightly deficient. In May also there was good rain, except in Muzaffarpur and Monghyr, though the crop in the Bengal districts suffered to some extent from storms and heavy rain. In the following month the fall was deficient throughout the indigo area, especially in Saran, Champaran and Murshidabad. In July there was good rain almost throughout the indigo area, and in August also the fall, though slightly below the normal in many of the important indigo districts, was not insufficient for the requirements of this crop. The fall in September was general and very heavy, and indigo suffered from water-logging in Bengal, and from floods in Darbhanga and Muzaffarpur. October was unusually dry. The outturn is likely to be one of the worst on record.

Area sown.—The normal area at present under indigo in these Provinces is, according to the latest estimates made by District Officers, 412,400 acres, but this figure is too high, sufficient account not having been taken of the contraction of area under this crop, which has occurred during recent years. The area actually cultivated with indigo this year

is estimated at 253,500 acres against 311,200 acres sown last year. The decrease is due to the present unfavourable prospects of the industry, owing to competition with synthetic indigo in the markets of Europe.

Character of the crop.—From Appendix I appended to this note, it will be seen that, except in Malda, District Officers everywhere expect an outturn below the normal. For the five districts of North Bihar, the outturn is estimated at 47 per cent. of a normal crop, while that for the remaining districts is estimated at 56 per cent. Of the nine important indigo districts enumerated above, the crop in four (Saran 32 per cent., Muzaffarpur 24 per cent. Nadia 25 per cent. and Murshidabad 12 per cent.) has been almost a complete failure. The outturn in Purnea, Monghyr and Bhagalpur varies between 70 and 76 per cent., while Darbhanga and Champaran forecast an outturn of 63 and 54 per cent., respectively. Since the issue of the preliminary forecast, the prospects of the crop have improved in three districts (Bhagalpur, Champaran and Monghyr), deteriorated in six (Nadia, Murshidabad, Purnea, Cuttack, Saran and Muzaffarpur), and are unchanged in ten. According to the estimates of the District Officers, the outturn for the Province as a whole will amount to 49 per cent. of an average crop. In my first forecast I anticipated a 50 per cent. crop for the whole Province, and I do not see any reason to change that estimate.

Gross outturn.—Assuming that the normal yield of indigo per acre in the nine Bihar districts is 20 lbs., and that of the Bengal districts 12 lbs., the total yield of indigo in the North Bihar districts, according to the district returns, will amount to 24,905 factory maunds, against 48,759 factory maunds of the past year, and that in the remaining area to 7,472 factory maunds as compared with 13,972 factory maunds of the preceding year. A factory maund is equal to about 75lbs.

Messrs. Moran & Co., however, estimate the outturn of the North Bihar districts at 26,000 factory maunds which very closely approximates the above estimate of the district officers, and this estimate may be accepted. Messrs. Moran & Co.'s estimate for the remaining area is only four to five thousand maunds, but from this figure several districts in which indigo is grown on a small scale are omitted. I estimate the yield for Bengal at 7,500 factory maunds.

C. G. H. ALLEN,

Offg. Director of the Department of Land Records and Agriculture, Bengal.

CALCUTTA,

The 13th December 1902.

Final Report on the Indigo Crop of Bengal, 1902.

Division.	District.	Total area of district in acres.	Total area estimated to be under cultivation in acres.	Approximate normal area under indigo in acres.	Approximate area sown last year (1901) in acres.	Estimated area sown this year (1902) in acres.	Taking 100 to represent the normal outturn, how much represented outturn last year (1901)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1902)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9	10	11
Burdwan ...	Burdwan	1,726,080	1,384,200	6,100	1,900	1,700	68	65	......	
	Bankura	1,677,440	642,800	300	100	100	90	90	The area and outturn are the same as were shown in the preliminary forecast.	
	Midnapore ...	3,319,040	2,190,600	3,000	1,900	1,200	49	60	The increase in the area in column 7 as compared with the preliminary forecast is due to the addition of figures since supplied by a zamindar. It is subject to further revision.	
Presidency ...	Nadia	1,787,520	630,500	16,600	12,500	8,900	77	25	The decrease in the area sown this year as compared with that shown in the preliminary forecast is due to the submission of revised figures after enquiry by the Subdivisional Officer of Kushtia.	
	Murshidabad ...	1,373,440	985,500	25,000	11,300	8,800	96	12	The decrease in the outturn is due to insufficient rainfall. Indigo industry is declining considerably.	The normal area should be revised.

Division.	District.	Total area of district in acres.	Total area estimated to be under cultivation in acres.	Approximate normal area under indigo in acres.	Approximate area sown last year (1901) in acres.	Estimated area sown this year (1902) in acres.	Taking 100 to represent the normal outturn, how much represented outturn last year (1901)?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1902)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9	10	11
Presidency—*concld.*	Jessore ...	1,873,000	1,203,800	14,000	600	400	25	13	The decrease in area sown this year is owing to the closing of the Hazrapur indigo concern.	The normal area should be revised.
Rajshahi ...	Rangpur	2,235,520	1,602,700	6,600	5,000	4,100	50	50	The cultivation of this crop is gradually dying out.	
Patna ...	Gaya	3,015,680	2,207,500	190	100	100	50	75	The crop is sown to a nominal extent in this district.	
	Shahabad ...	2,798,730	1,941,800	7,700	2,100	1,600	58	77	The decrease in the area sown is due to the substitution of sugar and other more paying native crops.	Ditto, ditto.
	Saran	1,708,726	1,357,200	45,500	37,600	19,300	70	32	Insufficient rain has reduced the outturn of the crops.	Ditto, ditto.
	Champaran ...	2,252,640	1,447,630	96,000	84,000	84,000	89	54		
	Muzaffarpur ...	1,941,254	1,687,000	65,000	50,000	48,000	62	24	The figure in column 5 is the average of areas under indigo in 1899, 1900 and 1901.	
	Darbhanga ...	2,142,690	1,678,000	50,310	47,600	32,500	82	63	The decrease in column 7 is principally due to the closing of factories in the Madhubani subdivision.	Ditto, ditto.

Bhagalpur ...	Monghyr ...	2,509,440	1,582,800	15,000	14,000	12,600	78	75	The decrease in area sown this year is due to the fall in the price of natural indigo. The fall in the outturn is due to want of moisture and insufficient rainfall.	
	Bhagalpur ...	2,704,640	2,097,000	13,000	13,000	12,000	76	76	Drought in May and June accounts for the decrease in outturn.	
	Purnea	3,165,513	1,630,800	40,000	19,000	16,000	110	70	The decrease is due to unfavourable season.	The normal area should be revised.
	Malda	1,215,000	672,800	5,000	8,000	2,000	94	100	......	Ditto, ditto.
	Sonthal Parganas	3,500,160	1,545,300	3,000	2,500	2,000	66	81	Certain factories at Dumka stopped working, hence the decrease in cultivation. The outturn at Rajmahal is very poor owing to the absence of seasonable rainfall.	
Orissa ...	Cuttack	2,003,149	1,161,200	200	200	200	81	73	Excessive rain at the time of maturity reduced the outturn.	
	North Bihar ...	10,561,750	7,692,600	271,600	233,200	196,400	78	47	......	* As estimated by this Department.
	Bengal ...	32,424,202	19,705,500	140,600	78,000	57,100	84	36		
	Total ...	42,986,652	27,398,100	412,400	311,200	253,500	79	50*

PROGRESS OF EDUCATION IN BENGAL FROM THE YEAR 1897-98 TO 1901-1902.

GENERAL DEPARTMENT—EDUCATION.

Calcutta, the 17th December 1902.

RESOLUTION—No. 3875.

READ—

The Review of Education in Bengal from the year 1897-98 to 1901-1902 with which is incorporated the Annual Report for 1901-1902.

THE Report covers the period of five years from 1897-98 to 1901-1902 and follows the lines of the Third Quinquennial Review of Education in India written by Mr. J. S. Cotton in 1898.

It is submitted by Mr. A. Pedler, F.R.S., C.I.E., Director of Public Instruction, who was in charge of the Department for seven months of the year 1901-02, his place being filled, during two periods of deputation to the Educational Conference at Simla and to the University Commission, by Mr. J. S. Slater. The Report was due to Government on the 1st October, but a complete copy did not reach the Secretariat till the 10th November, the delay being due partly to unusual pressure of work in the Press and partly to unpunctual submission of the Report of the Inspector of European Schools.

2. The most prominent features in the history of education in Bengal during the quinquennium, as depicted in this Report, are the falling off in the number of primary schools and pupils; the development of secondary education; the lamentably small progress made in female education; the continued backwardness of the Muhammadan population as compared with the Hindus; the increasing literacy among converts to Christianity; the revision of the system of vernacular education which was sanctioned in this Government's Resolution of the 1st January 1901; the development of the scheme of training schools with the establishment of the Kurseong Victoria School; the development, especially in Calcutta, of the system of hostels or boarding-houses for students, and the re-examination from the bottom of principles and methods of education which was initiated with the Education Conference held at Simla in 1901 and with the labours of the University Commission which began in 1902. Some of these matters will be noticed in this Resolution.

General statistics of institutions and pupils: primary and secondary education.

3. The decrease in the number of primary schools and pupils, which greatly outnumbers the increase obtained in the secondary schools, has been more or less continuous since the year 1896 97. There is a decrease in the number of schools, though not in the number of pupils, reported in 1892-93. This decrease has been the subject of enquiry under the orders of Government. The Director considers that the loss is nominal rather than real, and that it is due for the most part to elimination of weak and ephemeral schools from the returns; but he also thinks that there has been some real decrease of schools and pupils in recent years, owing to financial pressure and in localities to agricultural distress. These conclusions appear to be correct. It is not credible that there has really been a decrease in the number of children under instruction in Bengal in recent years, and the census figures show that in 1901 among persons over 15 years of age, there were 146 literate males per thousand against 137 in 1891. It was the special wish of the late Sir John Woodburn that earnest attempts should be made to increase the number of primary schools in the villages and to give them stability, and with this object, when allotting to the District Boards, to be expended on primary education, the sum of four lakhs out of the grant of ten lakhs placed at his disposal by the Government of India at the beginning of this year, he insisted that the Boards should devote a portion of the funds placed at their disposal to increasing the number of *pathsalas* as well as to improving the pay of the teachers in the existing schools.

While the primary schools have decreased in number during the last ten years, the large increase in the number of secondary schools and pupils, the conversion of many middle vernacular schools into middle English schools, and the increase in the number of boys learning English, indicate, as the Director remarks, an increasing desire among the people for higher standards of education. It is to be regretted that the Director finds that the standard of teaching in high schools is not so good as formerly; and it is to be hoped that the reforms consequent on the introduction of the new scheme of vernacular education and on the enquiries of the University Commission will lead to improvements in such schools.

The scheme of improved vernacular education for Bengal.

4. The system of education followed in vernacular schools and in the lower classes of English secondary schools was remodelled during the quinquennium in accordance with proposals submitted by a Committee of officers of the Education Department over which the Director, Mr. Pedler, presided; these proposals were approved in Government Resolution No. 1, dated 1st January 1901. In the words of the late Lieutenant-Governor, the changes introduced "aim at developing the minds of the boys more than practising and strengthening their memories." The new system is based on Kindergarten principles and on the policy of teaching by object-lessons, which is an extension of the Kindergarten principle. In connection with this scheme, the vernacular text-books in use in schools have been entirely revised.

Another important feature of the scheme is that Indian boys will in future not be allowed to commence to learn English before they are well grounded in their own vernacular. It has accordingly been decided that the child's mother-tongue shall be the medium of instruction up to Class V of high schools, which corresponds to Class I of middle schools and to Standard VI of the new scheme, and which is ordinarily reached when the child is about 13 years of age. The study of English as a subject is allowed and provided for from Standard III upwards, *i.e.*, in Class VIIB of high schools, and in Class IV of middle schools; this is the standard above the lower primary classes, and is reached by the average boy at ten years of age.

Female education.

5. Comparing the figures of the past ten years with those of the period under review, the Director finds that the total number of girls under instruction has increased by 13 per cent.; but this increase was gained in the first five years, and there has actually been a decrease in the number of girls returned as under instruction in the last five years, which is no doubt connected with the disappearance from the returns of the weak and ephemeral primary schools. According to the last census, the total number of females in Bengal was 39,215,224. Out of this number, the number of literate females was 7 per thousand against 4 only in 1891. The progress in female education in this Province has therefore been slow, though in Calcutta there has been marked advance. The Director gives in paragraph 4 of his report the reasons stated below as accounting for this slow progress:—

"The chief causes for the slow progress of female education in this country are—(1) conservatism of a great portion of the people; (2) the fact that the education of their female children is a matter of great indifference to a large proportion of parents and guardians, as they usually do not take the same amount of care and interest in the education of their female wards as they do in that of boys; (3) the system of early marriage, which presents an almost insurmountable barrier to education beyond the Primary stages; (4) the want of educated female teachers; (5) the want of a system for educating zenana ladies; (6) the want of adequate State aid and aid from the other Public Funds."

The late Lieutenant-Governor of Bengal had the cause of female education much at heart. Considerable increase of public expenditure has been sanctioned and will be devoted to schools for girls and on Inspectresses of Schools; and the training of female teachers is being encouraged.

Muhammadan education.

6. There was a slight increase in the number of Muhammadan pupils in colleges and secondary schools and madrasas, but the decrease in the number of Muhammadan boys returned as reading in primary schools was much larger. This decrease is no doubt due to the elimination of weak schools from the general

returns which has been above noticed; but the backwardness of the Muhammadan population in availing themselves of education continues in spite of special encouragements held out to Muhammadan students by way of scholarships and special facilities offered to them for entrance into the public service, and until this backwardness is overcome it must continue to be a matter of solicitude to the Government and to the leaders of the Muhammadan community.

Secondary education and University education.

7. During the ten years ending with March 1902, the advance in the number of students in secondary schools and in colleges has been marked. The students in secondary schools increased from 197,285 to 244,992, while those in colleges numbered 10,463 in 1900-1901 as compared with 6,287 ten years previously. The current edition of the "Statesman's Year Book" gives the number of male students at the various universities and colleges in the United Kingdom as 32,278. Thus Bengal, with nearly twice the population of the United Kingdom, has only one-third of the number of male university students. A comparison of the respective numbers of female students reading in colleges who number only 77 in Bengal with the numbers of such students in the United Kingdom would indicate far greater backwardness.

There was a net increase during the quinquennium of six unaided colleges and a large increase in the number of students in Arts Colleges, especially in the Law classes. The number of candidates at all the University examinations increased. The number of candidates at the F. A. examination in ten years has exceeded the number who matriculated during the same period, the explanation being that many candidates appear more than once at this examination. The percentage of success at the Entrance and F. A. examinations fell off slightly during the quinquennium. The average of success at the B. A. examination has been lower during the last five years than in the preceding five years, and at the M. A. examination the percentage of passes has remained almost unchanged, owing, it is said, to a practical uniformity in the standard.

Technical education.

8. Technical education is imparted in the Civil Engineering College, Sibpur, the Bihar School of Engineering, the Survey Schools at Dacca and Cuttack, and also in schools affiliated to the Civil Engineering College at Sibpur. There was a decrease during the quinquennium in the total number of pupils reading in the Survey Schools. The largest decrease took place in the Survey School at Dacca, owing, it is said, to the difficulty which the students experience in securing employment after passing the sub-overseer's examination. This matter will be separately considered in consultation with the Public Works Department of this Government. During the last quinquennium, the study of Science in Arts Colleges has advanced, and practical subjects of education have been introduced in high, middle, and primary schools. Drawing is now taught in almost all high schools, and Elementary Science subjects have been introduced in the curriculum of lower classes.

The Agricultural classes established in 1899 in the Civil Engineering College at Sibpur have been fairly successful. Ten out of twelve of the higher agricultural class and all the lower class students passed the examination last year; and all the successful students of the first class and the majority of those of the lower class have obtained appointments in the Government Service or under private gentlemen owning landed estates.

Expenditure.

9. The expenditure on public instruction from public funds has advanced from 36 lakhs in 1892-93 and 40 lakhs in 1896-97 to 43 lakhs in 1901-1902. This increase has practically been given entirely from Provincial revenues as the increased expenditure of recent years on education shown in the accounts of District Funds is due to larger grants being made from Provincial Funds in aid of District Boards and to the constitution of District Boards in the four districts of the Chota Nagpur Division, and not to development of the resources of District Boards. There has been no increase during the quinquennium of expenditure on education from Municipal funds. The increased expenditure of public funds in recent years has been mainly on account of secondary education and inspection, and it is only since an allotment has been made in the current year from Imperial Revenues that a substantial increase of expenditure on primary schools has been sanctioned.

Inspection.

10. There was an increase during the quinquennium in the number of Inspecting Officers of all classes. The number of Inspectors was raised from 6 to 9, excluding the Inspector of European Schools, and an Inspector of Schools is now provided for each Commissioner's Division. An increase of 64 Sub-Inspectors of Schools has recently been sanctioned with the object of reducing the number of primary schools to be inspected by each Sub-Inspector and the size of the Sub-Inspector's circles. This increase was rendered necessary by the orders which abolish the system of remuneration of teachers on the results of public examinations of their pupils and which substitute a system of remuneration with reference to results ascertained on inspections of the schools *in situ*.

The Inspecting Officers of higher grades performed their inspection duties during the year 1901-1902 to the Director's satisfaction. The Lieutenant-Governor hopes that, with the constitution of the new circles of Chota Nagpur and Chittagong, there will be fewer transfers of Inspectors next year.

All the Sub-Inspectors in the Burdwan Division, excepting those of Midnapore and Hooghly, and the Sub-Inspectors of Pabna, Darjeeling and Backergunge, failed to tour for the prescribed minimum of 200 days; the minimum number of 350 visits was not attained in the Sonthal Parganas, Midnapore, Rajshahi, Jalpaiguri and Darjeeling. These shortcomings should not be allowed to recur.

11. The Acting Lieutenant-Governor has much pleasure in acknowledging the services rendered by Mr. Pedler and during his absence by Mr. Slater as Director of the Department of Public Instruction.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

LIBERALITY OF NAWAB SALIMULLA BAHADUR OF DACCA.

No. 3546Medl., dated Calcutta, the 22nd December 1902.

From—H. C. WOODMAN, Esq., Under-Secy. to the Govt. of Bengal, Municipal Dept.,
To—The Commissioner of the Dacca Division.

I AM directed to acknowledge the receipt of your memorandum No. 1584G., dated the 8th December 1902, with which you forward a copy of a letter from the Superintendent of the Mitford Hospital, Dacca, reporting that Nawab Salimulla Bahadur has given a donation of Rs. 5,000 for the erection of a female ward in that institution to be called "Asmutonessa Female Ward."

2. In reply, I am to request that you will be so good as to convey to the donor the thanks of Government for his liberality. An extract from this letter will be published in the *Calcutta Gazette*.

DONATIONS AND ENDOWMENTS MADE BY PRIVATE INDIVIDUALS FOR PUBLIC PURPOSES AND WORKS OF PUBLIC UTILITY DURING THE YEAR 1901.

MUNICIPAL DEPARTMENT—MUNICIPAL.

Calcutta, the 23rd December 1902.

RESOLUTION—No. 3580M.

THE Acting Lieutenant-Governor has much pleasure in publishing, for general information, the accompanying statement of gifts that were made for public purposes during the year 1901. The sums contributed are shown against the names of the donors, and His Honour avails himself of this opportunity to express his thanks for the liberality and public spirit which have been displayed by them. The large amounts contributed for tanks in the Mymensingh, Rajshahi, Tippera, Dinajpur, Bhagalpur and Darbhanga districts are specially noticeable.

2. The following are the most important gifts of the year included in the statement:—

Rani Hemanta Kumari Debi of Puthia gave Rs. 30,000 for the construction of a boarding-house for college students at Rampur Boalia and also Rs. 7,000 for the excavation of three tanks in the district of Rajshahi: Kumar Rameswar Malia made a handsome donation of Rs. 20,000 for a Veterinary Dispensary at Howrah: Messrs. Burn and Co. of Howrah gave Rs. 22,000 for a culvert drain at Ramkrishnapur; and Babu Baijnath Goenka contributed Rs. 15,000 towards the drainage scheme of the town of Monghyr.

The late Nawab Sir Khwaja Ahsanullah Bahadur, K.C.I.E., made a donation of Rs. 15,000 for a hospital building at Patuakhali in the district of Backergunge: Maharani Sarat Sundari Barmani of Tajhat gave Rs. 12,000 for the construction of a female ward in connection with the new dispensary at Nawabganj in the town of Rangpur: Babu Jadab Lal Banerjee contributed Rs. 12,000 for a house for a High English School at Labpur in the district of Birbhum.

3. The Acting Lieutenant-Governor is also pleased to notice the following donations:—

Babu Ugar Mal Jawahir Mal and the Maharaja of Darbhanga gave Rs. 10,000 each for the construction of dharamsalas at Ram Chowk and Harahi in the district of Darbhanga. The late Mr. Walter Thompson of Beheea bequeathed Rs. 9,060 for the establishment and maintenance of a scholarship of Rs. 7-8 per mensem to be called the "Walter Thompson Female Scholarship" tenable for two years and awardable every year at the Campbell Medical School, Sealdah. The scholarship was founded during the year. Babu Ram Lal Mukerji made a donation of landed property yielding an annual income of Rs. 880 for the purpose of re-excavating one tank every year in the district of Hooghly. Babu Nanda Lal Gorai gave Rs. 9,000 for a school building at Chirkanda in the district of Manbhum. Babu Girdhari Lal Marwari gave Rs. 7,000 for a dharamsala at Colgong in the district of Bhagalpur; and Raja Thakur contributed Rs. 6,000 for a similar institution at Balbhaderpur in the district of Darbhanga. Babu Chogmall Sukhani gave Rs. 8,000 for the construction of dharamsalas and wells at Siliguri and Darjeeling.

Prithu Singh Sardar gave Rs. 6,000 for a public serai and a house at Sukiapukri in Darjeeling. Janki Pandey gave Rs. 6,000 for a tank at Manipur in the district of Shahabad.

Order.—Ordered that a copy of this Resolution and the statement be forwarded to the Judicial, Political, Appointment, Revenue, General, Financial, Legislative, Marine, and Public Works Departments of this Government for information.

Ordered also that a copy of this Resolution and the statement be forwarded to the Board of Revenue, the Inspector-General of Civil Hospitals, the Sanitary Board and to all Commissioners of Divisions for information.

Ordered also that the Resolution and the statement be published in the Supplement to the *Calcutta Gazette* for general information.

By order of the Lieutenant-Governor of Bengal,

E. W. COLLIN,

Offg. Secretary to the Govt. of Bengal.

Annual statement of works of public utility constructed by private individuals during the year 1901.

	Inches.
The mean pressure of the seven days	29·991
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	30·031
	Hours.
The total number of hours of bright sunshine	56·6
The maximum possible number of hours of sunshine	75·0
	°
The mean temperature of the seven days	67·9
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	67·4
The extreme variation of temperature	30·4
The maximum temperature	84·0
	Miles.
The highest velocity of the wind in one hour	10
	%
The mean relative humidity	68
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	71
	Inches.
The total fall of rain from 14th to 20th December 1902	Nil.
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·01
The total fall from 1st January to 20th December 1902	61·62
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65·23

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓ dew; - fog.

N.B.—In the weekly abstract from 30th November to 6th December 1902, *read* 78·2 *for* 87·2 as the maximum temperature of the 5th December 1902.

G. W. KÜCHLER,
for *Meteorological Reporter to the Govt. of India and Director-General of Indian Observatories.*

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
Alipore (Calcutta), the 22nd December 1902.

BENGAL AND NORTH-WESTERN RAILWAY.

Statement of goods traffic for the month of September 1902 compared with the corresponding period in 1901.
